BATTLEFIELD 2042 is one of the most highly anticipated games on the horizon. And if you're looking forward to the shooter from EA and DICE and want something to keep yourself busy you'll be able to download both Battlefield 1 and Battlefield V for free.

Amazon Prime Gaming subscribers will be able to download both Battlefield 1 and Battlefield V without paying an extra penny. From today Battlefield 1 will be available to Prime Gaming subscribers for free, with Battlefield V available as a freebie from August. Both Battlefield games are available to download for free with Prime Gaming for a limited time only, so don't delay taking advantage of this money saving offer.

Related articles

Battlefield 1 is available as a Prime Gaming freebie from July 21 through August 4.

While Battlefield V is a Prime Gaming freebie between August 2 and October 1.

That will give you plenty of things to play before the Battlefield 2042 release date of October 22.

The Battlefield game codes that Prime Gaming subscribers will be able to claim are redeemable through EA's Origin service.

READ MORE

Here's what Amazon Prime Gaming had to say about Battlefield 1 and Battlefield V...

Battlefield 1: Battlefield 1 takes players across multiple and varied locations in a bid to fight through immersive battles. From tight urban fights in a besieged French city, to big open spaces in the Italian Alps and frantic combats in the deserts of Arabia, prime members can discover a world at war through an adventure-filled campaign.

In a true multiplayer sandbox experience, take to the skies and engage in high-octane dogfights through treacherous landscapes, or have a battleship obliterating the coast from the sea, and engage in some of the biggest battles ever seen as empires clash for supremacy.

Battlefield V: Battlefield V delivers the most immersive gameplay of the franchise in a sandbox environment that takes players back in time to the battles of World War 2, allowing players to feel the force of the fight and truly shape the war as the war shapes them.

Players' soldiers can now tow stationary weapons, build fortifications and repair war-torn structures to turn the battlefield to the player's advantage.

Whether dragging a squad mate to safety or shooting a grenade out of the sky, players will forge a deeper connection to the ever-evolving world around them and achieve victory against the toughest odds. With the freedom to adapt and evolve the battlefield in new and unseen ways, the battlefield will never be the same.

In other Prime Gaming news, if you're a footie fan you could soon see the logo for the Amazon subscription service popping up on your telly more.

That's because Prime Gaming has been named as the official shirt sponsor for EFL League Two club Stevenage FC.

The Hertfordshire based club has previously put in a number of eye-catching performances in the FA Cup, with their most famous result in the tournament arguably being forcing a replay against Premier League giants Spurs.

Speaking about the news, Larry Plotnick, GM of Prime Gaming, said: "We are excited to partner with a club like Stevenage, that much like Prime Gaming, is ambitious, innovative and places an emphasis on being customer-obsessed.

"Stevenage has a great reputation for building a passionate and loyal community which aligns very much with our ambitions. As customer focused organizations both serving passionate communities, we think this is a great fit. We have a lot of exciting plans in the coming months."

After years without success, Amazon bets to revolutionize gaming with this game

Although Amazon has become the fourth most valuable company on the planet, it has convinced us to buy virtually any product through its e-commerce site, has become the backbone of entire businesses and government entities thanks to its cloud infrastructure, and has made its founder Jeff Bezos the richest man in the world; there is one sector to which it has invested billions of dollars and simply has not been able to achieve success: video games.

On July 20, the same day Jeff Bezos seeks to become an astronaut, the company will test in the closed beta of its massively multiplayer online (MMO) game New World, ahead of the final global release that is expected to be on August 31.

Defined by Amazon Games, New World is an open-world MMO where hundreds, or eventually, thousands of players arrived on Aeternum, a mysterious island in the early Age of Exploration. Players will have the opportunity and mission to begin their process of colonization and expansion within the island as they battle with wild creatures, hordes of the undead, and even other players.

New World enters to compete in one of the categories of video games that have grown the most in popularity in recent years, as internet access improves around the world and computer equipment or consoles to play them become increasingly accessible or popular. Classics such as World of Warcraft, Final Fantasy XIV, Minecraft, Roblox or Elders Scroll Online are part of the MMO or MMORPG category, a segment that according to an analysis by Insight Partners is expected to reach 26,650 million dollars by 2025.

According to the consultancy, one of the reasons for the success of this type of games is its ability to create or give life not only to a constant competition between players from all over the world, but also for its ability to create worlds with situations of virtual economy, trade, currency and real time.

"With the help of gamification, the developers manage to keep players involved in the game and also encourages them to spend more real money to receive the benefits of the games. This strategy has also made it easier for MMO game developers and publishers to generate more revenue by retaining older players and attracting other people to get involved in these games," the analysis cites.

For Amazon Games, the firm's video game development division, New World is more than the season launch, it's the company's key piece in trying to enter the planet's most valuable entertainment market and one that other entertainment and technology firms like Google and Netflix are also desperately looking to be a part of. However, despite the millions of dollars invested in Amazon Games the mission so far has been a resounding failure.

Although Amazon Games has been in existence since 2012, it was initially a small arm of Amazon dedicated to creating simple video games for Amazon's app store. However, in 2014 (after Amazon acquired video game studio Helix Games and the same year the firm bought Twitch for \$970 million) the e-commerce giant began to take its bet on the sector more seriously.

In 2016, Amazon Games made the big announcement, during the Twitch. With the firm said it was working on three big titles: Breakaway, Crucible and New World. Although it was expected to be released sometime in 2019 Breakaway was cancelled, following an Alpha version, in late March 2018.

Crucible, an online multiplayer first-person shooter and the title that would mark Amazon's entry into the world of Triple AAA video games, had a similar outcome.

After nearly six years of development, the game was released in May 2020; however, after several problems and complaints from players it returned to a closed beta a month after its release. In October of that same year Relentless Studio and Amazon Games announced that they would be cancelling Crucible for good.

On both occasions, Amazon Games has announced that following the cancellations of Breakaway and Crucible, teams of developers have teamed up to help conclude the development of New World.

For Amazon, New World's success is more than making money. If successful, Amazon could try to replicate the success of its video game division to boost existing platforms like Twitch, by integrating the ability for viewers from a stream on the platform to jump directly into the game or even from new services like Luna, Amazon's Cloud Gaming platform with which it plans to compete with Google's Stadia. , ORIGIN from EA or the most successful Xbox Game Pass Ultimate from Microsoft.

Although the firm has not been able to release a triple game to the market for six years and with failures. Amazon may well not start from scratch, as it already has 200 million Amazon Prime users globally; if the company manages to integrate its catalog of games into the subscription service it could mean a major competitor against Sony, Nintendo and Microsoft.

New World, is it good?Forbes had access to the New World Closed Beta preview to learn about progress in development. Although the game won't be released until August of this year, the experience we were able to have was entertaining, pretty solid, though short to know if it will be able to convince the most demanding players.

New World offers a simple combat system, but with some depth in terms of developing the character's skills and the type of weapons you use. In addition to advancing between missions, players will acquire skills to build, hunt, fish, cook or create objects in order to improve their character or advance their land control plans on the island.

Being focused on collaboration, New World offers an easy way to ally with other players to progress in the game to explore the Aeternum universe, take control of forts and establishments or be part of a company (with up to 50 players) to gain control over certain territories and fight against other companies of players.

Although Amazon Games has not confirmed the final size of the game map, each world (or server) is expected to be able to store up to 1,000 players.

The game will not be charged monthly like World of Warcraft or Final Fantasy XIV. The player will only have you pay once the cost of the game to be able to access the island.

However, as fun as the game's dynamics, controls, or story may be, New World's real challenge to take the market away from other MMOs is in its ability to convince players to give it a try, otherwise the social component of the game will never take off and New World's potential simply won't come true.

Amazon Grand Gaming Days sale: Here are the best gaming laptop deals

Karthik Iyer
649 words
23 June 2021
Digit
HTDIGI
English

Copyright © 2021 Nine Dot Nine Mediaworx Pvt. Ltd. All Rights Reserved

India, June 23 -- If you've been waiting for the right time to buy a gaming laptop, then now is as good as any because Amazon is currently selling a bunch of laptops at a discounted rate under its "Grand Gaming Days" sale. As always, not all the laptops under the sale are worth splurging on, which is why we decided to filter out the age-old machines with dated processors and GPUs like the 9th Gen Intel CPU and GTX 1050 GPU.

That said, here are the best gaming laptop deals you can grab from Amazon's Grand Gaming Days sale -

Acer Nitro 5 - AN515-56

The Acer Nitro 5 has become a household name on Amazon mainly because of just how much value these laptops bring to the table. Now, you can get the Nitro 5 with an 11th Gen Intel Core i5-11300H and GTX 1650 graphics for just Rs 67,990. With that kind of specs, there's no doubt this laptop should be able to handle even some of the newer, demanding AAA titles with ease at 1080p resolution. This laptop usually goes for about Rs 90,000, which means you are going to be saving a good chunk of money that can either go on some peripherals or stay in your bank account.

Usual Price - Rs 89,999

Sale Price - Rs 67,990

[Buy Now](#)

ASUS ROG Zephyrus G14 - GA401II-HE111TS

The ASUS ROG Zephyrus G14 gaming laptop managed to score a pretty good rating when we reviewed it last year. This laptop with an AMD Ryzen 5 4600HS and a GTX 1650Ti graphics is available for just Rs 89,990, down from Rs 1,28,990 MRP. You also get a 120Hz refresh rate screen on this machine along with a funky 'dot matrix' display on the lid, making it stand out from the other laptops on this list.

Usual Price - Rs 1,28,990

Sale Price - Rs 89,990

[Buy Now](#)

HP Pavilion Gaming - dk1148TX

If you don't mind settling for a 10th generation Intel Core i5 processor, then we suggest you check out the HP Pavilion Gaming laptop. There are better and updated versions of this laptop on the market right now, but we couldn't ignore it given the handsome discount. In addition to the Intel Core i5-10300H, you also get a GTX 1650 GPU and a 512 GB PCIe NVMe M.2 SSD + 32 GB Intel Optane Memory for storage. That makes it a very compelling package.

Usual Price - Rs 79,888

Sale Price - Rs 66,990

[Buy Now](#)

MSI Bravo 15 - A4DDR-212IN

Lastly, we have the MSI Bravo 15 gaming laptop that packs a Ryzen 7 4800H along with Radeon 5500M graphics. This isn't the machine for you if you're particularly looking for an Nvidia-powered GPU, but the Radeon 5500M isn't a feeble card either. It should be enough to handle even some of the newer AAA titles

with ease at 1080p as long as you are not looking for the best graphical fidelity. This is also the only laptop on this list with a dual-channel 16GB DDR4 memory, which is always a nice addition.

Usual Price - Rs 95,990

Sale Price - Rs 77,990

Buy Now

Well, those are some of the best deals we could find right now. We'll try to keep this page updated as and when we find more deals. It's worth pointing out that the 'Grand Gaming Days' sale will only be live till tomorrow, so you might want to get started before the stocks run out.

Published by HT Digital Content Services with permission from Digit.

This has been the worst Amazon Prime Day for PC gaming in years

Bill Thomas

2,031 words

23 June 2021

TechRadar

TECHR

English

© 2021. Future Publishing Ltd. All Rights Reserved

It's tough out there for anyone that wants to build a gaming PC or even just an upgrade on Amazon Prime Day.

One of the best things about [Amazon Prime Day](#) in the past has been the ability to build a [cheap gaming rig](#). Sure, you were never going to see the top-end flagship graphics card on a deep discount, but you could save on [RAM](#) and SSDs and other such components to kind of subsidize the cost of the GPU of your dreams.

That wasn't exactly possible this year.

Not that I was surprised. It doesn't exactly require a constant vigil over the [graphics card](#) market to see that prices are still incredibly inflated and availability isn't going to be fixed any time soon – even if we've heard some rumors that suggest some relief may be coming. I'll believe it when I see it at this point.

But while I wasn't expecting gamers to be able to buy an RTX 3080, it seemed like an easy choice to me for PC manufacturers to throw some of their best gaming PCs on sale. And, we did see some of that – [the Alienware Aurora R12, strapped with an RTX 3080](#), saw a pretty deep discount, but that wasn't even on Amazon.

[toCheeeek](#)

[Alienware Aurora R12 | Intel Core i7, 16GB RAM, RTX 3080 | \\$2,489 \\$2,199 at Dell](#)

The Alienware Aurora R12 is a luxurious gaming PC that will deliver excellent performance, and has an easy-to-open chassis that makes it simple to upgrade it later. And, on Prime Day, you can save \$290 on this epic gaming rig.

See what I mean?

[Click to view image \(Image credit: Future\)](#)

Shoveling out the worst gaming PCs on the market

On the first day of Amazon Prime Day, my first goal was to find [gaming PCs](#) on sale. Mostly because that's, like, my job, but also because I have friends who have been on the market for a new gaming rig for months, and they need something. And, wow was Prime Day a disappointment for that.

In the US at least, there weren't any gaming PCs on sale at Amazon, and the only ones I could find at a major retailer were at Best Buy, and those were so bad. One of the top deals at Best Buy was this [iBuyPower Arc gaming PC \(it's not on sale any more\)](#). Best Buy cut the price down to about \$500, but it's equipped with an Nvidia GeForce GT 710.

That graphics card was trash when it came out in 2014, and by today's standards, the integrated graphics in most processors are actually better. But, because it's paired with the Intel Core i3-10105F, you can't just pull that graphics card out and throw it in the dumpster where it belongs.

It wasn't really until I looked at Dell's website and saw the excellent Aurora R12 with a \$290 discount that I found something I could easily recommend to friends on the market for a new gaming PC. And even then, that's not a PC I would recommend to an enthusiast, as it's not the easiest to tear down and scavenge for parts if you want to build something on your own.

[toCheeeek](#)

Gaming RDY LCMBG205 Gaming PC: [\\$3,799.99 \\$3,599.99 at iBuyPower](#)

Save \$200 - If you're looking for a PC that has the GeForce 3080Ti pre-installed to save you searching for one, this is a PC that can help you future-proof your games for the next few years. Featuring a 1TB M.2 SSD alongside 32GB DDR4 memory, with an Intel Core i9 at i9-11900KF Processor (8X 3.50GHz) to boot, this is a PC definitely able to run current games at Ultra settings for a long while.

[toCheeeek](#)

AMD Ryzen 9 RTX Gaming PC: [\\$3,569.99 \\$3,369.99 at iBuyPower](#)

Save \$200 - A PC with a Ryzen 7 CPU instead, the 5800X is built for gaming, with eight cores and speeds of up to 4.7Ghz. The PC also features a 500GB M.2 SSD with 16GB DDR4 memory. This is a PC that's ready to run current games on Steam, Game Pass and more at Ultra settings for a long while.

[toCheeeek](#)

Intel Z590 Gaming Evo RTX II: [\\$4,029.99 \\$3,729.99 at iBuyPower](#)

Save \$300 - Featuring a 1TB M.2 SSD alongside 32GB DDR4 memory, with an Intel Core i9 at i9-11900KF Processor (8X 3.50GHz) to boot, this is a PC that can run the upcoming Forza Horizon 5 and Halo Infinite at their best settings, as long as you have a great monitor to boot.

[Click to view image \(Image credit: Razer\)](#)

Time to get a gaming laptop, I guess

However, while you were probably left disappointed if you were on the market for a gaming PC, there were actually a pretty good amount of [gaming laptop Prime Day](#) deals out there. A lot of these seemed to be the gaming laptops equipped with last-generation Nvidia Turing graphics like the RTX 2070 and RTX 2080, but those GPUs are still more than good enough to power through most modern games.

There were even a pretty good amount of gaming laptops out there with current-generation RTX 3000 series GPUs, which is what I would go with if I had to settle for a gaming laptop right now.

And hey, maybe a gaming laptop is your preferred way to do some PC gaming, in which case this Prime Day offered, and is still offering a pretty good choice of gaming laptops on sale. Though, it seems like the best ones, like the Razer Blade 15 and the Alienware m15 are starting to sell out, and that really just makes sense.

[toCheeeek](#)

Dell G3 15 gaming laptop: [\\$888.99 \\$649.99 at Dell](#)

Save \$210 - A huge price cut makes this Dell G3 15 a great buy if you're a gamer on a budget. This particular spec features an Intel Core i5-10300H processor, 8GB of RAM, a 256GB SSD, and most importantly - a GTX 1650 Ti graphics card. This GPU is definitely still a fairly modest card, but it's a step above the usual GTX 1650's you see in this price range.

[toCheeeek](#)

ASUS ROG Strix Scar 15, Intel Core i7, RTX 2070 Super, 16GB [\\$2,199 \\$1,719.99 at Newegg](#)

Save \$480 - The Asus ROG Strix Scar 15 might not have the latest RTX 30-series graphics, but the RTX 2070 Super is no slouch when it comes to gaming, and on Prime Day, you can get this excellent gaming laptop with an Intel Core i7-10875H CPU, RTX 2070 Super graphics, 16GB RAM, 1TB PCIe SSD, and a 15.6-inch, 240Hz, full HD display for 22% off.

[toCheeeek](#)

RTX 3080 laptop

Gigabyte Aorus 15G YC, Intel Core i7, RTX 3080, 32GB [\\$2,299 \\$1,949.99 at Newegg](#)

Save \$150 + \$200 rebate - It's impossible to get an RTX 3080 GPU at the moment, but this excellent laptop has the mobile version, which is still a formidable performer, and it's \$350 off during Prime Day. You also get Death Stranding and a GeForce Now membership thrown in.

[Click to view image \(Image credit: Future\)](#)

Finishing up your gaming setup

If you're one of the lucky few that's just totally happy with their existing gaming PC itself, then there are still quite a few peripheral deals out there that are pretty great. Corsair, Razer and other manufacturers put a ton of gaming mice, headsets and keyboards on sale, so if your setup is getting a little stale, or if you want to graduate to a mechanical keyboard – and you totally should – you can still do that.

Even if you were just looking for a cheap mouse and keyboard that'll just let you play games, there were a lot of savings to be had. The Razer Deathadder Essential, for instance, got its price cut all the way down to \$19 at Amazon, and that's an excellent little mouse.

So, if you just needed to upgrade your peripheral game, there were some pretty good deals out there.

[toCheeeek](#)

The best gaming mouse

Logitech G502 Lightspeed Wireless Gaming Mouse: [\\$149.99 \\$94.99 on Amazon](#)

Save \$55

The Logitech G502 Lightspeed typically tops lists as one of the best gaming mice in the world, making this a great choice for gamers who don't want to compromise on anything. With \$50 off, you're getting customizable weights, an intuitive scroll wheel and responsive clicks for an absolute steal.

[toCheeeek](#)

Incredible customization

Razer Naga Pro Wireless Gaming Mouse: [\\$149.99 \\$99.99 on Amazon](#)

A fully customizable powerhouse, the Razer Naga Pro Wireless Gaming Mouse has three different side plates to choose from to help you optimize your gameplay to every genre, rather than buying three dedicated mice. With 20K DPI, you're sure to enjoy the low latency and flexibility.

[toCheeeek](#)

Razer Huntsman Mini 60% Gaming Keyboard (Mercury): [\\$119.99 \\$99.99 on Amazon](#)

This Mercury white version of the beloved Razer Huntsman Mini 60% Gaming Keyboard stands out against the usual sea of black or grey peripherals, with the same PBT keycaps and customizable RGB lighting you know and love.

[toCheeeek](#)

Razer DeathAdder Essential gaming mouse: [\\$49.99 \\$19.99 at Amazon](#)

Save 60% on this super cheap Razer DeathAdder Essential gaming mouse. You're only getting a 6400 DPI optical sensor and five programmable buttons, but you'd be hard-pressed to find a better gaming mouse for the same price.

[toCheeeek](#)

Razer Kraken Kitty Gaming Headset: [\\$149.99 \\$119.99 on Amazon](#)

The Kraken Kitty edition gaming headset from Razer is now famous for being a must-have accessory for gamers and streamers alike. With customizable RGB lighting and built-in cat ears, you'll look incredible regardless of what you're playing.

[toCheeeek](#)

Razer Basilisk V2 Gaming Mouse: [£79.99 £36.99 on Amazon](#)

Save £43

The Razer Basilisk V2 Gaming Mouse offers manual optimization to give you the edge over your opponents, with 20 K optical sensor, 11 programmable buttons and a customizable scroll wheel, your mouse is exactly what you make it and tailored to your gameplay.

[Click to view image \(Image credit: Future\)](#)

The new normal?

Until the global silicon shortage ends, it's unlikely that big sales like Amazon Prime Day are going to be fruitful for PC gamers looking to build their next best gaming PC. And with the way Prime Day went this year, I'm not really expecting Black Friday to be much different.

Things could change, of course. Prices for the best graphics cards have started to come down, but they're still nowhere near their actual launch prices. It's still an awful time to build a new gaming PC, and it doesn't look like it's going to change any time soon. Sorry, gamers.

Discounts on Nintendo Switch, Playstation, Xbox consoles, games and accessories

Amazon Prime Day is back and bigger than ever and for those who have been waiting on the edge of their seat to bag a bargain on gaming essentials, you're in for a treat.

Each year, the Nintendo Switch deal is eagerly awaited as one of the most coveted items as soon as the sale begins and we expect that this year will be no different.

The two-day sale is taking place from June 21 to 22 and is a real treat for gamers for all your games, consoles and accessory needs. Push your worn-out headset aside, add a new adventure to your rotation and invest in a new controller to replace your one that is falling apart -all at an extremely reduced price.

We all love a deal and if it will get you a brand new crop of must-have tech, then we call that a win-win.

There's just one small catch -you need to be an Amazon Prime member. For just £7.99 a month (£3.99 for students) or £79 a year, you can have access to the sales, free next day delivery on a seemingly endless selection of items, Prime Video and thousands of ebooks. Commitment-free, there's also a 30 day free trial.

We've gathered the deals to make the most of before the big day.

Best deals on consoles

Nintendo Switch fans, you're in for a treat. As part of the Amazon Prime Day sale, the retailing giant is offering the covetable console at a fraction of the cost. Over lockdown it comes as no surprise that the device became super popular. At one point, it was actually sold out everywhere where retailers could not keep it in stock. Not only can you now purchase the console but during the sale extravaganza, it comes alongside three epic games so you don't need to waste any time and get gaming as soon as the items arrive.

* [Nintendo Switch Neon \(Red/Blue\) + Sports Party + Rayman Legends + Monopoly](#) – was: £321.99, now: £299.99

* [Portal TV from Facebook, Smart Video Calling on your TV with Alexa Built-in](#) – was: £149, now: £79

* [HTC VIVE PRO Premium VR Headset with SteamVR Tracking](#) – was: £1,299.99, now: £1,019

Best Xbox games – One/ Series X

With the launch of the Series X late last year, there are deals to be had on a whole host of games designed to match the impressive specs. We're talking 4K resolution and frame rates of up to 120 frames per second (fps).

But whether you were able to get your hands on the new console or not, you can still elevate your gaming experience with the latest games. The Series X actually has backwards compatibility feature. This means that you can play any previous Xbox generation game and the device augments them with the increased frame rates, higher resolutions and faster loading times.

As part of the Amazon Prime Day, there's discounts on sought-after games like FIFA 21, Assassins Creed Odyssey with up to 75 per cent off.

* [FIFA 21 Standard | Xbox One](#) – was: £59.99, now: £17.99

* [Assassins Creed Odyssey \(Xbox One\)](#) – was: £54.99, now: £15.99

- * [Immortals Fenyx Rising \(Xbox One/Series X\)](#) – was: £57.99, now: £21.49
- * [LEGO Batman 3: Beyond Gotham \(Xbox One\)](#) – was: £24.99, now: £13.49
- * [The Witcher 3 Game of the Year Edition \(Xbox One\)](#) – was: £39.99, now: £14.50
- * [Dragon Ball FighterZ \(Xbox One\)](#) – was: £54.99, now: £14
- * [Werewolf: The Apocalypse -Earthblood \(Xbox Series X\)](#) – was: £44.99, now: £18.99
- * [Balan Wonderworld \(Xbox One\)](#) – was: £49.99, now: £18.99

Best Nintendo Switch games

Already added the [Nintendo Switch console deal](#) above to your basket? Well now all you need is to build up your library with even more games to liven up the playing experience – variety is the spice of life after all. Switch games continue to be expensive so whenever they go on sale is a time to rejoice for us Switch lovers. The Witcher 3, Paw Patrol and the latest release from Just Dance are just some of the big names on offer with discounts of up to 65 per cent.

- * [Just Dance 2021 \(Nintendo Switch\)](#) – was: £49.99, now: £23.99
- * [Immortals Fenyx Rising \(Nintendo Switch\)](#) – was: £57.99, now: £21.49
- * [Jumanji: The Video Game \(Nintendo Switch\)](#) – was: £34.99, now: £18.29
- * [Paw Patrol: On a roll! \(Nintendo Switch\)](#) – was: £34.99, now: £22.99
- * [The Witcher 3 Complete Edition Switch \(Nintendo Switch\)](#) – was: £54.99, now: £37.40

Best PlayStation4 games (PS4)

For the PlayStation devotees among you, you have the luxury of a whole host of exclusive games but during the Amazon Prime Day sales, they are available at a much more purse-friendly price tag. With the PS5 still relatively impossible to actually find in stock, you can tie yourself over by investing in popular games like LEGO and The Witcher 3 with up to 65 per cent off. It's a worthwhile investment too as the PlayStation 5 also has a backwards compatibility feature so the games will still work on the newer console.

- * [Cyberpunk 2077 \(PS4\)](#) – was: £59.99, now: £23.99
- * [LEGO Marvel Collection \(PS4\)](#) – was: £39.99, now: £19.99
- * [LEGO The Incredibles \(PS4\)](#) – was: £34.99, now: £13.49
- * [FINAL FANTASY VII REMAKE \(PS4\)](#) – was: £59.99, now: £27.99
- * [The Witcher 3 Game of the Year Edition \(PS4\)](#) – was: £31, now: £13.50
- * [Marvel's Avengers with Iron Man Digital Comic \(PS4\)](#) – was: £59.99, now: £22.99

Best PlayStation 5 games (PS5)

If you were one of the lucky ones that were able to nab a PlayStation 5, the time is now to really show off what the console can do with the games below. The graphics are top notch on the newest iteration of the device with gameplay at 60fps and 4K resolution. This Amazon Prime Day, titles like Marvel's Avengers, Immortals Fenyx Rising and Watch Dogs Legion are available with up to 63 per cent off.

- * [Immortals Fenyx Rising \(PS5\)](#) – was: £57.99, now: £21.49
- * [Watch Dogs Legion \(PS5\)](#) – was: £57.99, now: £21.99
- * [Marvel's Avengers \(PS5\)](#) – was: £59.99, now: £22.99
- * [Werewolf: The Apocalypse -Earthblood \(PS5\)](#) – was: £44.99, now: £18.99
- * [Terminator: Resistance Enhanced \(PS5\)](#) – was: £39.99, now: £26.99

Best gaming headsets

Bring your accessories in line with the next generation of gaming, particularly your headset. To make the most of the sound experience, you need the right headset to get fully immersed in the game itself and it can

Page 14 of 148 © 2022 Factiva, Inc. All rights reserved.

even give you an edge over your competitors. Models from Razer, Turtle Beach and more are available with up to 45 per cent off.

* [Razer Blackshark V2 X -Premium Esports Gaming Headset](#) – was: £59.99, now: £39.99

* [Turtle Beach Stealth 600 Gen 2 Wireless Gaming Headset](#) – was: £89.99, now: £68.99

* [Turtle Beach Elite Pro 2 Gaming Headset and SuperAmp](#) – was: £149.99, now: £105

* [Roccat Elo X Stereo -Gaming Headset](#) – was: £39.99, now: £21.99

Best controllers

It goes without saying that your controller plays a crucial role as you game. Shop the below with up to 40 per cent off.

* [Thrustmaster ESWAP PRO CONTROLLER](#): the customizable wired professional controller – was: £149.99, now: £98

* [PowerA MOGA XP5-A Plus Bluetooth Controller](#) – was: £69.99, now: £39.99

Whether you're in the market for a console or accessories, you've come to the right place

Deal hunters listen up, [Amazon Prime Day](#) is has finally landed – a two-day shopping bonanza with big-ticket items being dropped considerably.

The online giant is slashing the prices of everything from [Amazon devices](#) and [laptops](#) to [TVs](#) and [tech](#), as well as the much sought-after [Apple products](#) and even [fashion](#).

Follow live:

[Read our Amazon Prime Day 2021 live blog for the latest updates](#)

But, for the gamers among us, it's even better news because gaming is to one of the most popular Prime Day categories, with prices being slashed on [Xbox](#), [Playstation](#) and [Nintendo Switch consoles](#) – and if yesterday's deals are anything to go by, we're in for even stronger stuff for day two of the event.

If you are looking to make savings across these [leading brands](#), as well as on the [accessories](#) and [games](#), you've come to the right place, but act fast as these deals tend to sell out fast – trust us.

Read more:

* [Best Amazon Prime Day 2021 deals – live](#)

* [The best laptop discounts to shop this Prime Day](#)

* [Amazon Prime Day 2021 Apple deals](#)

* [The best TV deals to shop this Prime Day](#)

From consoles and games to monitors and accessories, read on for our carefully curated round-up of the best deals to shop now.

For all the latest best buys and product reviews, sign up to the free IndyBest newsletter for updates delivered straight to your inbox. [To find out more click here.](#)

Our IndyBest team hand-picks every deal we feature. We may earn some commission from the links in this article, but our selections have been made independently and without bias. This revenue helps to fund journalism across The Independent.

The best Prime Day gaming deals available now

'Fifa 21' standard download code for Xbox One: Was £59.99, now £17.99, [Amazon.co.uk](#)

If you're already a Fifa fan, this is one to add to your collection, especially with its 70 per cent discount. With more ways to play and more locations to choose from, look forward to a true-to-life footballing experience. Players are capable of higher-level decision making, so you can flex your creativity on the pitch, while new developments in career mode allow you to lead your team to the top with upgraded matches, transfers and training.

[Buy now](#)

Nintendo Switch lite, turquoise: Was £209.99, now £179.99, [Amazon.co.uk](#)

Andrew Griffin, The Independent's technology editor and avid gamer, described the Nintendo Switch Lite as "a cheaper and lighter version [of the original] that can be carried around. It will suit anyone on a budget, with limited space or who never wants to play it on their TV anyway." While not the best deal yet, it's currently reduced by £35 – anything's better than nothing, right?

[Buy now](#)

Samsung Odyssey G9 curved gaming monitor: Was £1,279.99, now £1,049, [Amazon.co.uk](#)

Samsung's Odyssey G9 gaming monitor is ludicrous. The 49in ultra-ultra-wide QLED display is gently curved, placing the player at the centre of an immersive panorama. The G9 is especially effective when playing flight simulators and racing games, where your field of view is expanded to include more of the scene, though its 1ms response time makes it equally suitable for fighting games and fast-paced shooters. Widely considered to be the best gaming monitor around — as long as you have room for it — the Odyssey G9 has £230 off this Prime Day.

[Buy now](#)

Trust Gaming GXT 707 resto gaming chair: Was £199, now £124.99, [Amazon.co.uk](#)

A gaming chair is a must if you enjoy extensive play and this ergonomic design will stop your muscles getting sore. There's two removable cushions to provide lumbar and neck support along with a 360-degree rotating seat and a tiltable backrest. The smooth wheels won't scratch your floor either.

[Buy now](#)

PlayStation Plus 3 month membership and PlayStation Now: Was £42.98, now £29.99, [Amazon.co.uk](#)

PlayStation fans will love this deal – you'll get a three month subscription to PlayStation Plus and PlayStation Now all for less than £30. Compete with friends and other gamers, enjoy discounts on the PS Store, stream games from bygone eras and get the most out of your console. And considering this length of subscription would usually cost you upwards of £40, it's well worth grabbing while you can.

[Buy now](#)

Acer nitro VG270Sbmiipx 27in full HD gaming monitor: Was £249.99, now £219, [Amazon.co.uk](#)

Ensure you have the smoothest, clearest gameplay possible with this monitor that's designed to be lag-free with a two millisecond response time, so you'll never miss out on the action. The high resolution will keep your picture quality crystal clear at all times and it can be tilted to find the most comfortable viewing angle for you.

[Buy now](#)

'Hitman III' (PS5): Was £59.99, now £34.99, [Amazon.co.uk](#)

The last of the Hitman trilogy, this freestyle assassination game is full of mystery and drama. In fact, we loved it so much that it featured in our review of the [best PS5 games](#), where our tester described it as "a Groundhog Day-style puzzle" with an "enormous cast of wandering characters". He went on to add: "You might be infiltrating the upper floors of a Dubai skyscraper dressed as a janitor in one mission, and disguising yourself as the detective investigating an Agatha Christie-inspired murder mystery in the next."

[Pre-order now](#)

Razer blackshark V2 X premium esports gaming headset: Was £59.99, now £38.99, [Amazon.co.uk](#)

This pair made it as our best buy in our review of the [best gaming headsets](#) – need we say more? Our reviewer praised the lightweight set for offering "a superb directional audio and a superbly clear microphone ensuring your team communication is completely unimpeded". With built-in noise cancellation and memory foam pads to fit comfortably around the ears, at this price, these are a real steal, and, as our tester put it, it's "an excellent mid-range headset for those who play multiplayer on PC and PS4".

[Buy now](#)

PS5 dualsense controller and charging station bundle: Was £85.13, now £64.99, [Amazon.co.uk](#)

Got your hands on a new PS5? A bundle of the new dualsense controller with a charging station is currently on sale this Prime Day. Besides looking and feeling good, in our round-up of the [best PS5 accessories](#) we

said it had “some useful features such as haptic feedback, which is a form of far superior vibration”. The charging station is a convenient bonus.

[Buy now](#)

‘Assassin’s Creed III Remastered’ (Xbox One): Was £34.99, now £17.49, [Amazon.co.uk](#)

This game, which has been remastered for PlayStation 4, Xbox One and PC, places you on the precipice of the American Revolution, throwing you into the world of warrior Connor as he fights for the freedom of the nation. Expect your quest to be enhanced with impressive visuals and high-resolution graphics.

[Buy now](#)

Turtle Beach stealth 600 wireless gaming headset for Xbox One and Xbox Series X, white, gen 2: Was £89.99, now £67.99, [Amazon.co.uk](#)

Enjoy the freedom of these wireless headphones so you can celebrate your wins without getting tangled up. They also feature “superhuman hearing” so that you never miss footsteps behind you or the sound of enemy reloads. This headset is glasses friendly too, relieving pressure on your specs so you can stay comfortable during those long marathons.

[Buy now](#)

Razer goliathus extended chroma soft XXL gaming mouse mat: Was £59.99, now £27.99, [Amazon.co.uk](#)

Take your gaming to the next level with this XXL mouse mat from Razer. Complete with RGB lighting that reacts to your in-game alerts and effects, a soft-touch surface that provides a balance of control and speed, and a non-slip rubber base, this is a mat built to withstand even the most hardcore gaming sessions. Its price has been reduced by more than half right now, but it’s sure to give your gaming setup double the impact.

[Buy now](#)

‘Immortals Fenyx Rising’ (PS5): Was £57.99, now £21.49, [Amazon.co.uk](#)

Experience grand mythological adventures in real time with the latest ‘Immortals’ release. Playing as Fenyx, a new winged demigod, players are sent on a quest to save the Greek gods and their home from a dark curse, taking on mythological beasts such as Cyclops, Medusa and the Minotaur along the way. Players must use their wit to solve challenging puzzles and master the legendary powers of the gods in this epic fight for the ages.

[Buy now](#)

Razer basilisk X hyperspeed wireless gaming mouse: Was £59.99, now £33.99, [Amazon.co.uk](#)

Enjoy 43 per cent off this gaming mouse that has a rapid response time and a wireless performance that will last up to 450 hours. Providing pinpoint accuracy for headshots and tricky manoeuvres, along with the ability to last for as many as 50 million clicks, it’s a must-have for any gamer looking to improve their skills.

[Buy now](#)

‘The Witcher 3’ game of the year edition for PS4: Was £15.90, now £13.50, [Amazon.co.uk](#)

Loved Netflix’s The Witcher? Now it’s time to go back and play the game. Live out your adventure as the monster slayer for hire all while facing some gruesome foes and supernatural forces. This edition includes the Hearts of Stone and Blood & Wine expansions, as part of Wild Hunt game of the year expansion, which offers a whopping 50 hours of additional storytelling in addition to all new features and areas, expanding the explorable world by over a third.

[Buy now](#)

GTPLAYER gaming chair office desk chair: Was £123.99, now £99.99, [Amazon.co.uk](#)

You’ll want to have the comfiest perching spot possible while you play, especially if you’re spending a long time sitting down. This adjustable, ergonomic chair tailored specifically for gaming comes with padded memory foam armrests, two extra pillows for your head and a full recline of 150 degrees. Plus, if it becomes damaged, you’ll be offered another for free.

[Buy now](#)

‘Godfall’: Was £69.99, now £29.97, [Amazon.co.uk](#)

Playing as the last of the Valorian knights, who are god-like warriors, you must tear through foes as you climb through each of the elemental realms and challenge the mad god, Macros, who awaits you at the top. Described as a “looter-slasher, melee action-RPG”, this game can be played solo, or alongside friends with three-player online co-op play.

[Pre-order now](#)

Oculus Quest 2 advanced all-in-one virtual reality headset: Was £448, now £399, [Amazon.co.uk](#)

Try out the ultimate immersive gaming experience with this Oculus quest virtual-reality headset. From the best seats in the house at a live concert to groundbreaking films; you can explore classic favourites and new adventures in the expansive Quest content library. The hardware on this bit of gaming tech is next level, with an incredibly fast processor and a high-resolution display.

[Buy now](#)

‘Assassin’s Creed Valhalla’ for PS4: Was £57.99, now £29.48, [Amazon.co.uk](#)

The latest instalment in the Assassin’s Creed series now has nearly 50 per cent off in the Prime Day sale. You battle as a Viking warrior, heading across the sea to earn a place among the gods in Valhalla. It’s a must-have for any gamer.

[Amazon Prime Day](#) is still going strong, and there's a vast number of notable video game deals. [Returnal](#), [Resident Evil Village](#), Ghost of Tsushima and Demon's Souls are among those on sale during the Prime Day madness. We've gathered the biggest discounts we can find, including the lowest prices we've seen on some of the best games out right now.

Where possible, we've highlighted the game at a specific price on a specific platform. Keep in mind that some versions of the games listed are currently the same for all platforms, while others are different prices.

Returnal: \$50 (PS5)

Save \$20

[Click to view image.](#)

Returnal is a sci-fi roguelike shooter where players have to discover the hidden secret behind an alien planet. "Roguelike" means you will die a lot and restart from the beginning, making this game only for those who want a challenge.

[\\$50.00 AT AMAZON](#)

Amazon Luna Controller: \$49

Save \$21

[Click to view image.](#)

Lori Grunin/CNET

[Amazon Luna](#) is the company's foray into cloud gaming. The controller is required to stream games to mobile devices or Amazon Fire TVs, along with a monthly subscription that starts at \$6 for any Prime member.

[\\$49.00 AT AMAZON](#)

Marvel's Spider-Man: Miles Morales Launch Edition: \$40 (PS5)

Save \$20

[Click to view image.](#)

With Peter Parker out of town, it's up to Miles Morales to protect New York City in Marvel's Spider-Man: Miles Morales.

[\\$40.00 AT AMAZON](#)

Resident Evil Village: \$50 (PS5, PS4, Xbox One, Xbox Series)

Save \$10

[Click to view image.](#)

Capcom

Resident Evil Village is the latest entry in the long-running Resident Evil franchise and answered a lot of questions from Resident Evil 7.

[\\$50.00 AT AMAZON](#)

Ghost of Tsushima: \$30 (PS4)

Save \$30

[Click to view image.](#)

Mumbai, June 22 Computers & Laptops

Offers and deals on gaming laptops, desktops, monitors and accessories are live until June 24

Amazon India has announced its 'Grand Gaming Days' for gaming enthusiasts with a range of offers and deals on gaming gadgets.

Customers can avail offers and deals on gaming laptops, desktops & monitors, advanced headphones, gaming consoles, graphic cards, TVs from popular brands such as Lenovo, Acer, ASUS, LG, HP, Sony, Dell, Corsair, Cosmic byte, JBL and more. The sale will be live until June 24, 2021.

Customers can get up to 40 per cent off on Large screen TVs with high resolution, larger RAM and higher refresh rate. Additionally, they can also avail no-cost EMI and exchange offers with a price drop on select models, Amazon said.

Customers can get up to 50 per cent off on Gaming accessories like Racing wheels, Blue switch mechanical Keyboards, high DPI gaming mice and RGB gaming headsets with 7.1 surround sound, from brands such as Logitech, Redgear, Alienware and HyperX. Discounted deals will be live on select models.

Here are some popular gaming products on Amazon.in with offers and deals from sellers:

Gaming Laptops and Monitors

Acer Nitro 5 is a 15.6 inch gaming laptop powered by Intel i5 11th gen processor. It comes with Nvidia GeForce GTX 1650 with 8GB of dedicated RAM and 144Hz Refresh rate. It is equipped with Acer Cool Boost technology. It has a 512 SSD hard disk. This laptop will be available for ₹ 67,990.

HP Pavilion Gaming Laptop. The 15.6 inch FHD Laptop is powered by the AMD Ryzen 5 4600H processor. It comes with 8GB RAM along with 1TB HDD. It has an NVIDIA GeForce GTX 1650 4GB graphics card.

The MSI Bravo 15 FHD Gaming Laptop is configured with AMD Ryzen 7 4800H Mobile Processors using the 7nm technology and Radeon RX 5500M graphics and AMD FreeSync Premium. It comes with MSI's exclusive Dragon Center software to help control and customise the MSI laptop. It has 16GB RAM and 512GB SSD. It is available for ₹ 77,990.

The LG 24-inch Gaming Monitor comes with this Ultra HD 4K monitor with Flicker-Free technology and a 75Hz refresh rate. It includes features like dynamic action sync, black stabilizer and game mode. It is available for ₹ 13,499.

The AOPEN Acer gaming monitor comes with a 24-inch Full HD Curve VA Panel. It is available in black. The HC1 series features a 144Hz refresh rate. It will be available for ₹ 10,999.

Gaming accessories

Zebronics Zeb-MAX Plus V2 Mechanical Keyboard offers options such as a Stealth Mode or Rush Mode. It is a 104-Key Multi-color LED Keyboard with mechanical switches 80 million strokes lifecycle for OP Gameplay. The keyboard comes with 20-LED Modes, 1.8 Meter Braided Cable with Gold-plated USB Connector. It will be available for ₹ 3,310.

The HyperX Cloud Core + 7.1 Gaming Headset comes with a virtual 7.1 surround. The headset has signature HyperX memory foam and a soft leatherette for long gaming sessions. It comes with a detachable noise-cancelling microphone. It is priced at ₹ 5,990.

Logitech G923 Racing Wheel and Pedals and G333 Gaming Earphones will be available for a discount. Logitech G923 is a high-performance racing wheel re-engineered to support an enhanced feedback system. It features Trueforce, next-generation force feedback. It will be available for ₹ 5,000 off for this month.

The brand's gaming earphones come with dual audio drivers, one for highs/mids and one for bass. Users can select between three flexible, soft ear tips. In-line mic and controls. G333 will be available at a discounted price of ₹ 3,395 for this month.

Other accessories include the MSI Clutch GM40 Gaming Optical Mouse priced at ₹ 2,499 and the CLAW Shoot Wired USB Gamepad at a deal price of ₹ 949 with over 30 per cent discount. The SteelSeries Arctis 1 Wired Gaming Headset will be available at a discounted price of ₹ 5,599. The Cosmic Byte Black Eye Wired Mechanical Keyboard will be available for ₹ 3,749. The Razer DeathAdder Essential Gaming Mouse is priced at ₹ 1,599.

Gaming TVs

The Redmi (55) 4K Ultra HD Android Smart TV has over 8 million pixels for an ultra-high-definition viewing experience. It comes with 15W X 2 speakers. DTS Virtual: X enhances audio source.

The Sony Bravia (55) 4K Ultra HD Certified Android TV is powered by the X1 4K Processor and supports 4K resolution. It is equipped with the Bass Reflex speaker. It has an isolated box design for more efficient sound reproduction.

AMAZON is flogging an amazing Nintendo Switch bundle that saves you just over £40.

The rare Amazon Prime Day deal is a great chance to bag the console before the Christmas shopping season.

Of course, you'll need to be an Amazon Prime member to snag the discounted price.

The deal includes a Nintendo Switch (Red & Blue), as well as three games.

Titles included with the deal are Sports Part, Rahman Legends, and Monopoly.

You'd normally pay £341.96 for this bundle, but Amazon is selling it for just £299.99.

* Nintendo Switch bundle at Amazon for £299.99 – [buy here](#)

The Nintendo Switch is one of the world's most popular gaming consoles.

Since its launch in 2017, it's been commonly sold out – especially as Black Friday and Christmas approach.

Deals like this vanish quickly, so don't be surprised if it's gone soon.

The console is currently Nintendo's top machine, and is known as a "hybrid".

That's because it can be used as a handheld machine, or plugged into your TV.

On either side of the Switch are detachable Joy-Con controllers that can be removed when your console is connected to a telly.

And the Joy-Cons even support motion-sensing, and can be split between two people for multiplayer.

Part of the Nintendo Switch's huge success comes from its impressive roster of games.

And this deal comes with three titles, so you're starting off strong.

BONUS DEAL – Nintendo Switch & Pokemon Snap

We've also spotted another cracking Prime Day Nintendo Switch deal over at Amazon.

You can bag the console with hit new game Pokemon Snap for £309.99.

That's a hefty discount from the bundle's usual price of £349.98.

* Nintendo Switch Pokemon Snap bundle for £309.99 – [buy here](#)

All prices in this article were correct at the time of writing, but may have since changed. Always do your own research before making any purchase.

Gaming tips and tricks

Looking for tips and tricks across your favourite consoles and games? We have you covered...

* Can you play [PS4 games on PS5?](#)

- * [PS5 vs Xbox Series X](#) – which is better?
- * Everything you need to know about [Roblox](#)
- * Most [popular Roblox](#) games
- * [Best video games](#) for 2021
- * How to [tame a boar](#) in Fortnite
- * [Top 100 rated players](#) in FIFA 21
- * Best [FM21 wonderkids](#)
- * How many [people play Fortnite](#)?
- * Full [weapon tier list](#) from Valheim

In other news, The Sun's favourite alternative to a games console is the [Oculus Quest 2](#) VR headset.

Grab a VR headset and you'll be able to play the legendary [Beat Saber](#) – like Guitar Hero, but with lightsabers.

And Dell's [Alienware R10 Ryzen Edition](#) is a gaming PC powerhouse that crushes both the new consoles.

Amazon Grand Gaming Days sale: Top deals on gaming accessories, monitors, Acer Nitro and HP Pavilion laptops

1,181 words

22 June 2021

India Today Online

INTYON

English

Copyright 2021. Living Media India Limited

Amazon on Tuesday announced Grand Gaming Days for gaming enthusiasts bringing a host of offers and deals on gaming gadgets. The sale will be live till June 24, 2021. Customers can get great offers and deals on gaming laptops, desktops and monitors, advanced headphones, gaming consoles, graphic cards, TVs from popular brands like Lenovo, Acer, ASUS, LG, HP, Sony, Dell, Corsair, Cosmic byte, JBL among other brands.

Gamers can get up to 50 per cent off on gaming accessories like Racing wheels, Blue switch mechanical Keyboards, high DPI gaming mice and RGB gaming headsets with 7.1 surround sound, from top brands like Logitech, Redgear, Alienware and HyperX.

Customers can get up to 40 per cent off on large screen TVs with high resolution, larger RAM and higher refresh rate which enables a better gaming experience. Additionally, they can also avail of no-cost EMI and exchange offers with a price drop on select models.

Some popular deals from the Amazon Grand Gaming Days sale are mentioned below:

Gaming laptops and monitors: Under the sale, Amazon is giving the Acer Nitro 15.6 inch Gaming Laptop for Rs 67,990. The Acer Nitro 5 11th gen Gaming Laptop powered by Intel i5 11th gen processor laptop features enhanced visual experience. This laptop comes with Nvidia GeForce GTX 1650 with 8GB of dedicated RAM and a 144Hz Refresh rate. It works on Acer Cool Boost technology and 512 SSD hard disk.

The HP Pavilion Gaming 15.6 inch FHD Laptop is priced at Rs 54,900 as part of the sale. It comes with a powerful AMD Ryzen 5 4600H processor and 8GB RAM along with a 1TB HDD, NVIDIA GeForce GTX 1650 4GB graphics card, offering a complete package to gaming enthusiasts.

The MSI Bravo 15 FHD gaming laptop is available for Rs 77,990 under sale. The gaming laptop is configured with AMD Ryzen 7 4800H Mobile Processors which uses the latest 7nm technology and Radeon RX 5500M graphics. The MSI gaming laptop provides desktop-caliber performance in gaming laptops with immersive multimedia and gaming experience. AMD FreeSync Premium equips serious gamers with a fluid, tear-free gameplay experience at peak performance. MSI's exclusive Dragon Center software helps users control and customise their MSI laptops according to their preference. The gaming laptop offers 16GB RAM and 512GB SSD for maximum efficiency and performance.

Coming to the gaming monitors, the LG 24-inch Gaming Monitor with Flicker-Free technology and a 75Hz refresh rate is on sale for Rs 13,499. This Ultra HD 4K monitor promises to redefine the gaming visual experience as it has features like dynamic action sync, black stabilizer and game mode that deliver outstanding picture clarity and gaming optimisation. Another option that users can go for is the AOPEN Acer 24-inch Full HD Curve VA Panel Gaming Monitor which has a 1800R curve VA Panel Gaming Monitor and features cutting-edge gaming technology making the user's gaming experience smoother. The monitor is priced at Rs 10,999. HC1 series features a 144Hz refresh rate and fast response time, allowing users to defeat the enemy at the first moment, while the curved screen with Full HD resolution helps users detect all the details on the screen.

Where gaming accessories are concerned, gadgets like keyboards, gaming headsets, gaming earphones and gaming optical mouse are part of Amazon's Grand Gaming Days sale. Some popular offerings among the gaming accessories are ZEBRONICS Zeb-MAX Plus V2 Mechanical Keyboard which is a 104-Key multi-color LED Keyboard with mechanical switches 80 million strokes life cycle for OP Gameplays. The keyboard comes with 20-LED Modes, 1.8 Meter Braided Cable with Gold-plated USB Connector for max durability and is priced at 3,310.

The HyperX Cloud Core + 7.1 Gaming Headset is priced at Rs 5990 under the deal. It provides clear positional audio for a more immersive gaming experience. Signature HyperX memory foam and soft leatherette make it comfortable for long gaming sessions. The detachable noise-canceling microphone keeps

ambient sounds from interrupting your voice chat and can be removed when not in use. Cloud headsets are known for their legendary sound, comfort, and durability optimised for the way users play.

Amazon grand gaming days sale also has an offer on the racing wheels and pedals. The Logitech G923 Racing Wheel and Pedals are known to enhance the e-racing experience. It is designed to support a game-changing feedback system. The G923 features TRUEFORCE, next-generation force feedback that dials into game engines to deliver higher fidelity realism. Amazon is giving a special discount of Rs 5,000 on the accessories for this month.

The Logitech G333 gaming earphones are priced at Rs 3395 after the discount. They feature dual audio drivers, one for highs, mids and one for bass, also known to deliver incredibly detail-rich sound. Users will get the option to choose from multiple vibrant colors and will get ear tips of different sizes. The earphones will also house an in-line mic and controls that will give users clear comms and easy control.

Other accessories like the cosmic Byte Black Eye Wired Mechanical Keyboard is on sale for Rs 3749. The keyboard features an aluminum body that forms the foundation of this mechanical gaming keyboard. It also has a keypad of 104 mechanical keys with 13 RGB Backlight effect and it also sports Injection Molded Double Shot keys with a massive 50 Million Keystroke Key-life. The Razer DeathAdder Essential Gaming Mouse priced at Rs 1599 under the sale. The mouse features a 6,400 DPI optical sensor that enables fast and precise swipes for great control, while an ergonomic form allows for extended hours of gaming. It also features 5 Hyperresponse buttons with up to 10 million clicks durability.

Coming to the gaming TVs, the popular deals under the sale are Redmi (55) 4K Ultra HD Android Smart TV is priced at Rs 40,999 and offer impeccable visual quality with over 8 million pixels for ultra-high-definition viewing experience. It houses 15W X 2 speakers to provide users with a stereo experience for a powerful audio experience at home.

Another offer is the Sony Bravia (55) 4K Ultra HD Certified Android TV which is priced at Rs 59,990. It has fine details powered by X1 4K Processor and clear sound, features a powerful X1 processor, uses advanced algorithms to cut noise and boost detail. It also features a 4K signal, the Bass Reflex speaker which delivers the low-end sound and an isolated box design ensures highly efficient sound reproduction, delivering punchy bass without compromising detail and clarity.

Amazon will offer no-invite access to Luna cloud gaming service, but only during Prime Day

223 words

21 June 2021

ETMAG.com

FMETMA

English

Copyright 2021 EUROTRADE Media Co., Ltd., All Rights Reserved.

If you've been contemplating a subscription to a game streaming service and are already a Prime member, there's no harm in giving Luna a try. If nothing else, the trial will provide insight into how the service stacks up against similar offerings like Google Stadia and Microsoft's xCloud.

Amazon Prime subscribers will soon be able to take the company's Luna cloud gaming service for a spin at no cost.

From June 21-22 during Amazon's Prime Day shopping event, Prime subscribers across mainland US will have access to a seven-day free trial of Luna. The service first rolled out late last year, but interested parties had to request an invite for early access. Luna is compatible with Windows PC, Mac, Fire TV, iPhone, iPad and select Android phones. Amazon is also offering a 30 percent discount on its Luna Controller, bringing the price down from \$69.99 to \$48.99. If you'd rather not buy new hardware, you can simply use an Xbox One controller, PS4 controller or keyboard / mouse combo.

After the free seven-day trial, you'll be charged a monthly rate of \$5.99 unless you cancel (which you are free to do at any time).

If you consider yourself a serious gamer, now's the time to invest in a powerful gaming laptop. With Amazon Prime Day 2021 in full swing, gaming laptops are dropping in price at the e-commerce giant and other retailers. Not sure where to begin? Don't sweat it. Whether you're looking for a powerful machine that can run AAA games on ultra graphics or a base model that won't break the bank, we've got plenty of options to choose from.

Get expert shopping advice delivered to your phone. Sign up for text message alerts from the deal-hunting nerds at Reviewed.

For instance, if you're looking for a gaming rig that performs well and is lightweight and portable, the Razer Blade 15 Base Gaming Laptop is a good option. It's currently on sale for \$949.99, which is \$550 off of the \$1,499.99 list price. Under the hood, you're getting a NVIDIA GeForce GTX 1660 Ti graphics card and a 10th Gen Intel Core i7-10750H processor. In other words, it should run visually demanding games just fine.

Got something else in mind? Check out the best gaming laptop deals below.

Ready to upgrade your current rig with a new [gaming laptop](#)? New models are rolling out with Nvidia's latest GeForce RTX 30 series graphics, and there are bigger discounts to be found on older but still powerful gaming laptops. Amazon's annual [Prime Day](#) sale is a few days away -- it runs from Monday, June 21, through Tuesday, June 22 -- but there are deals to be found right now on gaming laptops. Check out the discounted models we found not only at Amazon but also Dell, Best Buy and Newegg.

Be sure to check back; I'll update this story regularly to include new deals as they emerge.

Read more: [Best gaming laptop to buy for 2021](#)

Dell G3 15: \$879

Save \$81

[Click to view image.](#)

Sarah Tew/CNET

This Dell G3 15 budget gaming laptop is based on the GeForce GTX 1660 Ti GPU and features a 10th-gen Core i5 CPU, 16GB of RAM and a 512GB solid-state drive. The 15.6-inch display features a full HD resolution and a 120Hz refresh rate. You won't be able to run the latest AAA titles at full tilt, but it can play less demanding games such as Fortnite and CS:GO at full HD resolution and 60 frames per second.

[\\$879.00 AT DELL](#)

Gigabyte G5 KC-5US1130SH : \$1,149

Save \$50

[Click to view image.](#)

Newegg

This Gigabyte is the lowest-cost laptop I've seen with Nvidia GeForce RTX 30-series graphics, and that's before you factor in its current \$50 discount. It features the RTX 3060 GPU along with a 10th-gen Core i5 CPU, 16GB of RAM and a 512GB SSD. The 15.6-inch screen has full HD resolution and a 144Hz refresh rate.

[\\$1,149.00 AT NEWEGG](#)

MSI GS66 10SE: \$1,250

Save \$250

[Click to view image.](#)

MSI

This 15.6-inch MSI gaming laptop supplies an FHD, 144Hz display powered by a 10th-gen Intel Core i7 CPU, 16GB of RAM and GeForce RTX 2060 graphics. The RTX 2060 is the budget card in Nvidia's previous RTX 2000-series lineup and offers excellent value. It can do ray tracing, which reproduces how light behaves in the real world to give games a more photorealistic look.

[\\$1,250.00 AT BEST BUY](#)

Razer Blade 15: \$1,482

Save \$318

[Click to view image.](#)

Sarah Tew/CNET

IMHO, this is the best-looking gaming laptop on the market. Impossibly thin for a high-powered gaming laptop with a sleek, slab look, this 15.6-inch Razer Blade machine also boasts a powerful, smart component lineup. This 2020 model is on sale and pairs a 10th-gen Intel Core i7 CPU with Nvidia GeForce RTX 2060 graphics and supplies an ample 16GB of RAM and a 512GB SSD. The 15.6-inch screen has full HD resolution and a lightning-fast 144Hz refresh rate.

[\\$1,482.00 AT AMAZON](#)

HP Omen 15: \$1,600

Save \$200

[Click to view image.](#)

Sarah Tew/CNET

HP's latest Omen 15 boasts a thin and sleek design and an insanely fast 300Hz display powered by GeForce RTX 3070 graphics. It also serves up a 10th-gen Core i7 CPU, 16GB of RAM and a 512GB SSD.

[\\$1,600.00 AT BEST BUY](#)

Alienware m15 R4: \$1,850

Save \$250

[Click to view image.](#)

Screenshot by Matt Elliott/CNET

This new Alienware m15 R4 monster features the GeForce RTX 3070 GPU from Nvidia's latest lineup along with a 10th-gen Core i7 CPU, 16GB of RAM and a 512GB SSD. The 15.6-inch display features a full HD resolution and a screaming-fast 300Hz refresh rate.

[\\$1,850.00 AT BEST BUY](#)

Asus ROG Strix Scar 15: \$1,899

Save \$301

[Click to view image.](#)

Sarah Tew/CNET

This model from Asus delivers previous-generation GeForce RTX 2070 Super graphics and a previous-generation Core i7 CPU, but both should be plenty powerful when combined with 16GB of RAM. This laptop boasts a fast 240Hz, 15.6-inch display and tons of storage with a 1TB SSD.

Amazon Studios Celebrating Queer Media With 'Voices: Pride' Virtual Event (EXCLUSIVE)

Haley Bosselman

302 words

18 June 2021

Variety

VARTY

English

© 2021 Variety Media, LLC, a subsidiary of Penske Business Media. All rights reserved.

Amazon Studios Voices: Pride will take place on June 24 to celebrate queer voices and representation in media.

In partnership with GLAAD and Pride Media, the virtual event will consist of three roundtable conversations and three lightning talks from LGBTQIA+ players across the industry and will close with performances from drag queens Kandy Muse, LaLa Ri and Manila Luzon.

"Amazon Studios has long prioritized authentic storytelling from LGBTQIA+ talent and storytellers. After the tremendous response to our Voices: API Representation in Film and Media event last month, we want to continue driving the conversation forward around the immediate steps Hollywood can take to improve representation and positively impact the media landscape," Amazon Studios and IMD global head of DEI Latasha Gillespie said in a statement. "We are delighted to celebrate Pride by hosting our next installment of Amazon Studios Voices and invite everyone to join us in the conversation around authentic and intersectional representation of the LGBTQIA+ community on screen and behind the camera."

Voices: Pride will kick off at 9 a.m. PT with a welcome from Gillespie and then head into a tribute to the visibility of the trans community by playing Amazon Studios video for Trans Day of Visibility, which took place March 31.

Panels and conversations will center around discussing various films, television shows and musicals, including "My Name is Pauli Murray," "Everybody's Talking About Jamie," "With Love" and "A League of Their Own." The 10-minute lightning talks will feature writer and advocate Krit Fanene Schmidt; GLAAD and LATAM leader Monica Transendes and media strategist Tre Borden.

The full-day itinerary and access to event registration can be found by visiting Amazon Studios' diversity, equity and inclusion site [here](#).

Amazon Prime users to get access to Luna gaming service

355 words

16 June 2021

Deccan Herald

DECHER

English

Copyright 2021. The Printers (Mysore) Private Ltd.

Amazon Prime members will be able to get free access to Metro Exodus, Sonic Mania Plus, Star Wars Pinball, Ghost Runner on Luna gaming service for limited time.

Amazon has announced that the Prime members will get access to the company's premium Luna game streaming service this month.

As part of the Prime Day celebration, Amazon patrons will get to play exclusive games on the Luna platform for a limited time next week.

Interested users have to register on Luna's official website on June 21 and the window will close the next day (June 22). Then, users will be able to play several popular games including Metro Exodus, Sonic Mania Plus, Star Wars Pinball, GRID, Control, Ghost Runner, Team Sonic Racing, Overcooked! 2, and many more for free, but only for seven days.

Previously, users had to sign-up for Luna only on Fire TV-enabled devices, but with the latest offers, Luna can be accessed on several devices including Windows PCs, Macs. Even, users with iPhone, iPad, and select Android phones be able to play games on the Luna platform via a web browser. Games available on Amazon's Luna game streaming platform (screen-shot)

After the 7-day trial offer, users can either cancel the subscription or continue by paying \$5.99 (approx. Rs 439) per month.

Also, users will also be able to subscribe to the Ubisoft Plus beta channel for \$14.99 (around Rs 1,099)/month within the Luna+ service. There, users get access to blockbuster gaming titles including Assassin's Creed, FarCry, and Watch Dogs. However, this is limited to the US region.

This is a good strategy to attract more consumers into their fold. However, it would have been better if the free access is allowed for one or three months as Apple does with the Arcade gaming service. Also, expand the availability to wider regions of the world.

The PS5 perfect SteelSeries Arctis Pro + GameDAC Wired Gaming Headset is £100 off thanks to this Prime Day price cut

For gamers the world over now is a great time to be looking to upgrade a gaming setup as [Amazon Prime Day 2021 deals](#) are now starting to drop. And among the best early Prime Day deals we've seen so far is this absolute banger on the SteelSeries Arctis Pro + GameDAC Wired Gaming Headset for PS5 (PS4 and PC also supported).

* [View the SteelSeries Arctis Pro + GameDAC deal at Amazon](#)

This wired gaming headset is basically an audiophile's dream pair of PS5 gaming headphones as not only does it deliver a set of cans with powerful 40mm neodymium drivers capable of a impressive frequency range of 10 - 40,000 Hz, but it also comes with its very own DAC (digital-to-analog converter) and headphone amp.

The DAC and amp combo means that the headset delivers high-fidelity 96 kHz / 24 bit audio at its purest full resolution with no down-sampling. In layman's terms that means incredible audio fidelity and in-game immersion.

Here at T3 we take audio incredibly seriously and only ever recommend the absolute finest audio products, so take it from us that this is one great-sounding gaming headset. And, thanks to this early Amazon Prime Day deal, it is now £100 cheaper than normal.

The full details of the deal can be viewed below:

[toCheeeek](#)

Star Deal

SteelSeries Arctis Pro + GameDAC Wired Gaming Headset | [Was: £249.99](#) | [Now: £149.95](#) | [Saving: £100.04](#)

This is one of the absolute finest wired gaming headsets on the market today, and a perfect partner for PS5-owning audiophiles. The Arctis Pro comes with its own dedicated DAC and headphone amp, which means the gamer is treated to high-fidelity 96 kHz / 24 bit audio at its purest full resolution with no down-sampling. Immersion is taken to an entirely new level with this gaming headset, and right now it is a whopping £100 off (that's a straight 40% saving) thanks to this early Amazon Prime Day deal.

SteelSeries is a regular member of T3's [best gaming headsets](#) buying guide, and has impressed with both its wired and wireless headsets over the past few years. Indeed, just last year [did the maker win](#) T3's Best Gaming Headset award at the T3 Awards 2020 for its flagship wireless headset, the SteelSeries Arctis Pro Wireless.

The SteelSeries Arctis Pro Wireless is one of the absolute finest wireless gaming headsets on the market today, by the way, so if you like the look of the SteelSeries Arctis Pro + GameDAC Wired Gaming Headset but really want wireless functionality, then you should absolutely consider it. There's nowhere near the same discount on it though currently at Amazon, but if you can afford it then it won't disappoint.

[toCheeeek](#)

SteelSeries Arctis Pro Wireless | [Was: £299.99](#) | [Now: £290](#) | [Saving: £9.99](#)

Wireless gaming headset royalty, the SteelSeries Arctis Pro Wireless delivers everything you would want from a flagship set of gaming cans. Its Dual-Wireless technology and interchangeable batteries (two are included in the box) with in-hub charging are standout features, as too its ClearCast microphone and excellent audio reproduction.

To compare Amazon's deal price on the SteelSeries Arctis Pro + GameDAC Wired Gaming Headset to other retailers be sure to consult the pricing chart below, which pulls through today's very best prices from retailers across the UK.

* Why not partner the SteelSeries with one of the [best gaming chairs](#)?

Amazon will open its Luna streaming gaming service to Prime users for a free trial

173 words

14 June 2021

CE NoticiasFinancieras

NFINCE

English

Copyright © Content Engine LLC

Members of Amazon's Prime program will be able to access a free temporary trial of streaming gaming service Luna on June 21 and 22 without having to resort to an invitation for early access.

Amazon introduced Luna in late September last year. The streaming gaming service is based on Amazon Web Services from where games are streamed to users' computers, and has its own controller, which incorporates Cloud Direct technology to connect directly to Amazon's servers.

Since its launch, it has been available under invitation for early access in the United States, where it will offer prime members a limited seven-day trial period later this month.

Amazon has reported in an update on luna's page that it offers priority access to Prime members on June 21 and 22, without having to get an invitation, although after the trial period it maintains the price of the subscription: \$us 5.99 per month.

Amazon Cloud gaming Luna available to Prime members on June 21-22

310 words

14 June 2021

Indo-Asian News Service

HNIANS

English

Copyright 2021. Indo-Asian News Service

San Francisco, June 14 (IANS) Amazon has announced to let Prime members access its Cloud game streaming service Luna on June 21 and 22 -- its Prime Day in select countries.

Previously, to test out Luna, one had to request access or sign up from supported Fire TV devices.

"But for this limited-time only, any Prime subscribers in the mainland US will be able to start a seven-day trial of Luna right away," the company said in an update.

Luna is available on Windows PC, Mac, Fire TV, and via the web on iPhone, iPad, and "select Android phones."

One can access and play games like GRID, Metro Exodus, Control during the 7-day trial.

"\$5.99/month early access price is only available during Luna early access. Your Luna+ subscription will renew at the applicable monthly subscription price after the Luna early access period is over," the company said.

You can play Luna with a compatible controller, including Luna Controller, PS4, Xbox One, and select Bluetooth controllers or keyboard+mouse. Ubisoft+ channel beta is \$14.99/month.

The Ubisoft+ channel beta on Luna includes a growing library of new and favorite games from Ubisoft available to play from the cloud.

You can play games at up to 1080p/60fps with 4k coming soon for select titles.

Unlike streaming movies or music, cloud gaming can consume up to 10GB per hour at 1080p.

The two-day shopping extravaganza will offer Prime members over 2 million deals across every category, including fashion, electronics, toys, home decor, automotive, and more.

The Prime Day is open to members in the US, the UK, the UAE, Turkey, Spain, Singapore, Saudi Arabia, Portugal, Netherlands, Mexico, Luxembourg, Japan, Italy, Germany, France, China, Brazil, Belgium, Austria, and Australia.

Amazon Technologies Inc. Patent Issued for Generation and modification of rooms in virtual reality environments (USPTO 11017611)

1,909 words

11 June 2021

Investment Weekly News

INVWK

10073

English

© Copyright 2021 Investment Weekly News via VerticalNews.com

2021 JUN 19 (VerticalNews) -- By a News Reporter-Staff News Editor at Investment Weekly News -- Amazon Technologies Inc. (Seattle, Washington, United States) has been issued patent number 11017611, according to news reporting originating out of Alexandria, Virginia, by VerticalNews editors.

The patent's inventors are Baker, Dillon Taylor (Seattle, WA, US), Chuah, Joonhao (Seattle, WA, US), DuPree, Jesse Alan (Fall City, WA, US), Kane, Kristian (Seattle, WA, US), Kim, Hai Quang (Bellevue, WA, US), Mount, Brian James (Seattle, WA, US), Thomas, Michael (Seattle, WA, US), Thompson, Lee David (Normandy Park, WA, US).

This patent was filed on January 27, 2020 and was published online on May 25, 2021.

From the background information supplied by the inventors, news correspondents obtained the following quote: "Virtual reality devices such as headsets with corresponding controllers are increasing in use. Generally, virtual reality devices may allow users to be completely immersed in digital environments, such as video games or other virtual reality environments. However, conventional, text-based menus, associated menu structures, and text-based user interfaces may be difficult, cumbersome, and unnatural to use in such immersive digital environments, and may also reduce the desired immersive effect when using virtual reality devices. Accordingly, there is a need for virtual reality user interfaces that facilitate simple and intuitive interactions by users with objects or other aspects of the digital environments."

Supplementing the background information on this patent, VerticalNews reporters also obtained the inventors' summary information for this patent: "SUMMARY:"

The claims supplied by the inventors are:

"1. A computer-implemented method to generate a room in an extended reality environment, comprising: causing, via a display device, presentation of a floor, a plurality of walls, and a ceiling within the extended reality environment; causing, via the display device, presentation of a plurality of dimensions associated with the floor, the plurality of walls, and the ceiling; receiving, via an input device, a first input associated with moving a first wall of the plurality of walls, wherein the first input comprises selection of a first grab point positioned along the first wall, the first grab point having associated logic with respect to movement of the first wall; causing, via the display device, presentation of a first dimension of the plurality of dimensions that is associated with the first wall; causing, via the display device, stopping of presentation of other dimensions of the plurality of dimensions associated with the floor, the plurality of walls, and the ceiling; causing, via the display device, movement of the first wall responsive to the first input received via the input device based on the associated logic of the first grab point; causing, via the display device, modification of presentation of the first dimension that is associated with the first wall responsive to movement of the first wall; receiving, via the input device, a second input associated with moving the ceiling, wherein the second input comprises selection of a second grab point positioned along the ceiling, the second grab point having associated logic with respect to movement of the ceiling; causing, via the display device, presentation of a second dimension of the plurality of dimensions that is associated with the ceiling; causing, via the display device, stopping of presentation of other dimensions of the plurality of dimensions associated with the floor, the plurality of walls, and the ceiling; causing, via the display device, movement of the ceiling responsive to the second input received via the input device based on the associated logic of the second grab point; and causing, via the display device, modification of presentation of the second dimension that is associated with the ceiling responsive to movement of the ceiling.

"2. The computer-implemented method of claim 1, wherein dimensions associated with the plurality of walls comprise widths of respective walls; and wherein dimensions associated with the ceiling comprise a height between the ceiling and the floor.

"3. The computer-implemented method of claim 1, wherein the first grab point comprises at least one of a two-dimensional shape or a three-dimensional shape that is positioned substantially at a center of a first interface between the first wall and the floor; and wherein the second grab point comprises at least one of a two-dimensional shape or a three-dimensional shape that is positioned substantially at a center of a second interface between the ceiling and an adjacent wall.

"4. The computer-implemented method of claim 1, further comprising: receiving, via the input device, a third input associated with moving a fixture associated with the first wall, wherein the third input comprises selection of the fixture positioned along the first wall; causing, via the display device, presentation of a plurality of dimensions that are associated with distances between the fixture and portions of the floor, the plurality of walls, and the ceiling; causing, via the display device, movement of the fixture responsive to the third input received via the input device; and causing, via the display device, modification of presentation of the plurality of dimensions that are associated with the distances between the fixture and portions of the floor, the plurality of walls, and the ceiling responsive to movement of the fixture.

"5. The computer-implemented method of claim 4, further comprising: receiving, via the input device, a fourth input associated with resizing a portion of the fixture associated with the first wall, wherein the fourth input comprises selection of a fourth grab point positioned along the portion of the fixture, the fourth grab point having associated logic with respect to movement of the portion of the fixture; causing, via the display device, presentation of a third dimension of the plurality of dimensions that is associated with a size of the portion of the fixture; causing, via the display device, presentation of a fourth dimension of the plurality of dimensions that is associated with a distance between the portion of the fixture and a portion of the floor, the plurality of walls, or the ceiling; causing, via the display device, stopping of presentation of other dimensions of the plurality of dimensions associated with the distances between the fixture and portions of the floor, the plurality of walls, and the ceiling; causing, via the display device, resizing of the portion of the fixture responsive to the fourth input received via the input device based on the associated logic of the fourth grab point; and causing, via the display device, modification of presentation of the third and fourth dimensions that are associated with the portion of the fixture responsive to resizing of the portion of the fixture.

"6. A computer-implemented method, comprising: causing, via a display device, presentation of a plurality of surfaces that define boundaries of a space, the plurality of surfaces including a lower surface, a plurality of dividing surfaces, and an upper surface, and an associated plurality of dimensions within an extended reality environment; receiving, via an input device, a first input associated with moving a first surface of the plurality of surfaces, wherein the first input comprises selection of a first grab point positioned along the first surface, the first grab point having associated rules with respect to movement of the first surface; causing, via the display device, presentation of a first dimension associated with the first surface; causing, via the display device, stopping of presentation of other dimensions of the plurality of dimensions associated with the plurality of surfaces; causing, via the display device, movement of the first surface responsive to the first input received via the input device based at least in part on the associated rules of the first grab point; and causing, via the display device, modification of presentation of the first dimension associated with the first surface responsive to movement of the first surface.

"7. The computer-implemented method of claim 6, wherein the plurality of dimensions associated with the lower surface, the plurality of dividing surfaces, and the upper surface comprise lengths of portions of the lower surface, widths of portions of the lower surface, widths of respective dividing surfaces, heights of respective dividing surfaces, lengths of portions of the upper surface, widths of portions of the upper surface, or heights of portions of the upper surface.

"8. The computer-implemented method of claim 6, wherein the first surface comprises a first wall of the plurality of dividing surfaces, and the first dimension associated with the first surface comprises a distance between the first wall and an opposing wall of the plurality of dividing surfaces.

"9. The computer-implemented method of claim 6, wherein the first surface comprises the upper surface that is a ceiling, the lower surface comprises a floor, and the first dimension associated with the first surface comprises a distance between the ceiling and the floor.

"10. The computer-implemented method of claim 6, wherein the first grab point comprises at least one of a two-dimensional shape or a three-dimensional shape that is positioned at an interface between the first surface and an adjacent surface of the plurality of surfaces.

"11. The computer-implemented method of claim 10, wherein the first grab point comprises at least one of a circle, a semi-circle, an oval, a triangle, a rectangle, a cylinder, a semi-cylinder, an oval prism, a triangular prism, or a rectangular prism.

"12. The computer-implemented method of claim 6, further comprising: receiving, via the input device, a second input associated with placing a fixture in association with one of the plurality of surfaces; causing, via the display device, presentation of a plurality of dimensions that are associated with distances between the

fixture and portions of the plurality of surfaces; and causing, via the display device, placement of the fixture responsive to the second input received via the input device based at least in part on associated rules with respect to placement of the fixture.

"13. The computer-implemented method of claim 12, further comprising: receiving, via the input device, a third input associated with moving the fixture associated with one of the plurality of surfaces, wherein the third input comprises selection of the fixture; causing, via the display device, presentation of the plurality of dimensions that are associated with distances between the fixture and portions of the plurality of surfaces; causing, via the display device, movement of the fixture responsive to the third input received via the input device based at least in part on associated rules with respect to movement of the fixture; and causing, via the display device, modification of presentation of at least some of the plurality of dimensions that are associated with the distances between the fixture and portions of the plurality of surfaces responsive to movement of the fixture."

Ready to upgrade your current rig with a new [gaming laptop](#)? New models are rolling out with Nvidia's latest GeForce RTX 3000 series graphics, and there are bigger discounts to be found on older but still powerful gaming laptops. Amazon's annual [Prime Day](#) sale is a couple weeks away -- it runs from Monday, June 21, through Tuesday, June 22 -- but there are deals to be found right now on gaming laptops. Check out the discounted models we found not only at Amazon but also Dell, Best Buy and Newegg.

Be sure to check back; I'll update this story regularly to include new deals as they emerge.

Read more: [Best gaming laptop to buy for 2021](#)

Dell G3 15: \$850

Save \$110

[Click to view image.](#)

Sarah Tew/CNET

This Dell G3 15 budget gaming laptop is based on the GeForce GTX 1660 Ti GPU and features a 10th-gen Core i5 CPU, 16GB of RAM and a 512GB solid-state drive. The 15.6-inch display features a full HD resolution and a 120Hz refresh rate. You won't be able to run the latest AAA titles at full tilt, but it can play less demanding games such as Fortnite and CS:GO at full HD resolution and 60 frames per second.

[\\$850.00 AT DELL](#)

Gigabyte G5 KC-5US1130SH : \$1,199

Low list price

[Click to view image.](#)

Newegg

This Gigabyte isn't on sale but is the lowest-cost laptop I've seen with Nvidia GeForce RTX 3000 series graphics. It features the RTX 3060 GPU along with a 10th-gen Core i5 CPU, 16GB of RAM and a 512GB SSD. The 15.6-inch screen has full HD resolution and a 144Hz refresh rate.

[\\$1,199.00 AT NEWEGG](#)

MSI GS66 10SE: \$1,250

Save \$250

[Click to view image.](#)

MSI

This 15.6-inch MSI gaming laptop supplies an FHD, 144Hz display powered by a 10th-gen Intel Core i7 CPU, 16GB of RAM and GeForce RTX 2060 graphics. The RTX 2060 is the budget card in Nvidia's previous RTX 2000-series lineup and offers excellent bang for the buck along with ray tracing, which reproduces how light behaves in the real world to give games a more photorealistic look.

[\\$1,250.00 AT BEST BUY](#)

Asus ROG Zephyrus M15: \$1,300

Save \$280

[Click to view image.](#)

ASUS

The Asus ROG Zephyrus is the company's thinnest, most compact gaming laptop. Despite its trim dimensions, the ROG Zephyrus does not sacrifice performance. This model features a 10th-gen Intel Core i7 CPU, 16GB of RAM, a roomy 1TB SSD and Nvidia GeForce RTX 2070 Max-Q graphics. The CPU and GPU are a generation behind but still plenty of power to push current AAA titles. The 15-inch display features a full HD resolution and a fast 240Hz refresh rate.

[\\$1,300.00 AT BEST BUY](#)

Acer Predator Triton SE: \$1,350

Save \$150

[Click to view image.](#)

Best Buy

It's rare to find a model on sale that features the most recent from Nvidia, but this 14-inch model from Acer is \$150 off and features GeForce RTX 3060 graphics. It also supplies the latest Intel with an 11th-gen Core i7 CPU. The display features full HD resolution and a 144Hz refresh rate, and the keyboard provides a bit of flair with three-zone RGB lighting.

[\\$1,350.00 AT BEST BUY](#)

Razer Blade 15 (renewed): \$1,400

Save \$989

[Click to view image.](#)

Sarah Tew/CNET

IMHO, this is the best-looking gaming laptop on the market. Impossibly thin for a high-powered gaming laptop with a sleek, slab look, this 15.6-inch Razer Blade machine also boasts a powerful, smart component lineup. This renewed/refurbished model pairs a ninth-gen Intel Core i7 CPU with Nvidia GeForce RTX 2070 Max-Q graphics and supplies an ample 16GB of RAM and a 512GB SSD. The 15.6-inch screen has full HD resolution and a lightning-fast 240Hz refresh rate.

[\\$1,400.00 AT AMAZON](#)

Asus TUF 3070 Gaming Laptop: \$1,840

Save \$88

[Click to view image.](#)

Asus

As stated before, it's uncommon to see any sort of discount on a gaming laptop with current-gen Nvidia graphics. This 15.6-inch model from Asus is only slightly discounted but delivers a wallop with GeForce RTX 3070 graphics, an 11th-gen Intel Core i7 CPU, an ample 24GB of RAM and a huge 2TB SSD. The display features a full HD resolution and a speedy 240Hz refresh rate.

[\\$1,840.00 AT AMAZON](#)

Amazon Prime Gaming's June Battlefield – Battlefield 4 and More are Free

Chris Wray

380 words

2 June 2021

Wccftech.com

NEWAGAE

English

Copyright 2021. News Age Ads LLC - All rights reserved

[Amazon Prime Gaming](#). It's not something I write about too much, though that's primarily because it's not something I think about as much as I likely ought to. Why should I? Because I already subscribe to prime, and the bonuses are just on top of what I'm already paying for anyway. The other reason is simply that some of the giveaways are pretty good.

Case in point, from yesterday (1st of June) to the 21st of June, you can [claim a free copy of Battlefield 4](#). Sure, it's not the latest Battlefield, but it's still a decent one. One that's still fairly active online and does have a decent enough single-player campaign for you to play through. Oh, and it's free, so there's no real reason not to pick up your Origin key if you already have an Amazon Prime Subscription.

As for the other aspects of Amazon Prime Gaming in June 2021, there's a decent amount to pick up for various titles. The new additions for this month are as follows (with a reminder that most things have different end dates, so get in early):

Full Games to Own:

- * Battlefield 4 (Origin key)
- * Batman - The Telltale Series
- * Lost in Harmony
- * Newfound Courage
- * BFF or Die
- * Mugsters
- * Spitkiss

Exclusive Content for:

- * Fall Guys – Burning Circuits Bundle, which includes:
 - * A Burning Circuits Costume
 - * 6500 Kudos
- * FIFA 21 – Gaming 81+ OVR Player Pack including:
 - * 1 Player Pick of 4 OVR 83+ Players
 - * 5 Gold Rare Players
- * VALORANT - Pity Party Spray
- * Assassin's Creed Valhalla - Druidic Settlement Bundle, which includes:
 - * a Black Raven Settlement Pack
 - * Mystical Settlement Pack
 - * 5x One Hour XP Boosters
- * Paladins - Exclusive LEX-O Suit Skin
- * Black Desert Online - +16 Inventory Expansion Coupon

This doesn't include other bonuses featured for League of Legends, Rainbow Six Siege, Legends of Runeterra, Rogue Company, and more. I've no doubt there'll be something there for you to claim. Personally, I've grabbed the content for Ass Creed Valhalla for when I finally start the game in what will likely be in a decade or two.

IF you can't wait for the official reveal of Battlefield 6 next week, then the latest Amazon Prime Gaming freebie is perfect for you.

After months of speculation and rumours Battlefield fans will get their first proper look at Battlefield 6 - the highly anticipated FPS from DICE and EA - next week. On Wednesday June 9 the next game in the hit series will officially be revealed, with an announcement looking set to drop on the official Battlefield YouTube channel. If you can't wait for the big Battlefield 6 reveal, and are looking for something to keep you busy until then, then the latest Amazon Prime Gaming freebie is for you.

Related articles

This month has seen the latest Amazon Prime Gaming free games released, and arguably the pick of the bunch is Battlefield 4.

Prime Gaming members can claim a copy of Battlefield 4 on Origin right now without paying a single extra penny.

The DICE shooter is available as a Prime Gaming freebie for PC gamers until June 21.

If you claim a code before this date then you will be activate it on Origin until July 21.

READ MORE

Speaking about the Battlefield deal, Amazon said: "Prime members can claim one game code redeemable on Origin for the Battlefield 4 Standard edition.

"Battlefield 4 is the genre-defining action blockbuster, made from moments that blur the line between game and glory. The critically acclaimed first-person shooter offers players a visceral, dramatic experience unlike any other, as they take on over-the-top and dangerous missions as an esteemed member of the U.S. Marines during the fictional 'War of 2020'.

"To claim Battlefield 4 and see all the other Prime Gaming offers currently available to Prime members this month, including more games and in-game content for games including Fall Guys: Ultimate Knockout, FIFA 21, VALORANT, Rainbow Six Siege, and Apex Legends".

Battlefield 4 isn't the only free game that Prime Gaming subscribers can pick up right now.

New free games added for June also include Batman - The Telltale Series, Newfound Courage, Lost in Harmony, and BFF or Die.

Exclusive loot can also be picked up for plenty of other blockbuster games.

Here's some of the gear Prime Gaming subscribers can pick up...

- Fall Guys – A Burning Circuits Costume and 6,500 Kudos
- FIFA 21 – Exclusive Prime Gaming 81+ OVR Player Pack includes: 1 Player Pick of 4 OVR 83+ Players and 5 Gold Rare Players
- Assassin's Creed Valhalla - Prime Members can lead their clan in the action role-playing game and claim the Druidic Settlement Bundle, which includes: a Black Raven Settlement Pack, Mystical Settlement Pack, 5x One Hour XP Boosters

Prime Gaming is one of the many perks of being an Amazon Prime subscribers.

DUBLIN--(BUSINESS WIRE) --May 27, 2021--

The "Global Online Gaming Market 2020-2026" report has been added to ResearchAndMarkets.com's offering.

The global online gaming market is anticipated to grow at a CAGR of 11.9% during the forecast period. The growth of the market is attributed to the growing adoption of video games as a leisure activity among all age groups. In addition to this, the rising trend of professional gaming is also anticipated to aid the expansion of the market. Moreover, macro-economic factors such as increasing internet penetration, availability of low-cost game-centric smartphones, increasing disposable income, and further development of telecommunication infrastructure will also aid in the growth of the market.

However, online gaming is also causing severe effects on the body and mind such as obesity, depression, addictive behavior, and increased aggressive or violent behavior. This, in turn, will challenge the growth of the market during the forecast period as the awareness regarding these side effects of excessive gaming is increasing across the globe.

The global online gaming market is segmented based on game type, device type, and revenue model. Based on the game type, the market is sub-segmented into role-playing games, action & adventure games, racing games, simulation games, strategy games, sports games, and other games. Based on the device type, the market is sub-segmented into the console, computer, mobile devices, and others. The mobile devices segment is witnessing a significant growth rate all across the globe. Based on the revenue model, the market is bifurcated into free gaming services and paid gaming services. Paid gaming services holds a major market share all across the globe.

The global online gaming market is further segmented based on geography into North America, Europe, Asia-Pacific, and the Rest of the World. North America is expected to hold a significant market share in the market during the forecast period. High penetration of online gaming among all age groups, high per capita spending on online games is expected to be some of the major factors for the significant market share during the forecast period.

Grab the Razer Kraken Tournament Edition gaming headset on sale for as low as \$59.99 at Amazon

Retailers are kicking off their [Memorial Day sales](#) this week, with many bringing some exceptional deals on appliances, electronics, TVs and just about everything in-between. Amazon's Memorial Day sale hasn't started just yet but thankfully, there's plenty of offers to check out right now.

For gamers in need of a new gaming headset cheap, the Razer Kraken Tournament Edition gaming headset just got cheaper over at Amazon. [On sale for \\$59.99](#), Amazon is taking 40% off one of the [best gaming headsets](#) available today.

A slick headset built with the most immersive gaming experience in mind, the Razer Kraken Tournament Edition features THX 7.1 channel surround sound support and a built-in noise cancelling mic to deliver clear, precise playback to take your game to the next level.

[toCheeeek](#)

Razer Kraken Tournament Edition (Green)

[Now: \\$59.99 | Was: \\$99.99 | Savings: \\$40 \(40%\)](#)

Receiving the largest discount of the two colors available, the green Razer Kraken Tournament Edition is at its best price yet. If you don't mind the neon style, go with this option to save the most money. It just got another price drop as well, so grab one before this deal ends.

[toCheeeek](#)

Razer Kraken Tournament Edition (Black)

[Now: \\$64.99 | Was: \\$99.99 | Savings: \\$35 \(35%\)](#)

Razer's classic black version of the Kraken Tournament Edition is also getting a sizeable discount, albeit slightly less than its green counterpart. The \$35 price drop is nothing to scoff at however, as it puts this style back down to its lowest price of the year again.

* [Browse all deals on gaming headsets at Amazon](#)

Full THX 7.1 Surround Sound support immerses you like never before in your favorite games, bringing out details you didn't even know were there. Coupled with a retractable noise cancelling mic that offers crystal clear voice communication and the value of this gaming headset deal just can't be beat. You also get full compatibility with Amazon Alexa, making it an ideal smart gaming headset.

* [Best gaming keyboards](#)

It's also an excellent option for Xbox Series X and [PS5](#) owners, taking full advantage of the new consoles tech by providing the most immersive sound possible. As an Xbox or PS5 gaming headset replacement, it passes the test with flying colors and offers a pretty affordable alternative.

This Razer Kraken Tournament Edition deal looks to be here to stay at Amazon for some time, but that could change without notice. If you don't see the deal available at Amazon, be sure to check out more deals on the Kraken Ultimate Edition below.

Summary List Placement

GameStop [launched a new website](#) this week that revealed it's hiring a team to build a non-fungible token platform.

A minimalistic web portal includes a message inviting engineers, designers, gamers, marketers, and community leaders to join the video-retailer's team.

It also posted a link to an [Ethereum address](#), possibly indicating its platform will be based on this blockchain technology.

NFTs are a [type of digital asset](#) that exploded in popularity during the pandemic, as enthusiasts and investors scrambled to spend enormous sums of money on items that only exist online. They are powered by blockchain, similar to bitcoin.

"Non-fungible" means that the item is completely unique and cannot be exchanged for something of equal or similar value.

Read More: [Warren Buffett is hoarding \\$80 billion of cash, cleaning up his stock portfolio, and declining to bash bitcoin. Veteran investor Thomas Russo says why that strategy will ultimately pay off.](#)

The exact scope of GameStop's project isn't clear yet, but a graphic on its website states: "Power to the players. Power to the creators. Power to the collectors."

Matthew Finestone, the company's head of blockchain, [said on Twitter](#) he was "super excited & honoured" to be part of its NFT ambitions.

GameStop, founded by Harvard alumni about 37 years ago, found itself at the [center of market attention](#) earlier this year, after retail investors banded together to beat Wall Street hedge funds at their own game.

The company's shares rose by as much as 2,500% within a matter of weeks, sparked by the power of herd mentality circulating on the Wall Street Bets forum and the surging popularity of trading apps like Robinhood.

It recently made a number of leadership changes under strategic direction set by activist investor Ryan Cohen, who is leading its shift to e-commerce to compete with big retailers.

Former chief financial officer Jim Bell and chief customer officer Frank Hamlin were among the senior executives who left this year, and CEO George Sherman is set to [depart on July 31](#) or upon the appointment of a successor. A former Amazon Web Services engineering lead, Matt Francis, was [appointed](#) to its newly created role of chief technology officer in February.

Cohen and two other like-minded board members are at the helm of [transforming GameStop](#) into the Amazon of gaming.

GameStop was last trading 12% higher at \$236.77 per share on Wednesday.

Best **gaming** laptop deals right now at **Amazon**, Dell, Best Buy and Newegg

Matt Elliott

1,034 words

24 May 2021

CNET News.com

CNEWSN

English

(c) CNET Networks Inc. All Rights Reserved.

Ready to upgrade your current rig with a new [gaming laptop](#)? New models are rolling out with Nvidia's latest GeForce RTX 3000 series graphics, and there are bigger discounts to be found on older but still powerful gaming laptops. And if you're [working from home](#), a gaming laptop can double as an overqualified office machine.

Check out the picks here, all of which are currently discounted at Amazon, Dell, Best Buy or Newegg. Two are actually not on sale, just dirt cheap -- a budget Acer Nitro 5 that's about as inexpensive as a gaming laptop gets (though not as cheap as it was last month) and another that's the lowest-cost laptop I've found with RTX 3060 graphics.

Be sure to check back; I'll update this story regularly to include new deals as they emerge.

Read more: [Best gaming laptop to buy for 2021](#)

Acer Nitro 5: \$735

Low list price

[Click to view image.](#)

Sarah Tew/CNET

It's no longer a steal -- it was \$600 last month -- but the Nitro 5 is still a solid buy at its current price of \$739. It features a 15.6-inch, full HD display powered by a ninth-gen Intel Core i5 CPU, 8GB of memory and Nvidia GeForce GTX 1650 graphics. The GTX GPU lacks the ray tracing of Nvidia's current RTX lineup but should let you play Fortnite and other casual games at medium settings at 1080p and 60 frames per second.

[\\$735.00 AT AMAZON](#)

Dell G3 15: \$930

Save \$260

[Click to view image.](#)

Sarah Tew/CNET

This Dell G3 15 budget gaming laptop is based on the GeForce GTX 1660 Ti GPU and features a 10th-gen Core i5 CPU, 16GB of RAM and a 512GB solid-state drive. The 15.6-inch display features a full HD resolution and a 120Hz refresh rate. You won't be able to run the latest AAA titles at full tilt, but it can play less demanding games such as Fortnite and CS:GO at full HD resolution and 60 frames per second.

[\\$930.00 AT DELL](#)

Lenovo Legion 5: \$950

Save \$150

[Click to view image.](#)

Lenovo

This Lenovo Legion 5 budget gaming laptop is based on the GeForce GTX 1660 Ti GPU, like the Dell G3 15 above, and serves up a better CPU but only half the RAM. It features a 10th-gen Core i7 CPU and 8GB of

RAM along with a 512GB SSD. It also features a 15.6-inch display with a full HD resolution and a 120Hz refresh rate.

[\\$950.00 AT BEST BUY](#)

Gigabyte G5 KC-5US1130SH : \$1,199

Low list price

[Click to view image.](#)

Newegg

This Gigabyte isn't on sale but is the lowest-cost laptop I've seen with Nvidia GeForce RTX 3000 series graphics. It features the RTX 3060 GPU along with a 10th-gen Core i5 CPU, 16GB of RAM and a 512GB SSD. The 15.6-inch screen has full HD resolution and a 144Hz refresh rate.

[\\$1,199.00 AT NEWEGG](#)

Asus ROG Zephyrus M15: \$1,300

Save \$250

[Click to view image.](#)

ASUS

The Asus ROG Zephyrus is the company's thinnest, most compact gaming laptop. Despite its trim dimensions, the ROG Zephyrus does not sacrifice performance. It offers the latest silicon from AMD and Intel as well as GPUs from Nvidia's GeForce RTX line. This model features a 10th-gen Intel Core i7 CPU, 16GB of RAM, a roomy 1TB SSD and Nvidia GeForce RTX 2060 graphics. The RTX 2060 is the budget card in Nvidia's RTX 2000-series lineup and offers excellent bang for the buck along with ray tracing, which reproduces how light behaves in the real world to give games a more photorealistic look. The 15-inch display features a 4K (3,840x2,160-pixel) resolution but only a 60Hz refresh rate.

[\\$1,300.00 AT BEST BUY](#)

Razer Blade 15 (renewed): \$1,399

Save \$574

[Click to view image.](#)

Sarah Tew/CNET

IMHO, this is the best-looking gaming laptop on the market. Impossibly thin for a high-powered gaming laptop with a sleek, slab look, this 15.6-inch Razer Blade laptop also boasts a powerful, smart component lineup. This renewed/refurbished model pairs a ninth-gen Intel Core i7 CPU with Nvidia GeForce RTX 2070 Max-Q graphics and supplies an ample 16GB of RAM and a 512GB SSD. The 15.6-inch screen has full HD resolution and a lightning-fast 240Hz refresh rate.

[\\$1,399.00 AT AMAZON](#)

Asus ROG Zephyrus 14: \$1,450

Save \$50

[Click to view image.](#)

Granted, the \$50 discount is modest, but any price break on a laptop with a GPU from Nvidia's new RTX 3000 series is noteworthy. This model boasts an unusual AMD and Nvidia mix. It pairs Nvidia GeForce RTX 3060 graphics with an AMD Ryzen 9 CPU. It also supplies an ample 16GB of RAM and a roomy 1TB SSD. The 14-inch screen has 1,920x1,080-pixel resolution and a speedy 144Hz refresh rate.

[\\$1,450.00 AT BEST BUY](#)

Alienware m15 R4: \$1,950

Save \$150

[Click to view image.](#)

Screenshot by Matt Elliott/CNET

This new Alienware m15 R4 monster features the GeForce RTX 3070 GPU from Nvidia's latest lineup along with a 10th-gen Core i7 CPU, 16GB of RAM and a 512GB SSD. The 15.6-inch display features a full HD resolution and a screaming-fast 300Hz refresh rate.

[\\$1,950.00 AT BEST BUY](#)

More for gamers

- * [Best graphics card for gamers and creatives in 2021](#)

Global Digital Wallets Market Report 2021 Featuring Functionality of Leading Digital Wallets - Apple Wallet, Google Pay, Samsung Pay, PayPal, Starbucks, Cumberland Farms/ Zipline, & Amazon Pay

738 words

21 May 2021

19:15

PR Newswire

PRN

English

Copyright © 2021 PR Newswire Association LLC. All Rights Reserved.

DUBLIN, May 21, 2021 /PRNewswire/ -- The "A Functional Taxonomy of Digital Wallets: Today's Version, Tomorrow's Direction" report has been added to ResearchAndMarkets.com's offering.

A Functional Taxonomy of Digital Wallets: Today's Version, Tomorrow's Direction, delivers a review of all the major digital wallets using a single consistent taxonomy to enable a more effective competitive evaluation of the feature/functions each wallet supports. This in turn suggests the key development and market direction being pursued by each wallet supplier.

Today there are wallets to support global card networks, national card networks, multiple merchants and single merchants. Some have added loyalty programs, others support ticketing and still others are adding support for car keys. There are also e-commerce buttons that act as wallets and merchant wallets that are adding financial services.

"It is interesting to witness the expansion of wallets into new markets, from authentication to access control. Yet when one takes a step back, one doesn't perceive these solutions staying focused on the payments market. They need to offer more benefits to win over banks, merchants and consumers," comments Tim Sloane.

Highlights of the report include:

- Digital wallets available today are very different, ranging from universal wallets (Apple Pay, Google Pay, Samsung Pay), to online pay buttons (Amazon, PayPal, and soon the Secure Remote Commerce (SRC) solutions), all the way to retailer digital wallets.
- Each digital wallet has its own set of features, sometimes implemented to help target international markets, sometimes to address new domestic markets (such as car replacing keys), and sometimes to benefit existing users, be that the consumer, the financial institution or the merchant.
- It may be that the difficulty of staying focused on specific markets, instead of chasing new markets, has prevented universal wallets from delivering a compelling solution to its three primary market participants: banks, consumers and merchants.
- Universal digital wallets have struggled to provide sufficient features to divert merchants from developing their own digital wallets. Universal digital wallet providers have created significant distrust on the part of banks, by adding banking features, introducing their own card programs, as well as P2P capabilities.
- Merchants are also not enamored by the universal digital wallets, as they lack the ability to differentiate their merchant loyalty programs.
- It is likely traditional market forces will start to consolidate the functions supported in the universal wallets that are popular in the market today. Suppliers associated with what is typically called a universal wallet have all been adding new capabilities.

Save up to \$100 on select Corsair gaming chairs at Amazon

With many retailers kicking off their [Memorial Day sales](#) this week and the following, now's the time to start shopping for the offers you're looking for. If you're on the market for a gaming chair, Amazon may just have the deal for you.

Amazon is offering Corsair gaming chairs on sale with [discounts of up to \\$100 off](#) select WWT1 Race and WWT2 Road Warrior gaming chairs.

Among some of the [best gaming chairs](#) available, Corsair WW T1 Race and WW T2 Rod Warrior gaming chairs are designed for maximum comfort while promoting proper posture during extended gaming sessions.

[toCheeeek](#)

Corsair WW T1 Race Gaming Chair (Black/Red)

[Now: \\$249.99 | Was: \\$349.99 | Savings: \\$100 \(29%\)](#)

Steel construction combined with leather comfort make this chair a must-see for those in need of an upgrade. Encouraging proper posture while providing comfort even during extended sessions, Corsair's WW T1 racing gaming chair features a reclining back, height adjustable armrest and seat, and nylon casters for easy movement.

* [Best gaming keyboards](#)

You'll find two models available with multiple colors to choose from, some of which are receiving a bigger discount than others.

[Starting as low as \\$249.99](#), the WW T1 Race gaming chair is the choice for those who just want a solid gaming chair without too many frills.

Corsair's WW T1 Race gaming chair features a steel frame and comfortable leather exterior, offering a premium feel with a more robust design. 4D adjustable arm rests combined with multiple height settings allow users to customize the feel, with multiple reclining settings for added comfort.

* [Best gaming mouse](#)

The pricier of the two options, the WW T2 Road Warrior, [starts as low as \\$362.99](#) with sizeable discounts on select models.

The WW T2 Road Warrior comfort gaming chair takes it a step further, adding additional support and cushion where needed. The same features, including 4D adjustable arm rests and height adjustments, are included in the WW T2 as well.

All the peripherals you could ever want are currently on offer

It's not every day that we see a massive sale on mountains of gaming gear. But for one week only, laptops, [keyboards](#), [mice](#) and many more are on sale at Amazon. We'll never say no to a little discount when it comes to killer gaming setups that give us an edge.

It's Amazon Gaming Week, meaning there are promotions and discounts on many of our favourite gaming accessories, all ahead of [Amazon Prime Day](#) in June. And, better yet, the Gaming Week sales are open to non-Prime members as well.

The retailer is also running a daily quiz, giving you the chance to win gaming gear prizes. From what we can see, the questions are pretty easy and nothing that a quick Google won't bring up.

While the [Xbox Series X](#) and the [PlayStation 5](#) aren't included in the sale – we're all still struggling to get a hold of one, let alone get one at a discount – you can find plenty of PS5 accessories. There's also up to 60 per cent off some Razer and Logitech mice, headsets and keyboards, and the price of some gaming laptops have been slashed.

We've scoured high and low through Amazon's Gaming Week sales to find the best deals. You can find our top picks on gaming products below.

Read more:

* [9 best gaming mice for speed, comfort and control](#)

* [10 best keyboards: Wireless and wired models for quick typing](#)

* [10 best wireless gaming headsets to give you the multiplayer edge](#)

Our IndyBest team handpicks every deal we feature. We may earn some commission from the links in this article, but our selections have been made independently and without bias. This revenue helps to fund journalism across The Independent.

Amazon Gaming Week deals: Where to get them

Below we've rounded up a few of our favourite gaming peripherals included in the Gaming Week sale, but for the full list, check out the [Amazon Gaming Week page](#).

Best gaming mouse deals

Razer viper: Was £79.99, now £54.99, [Amazon.co.uk](#)

The Razer viper 8k is our top pick in our round-up of the [best gaming mice](#), and while it isn't discounted in Amazon's Gaming Week sale, its slightly less-powerful little brother, the [Razer viper](#), is. Amazon is giving you £25 off its usual price – a 31 per cent saving.

The Razer viper has a 5G optical sensor, engineered with up to 16,000 dpi sensitivity and a 99.4 per cent resolution accuracy. It only weighs 69g and boasts an ambidextrous chassis instead of a skeletal body. There's also a speed flex cable for minimal drag and smooth control.

[Buy now](#)

Corsair katar pro XT: Was £34.99, now £24.99, [Amazon.co.uk](#)

Corsair's ultra-light gaming mouse is one of our favourite budget options, and the pro XT made it into our round-up of the [best gaming mice](#) – it's £10 cheaper during Gaming Week. In our gaming mice round-up, our reviewer said that it is "designed with FPS and MOBA games in mind", and that "it offers an 18,000 dpi optical sensor that can be easily customised in one dpi increments if needed".

According to Corsair, the Omron switches in the device are guaranteed for 50 million clicks, although obviously we weren't in a position to confirm that. "Response times when clicking feel instant to the human eye and its highly lightweight design (of just over 70g) is ideal if you need the lightest mouse possible," our reviewer added. Plus you can switch profiles at the click of a button, handy if you need different setups for different games.

[Buy now](#)

Corsair M65 RGB elite: Was £59.99, now £39.99, [Amazon.co.uk](#)

Another Corsair mouse which made it onto our round-up of the [best gaming mice](#) is on sale right now. The M65 RGB lite is just £39.99 at the moment, giving you a nice saving of £20. In our gaming mice round-up, our reviewer said that it offers a few notable features over its rivals, including adjustable weights that you can add or remove to ensure you get the correct feeling in your hand.

Alongside that are some neatly located programmable buttons – there are eight in all, "including one with crosshairs on it that is referred to as a "sniper button". Well placed, they're ideally suited for FPS gaming and "do feel like they make a difference as you play", our reviewer added. It's a chunkier mouse than others, so it's more suited to bigger hands and it has a dpi optical sensor of 18,000, with the ability to adjust it in one dpi increments.

[Buy now](#)

Asus ROG strix impact II: Was £69.99, now £54.99, [Amazon.co.uk](#)

While the Asus ROG pugio II, featured in our round-up of the [best gaming mice](#), isn't on sale at the moment, the Asus ROG strix impact II is. You can currently get £15 off its usual price of £69.99.

The mouse has a 16,000 dpi, 400 IPS optical sensor and up to 89 hours of battery life if you leave the RGB lighting off. The company's "smarthop" technology always switches to the cleanest channel, giving you smooth control.

There's also a pivoted button mechanism for faster and more responsive mouse clicks, and an on-the-fly dpi button to help you adjust the sensitivity of the mouse without having to navigate into the settings.

[Buy now](#)

Best gaming headset deals

Razer kraken tournament edition: Was £99.99, now £58.99, [Amazon.co.uk](#)

The Razer kraken X makes a noble appearance in our round-up of the [best gaming headsets](#), and the tournament edition of the kraken is just as good. You can save a whopping £41 during the Gaming Week sales on Amazon.

The kraken has full audio controls thanks to the USB audio controller, letting you turn on THX spatial audio for 360-degree sound, control over both the volume and bass levels and even configure the game and chat balance, ensuring your teammates never overpower the game audio or vice versa.

The headset features custom-tuned 50mm drivers, providing you with a wide soundscape so that you can hear those subtle footsteps sneaking up behind you, as well as the boom of those gunfights and explosions.

[Buy now](#)

Astro A10 gaming headset: Was £59.99, now £49.79, [Amazon.co.uk](#)

Although the wireless Astro A50, which features in our round-up of the [best wireless gaming headsets](#), isn't on sale at the moment, the wired Astro A10 are only £49.79. The A10 has a neutral sound spectrum, delivering you true-to-life sound.

The A10 prioritises comfort, with Astro saying that it has been designed for marathon gaming sessions, with cloth and synthetic leather ear cushions for comfort and acoustic performance. Plus the brand says that they fit comfortably, even if you're gaming with a VR headset.

[Buy now](#)

Best gaming keyboard deals

Razer blackwidow V3 pro: Was £249.99, now £149.99, [Amazon.co.uk](#)

The pro version of the blackwidow gaming keyboard currently has a massive £100 off its usual price. The standard blackwidow V3 keyboard appears on our round-up of the [best gaming keyboards](#) and the blackwidow V3 pro is a step up from that.

The V3 pro takes advantage of Razer's "hyperspeed" wireless technology, but also lets you connect up to three devices using Bluetooth. You can toggle between them seamlessly with one switch. There's also a transparent switch housing, letting you see those dynamic lighting customisations.

The V3 pro keycaps also have extra-thick walls which make them tough enough to withstand constant spamming of the trigger button.

[Buy now](#)

Asus ROG strix scope RX: Was £124.99, now £99.99, [Amazon.co.uk](#)

Another gaming peripheral that appears on one of our round-ups is on sale this week. The Asus ROG strix scope RX is one of our [best gaming keyboards](#), and it's aimed squarely at those who play first-person shooters.

It has an extended left ctrl button for easy crouching and a compact design to give players maximum mouse movement. It also has a "stealth" button to instantly hide everything on screen. In our round-up, our reviewer said that they found the keys a little too sensitive for day-to-day typing and gaming, "but for twitchy FPS, that mild negative can easily be recast as a positive".

On top of that, our reviewer added that "the construction is solid, it feels robust and it's even IP56-certified for protection against water and dust, meaning gamers can drink nearby with confidence".

[Buy now](#)

Best gaming monitors and gaming laptop deals

Samsung LC49RG90SSUXEN 49in curved LED gaming monitor: Was £1,099.99, now £799, [Amazon.co.uk](#)

This massive 49in dual QHD curved gaming monitor is the equivalent of two 27in QHD displays put side by side, and it now has £300.99 off in the Amazon Gaming Week sale. It has a smooth 120Hz refresh rate with AMD free sync 2 technology, so you get crisp HDR content, supporting a peak brightness rating of 1,000 nits.

On top of that, the Samsung LC49RG90SSUXEN also has a super ultra-wide 32:9 (5120x1440) aspect ratio, ensuring the display curves around your field of view so that you feel like you're really in the action.

[Buy now](#)

LG Ultragear 27GL83A-B 27in gaming monitor: Was £439.99, now £369.99, [Amazon.co.uk](#)

If you're in the market for something a little smaller than the gigantic Samsung gaming display, then the LG UltraGear might do it for you. It's a 27in QHD gaming monitor and it currently has £70 off.

It has an ultra-smooth 144Hz refresh rate, and is G-Sync compatible, meaning that any screen tearing or stuttering will be eliminated, keeping you ahead of the game. Dynamic action sync also reduces any input lag you might have. For any FPS gamers, LG says the crosshair is perfectly centred to increase your shooting accuracy.

[Buy now](#)

HP pavilion 15.6in 15-dk1019na full HD gaming laptop: Was £1,149.99, now £899.99, [Amazon.co.uk](#)

This HP Pavilion laptop is powered by a 10th-generation Intel Core i7-10750H processor for gaming and multitasking. It's got improved thermal cooling for overall performance and stability. High-grade graphics come built-in thanks to the NVIDIA GeForce GTX 1660 Ti graphics card.

There's also a dual-fan system for enhanced thermal cooling which will keep your laptop from overheating when you're in a long gaming session. You can currently get £250 off the original price this Gaming Week.

CORSAIR is one of the better-known PC gaming and hardware companies, so deals on its products tend to be popular.

Handily, we've spotted some solid discounts on the brand during Amazon's ongoing Gaming Week offers.

This article and featured products have been independently chosen by Sun journalists. It contains links which are ads, and if you click a link and buy a product we will earn revenue.

PC gamers looking for keyboards or gaming mice are often expected to pay high prices.

Amazon's current Corsair deals represent some good value then, with up to 33% off across offers.

* Save 33% on Corsair PC gaming accessories at Amazon – [buy here](#)

The Corsair PC gaming deals end in four days though, so if you are looking for a new bit of kit make sure to check them out soon.

There are three Corsair mice featured in the offers: the Katar Pro XT Ultra-Light, Corsair Harpoon Wireless RGB model and Corsair's M65 Elite RGB Optical model.

Each will suit slightly different needs, with the M65 Elite being best for those wanting additional controls within fingers' reach thanks to its eight programmable buttons.

For keyboards, the offers are on Corsair's K68 RGB and K70 MK.2 mechanical models – both usually firmly north of £100.

While the K68 is now down to £84.99, saving £35, the K70 is currently at £109, saving £51. Both are top offers for highly rated gaming keyboards.

There are other select accessories available for less while the offers are live: Corsair's MM800 and MM150 mouse pads are each 33 per cent off.

Additionally, the company's iCUE LS100 Smart Lighting Strip expansion kit is £20.47 off.

* Save 33% on Corsair PC gaming accessories at Amazon – [buy here](#)

All prices in this article were correct at the time of writing, but may have since changed. Always do your own research before making any purchase.

Amazon's gaming laptop deals mean savings on Asus, HP, Dell and more.

AMAZON'S new gaming laptop deals are part of the giant's Gaming Week offers.

We've had a look at the offers and picked out a few top options.

This article and featured products have been independently chosen by Sun journalists. It contains links which are ads, and if you click a link and buy a product we will earn revenue.

It isn't often you find several top laptop brands with discounts in one place.

That makes Amazon's gaming laptop deals well worth a browse, as ASUS, HP, Dell, MSI and Lenovo products all included.

* Amazon's gaming laptop deals – [shop here](#)

The top deal we've spotted offers a saving of £383, but there are several decent discounts to consider.

As with any big purchase, it's important to be sure you're getting what you need for your money.

When it comes to gaming laptops, consider the specifications and whether the CPU, RAM and hard drive all offer performance (speed or capacity) you're happy with.

It is also important to consider the graphics solution any laptop makes use of, the display size and whether you can play at the settings you want to.

For example, an Ultra HD 4K-capable gaming laptop will be pricier than one rated for 1080p Full HD.

Pricier models may also feature specific features like branded speakers, which can add to the price – check whether you'll want or use these to make sure you're getting best value.

Here are our top picks of Amazon's gaming laptops deals.

* ASUS ROG Zephyrus S15 GX502LXS 15.6" Gaming Laptop, £1,999 (save £383.98) – [buy here](#)

* HP Pavilion 15-dk1019na 15.6 Inch Gaming Laptop, £899 (save £250) – [buy here](#)

* Lenovo Legion 5 15.6 Inch Gaming Laptop, £779.99 (save £70) – [buy here](#)

* Dell G5 15.6 Inch Gaming Laptop, £879 (save £220) – [buy here](#)

All prices in this article were correct at the time of writing, but may have since changed. Always do your own research before making any purchase.

You can save £51 on Panasonic's SoundSlider Gaming Speaker on Amazon.

Looking for more tech offers? Take a look at our dedicated tech deals section.

Keen on the latest discounts and vouchers? Check Sun Vouchers.

Ready to upgrade your current rig with a new [gaming laptop](#)? New models are rolling out with Nvidia's latest GeForce RTX 3000 series graphics, and there are bigger discounts to be found on older but still powerful gaming laptops. And if you're [working from home](#), a gaming laptop can double as an overqualified office machine.

Check out the picks here, all of which are currently discounted at Amazon, Dell, Best Buy or Newegg. Two are actually not on sale, just dirt cheap -- a budget Acer Nitro 5 that's about as inexpensive as a gaming laptop gets (though not as cheap as it was last month) and another that's the lowest-cost laptop I've found with RTX 3060 graphics.

Be sure to check back; I'll update this story regularly to include new deals as they emerge.

Read more: [Best gaming laptop to buy for 2021](#)

Acer Nitro 5: \$720

Low list price

[Click to view image.](#)

Sarah Tew/CNET

It's no longer a steal -- it was \$600 last month -- but the Nitro 5 is still a solid buy at its list price of \$720. It features a 15.6-inch, full HD display powered by a ninth-gen Intel Core i5 CPU, 8GB of memory and Nvidia GeForce GTX 1650 graphics. The GTX GPU lacks the ray tracing of Nvidia's current RTX lineup but should let you play Fortnite and other casual games at medium settings at 1080p and 60 frames per second.

[\\$720.00 AT AMAZON](#)

Dell G3 15: \$750

Save \$250

[Click to view image.](#)

Sarah Tew/CNET

This entry-level Dell G3 15 gaming laptop is based on the GeForce GTX 1650 TI GPU and features a 10th-gen Core i5 CPU, 8GB of RAM and a 512GB solid-state drive. The 15.6-inch display features a full HD resolution and a 120Hz refresh rate. You won't be able to run the latest AAA titles, but it can play older games such as Fortnite and CS:GO at full HD resolution.

[\\$750.00 AT BEST BUY](#)

Dell G3 15: \$990

Save \$200

[Click to view image.](#)

Sarah Tew/CNET

This Dell G3 15 gaming laptop model is discounted by \$200 and doubles the RAM to 16GB and bumps up the graphics a notch to the GeForce GTX 1660 Ti GPU. It'll let you play less demanding games at 1080p and 60 frames per second.

[\\$990.00 AT DELL](#)

Gigabyte G5 KC-5US1130SH : \$1,199

Low list price

[Click to view image.](#)

Newegg

This Gigabyte isn't on sale but is the lowest-cost laptop I've seen with Nvidia GeForce RTX 3000 series graphics. It features the RTX 3060 GPU along with a 10th-gen Core i5 CPU, 16GB of RAM and a 512GB SSD. The 15.6-inch screen has full HD resolution and a 144Hz refresh rate.

[\\$1,199.00 AT NEWEGG](#)

Asus ROG Zephyrus M15: \$1,250

Save \$300

[Click to view image.](#)

ASUS

The Asus ROG Zephyrus is the company's thinnest, most compact gaming laptop. Despite its trim dimensions, the ROG Zephyrus does not sacrifice performance. It offers the latest silicon from AMD and Intel as well as GPUs from Nvidia's GeForce RTX line. This model features a 10th-gen Intel Core i7 CPU, 16GB of RAM, a roomy 1TB SSD and Nvidia GeForce RTX 2060 graphics. The RTX 2060 is the budget card in Nvidia's RTX 2000-series lineup and offers excellent bang for the buck along with ray tracing, which reproduces how light behaves in the real world to give games a more photorealistic look. The 15-inch display features a 4K (3,840x2,160-pixel) resolution but only a 60Hz refresh rate.

[\\$1,250.00 AT BEST BUY](#)

Razer Blade 15 (renewed): \$1,399

Save \$610

[Click to view image.](#)

Sarah Tew/CNET

IMHO, this is the best-looking gaming laptop on the market. Impossibly thin for a high-powered gaming laptop with a sleek, slab look, this 15.6-inch Razer Blade laptop also boasts a powerful, smart component lineup. This renewed/refurbished model pairs a ninth-gen Intel Core i7 CPU with Nvidia GeForce RTX 2070 Max-Q graphics and supplies an ample 16GB of RAM and a 512GB SSD. The 15.6-inch screen has full HD resolution and a lightning-fast 240Hz refresh rate.

[\\$1,399.00 AT AMAZON](#)

Asus ROG Zephyrus 14: \$1,450

Save \$50

[Click to view image.](#)

Granted, the \$50 discount is modest, but any price break on a laptop with a GPU from Nvidia's new RTX 3000 series is noteworthy. This model boasts an unusual AMD and Nvidia mix. It pairs Nvidia GeForce RTX 3060 graphics with an AMD Ryzen 9 CPU. It also supplies an ample 16GB of RAM and a roomy 1TB SSD. The 14-inch screen has 1,920x1,080-pixel resolution and a speedy 144Hz refresh rate.

[\\$1,450.00 AT BEST BUY](#)

More for gamers

BASS BOOST Save £51 on Panasonic's SoundSlayer Gaming Speaker on Amazon

Kevin Pocock

404 words

11 May 2021

00:00

thescottishsun.co.uk

THESCOT

English

© 2021 News Group Newspapers Ltd. All rights reserved

AMAZON'S gaming week deals have kicked off with a bang, or at least some serious sound effects.

Panasonic's SoundSlayer speaker is in the early deals, and ready to amp things up.

This article and featured products have been independently chosen by Sun journalists. It contains links which are ads, and if you click a link and buy a product we will earn revenue.

The SoundSlayer is £250-worth of audio accessory designed for console or PC gamers.

Its usual price has been cut by £51 though, as Amazon's Gaming Week deals drop it to £200.

A £50 saving on a speaker setup isn't too shabby, especially if you prefer atmospheric audio as a break from headphones.

Panasonic's SC-HTB01 SoundSlayer is styled as a gaming speaker, which requires it to have some decent bass.

Afterall, you certainly don't want to be without any low-end for proper gaming audio – so it's just as well the 2.1 channel device has a built-in sub-woofer.

* Panasonic SC-HTB01 SoundSlayer 2.1 Gaming Speaker, £199 (save £50.99) – [buy here](#)

That should help with sound for cinematic environments or in first-person gaming where bass adds depth to gameplay. The speaker even has three game modes developed in partnership with Square Enix's FFXIV Online sound team.

For tech specs, the SoundSlayer supports Dolby Atmos and DTS:X and connects via HDMI and Bluetooth. That means it should connect to most devices, although it is designed specifically for gaming audio.

[Prime members](#) can get free premium delivery on the speaker if you do want to pick it up speedily. If you're not looking to make a snap decision, the deal is on for six more days; but it looks a solid option to us.

* Panasonic SC-HTB01 SoundSlayer 2.1 Gaming Speaker, £199 (save £50.99) – [buy here](#)

All prices in this article were correct at the time of writing, but may have since changed. Always do your own research before making any purchase.

Elsewhere, WD's 1TB MyPassport SSD drive is £97 OFF and works with Xbox, Playstation and PC.

Best GeForce RTX 3000 gaming desktop deals from Amazon, Best Buy and Newegg

Matt Elliott

545 words

3 May 2021

CNET News.com

CNEWSN

English

(c) CNET Networks Inc. All Rights Reserved.

DIY gamers are having a devil of a time finding standalone [Nvidia GeForce RTX 3000 series graphics cards in stock](#), but if you aren't looking to build your own gaming PC, you can find some reasonably priced, off-the-shelf gaming desktops with Nvidia's latest GPU.

Read more: [The best graphics card for 2021](#)

Amazon, Best Buy and Newegg have some inventory of RTX 3000 gaming desktops from vendors including ABS, Acer, Alienware, HP and SkyTech. After taking a look at the PCs that each site has in stock, here are the best deals I found, from relatively inexpensive desktops with RTX 3060 graphics to a fully loaded beast with an RTX 3090 GPU.

Check back -- I'll keep this list updated as I find new deals on RTX 3000 series gaming desktops.

HP Omen GT13-1074: \$1,250

RTX 3060 graphics on the cheap

[Click to view image.](#)

HP

This is the least expensive PC I could find with Nvidia's latest GPU. It features an unusual marriage between AMD and Nvidia, with an AMD Ryzen 5 CPU and an Nvidia GeForce RTX 3060 GPU. The imposing, jet-black tower also includes 16GB of RAM and a 1TB solid-state drive.

[\\$1,250.00 AT BEST BUY](#)

Acer Predator Orion 3000: \$1,700

Affordable RTX 3070 graphics

[Click to view image.](#)

Newegg

This Acer model is the lowest-cost desktop I could find with RTX 3070 graphics. It also features an Intel Core i7 CPU, 16GB of RAM, a 512GB SSD and a 1TB hard drive.

[\\$1,700.00 AT NEWEGG](#)

SkyTech Archangel 3.0: \$1,800

RTX 3060 GPU with 600-watt PSU

[Click to view image.](#)

Amazon

This SkyTech PC features the same Ryzen 5 3600 CPU and GeForce RTX 3060 as the above HP Omen model and also supplies 16GB of RAM and a 1TB SSD. What it adds to the mix is a beefier power supply (600 watts to the HP's 500-watt PSU) and RGB lighting to add a bit of bling to your rig.

[\\$1,800.00 AT AMAZON](#)

Alienware Aurora R12: \$1,900

RTX 3070 power for less than \$2,000

[Click to view image.](#)

This funky, futuristic looking Alienware unit is one of the few systems that has the GeForce RTX 3070 GPU and costs less than \$2,000. It features an Intel Core i7 CPU, 16GB of RAM, a 256GB SSD along with a 1TB hard drive. It's available in-store only so you'll need to check availability near you.

[\\$1,900.00 AT BEST BUY](#)

ABS Legend ALI511: \$3,800

RTX 3090 graphics at a nonexorbitant cost

[Click to view image.](#)

Newegg

Ready to blow it out? When you consider that many gaming PCs with Nvidia's latest GPUs cost \$5,000 and up, this ABS monster at less than \$4,000 starts to look reasonable. And it's currently on sale with a \$200 discount. It features the RTX 3090, the top GPU in Nvidia's new lineup. It also boasts a 10-core Core i9 CPU, a bountiful 32GB of RAM, a 1TB SSD and an 850-watt power supply.

Logitech Gaming Products Now Labeled Climate Pledge Friendly on amazon.com

Logitech

493 words

3 May 2021

3BL Media

BLMD

English

Copyright 2021. 3BL Media, LLC.

Logitech Gaming Products are now signposted on amazon.com as “Climate Pledge Friendly”. This means eco-conscious consumers can also search for devices, which are “Climate Pledge Friendly” and find our gaming products – LogitechG and ASTRO Gaming. This innovation has been rolled out on amazon.com and the majority of Amazon’s European platforms to date, with plans to extend it to all countries worldwide later this year.

What is Amazon’s Climate Pledge Friendly Program?

Amazon launched its Climate Pledge Friendly Program late last year, to help customers discover and shop for more sustainable products. The goal of the Climate Pledge Friendly Program is to empower consumers to use their spending power to signal their interest in sustainability and push companies to transform how products are made and designed for sustainability. While searching for products on Amazon, customers can now see the Climate Pledge Friendly label on eligible products and learn more about the [certifications](#) that make a product Climate Pledge Friendly, as well as use the Climate Pledge Friendly filter to see all the products within a specific category that are climate-friendly. The same signposting will be implemented on Amazon platforms worldwide, in the next few months.

As Cyrus Wadia, Worldwide Head of Sustainable Products at Amazon, commented: “We’re making it easy for customers around the world to take steps to reduce their impact on the environment, including swapping out everyday products for more sustainable options.

Why are Logitech gaming products Climate Pledge Friendly?

Logitech gaming products are certified CarbonNeutral(R). Carbon Neutral certification is one of the [many certifications](#) Amazon has chosen to recognize at this stage, on their platform.

How did Logitech gaming products achieve CarbonNeutral certification?

In 2019, we quantified the environmental impact (carbon footprint) of the full Logitech G and ASTRO Gaming portfolio – from end to end – all materials, design and manufacturing activities, shipment, use phase, and end of life. Each year, we achieve significant carbon reductions through sustainable design efforts e.g. use of lighter weight materials, reduced packaging. We also achieve carbon reductions by purchasing renewable electricity for our own factory and many of the factories that manufacture gaming products.

For the carbon we could not design out of the product, we collaborated with Natural Capital Partners to identify and apply certified carbon offset instruments to address the remaining carbon footprint of each device. All our carbon instruments are third-party certified and aligned with the United Nations Sustainable Development Goals. In many cases, we have chosen to support forestry conservation programs, which are certified [REDD+](#) and reverse forest degradation, to conserve existing forestry stocks and associated biodiversity.

Tweet me: [Through its work with @NatCap Partners, @LogitechG gaming products are certified #CarbonNeutral and now carry the Climate Pledge Friendly badge on @amazon. These badges and the company's own carbon labeling allow gamers to shop sustainably: https://bit.ly/3t9TYOV](#)

Ready to upgrade your current rig with a new [gaming laptop](#)? New models are rolling out with Nvidia's latest GeForce RTX 3000 series graphics, and there are bigger discounts to be found on older but still powerful gaming laptops. And if you're [working from home](#), a gaming laptop can double as an overqualified office machine.

Check out the picks here, all of which are currently discounted at Amazon, Dell, Best Buy or Newegg. Two are actually not on sale, just dirt cheap -- a budget Acer Nitro 5 that's about as inexpensive as a gaming laptop gets and another that's the lowest-cost laptop I've found with RTX 3060 graphics.

Be sure to check back; I'll update this story regularly to include new deals as they emerge.

Read more: [Best gaming laptop to buy for 2021](#)

Acer Nitro 5: \$650

Low list price

[Click to view image.](#)

Sarah Tew/CNET

The \$50 discount has disappeared, but the Nitro 5 is still a solid buy at its list price of \$650. It features a 15.6-inch, full HD display powered by a ninth-gen Intel Core i5 CPU, 8GB of memory and Nvidia GeForce GTX 1650 graphics. The GTX GPU lacks ray tracing of Nvidia's current RTX lineup but should let you play Fortnite and other casual games at medium settings at 1080p and 60 frames per second.

[\\$650.00 AT AMAZON](#)

Dell G3 15: \$750

Save \$250

[Click to view image.](#)

Sarah Tew/CNET

This entry-level Dell G3 15 gaming laptop is based on the GeForce GTX 1650 TI GPU and features a 10th-gen Core i5 CPU, 8GB of RAM and a 512GB SSD. The 15.6-inch display features a full HD resolution and a 120Hz refresh rate. You won't be able to run the latest AAA titles, but it can play older games such as Fortnite and CS:GO at full HD resolution.

[\\$750.00 AT BEST BUY](#)

Dell G3 15: \$990

Save \$200

[Click to view image.](#)

Sarah Tew/CNET

This Dell G3 15 gaming laptop model is discounted by \$200 and doubles the RAM to 16GB and bumps up the graphics a notch to the GeForce GTX 1660 Ti GPU. It'll let you play less demanding games at 1080p and 60 frames per second.

[\\$990.00 AT DELL](#)

MSI GF65 Thin 10UE-092: \$1,249

Low list price

[Click to view image.](#)

Screenshot by Matt Elliott/CNET

This MSI laptop isn't on sale but I'm including it here because it's the lowest-cost laptop I've seen with Nvidia GeForce RTX 3000 series graphics. It features the RTX 3060 GPU along with a 10th-gen Core i7 CPU, 8GB of RAM and a 512GB SSD. The 15.6-inch display features a full HD resolution and a 144Hz refresh rate.

[\\$1,249.00 AT NEWEGG](#)

Asus ROG Zephyrus M15: \$1,250

Save \$300

[Click to view image.](#)

ASUS

The Asus ROG Zephyrus is the company's thinnest, most compact gaming laptop. Despite its trim dimensions, the ROG Zephyrus does not sacrifice performance. It offers the latest silicon from AMD and Intel as well as GPUs from Nvidia's GeForce RTX line. This model features a 10th-gen Intel Core i7 CPU, 16GB of RAM, a roomy 1TB SSD and Nvidia GeForce RTX 2060 graphics. The RTX 2060 is the budget card in Nvidia's RTX 2000-series lineup and offers excellent bang for the buck along with ray tracing, which reproduces how light behaves in the real world to give games a more photorealistic look. The 15-inch display features a 4K (3,840x2,160-pixel) resolution but only a 60Hz refresh rate.

[\\$1,250.00 AT BEST BUY](#)

Razer Blade 15 (renewed): \$1,399

Save \$610

[Click to view image.](#)

Sarah Tew/CNET

IMHO, this is the best-looking gaming laptop on the market. Impossibly thin for a high-powered gaming laptop with a sleek, slab look, this 15.6-inch Razer Blade laptop also boasts a powerful, smart component lineup. This renewed/refurbished model pairs a ninth-gen Intel Core i7 CPU with Nvidia GeForce RTX 2070 Max-Q graphics and supplies an ample 16GB of RAM and a 512GB SSD. The 15.6-inch display features a full HD resolution and a lightning-fast 240Hz refresh rate.

[\\$1,399.00 AT AMAZON](#)

Asus ROG Zephyrus 14: \$1,450

Save \$50

[Click to view image.](#)

Granted, the \$50 discount is modest, but any price break on a laptop with a GPU from Nvidia's new RTX 3000 series is noteworthy. This model boasts an unusual AMD and Nvidia mix. It pairs Nvidia GeForce RTX 3060 graphics with an AMD Ryzen 9 CPU. It also supplies an ample 16GB of RAM and a roomy 1TB SSD. The 14-inch display features a 1,920x1,080-pixel resolution and a speedy 144Hz refresh rate.

[\\$1,450.00 AT BEST BUY](#)

HP Omen 15: \$1,450

Save \$300

[Click to view image.](#)

Best Buy

This HP Omen 15 model boasts a 4K display powered by GeForce RTX 2070 graphics, a 10th-gen Core i7 CPU and 16GB of RAM. It also offers plenty of room to store games with a huge 1TB SSD.

[\\$1,450.00 AT BEST BUY](#)

Amazon opens its first hairdresser with virtual reality, QR... and a lot of marketing

612 words

23 April 2021

CE NoticiasFinancieras

NFINCE

English

Copyright © Content Engine LLC

Everything points to a marketing campaign without a strategy of expansion in new sectors, but the truth is that Amazon's new project represents a statement of intent by the e-commerce giant: the beauty and personal care sector, with technological applications, is one of its business objectives.

If Amazon first tried supermarkets without CASHiers, now it's time for a foray into the beauty market. The technology platform has opened a hairdresser's in London. A beauty salon, a lifelong salon. It has hairdressers, armchairs, sinks, mirrors, scissors, dyes... and the application of augmented reality technologies, tablets and QR codes in all products.

At the Amazon Lounge, customers can experiment with different cuts or hair colors using virtual reality to get an idea of the result and, if it convinces them, then put it into practice. While customers wait or are taken care of, they will be able to enjoy entertainment on Fire tablets in each styling chair and analyze their new look in a creative area.

The hairdresser will also integrate point and learn technology, with which users can point the product they are interested in on a shelf and receive information, including videos and other data, that will appear on a screen. To purchase shampoos, creams and masks, customers can scan the QR code, visit The Amazon page and purchase it, with direct delivery at home.

Unlike the e-commerce company's ATM-free grocery stores, which have been expanding through London, the Amazon Lounge is not aiming to be the start of growth in this sector. "This will be an experimental place, where we show new products and technology, and there are no current plans to open other Amazon salons," the company says on its blog.

Located on Brushfield Street, hairdressing is an initiative "designed to support the professional beauty industry". It arrives after the launch of Amazon's Professional Beauty Store in the UK. This new store seeks to attract hairdressing and aesthetic companies to a catalog of "more than ten thousand products and supplies for salons and spas".

Small locals

The hairdressing room is not very large, as it has a size of about 140 square meters, with two floors. The hairdressing and styling services of the Amazon hairdresser are run by Elena Lavagni and her team, who manage the Neville Hair & Beauty Salon. The Amazon Lounge will offer a full range of hairdressing services for adults and children, such as cutting and drying, color and wicks, treatments and hairstyles.

The store will offer professionals advantages such as prices and wholesale billing, with no minimum order value, and fast delivery methods.

Initially, hairdressing services will only be available to Amazon employees, although the company expects to open it to the general public in the coming weeks.

"We designed this salon for customers to come and experience some of the best technologies, hair care products and stylists in the industry," says John Bounphrey, Amazon's UK director, on the company's blog.

Amazon has tested in recent years with different formats of physical stores to approach consumers not only virtually. In addition to Amazon Go supermarkets, a store without ATMs. He has also experimented with limited-term stores, where some items from the online store are displayed and sold.

After these small premises, the technology company launched to open a larger store, Amazon Go Grocery, a format five times larger than Amazon Go and of which it has two establishments (in Seattle and Redmond) with about 5,000 items for sale and a size of about 1,000 square meters.

Logitech International SA - Logitech Gaming Products now labeled Climate Pledge Friendly on amazon.com

Logitech Gaming Products now labeled Climate Pledge Friendly on amazon.com

As of this week, Logitech Gaming Products are now signposted on amazon.com as 'Climate Pledge Friendly'. This means eco-conscious consumers can also search for devices , which are 'Climate Pledge Friendly' and find our gaming products - LogitechG and ASTRO Gaming. This innovation has been rolled out on amazon.com and the majority of Amazon's European platforms to date, with plans to extend it to all countries worldwide later this year.

What is Amazon's Climate Pledge Friendly Program?

Amazon launched their Climate Pledge Friendly Program late last year, to help customers discover and shop for more sustainable products. The goal of the Climate Pledge Friendly Program is to empower consumers to use their spending power to signal their interest in sustainability and push companies to transform how products are made and designed for sustainability. While searching for products on Amazon, customers can now see the Climate Pledge Friendly label on eligible products and learn more about the [certifications](#) that make a product Climate Pledge Friendly, as well as use the Climate Pledge Friendly filter to see all the products within a specific category that are climate-friendly. The same signposting will be implemented on Amazon platforms worldwide, in the next few months.

As Cyrus Wadia, Worldwide Head of Sustainable Products at Amazon, commented: 'We're making it easy for customers around the world to take steps to reduce their impact on the environment, including swapping out everyday products for more sustainable options.

Why are Logitech gaming products Climate Pledge Friendly?

Logitech gaming products are certified CarbonNeutral (R) . Carbon Neutral certification is one of the [many certifications](#) Amazon has chosen to recognize at this stage, on their platform.

How did Logitech gaming products achieve CarbonNeutral certification?

In 2019, we quantified the environmental impact (carbon footprint) of the full Logitech G and ASTRO Gaming portfolio - from end to end - all materials, design and manufacturing activities, shipment, use phase and end of life. Each year, we achieve significant carbon reductions through sustainable design efforts e.g. use of lighter weight materials, reduced packaging. We also achieve carbon reductions by purchasing renewable electricity for our own factory and many of the factories that manufacture gaming products.

For the carbon we could not design out of the product, we collaborated with Natural Capital Partners to identify and apply certified carbon offset instruments to address the remaining carbon footprint of each device. All our carbon instruments are third-party certified and aligned with the United Nations Sustainable Development Goals. In many cases, we have chosen to support forestry conservation programs, which are certified [REDD+](#) and reverse forest degradation, to conserve existing forestry stocks and associated biodiversity.

Celebrate on Social Media

Twitter: Through our work with @NatCap_Partners, Logitech G gaming products are certified CarbonNeutral and now carry the Climate Pledge Friendly badge on @amazon. These badges and our carbon labeling announced earlier allow gamers to shop sustainably. ([Click to Tweet!](#))

LinkedIn: Logitech G gaming products are certified CarbonNeutral® and now carry the Climate Pledge Friendly badge on @Amazon to help customers shop more sustainably. We're proud to work with @Natural Capital Partners to make sustainably-certified products available to our customers. Watch for the icon when you shop. #carbonneutral #earthday2021 #restoreourearth #climateaction #ClimatePledgeFriendly

Take a look inside Wall Street darling Ryan Cohen's ambitious plan to 'transform' the retailer into the Amazon of gaming (GME)

feedback@businessinsider.com (Ben Gilbert)

1,001 words

20 April 2021

19:59

Summary List Placement

What does [Ryan Cohen](#) want with GameStop ?

That's the big, unanswered question at the heart of his 12.9% ownership stake in the company — an investment he made well before GameStop became a meme stock.

Cohen, who cofounded Chewy and acted as CEO before it sold to PetSmart for \$3.35 billion in 2017, does not have a background in the video game industry. His claim to fame is outfoxing Amazon at its own game — e-commerce — in a specific category: pets. That's an especially meaningful claim to fame when it comes to Wall Street, which saw Cohen's involvement in the company as [a reason to buy the ailing retailer's stock](#) before Reddit found it.

Read more: [Ryan Cohen made millions when Chewy got acquired. Now the millennial entrepreneur has a plan to turn around GameStop.](#)

But Cohen is no casual investor in GameStop — he's the chairman of its board, and an activist investor who has successfully lobbied the company to follow his advice several times thus far. He is clearly in this for the long term.

Though the lingering question of "Why GameStop ?" remains unanswered, we know a lot about Cohen's plans for the future of the company.

1. Cohen wants GameStop to become a technology company, with a focus on ecommerce over brick-and-retail stores.

Cohen's investment firm, RC Ventures, owns 12.9% of GameStop . That stake makes it the second-largest single shareholder of GameStop .

Those shares cost tens of millions of dollars in 2020, and they put Cohen in a position to more directly engage with the company's leadership. But those private conversations apparently didn't go very well.

"Given that our attempts to privately engage with you since the summer have yielded little progress, we feel compelled to send a clear message to the Board today," Cohen wrote in [an open letter aimed at GameStop's board of directors](#) published in November 2020.

"GameStop 's leadership should immediately conduct a strategic review of the business," he said, "and share a credible plan for seizing the tremendous opportunities in the rapidly-growing gaming sector."

The letter, overwhelmingly, focused on the company's need to transition to ecommerce.

"GameStop 's challenges stem from internal intransigence and an unwillingness to rapidly embrace the digital economy," the letter said. "GameStop needs to evolve into a technology company that delights gamers and delivers exceptional digital experiences — not remain a video game retailer that overprioritizes its brick-and-mortar footprint and stumbles around the online ecosystem."

Throughout his letter, Cohen directly criticizes the company's leadership — both its executive suite and its board of directors, to whom the letter is addressed.

GameStop CEO and board member George Sherman , "appears committed to a twentieth-century focus on physical stores and walk-in sales, despite the transition to an always-on digital world," Cohen said, and the

board lacks "the type of strategic vision" necessary for GameStop , "to pivot toward becoming a technology-driven business that excels in the gaming and digital experience worlds."

That criticism appeared to have a major impact, as GameStop [announced in early January](#) that Cohen and two of his former Chewy lieutenants would become new members of the board. Soon after, Cohen was put in charge of a committee created to reshape GameStop and appointed the chairman of its board.

2. He's swapping the company's current leadership, both its board and c-suite, for former Amazon and Chewy leaders.

Since Cohen joined GameStop 's board and was [put in charge of the Strategic Planning and Capital Allocation Committee](#) , the company's entire executive suite has been cleared out.

That includes CEO George Sherman , who is stepping down in the near future, and CFO Jim Bell, who [was suddenly forced out of his role at the company](#) after the board of directors "lost faith" in him, according to a person familiar with the decision who spoke with Insider. At the same time, a gaggle of former Amazon and Chewy leaders have been elected in their place.

Similarly, the company's board of directors is being completely flipped — at the company's annual shareholder meeting in June, it plans to elect a small group of Cohen's colleagues to the board. And Cohen is expected to be elected chairman of the board.

In the last six months, Cohen has completely reshaped the leadership of GameStop .

3. The potential future of GameStop : online trade-ins.

Game trade-ins, and their subsequent resale, are the lifeblood of GameStop .

In September 2020, when Cohen initially purchased a significant chunk of the company's shares, he privately proposed a plan to the board to focus GameStop on e-commerce opportunities.

One example of those opportunities is tied to GameStop 's core business: reselling used games.

Cohen [reportedly](#) proposed an online version of the retailer's (in)famous game trade-in program.

During those talks, he proposed a major expansion of GameStop 's online footprint, according to Bloomberg. Beyond just games, GameStop 's online store would offer "a wide range of merchandise," the report said, and prioritize fast shipping.

Cohen has yet to publicly spell out his specific plans, and representatives repeatedly declined requests for comment.

Amazon cancels Lord of the Rings MMO, in latest blow to gaming division

Henry St Leger

567 words

19 April 2021

TechRadar

TECHR

English

© 2021. Future Publishing Ltd. All Rights Reserved

The teamup Lord of the Rings MMO between Amazon Games Studios and Athlon Games appears to have been cancelled.

The Lord of the Rings MMO is no more, it seems, with [Bloomberg](#) reporting that the Amazon Game Studios title is no longer being worked on.

The MMO, inspired by the fantasy world of J R R Tolkien's Lord of the Rings trilogy, has been in development for consoles and PC for at least two years. [News of the game appeared in late 2018](#), when Athlon Games (the studio behind Warframe and Gears 4) confirmed it had taken on the project.

In 2019, though, [Amazon Game Studios got involved](#), but it seems that Amazon's continued bad luck in the world of game development has led to this MMO's demise as well.

* [Best MMO games](#)

* [Lord of the Rings on Amazon](#): the TV show explained

* [Best games](#): our favorite PC and console games of the year

Bloomberg reports that the Lord of the Rings MMO's cancellation is due to "a dispute between Amazon and Tencent", with the latter publisher having acquired one of Amazon's other development partners on the game – Leyou Technologies Holdings Ltd. Contract negotiations fell through, and the fallout seems sensitive enough that the publication's sources asked not to be named.

Amazon has, however, confirmed that it is "unable to secure terms to proceed with this title at this time," and that the organization is "disappointed that we won't be bringing this game to customers."

The Lord of the Rings MMO was planned to take place in the Middle-earth portrayed in The Lord of the Rings literary trilogy.

Previously the game was set to be a prequel to the well-known stories of Frodo and Bilbo Baggins, instead taking place in the deep history of Middle-earth, and conveniently avoiding any canonical issues.

One does not simply make a hit game

This cancellation will no doubt be a big blow to Amazon Game Studios, which has seen many of its big budget projects fall through, or crumble under scrutiny.

In 2020, Amazon cancelled its free-to-play multiplayer shooter Crucible, which had released into an open beta to little fanfare, and even retreated into a closed beta for a short while. Amazon's other big MMO project, New World, has also seen delays after it drew fire for [insensitive and stereotypical portrayals of Native Americans](#), in a game that tasked you with... colonising the continent as European explorers.

[Another piece by Bloomberg](#) on the internal issues of Amazon's gaming division is insightful here, pointing to how Amazon's usual business strategy and culture is anathema to good game development – despite the studio spending swathes of cash on experienced devs from EA and others.

We don't expect this will have any repercussions for the upcoming Lord of the Rings TV show, given that Amazon's TV and film streaming division has fared much better than its in-house game studio.

For those disappointed by the end of a Lord of the Rings MMO, too, you'll still have the [Gollum game](#) to look forward to – or the existing Shadow of War / Shadow of Mordor titles to revisit.

Amazon doesn't 'get' gaming. A canned Lord of the Rings is only the latest example.

Adam Rosenberg

Maybe it's time for Amazon to take the 'L' on trying to build a thriving video game business before more jobs are affected?

The latest misstep for Amazon's stumbling efforts to build and release its own video games is also a story about The Lord of the Rings. In 2019, the company announced plans "to develop and publish a free-to-play massively multiplayer online (MMO) game" — think World of Warcraft — based on author J.R.R. Tolkien's beloved fantasy series.

Now, almost two years later and with nary a trailer, screenshot, or fact sheet released about the game, that project is canceled. Amazon confirmed as much in a report from Bloomberg's Jason Schreier, who first heard the news from anonymous sources.

The report notes that the game, which was being built under a co-development partnership between Amazon Game Studios and Leyou Technologies Holdings Ltd. The latter studio, a China-based company, was acquired by Tencent back in December. And in the course of the contract negotiations around that acquisition, a dispute between Amazon and Tencent led to the Lord of the Rings cancellation.

Maybe it's time for Amazon to take the 'L' on video games.

An Amazon spokesperson told Bloomberg that "we have been unable to secure terms to proceed with this title at this time." It doesn't sound like there will be layoffs, but Amazon does plan to put the Lord of the Rings team on other projects, effectively flushing their two years of work so far down the drain.

While it's a tough outcome for fans, certainly, the game's cancellation is more importantly another strike against Amazon's game-making aspirations. The company does own Twitch, which hinges much of its success on popular gaming streams, and it's also developing a cloud gaming service to rival Google's Stadia, in Luna.

When it comes to actual games, though, Amazon has continually struggled. There was Crucible, the free-to-play online shooter that was conceived to compete with the likes of Overwatch. In an unprecedented-for-the-industry string of events, the game released in May 2020 and then went back into closed beta testing just two months later, in July 2020. Then, in October, Amazon just up and canceled the project. It had reportedly been in development since 2014.

The whole incident felt like an echo of a similar cancellation from a couple years prior, when Amazon pulled the plug in 2018 on Breakaway, a multiplayer game that was described as a "mythological sport brawler." It was announced in 2016 and ready enough at that point to be something people could play.

Both of these games, with their colorful presentation, online focus, and hero-driven makeup, seemed implicitly designed to make Amazon's gaming endeavors a presence in the esports scene. Probably due in part to the Twitch connection and the popularity of streaming gameplay. Though let's be clear: Competitive online games are generally popular, and shooters like Overwatch or Call of Duty are among the biggest. Crucible in particular seemed intended to slide right into that category based on the Amazon link, and the support such a link promised, on its own.

These projects could have worked with a more concrete creative foundation holding them up. But the way they were both trotted out, it's hard not to look at the two titles as concepts that were pitched as a business plan first and a creative endeavor second. They both arrived looking an awful lot like esports projects, but the experiences they offered weren't quite there.

It's a similar situation with New World, perhaps Amazon's most promising game project at this point. It was first pitched as an MMO in which players, looking like 17th century European explorers, colonized an untamed land in a riff on early America. And while the game's setting is fictional and fantastical, with players facing off against monsters instead of displacing an indigenous population, the tone-deafness in that premise and title raised plenty of questions.

(It's worth noting that New World has undergone some changes since the original reveal, and recent looks have painted a promising picture. That title, though....)

Again and again, though, Amazon has demonstrated more apparent interest in releasing games as a business opportunity than as a creative endeavor. Many successful publishers will tell you that the best and most successful games manage to mix both of those things together in a seemingly effortless way. That's a lesson Amazon still needs to learn.

All of that context now carries us back to this newly canned Lord of the Rings project. We're not clear on the details of the contract dispute that reportedly killed the game, but it's not unreasonable to speculate that Amazon saw it first and foremost as a Lord of the Rings-themed money tree. Tencent has major investments in the gaming industry and lots of experience to go with it, which raises the question of why and how such a seemingly slam-dunk project — The Lord of the Rings Online was already a successful MMO long ago — fell apart, and what role Amazon played given the history.

That history points to a pattern of unforced errors on Amazon's part. From Breakaway to Crucible to the questionable creative choices on New World and now the Tencent break-up, these feel more like rookie mistakes than a string of "couldn't be helped" coincidences.

Maybe the unexpected development of Tencent's Leyou acquisition is to blame for Lord of the Rings. Maybe COVID killed any hope that the developers could bring Crucible together in the end. Maybe New World's tone-deaf introduction will be wiped away by a successful launch. (I've got no explanation for Breakaway; that game's reveal doesn't make a lick of sense to this day.)

At a certain point though, the excuses don't carry much weight anymore. Maybe it's all those things, just a coincidental series of missteps that paint an unfortunate picture. Or maybe, just maybe, the problem was Amazon all along.

Ready to upgrade your current rig with a new [gaming laptop](#)? New models are rolling out with Nvidia's latest GeForce RTX 3000 series graphics, and there are bigger discounts to be found on older but still powerful gaming laptops. And if you're [working from home](#), a gaming laptop can double as an overqualified office machine.

Check out the picks here, all of which are currently discounted at Amazon, Dell, Best Buy or Newegg. Well, there's one that's not currently on sale, but it's the lowest-cost laptop I've found with RTX 3060 graphics.

Be sure to check back; I'll update this story regularly to include new deals as they emerge.

Read more: [Best gaming laptop to buy for 2021](#)

Dell G3 15: \$800

Save \$200

[Click to view image.](#)

Sarah Tew/CNET

This entry-level Dell G3 15 gaming laptop is based on the GeForce GTX 1650 TI GPU and features a 10th-gen Core i5 CPU, 8GB of RAM and a 512GB SSD. The 15.6-inch display features a full HD resolution and a 120Hz refresh rate. You won't be able to run the latest AAA titles, but it can play slightly older games such as Fortnite and CS:GO at full HD resolution.

[\\$800.00 AT BEST BUY](#)

Dell G5 15: \$850

Save \$295

[Click to view image.](#)

Sarah Tew/CNET

This Dell G5 15 gaming laptop model is deeply discounted and features a 15.6-inch, full HD, 120Hz display powered by a 10th-gen Intel Core i7 CPU, 16GB of RAM and GeForce GTX 1660 Ti graphics. It'll let you play less demanding games at 1080p and 60 frames per second.

[\\$850.00 AT DELL](#)

Asus ROG Zephyrus G14: \$1,200

Save \$150

[Click to view image.](#)

Lori Grunin/CNET

The Asus ROG Zephyrus is the company's thinnest, most compact gaming laptop. Despite its trim dimensions, the ROG Zephyrus does not sacrifice performance. It offers the latest silicon from AMD and Intel as well as GPUs from Nvidia's GeForce RTX line. This model features an AMD Ryzen 9 CPU, 16GB of RAM, a roomy 1TB SSD and Nvidia GeForce RTX 2060 Max-Q graphics. The RTX 2060 is the budget card in Nvidia's RTX 2000-series lineup and offers excellent bang for the buck along with ray tracing, which

reproduces how light behaves in the real world to give games a more photorealistic look. The 15-inch display features a 1,920x1,080-pixel resolution and a speedy 120Hz refresh rate.

[\\$1,200.00 AT BEST BUY](#)

MSI GF65 Thin 10UE-092: \$1,249

Low list price

[Click to view image.](#)

Screenshot by Matt Elliott/CNET

This MSI laptop isn't on sale but I'm including it here because it's the lowest-cost laptop I've seen with Nvidia GeForce RTX 3000 series graphics. It features the RTX 3060 GPU along with a 10th-gen Core i7 CPU, 8GB of RAM and a 512GB SSD. The 15.6-inch display features a full HD resolution and a 144Hz refresh rate.

[\\$1,249.00 AT NEWEGG](#)

Alienware m15 R4: \$1,500

Save \$364

[Click to view image.](#)

Screenshot by Matt Elliott/CNET

You can get this new Alienware m15 R4 model direct from Dell at a discount. It's based on GeForce RTX 3060 graphics and a 10th-gen Core i7 CPU. It also serves up an ample 16GB of RAM and a 512GB SSD. The 15.6-inch display features a full HD resolution and a 144Hz refresh rate.

[\\$1,500.00 AT DELL](#)

Razer Blade 15 (renewed): \$1,469

Save \$551

[Click to view image.](#)

Sarah Tew/CNET

IMHO, this is the best-looking gaming laptop on the market. Impossibly thin for a high-powered gaming laptop with a sleek, slab look, this 15.6-inch Razer Blade laptop also boasts a powerful, smart component lineup. This renewed/refurbished model pairs a ninth-gen Intel Core i7 CPU with Nvidia GeForce RTX 2070 Max-Q graphics and supplies an ample 16GB of RAM and a 512GB SSD. The 15.6-inch display features a full HD resolution and a lightning-fast 240Hz refresh rate.

15:07 EDT Amazon adds 720p streaming to its Luna cloud gaming service Amazon's Team Luna blogged earlier: "Since Luna launched into early access, we've regularly heard from customers on what they're enjoying as well as areas where we can improve their experience. One of the most requested features is the ability to play at lower resolutions to match unique internet connection speeds and bandwidth demands. Starting today, we're enabling a new 720p option, allowing for decreased bandwidth and data usage by streaming at a lower resolution. With this setting, customers that have data cap limitations from their internet service providers can play at a lower resolution without sacrificing gameplay performance. To take advantage of the 720p option, customers can go to the Settings tab in Luna and select 720p. It's that easy! We are working hard to continue improving Luna throughout early access, so we appreciate all the feedback we've received thus far from customers.

Download the Luna app on Fire TV to start playing today or get more information and request an invitation to early access at amazon.com/Luna."

Gamers, movie nerds, and anime fans will be delighted

Attention, mobile gamers and movie nerds!

This is not a drill. You can now score up to three months free access to Amazon Prime Gaming, HBO Go, VIU Premium, and more with Globe's latest offerings.

During the telco's Innovation Fest media conference held on March 25, 2021, the company announced that its postpaid customers can avail of free three-month-long premium access to the said streaming platforms.

"For gamers, customers can enjoy Amazon Prime Gaming, which comes with the 3-month Amazon Prime Video access and offers in-game content for top games plus a selection of free games every month," the company announced in a press statement. "With HBO GO, customers have unlimited access to thousands of hours of critically-acclaimed and award-winning content from HBO, the latest and biggest Hollywood Blockbusters and HBO Asian Originals - movies and series available across all genres including Warner Bros and DC. Lastly, Viu is the one-stop service for viewers to access the largest volume and widest selection of Korean content titles."

ANIME TIME! Some of the anime titles available on iQiyi

Meanwhile, anime lovers will also have something to look forward to as the telco company will soon announce its special offering in partnership with iQiyi. iQiyi is a Chinese streaming platform that houses thousands of Asian content from movie, drama series to anime.

As of writing, the said platform offers hundreds of anime options, even the on-going ones such as "Attack on Titan," "Jujutsu Kaisen," the "Dragon Ball series," all the 966 episodes of "One Piece," and a lot more.

Summary List Placement

The co-founder and CEO who convinced Wall Street that pets are big business has a new pet project: [Turning GameStop into the Amazon of gaming](#).

After taking a 12.9% stake last year through his investment firm RC Ventures, Cohen has made major changes at GameStop . First, he oversaw a string of c-suite departures and hirings. Then, he was [appointed leader of a new committee](#) overseeing a company-wide "transformation." Now, he's taking over the company's board.

A whopping eight board members are stepping down, GameStop said [regulatory filing on Wednesday](#). That leaves only Cohen, his former Chewy colleagues Jim Grube and Alan Attal , kindred spirit/activist investor Kurt Wolf, and current CEO George Sherman as board members.

From a board that currently has 13 members, the new GameStop board of directors will have just five. And at least four of those five members are working together: Cohen, Grube, Attal, and Wolf.

Notably, former Nintendo of America president and well-known video game personality Reggie Fils-Aimé is among the board members stepping down in June. He lasted [just over a year](#) in the position.

As for the executive team, CEO George Sherman is the only remaining member from before Cohen got involved with the company. Jim Bell , the company's CFO, is [said to have been pushed to resign](#) by the company's board. Soon after, CCO Frank Hamlin by the company's board. Soon after, [resigned](#).

Cohen openly criticized Sherman, his c-suite, and GamesStop's directors [in a letter to the board](#) about the company's overall direction in late 2020.

Sherman, "appears committed to a twentieth-century focus on physical stores and walk-in sales, despite the transition to an always-on digital world," Cohen said. He added that the board lacks "the type of strategic vision" necessary for GameStop , "to pivot toward becoming a technology-driven business that excels in the gaming and digital experience worlds."

In his letter, Cohen said the company, "needs to evolve into a technology company that delights gamers and delivers exceptional digital experiences — not remain a video game retailer that overprioritizes its brick-and-mortar footprint and stumbles around the online ecosystem."

Since Cohen joined the company's board in January, taking charge of a "strategic" committee soon after, the company has made a string of high-profile hires from the likes of Amazon and — you guessed it — Chewy.

* Former Amazon Web Services engineering lead Matt Francis was [hired in February](#) as the company's new chief technology officer.

* Former Amazon fulfillment director Jenna Owens was [hired in March](#) to serve as the company's new chief of operations.

* Alongside Owens' hiring, Chewy's former ecommerce lead Neda Pacifico was hired on as senior VP of ecommerce in March.

Cohen himself has kept quiet across the last several months.

He has repeatedly declined interview requests, and his Twitter timeline is primarily GIFs and images. His [most recent tweet](#) is a GIF from the movie "Ted," of the titular character smoking a bong. On the most recent GameStop earnings call, Cohen did not appear.

Representatives for Cohen and GameStop did not respond to requests for comment as of publishing.

A whole bunch of Razer products are currently discounted at Amazon. It truly is as if Amazon Prime Day is here already

[Amazon Prime Day](#) may still be a few months away, but that hasn't stopped Amazon from holding a huge Razer gaming sale, with everything from laptops to keyboards to gaming headsets reduced in price.

Razer has made a name for itself over the past couple of decades as one of the world's foremost and most premium gaming hardware makers, with its systems and accessories frequent members of T3's [best gaming laptops](#), [best gaming headsets](#) and [best gaming mice](#) buying guides, among others.

* [View all the discounted Razer products at Amazon](#)

Which is why this large Razer gaming sale at Amazon is so welcome – it delivers that premium gaming hardware but for less money. And, with discounts of up to 43 per cent off, it really is like Amazon Prime Day has come early.

To view all the discounted Razer products at Amazon simply click the link above, or to see a curated selection of what T3 considers the best deals on offer, check out the products below.

[toCheeeek](#)

Razer Kraken | [Was: £79.99](#) | [Now: £56.49](#) | [Saving: £23.50](#)

Razer's well-scored Kraken wired gaming headset for PC Xbox and PlayStation gets a fat 29% price cut over at Amazon, and that has caused its price to fall from £79.99 to £56.49. Free delivery is also included in the deal.

[toCheeeek](#)

Razer Ornata V2 | [Was: £99.99](#) | [Now: £72.99](#) | [Saving: £27](#)

The second generation of the Razer Ornata features the maker's advanced Mecha-Membrane technology, as well as Razer Chrome RGB and a multi-function Digital Wheel with Media Keys. It's currently discounted by 27% down to £72.99. Free delivery is included in the deal.

[toCheeeek](#)

Razer Blade 15 Gaming Laptop | [Was: £2,999.99](#) | [Now: £2,199.78](#) | [Saving: £800.21](#)

A big asking price gets cut by 27%. The result is the Razer Blade 15 Gaming Laptop is now £2,199.78 instead of £2,999.99. That's a straight discount of £800.21. This system comes loaded with an Nvidia GeForce RTX 2080 S, 16GB of RAM and an Intel Core i7 CPU. One of the world's foremost gaming laptop lines. Free delivery is included in the deal.

[toCheeeek](#)

Razer Viper Ultimate | [Was: £109.99](#) | [Now: £89.99](#) | [Saving: £20](#)

An 18 per cent saving means the elite-tier gaming mouse, the Razer Viper Ultimate, is currently reduced down to £89.99 from £109.99. This wireless gaming mouse boasts a ludicrously accurate 20,000 DPI sensor and only weighs in at 74 grams. The battery life? A super-long 70 hours. Free delivery is included in the deal.

[toCheeeek](#)

Razer Goliathus Chroma | [Was: £39.99](#) | [Now: £31](#) | [Saving: £8.99](#)

Serious PC gamers should have a mouse mat and the Razer Goliathus Chroma is a fantastic choice. It features a cable holder, non-slip fabric surface with quilted edge, and integrated RGB lighting. It's now reduced at Amazon by 22% down to £31. Free delivery is included in this deal.

To see even more great Razer hardware, be sure to check out T3's [best gaming chairs](#) guide to check out the 5-star rated Razer Iskur, as well as our [best gaming phones](#) to check out the Razer Phone 2.

And, if you're in the market for a gaming headset then be sure to also check out T3's [Razer BlackShark V2 review](#), as we concluded that it is "a light gaming headset with great sound".

Logitech gaming mice, keyboards and headsets are now discounted at Amazon

Following on rapidly from [Amazon Prime Day](#)-big discounts on [Amazon devices](#) and [Razer gaming accessories](#) comes yet even more great discounts at Amazon as part of [its Spring Sale](#) – and this time it is on Logitech gaming peripherals.

Logitech makes some of the very best gaming accessories in the world right now, and a selection of these are now currently discounted massively. We're talking about top gaming mice, keyboards and headsets that are now half price or better.

* [View all the Logitech gaming discounts at Amazon](#)

To see all the Logitech gaming deals at Amazon simply follow the link above, or to see a curated selection of T3's top deal picks, read on.

[toCheeeek](#)

Logitech G635 Wired Gaming RGB Headset | [Was: £129.99](#) | [Now: £69.99](#) | [Saving: £60](#)

A going on half-price 46 per cent discount means that the well-reviewed Logitech G635 gaming headset's price has fallen from £129.99 to just £69.99. This wired gaming headset delivers 7.1 surround sound audio, 50mm Pro-G drivers and a flip-to-mute mic, and it works with all consoles and PCs.

[toCheeeek](#)

Logitech G213 Prodigy Gaming Keyboard | [Was: £59.99](#) | [Now: £32.99](#) | [Saving: £27](#)

This is a really attractive new low price on the slick Logitech G213 gaming keyboard. A 45 per cent discount means its price has fallen from £59.99 to only £32.99. RGB lighting, anti-ghosting tech and a slimline design combine to deliver a great gaming keyboard for, now, a bargain price point.

[toCheeeek](#)

Logitech G903 Lightspeed Wireless Gaming Mouse | [Was: £129.99](#) | [Now: £61.99](#) | [Saving: £68](#)

A better than half price discount of £68 means that the superb Logitech G903 Lightspeed gaming mouse is now available for £61.99. That's a straight discount of 52 per cent. Simply put, this is one of the very best wireless gaming mice on Earth right now, making this a superb deal.

To see even more great gaming accessories be sure to check out T3's [best gaming mice](#), [best gaming keyboards](#), [best gaming headsets](#) and [best gaming chairs](#) buying guides.

The Right Time to Get Gaming Products: Amazon Announces 'Grand Gaming Days'

965 words

23 March 2021

PCQuest

CMPCQU

English

Copyright © 2021. CyberMedia.

Amazon keeps coming up with multiple deals and sales throughout the year and this time they have shifted their focus to the gaming community. Amazon has announced the 'Grand Gaming Days'. Days of sale where everything from laptops to gaming desktops would be available at exciting prices with some good offers to avail.

#1 Gaming Laptops

* HP Pavilion Gaming: The Intel Core 9th Gen laptop paired with a 4 GB Nvidia GTX 1650 can be a good pick for gamers who do not want to get into the competitive scene. It is capable of delivering a good gaming performance and can run almost all well-optimized triple-A titles at a good setting keeping the frame rates stable. The laptop is available for Rs 57,990.

* ASUS TUF Gaming FX505DT Laptop: A laptop with Ryzen 7 processor, Nvidia GTX 1650 and 144hz display? Yes. This is that laptop. The Asus TUF laptop is on sale for Rs 59,990. You might want to invest a little in expanding the RAM but even without that, the laptop is very powerful and capable. The 144hz display makes the experience even more immersive.

* MSI Bravo Ryzen: The Bravo combines power and performance. Ryzen 7 4000-series processor along with AMD Radeon RX 5500M graphics makes it a very powerful laptop. To match this power and utilize it optimally, the laptop also comes with a 144hz panel making high refresh gaming rate possible. The 16 GB RAM will be able to handle every game thrown at it. It is currently on sale for Rs 82,990

#2 Gaming Desktops

* Lenovo IdeaCentre G5 Gaming Desktop: The sleek-looking tower is a powerhouse in itself. The power factor comes from the Intel Core i5 10th gen processor and the Nvidia GTX 1660 super. This combination is capable of running any game on the highest setting. If paired with a good monitor, you can also experience 2K gaming on it. This gaming tower is currently selling for Rs 62,990 and is on sale.

* ASUS ROG Strix: The brand that this tower comes from is renowned but a lot of people might think it does not justify the cost at which it comes. The gaming tower houses an Intel Core i5 10th gen processor and is paired with the Nvidia GTX 1650. It is on sale for Rs 69,990 but if you want then you can always go for other alternatives that might offer better hardware and performance.

#3 Gaming Monitors

* Samsung Odyssey Curved gaming monitor: This is a 27-inch Curved Gaming Monitor with a 144hz refresh rate and AMD Free Sync. It comes with wider game space and life-like detail with HD resolution. The monitor gives flawlessly smooth gameplay with a 144hz refresh rate and immersive viewing with 1000R curvature. Get an amazing gaming experience with this gaming monitor, available for INR 22,802.

* LG Ultragear 32" 2K gaming monitor: The QHD 32GK650F combines AMD Radeon FreeSync™ technology with a 144Hz refresh rate, 1ms motion blur reduction and Dynamic Action Sync for smooth gameplay with virtually no tearing. It is available for INR 23,449.

#4 Gaming Accessories

* EPOS Sennheiser GSP 300 Headset with Noise-Cancelling Mic: The new Sennheiser GSP 300 is the logical upgrade for players wanting improved audio performance and wearing comfort. This closed gaming headset is fitted with ultra-comfortable memory foam ear pads providing best-in-class isolation from ambient sound. The broadcast quality, noise-cancelling microphone minimizes background noise so you can stay immersed in the game. Take your game to the next level with the GSP 300. It is available for INR 6,589.

* Logitech G 331 Gaming Headset: Logitech G331 gaming headset lets you hear more of the game with big 50 mm drivers that deliver a complete sound. Enjoy the whole experience of all your favourite games. It's slim

and lightweight, with rotating sports-performance ear cups, a large 6mm flip-to-mute mic, and convenient multi-platform compatibility. Get it for INR 3,995.

#5 Gaming TVs:

* LG (43) 4K UHD Smart LED TV: New LG 43UM7290 4K smart TV loaded with amazing features and stunning picture quality through 4K Active HDR. It is lightweight and has a metallic design. Its key features include 4K IPS display, wide viewing angle, Apple Air Play2, DTS Virtual: X, 20w sound, 4K upscaler, Web OS, AI Launcher (with preview) home dashboard, magic mobile connection, Quad-Core Processor, cloud photo and video and 2 way Bluetooth audio playback. It is available for INR 33,999.

* TCL 107.86 cm (43 inches) Full HD LED Certified Android Smart TV: The smart Android TV has a built-in Google Play Store, you can get all your favourite apps, watch the content you love and browse the web. Access all your favourite Apps and evolve your entertainment-from Netflix, to Youtube, Prime video, and much more. Get it for INR 22,449.

#6 Gaming routers:

* Netgear Nighthawk R7000P AC2300: Built with gaming, streaming and mobile devices in mind, this gigabit Wi-Fi router supports MU-MIMO for simultaneous streaming and delivers extreme speed, so you enjoy less lag and less buffering. With next-generation Wi-Fi, Beamforming+ and built-in high-powered amplifiers and external antennas, get ready for extreme performance. It is available for INR 9,799.

* TP-Link Archer C5400 AC5400 Wireless Tri-Band Router: Archer C5400 delivers combined Tri-Band Wi-Fi speeds to 5334Mbps, letting you dedicate an entire band to gaming without slowing down your network. Further, smart connect helps devices run even faster by assigning them to the best available channel to balance network demand. Get it for INR 16,999.

© 2021 Reach Plc

Amazon's first big sale event of 2021 includes their own brand devices like Echo Dot, Kindles and Fire TV Stick and more

Spring is here and after a long, hard winter, it's time to refresh and stock up on new items, ready for what is hopefully a brighter summer.

From the 22nd March until the 31st, Amazon is running their first major deals event of the year, with up to 40% off their most popular own brand devices, as well as price reductions on beauty, wellbeing, sexual wellbeing, homewares, gaming and kids products.

With new deals launching daily, it's worth checking back on the deals page to see what the key price drops are each day.

However, as is usual with Amazon, there is a strong focus on their own brand devices, such as the Echo Dot, Echo Buds, Kindles and the Fire TV Stick.

We've picked out just some of our favourite items that are in the sale now - but you can shop the full Spring Sale event over at amazon.co.uk until the 31st March.

Fire TV Stick 4K Ultra HD with Alexa Voice Remote - was £49.99, now £39.99

This is the most powerful streaming media stick with a new Wi-Fi antenna design, optimised for 4K Ultra HD streaming. You can launch and control your favourite movies and TV shows with the Alexa Voice Remote. Enjoy brilliant picture with access to 4K Ultra HD, Dolby Vision, HDR, and HDR10+. Experience immersive sound with access to Dolby Atmos on selected Prime Video titles. You can also enjoy all your favourites from BBC iPlayer, Netflix, Prime Video, YouTube, Now, ITV Hub, All 4, Disney+, Apple TV and others (subscription fees may apply). Amazon Prime members get unlimited access to thousands of movies and TV episodes, plus ad-free listening to over 2 million songs with Prime Music. With top apps from BBC, ITV, Sky News and more, watch your favourite programmes live, as they happen. Or if you miss your favourite show, you can watch it on demand later. All-new Echo Dot 4th Generation Smart Speaker with Alexa - was £49.99, now £29.99

Meet the all-new Echo Dot—Amazon's most popular smart speaker with Alexa. The sleek, compact design delivers crisp vocals and balanced bass for full sound. You can voice control your entertainment—stream songs from Amazon Music, Apple Music, Spotify, Deezer and more. Play music, audiobooks and podcasts throughout your home with multi-room music. Ask Alexa to tell a joke, play music, answer questions, play the news, check the weather, set alarms and more. Use your voice to turn on lights, adjust thermostats and lock doors with compatible devices. Call almost anyone hands free. Instantly drop in on other rooms or announce to the entire household that dinner's ready. Echo Buds - was £119.99, now £59.99

The premium speaker in these Echo Buds delivers crisp, dynamic audio. Bose Active Noise Reduction Technology and sealed in-ear design limits background noise. The Echo Buds work with the Alexa app to stream music, play Audible audiobooks, make calls or check your calendar - just ask. They provide access to Siri or Google Assistant from a supported device - just press and hold your earbud. Get up to 5 hours music playback per charge, up to 2 hrs with a quick 15-minute charge and up to 20 hours with the charging case. You'll also get multiple sizes of ear tips help form a comfortable in-ear seal for immersive listening. The Ear Tip Sizing Test in the Alexa app can help ensure the right fit for the best sound. Not to mention that the Echo Buds are sweat resistant with a secure fit that's made to move with you. Ring Video Doorbell 3 Plus - was £179, now £139

Exclusive to Ring Video Doorbell 3 Plus, get 4 extra seconds of black and white video to show you what happened before motion was triggered with Pre-Roll. The 1080p HD video doorbell with features that let you see, hear, and speak to anyone from your phone, tablet, or PC. Receive instant notifications when anyone presses your doorbell or triggers the built-in motion sensors. Connect your Video Doorbell 3 Plus to Wi-Fi through the Ring app and mount it to your wall with the included tools. Pair with select Alexa-enabled devices

and enable announcements to be notified when your doorbell is pressed or motion is detected. Standard features such as instant notifications, live view and two-way talk are available out of the box and for free on all Ring devices. Add a Ring Protect Plan (subscription sold separately) to record, review and share the moment you missed (30-day free trial included in your purchase).

Dunelm's stunning fire pits are perfect for the Scottish summer - and they start at just £25

These are the eight TikTok beauty must haves that are now bestsellers thanks to the platform's viral videos

AMAZON has launched a limited-time Amazon Warehouse sale which brings with it big savings to PS5, PS4, Xbox Series X and S, Xbox One, Nintendo Switch and PC gamers. Discounts are being offered on select games, accessories and more - but the deals won't last long.

Amazon has this week launched an Amazon Warehouse sale that offers discounts for PS5, PS4, Xbox, PC and Switch gamers. The Amazon Warehouse sale launched today and will only run until the end of March 31. The Amazon sale adds an extra 30 percent discount to already reduced Warehouse items.

Related articles

These discounts are available for a huge range of Amazon Warehouse products such as toys, computing and electronics.

And there are plenty of money saving deals on offer, with over 1,000 bargains to be had in the gaming category alone.

Among the featured deals is a Turtle Beach Stealth 600 Gen 2 Wireless Gaming Headset for PS4 and PS5.

The Amazon Warehouse prices previously for this item £74.40, but with the extra discount it brings it down to £68.40.

While the evergreen Grand Theft Auto 5 can be picked up on the Xbox One for just £8.34.

This is for the Premium Edition, and is a reduction from the previous Warehouse price of £14.34.

Keeping with the Rockstar Games theme, Red Dead Redemption 2 can also be picked up for on the PS4 for £13.53.

The previous Warehouse price was £19.53.

READ MORE

With a few of the best deals around we've only seen a handful of stock left so if you like the sound of any of the Amazon Warehouse deals - or are just looking for a bargain in general - it's best to act sooner rather than later.

Discussing the sale, Amazon said: "From March 22, 2021, 12:00 am to March 31, 2021, 11:59 pm, Amazon customers get 30 percent discount of selected products from Amazon Warehouse. The discount will be automatically deducted at checkout. All participating products can be found in this store. The offer can not be combined with other promotional offers."

If you're unfamiliar with Amazon Warehouse, the important thing to know is items that are on sale aren't brand spanking news. But the products undergo "rigorous" testing to ensure items are in "like-new" condition.

As Amazon explains: "Amazon Warehouse resells millions of like-new, open-box, and pre-owned items that have been returned by customers at a great discount."

The retail giant adds: "Smart shoppers can find great deals on millions of quality used products at Amazon Warehouse. All items are inspected and graded using Amazon's rigorous 20-point quality inspection process and sold at a discount. Purchases are Prime-eligible and backed by Amazon's 30-day return policy and award-winning customer service."

Galaxy S21 Support Comes To Amazon Luna Cloud Gaming

Justin Diaz

434 words

19 March 2021

Android Headlines

ANDHD

English

Copyright 2021. Android Headlines. Chris Yackulic

The [Amazon Luna](#) cloud gaming service is still in beta and has a fairly limited pool of device support, but this week it has expanded a little by adding support for Samsung's Galaxy S21 series of smartphones.

This includes the Galaxy S21, the Galaxy S21+, and the Galaxy S21 Ultra. So no matter which model you have picked, they can all play games via the cloud if you have access to Amazon Luna.

The only major component here besides device support is access. And that will pose a problem for some who are interested in trying it out. That's because you still need an invite to play games on Amazon Luna. That is, unless you have a few specific device types.

Amazon Luna on the Galaxy S21 will still require an invite to the service

If you have a Galaxy S21, there's only one thing stopping you from playing games through Amazon Luna right now. The invite. If you don't already have one, then you can't play games on the phone.

You can however sign up for an invite and when you get one, you'll be able to sign in through your device and play to your heart's content. Your only option right now if you want to test out the service right away is using [Fire TV](#).

Recently, Amazon announced that most current Fire TV devices, including the Fire TV Cube and select TVs with Fire TV built-in, would support the Luna open beta. Which means no invite required. All other devices though, such as PC, Android, and iOS, you need the invite to play. For now.

You still have to pay for the subscription

If you've signed up for an invite or if you already have access, then you're already aware of the cost. If not, then you need to know that you will still need to pay for the subscription fee to access Luna from your device. Regardless of whether that's a Fire TV, an Android smartphone like the Galaxy S21 Ultra, or your PC browser.

Thankfully the service cost is only \$4.99 so you're not looking at an exorbitant amount. Although the cost does increase if you add the Ubisoft+ channel in addition to the Luna channel.

Amazon Luna is now compatible with even more Android devices from [@Samsung](#) including the S21, S21+, and S21 Ultra phone

— Amazon Luna (@amazonluna) [March 18, 2021](#)

© 2021. Future US Inc. All Rights Reserved.

Between March 15-22, HyperX is running a global fan appreciation sales event called the HyperX Loot Drop.

When it comes to the [best gaming headsets](#) and accessories for new gamers and enthusiasts alike, HyperX ranks highly thanks to its premium builds and quality materials.

Now, as a "thank you" to all of its fans (and as a moneymaking opportunity for itself), the gaming brand is having a weeklong sales event called [HyperX Loot Drop](#). Throughout the week, HyperX will be dropping big daily discounts across everything it does, including its accessories and even components like its [best RAM](#).

These discounts will be available across all the big online retailers including [Amazon](#), [Best Buy](#), [Fred Meyer](#), [Microsoft](#) and more. Here are the best HyperX deals we're seeing on this first day of the sale.

The Best HyperX Loot Drop Deals of the day

[toCheeeek](#)

HyperX Cloud S wired gaming headset: [was \\$129, now \\$99 at Best Buy](#)

This light and comfortable gaming headset sports a deep, immersive, 7.1 surround soundstage with adjustable bass. This experience pairs with a crystal clear microphone to deliver clear team chat!

[toCheeeek](#)

HyperX Alloy Elite 2: [was \\$129, now \\$111 at Amazon](#)

This wired mechanical gaming keyboard packs a solid steel frame and customisable RGB to give a premium look feel to its construction. The HyperX mechanical switches and pudding caps offer plenty of travel and a satisfyingly tactile response for gaming and work alike.

[toCheeeek](#)

HyperX Pulsefire Surge: [was \\$54, now \\$32 at Microsoft](#)

This lightweight, wired gaming mouse uses state-of-the-art Pixart 3389 sensor and responsive Omron switches rated for 50 million clicks, to give you a competitive edge.

[toCheeeek](#)

HyperX Alloy Origins Core: [was \\$89, now \\$64 at HyperX](#)

Lacking the space for a full-size mechanical gaming keyboard? HyperX has got you covered with the Alloy Origins Core. This has a full aircraft-grade aluminum body, switches rated to last for 80 million keystrokes and a 100% anti-ghosting.

[toCheeeek](#)

HyperX Fury DDR4 RGB: [was \\$117, now \\$87 at HyperX \(scroll down to find the deal\)](#)

The RGB making this RAM stick look amazing is just the tip of the iceberg. With a 3,466MHz speed, this DDR4 RAM offers plenty of multitasking performance.

[toCheeeek](#)

HyperX Alloy Core RGB Membrane: [was \\$42.99, now \\$39.99 at Target](#)

Is your budget a little further south than the more expensive keyboards at all? HyperX have also cut the price of their membrane gaming keyboard too. It may not have the same typing experience or customisability of the above options, but it will more than handily do the job!

This event comes after recent news that [HP is set to acquire HyperX for \\$425 million](#), so it's possible this deal is also acting as a sort of warehouse-clearing event before the brands get consolidated. We're not 100% sure how HP plans to split up its products' branding, though HP has said the HyperX will retain "DRAM, flash, and SSD products for gamers and enthusiasts."

To see the latest deals as the event goes on, keep checking this page throughout this week, as we will add new offers as they become available! And for more information about all the participating countries and retailers, HyperX has set up its own [Loot Drop website](#).

These Astro, Razer, and Alienware gaming headset deals are returning to record low prices this week at Amazon.

Amazon is regularly offering discounts on a range of cheap gaming headset deals, but this week three models have caught our eye. Not only are these headsets offering excellent specs and audio quality, even in the more budget-friendly ranges, but they're also returning to record low prices right now. That's perfect if you're looking to grab a new set of cups without breaking the bank.

* [Browse Amazon's full range of gaming headsets](#)

The cheapest gaming headset in our top picks is this Astro A10. The Xbox edition is now [down to just \\$39.99 \(was \\$60\)](#) - a price we've only seen once before. Sure, it's a basic set of cups but there's still a fantastic audio quality here considering you're spending less than the price of most games.

However, if you are looking for something with a bit more power under the hood - or compatibility across PlayStation, Xbox, PC and Switch - the Alienware 510H is also sitting at its lowest price yet. You'll find it [for just \\$73.99 right now, down from \\$99.99](#). That's a discount that's only appeared a few times since launch, so we'd move fast if you're looking for 7.1 surround sound at a great price.

At the top end of our list is the Razer BlackShark V2 Pro. The wireless PC-first headset specializes in pinpoint positional audio and ultra low latency, making it a must-see for competitive players. This [record low \\$159.99 price tag \(was \\$179.99\)](#) is the biggest discount we've seen on this 2020 release so far.

Not in the US? Scroll down for more [cheap gaming headset deals](#) in your region.

Today's best cheap gaming headset deals

[toCheeeek](#)

Astro A10 Xbox gaming headset: [\\$60 \\$39.99 at Amazon](#)

If you're after a super cheap gaming headset for your Xbox One or Series X, this Astro A10 is back down to a record low \$39.99 price at Amazon. It's a budget set of cups for sure, but if you want a no fuss bank account pleaser it's a great offer.

[toCheeeek](#)

Alienware 510H gaming headset: [\\$99.99 \\$73.99 at Amazon](#)

We've only seen this record low \$73.99 price tag on the Alienware 510H a couple of times since launch last year. That makes this week's discount on the cross-platform gaming headset all the more impressive.

[toCheeeek](#)

Razer BlackShark V2 Pro PC wireless gaming headset: [\\$179.99 \\$159.99 at Amazon](#)

If you're after a super low latency wireless gaming headset, with pinpoint positional audio and a lightweight form factor, the Razer BlackShark V2 Pro is one of the best headsets on the market. Right now it's available for its lowest price yet - just \$159.99 after a \$20 discount. We've only seen this price a few times so far this year, and those costs to jump back up so we'd move quickly on this one.

More gaming headset deals

You'll need something to play as well, which is why we're rounding up all the best [cheap game deals](#) right here on TechRadar. However, if you're after more hardware you can check out the [best gaming monitor deals](#), [gaming mouse sales](#), and [cheap gaming keyboard deals](#) as well.

Looking to upgrade your current rig with a new [gaming laptop](#)? No matter your budget, you'll find deep discounts on a wide range of gaming laptops, making this a great time to buy. And if you're [working from home](#), a gaming laptop can double as an overqualified office machine.

Check out the picks here, all of which are currently discounted at Amazon, Dell, Best Buy or Newegg. These laptops range from budget models with Nvidia's older GeForce GTX graphics to current systems with more powerful GeForce RTX graphics.

Be sure to check back; I'll update this story regularly to include new deals as they emerge.

Read more: [Best gaming laptop to buy for 2021](#)

Acer Nitro 5: \$730

Save \$90

[Click to view image.](#)

Sarah Tew/CNET

This is about as inexpensive as a gaming laptop gets. You won't be able to run the latest AAA titles but it can play slightly older games such as Fortnite and CS:GO at full HD resolution. The Nitro 5 features a 15.6-inch, full HD display with a speedy 144Hz refresh rate with a 10th-gen Intel Core i5 CPU, 8GB of memory and Nvidia GeForce GTX 1650 Ti graphics.

[\\$730.00 AT AMAZON](#)

Dell G3 15: \$796

Save \$134

[Click to view image.](#)

Sarah Tew/CNET

Like the Acer Nitro 5 above, this entry-level Dell G3 15 gaming laptop is based on the GeForce GTX 1650 Ti GPU and features a 10th-gen Core i5 CPU, 8GB of RAM and a speedy 144Hz display. It offers double the storage capacity of the Nitro 5 sale model, however, with a 512GB SSD.

[\\$796.00 AT AMAZON](#)

Dell G5 15: \$900

Save \$490

[Click to view image.](#)

Sarah Tew/CNET

This Dell G5 15 gaming laptop model is deeply discounted and features a 15.6-inch, full HD, 144Hz display powered by a 10th-gen Intel Core i7 CPU, 16GB of RAM and GeForce GTX 1660 Ti graphics. It'll let you play less demanding games at 1080p and 60 frames per second.

[\\$900.00 AT DELL](#)

MSI GS66 10SE: \$1,100

Save \$400

[Click to view image.](#)

MSI

Here's another 15-inch gaming laptop with RTX 2060 graphics on sale for \$1,100. It has an FHD, 144Hz display powered by a 10th-gen Intel Core i7 CPU, 16GB of RAM and GeForce RTX 2060 graphics.

[\\$1,100.00 AT BEST BUY](#)

Asus ROG Strix G17: \$1,450

Save \$250

[Click to view image.](#)

ASUS

You get a lot of screen for the money with this 17.3-inch model from Asus. It features a full HD, 144Hz screen powered by a 10th-gen Core i7 CPU, 16GB of RAM and GeForce RTX 2070 graphics.

[\\$1,400.00 AT NEWEGG](#)

Dell G7 17: \$1,450

Save \$250

[Click to view image.](#)

Dell

The Dell G7 17 is big and fast, boasting a huge, 17.3-inch display with a fast 300Hz refresh rate powered by a 10th-gen Intel Core i7 CPU, 16GB of RAM and Nvidia GeForce RTX 2070 Max-Q graphics.

[\\$1,450.00 AT BEST BUY](#)

MSI GS66 Stealth: \$1,500

Save \$300

[Click to view image.](#)

MSI

This 15-inch laptop features a 10th-gen Intel Core i7 CPU, 16GB of RAM, a 1TB SSD and Nvidia GeForce RTX 2070 Max-Q graphics. The 15.6-inch display features a full HD resolution and an ultrafast 240Hz refresh rate.

[\\$1,500.00 AT BEST BUY](#)

Razer Blade 15: \$1,500

Save \$300

[Click to view image.](#)

Sarah Tew/CNET

IMHO, this is the best-looking gaming laptop on the market. Impossibly thin for a high-powered gaming laptop with a sleek, slab look, this 15.6-inch Razer Blade laptop also boasts a powerful, smart component lineup. This model pairs a 10th-gen Intel Core i7 CPU with Nvidia GeForce RTX 2060 graphics and supplies an ample 16GB of RAM and a 512GB SSD. The 15.6-inch display features a full HD resolution and a speedy 144Hz refresh rate.

Wall Street darling Ryan Cohen is leading a new initiative to turn GameStop into the Amazon of gaming (GME)

feedback@businessinsider.com (Ben Gilbert)

523 words

8 March 2021

21:05

Business Insider

BIZINS

English

Copyright 2021. Insider Inc

Summary List Placement

Ryan Cohen, the Chewy cofounder and former CEO who convinced Wall Street that pets are big business, has a new pet project: a new initiative to transform GameStop, the world's largest video game retailer, into the Amazon of gaming.

GameStop announced the "Strategic Planning and Capital Allocation Committee" on Monday morning, which is composed of Cohen, former Chewy CMO Alan Attal, and another one of GameStop's activist investors, Kurt Wolf. The purpose of the committee, GameStop said, is to, "identify initiatives that can further accelerate the company's transformation."

That "transformation" has already begun, with the Cohen-led committee already [hiring an Amazon vet](#) as the company's new CTO, and the [recent ousting of CFO Jim Bell](#).

The re-invention of GameStop is the latest project from Cohen and his venture firm, RC Ventures, following [the sale of Chewy to PetSmart in 2017 for \\$3.35 billion](#). Cohen previously bought up a sizable chunk of GameStop shares, accumulating over 12% of the company by December 2020 and [sending stock value soaring](#).

In September 2020, when Cohen initially purchased a significant chunk of the company's shares, he proposed to the board a plan to focus GameStop on e-commerce opportunities. One example of those opportunities is tied to GameStop's core business: reselling used games. Cohen [reportedly](#) proposed an online version of the retailer's well-known game trade-in program.

Then, in November 2020, Cohen published an open letter to GameStop shareholders that criticized GameStop's executive leadership team.

"Through our private conversations, we have explained to Mr. Sherman [CEO] and the Board that GameStop has the ability to pivot toward becoming a technology-driven business that excels in the gaming and digital experience worlds," [Cohen wrote in the letter](#). "But this pivot requires the type of strategic vision that has not yet taken hold in the c-suite or boardroom."

Now, Cohen and two liked-minded colleagues on GameStop's board, are in charge of enabling that "strategic vision" at GameStop that he wrote about late last year.

A representative for Cohen did not respond to a request for comment as of publishing.

One simple \$50 Amazon purchase can double the internet speed on your computer or gaming console

Maren Estrada

564 words

8 March 2021

Boy Genius Report (BGR)

BGR

English

BGR Media, LLC, a subsidiary of Penske Media Corporation. All Rights Reserved.

Are you wondering how to speed up your home internet without dropping a ton of cash on an overpriced mesh Wi-Fi system? Well, you will be happy to hear that it's much easier and less expensive than you think. If you're sick of slow internet speeds and "buffering" on your computer, TV, or video game console, there's a simple device that will be a game-changer for you.

Before you do something drastic like buying a fancy new router or a pricey mesh Wi-Fi system, check out the TP-Link AV1000 Gigabit Powerline Internet Kit, which is just \$49.99 on Amazon.

When you're trying to watch a video or stream a game, slow internet speeds and buffering can be your worst nightmare. It's so aggravating, but it happens all the time. What you might not realize though, is that there's a wonderfully easy way for most people to fix this problem.

A lot of the time, it's your Wi-Fi connection that is the main source of the issue. Sometimes there's interference, or if you live in a big household it could be a congestion problem. It could also be an issue with range, and you can get away with a cheap fix by picking up a Wi-Fi range extender. The best-selling TP-Link model on Amazon is on sale right now for just \$17.99, or you can go all-out with one of TP-Link's fastest extenders ever for \$79.99 thanks to a discount.

But if you want the best possible fix with the fastest and most reliable connection, you need to ditch wireless on your device and switch to a wired internet connection. Of course, no one wants to spend hundreds of dollars installing Ethernet, and we would never suggest that. Why bother when you can instantly transform any regular old power outlet into an Ethernet port in about 2 seconds?

Definitely check out the TP-Link AV1000 Powerline Ethernet Adapter at Amazon. It really couldn't be any simpler. Just plug one box into a power outlet near your router and the other box into an outlet near your TV or computer. Connect to each box separately using a regular old Ethernet cable, and presto! You've got yourself a gigabit Ethernet connection that you just installed yourself in seconds. What's more, this awesome top-rated powerline kit is on Amazon right now for \$49.99.

Here are TP-Link's highlights from the product page:

HomePlug AV2 Standard – high-speed data transfer rates of up to 1000 Mbps, supporting all your online needs
Gigabit port – provides secure wired networks for desktops, smart TVs, or games consoles
Plug and play – allows the setup of your powerline network in minutes, so you can enjoy fast wired connections right away
Patented Power-Saving Mode – automatically reduces power consumption by up to 85%
No new wires and no configuration required; Compatible with all TP-Link AV2000, AV1300, AV1200, AV1000, AV600, AV500 & AV200 PowerPoint adapters. Make sure all powerline devices are on the same electrical circuit.
Kindly Reminder: TL-PA7017 KIT can only provide wired connections. No WiFi. Industry-leading support: 2-year warranty and free 24/7 technical support.

QUICK LINKS:

*

Razer Basilisk v2 gaming mouse — save \$35

*

Razer Huntsman Tournament Edition gaming keyboard — save \$40

*

Razer Seiren X USB streaming microphone — save \$44

*

Razer Kraken Ultimate USB gaming headset — save \$60

*

Razer Kishi mobile game controller for Android — save \$25

PC gaming is undoubtedly one of the best ways to game — it's the most customizable gaming experience you can have, and if you're able to dish out some serious cash, the most visually stunning gaming you can experience.

But once you get the graphics card, processor, and internal components that you want for your build, you're going to need some accessories to actually, you know, use it. A mouse, keyboard, and more are all essential pieces of your PC setup, and trusted brand Razer has all of that and more on sale at Amazon as of March 8.

Check out all the discounted items here, and our highlights below.

Razer Basilisk v2 gaming mouse — \$44.99

The Basilisk v2 is a slick and speedy mouse that offers on-the-fly sensitivity adjustments for those who like to get their mouse-feel just right. The device's response time is three times faster than traditional mechanical switches, and allows for endless reconfiguration with 11 programmable buttons. It even features adjustable RGB settings.

Save \$35 at Amazon See Details

Razer Huntsman Tournament Edition gaming keyboard — \$89.99

The Huntsman is a favorite among PC gamers thanks to its speed and personalization options. The keyboard's optical switches are up to 30% faster than traditional mechanical switches, and features a customizable array of backlighting effects. Programmable macros, oil-resistant keycaps, and super durable construction are among the other highlights.

Save \$40 at Amazon See Details

Razer Seiren X USB streaming microphone — \$55.99

Looking to get into streaming? You're going to need a good microphone. This mic from Razer plugs into your computer easily via USB, and boasts built-in background noise reduction, a built-in shock mount, and zero-latency monitoring with minimal echo.

Save \$44 at Amazon [See Details](#)

Razer Kraken Ultimate USB gaming headset — \$69.99

If you need a headset upgrade or don't have one yet, the Razer Kraken is a great place to start. It's capable of THX 7.1 surround sound for immersion, has cooling-gel-infused cushions for all-day comfort, a retractable noise-canceling microphone, and on-ear controls for easy access.

Save \$60 at Amazon [See Details](#)

Razer Kishi mobile game controller for Android — \$74.99

A non-PC-gaming product but still nice to have, the Razer Kishi mobile controller is great for those who are into cloud gaming on their phones. Compatible with Android phones, the Kishi can stretch out to fit your device, effectively turning it into a controller (it can be retracted again when not in use for convenient storage). Enjoy latency-free gaming and an ergonomic design as you play on your commute or simply from your bed — there's just something magical about playing console games on your smartphone.

Save \$25 at Amazon [See Details](#)

Amazon Prime UK free games: Don't cancel Prime until you redeem gaming benefits

Liam Martin

520 words

4 March 2021

15:55

express.co.uk

EXCO

English

Copyright 2021

AMAZON Prime customers can unlock a fresh batch of free video games for March 2021.

Amazon Prime UK customers could be missing out on a valuable benefit of being a subscriber.

In addition to next day deliveries, movie and TV streaming and access to music, Amazon Prime customers can also download and play lots of different video games for free.

Amazon makes a handful of free games available to subscribers every month.

That's on top of bonus in-game items and DLC for popular titles such as Fall Guys, Valorant, World of Tanks and Warframe.

To mark the beginning of March, Amazon has updated its selection of free games for the month.

From now until the end of March, Amazon Prime UK subscribers can claim Bomber Crew Deluxe, Blasphemous, Boomerang Fu, SkyDrift and Tengami for free.

While they're not the kind of triple-A blockbusters you'll find on the likes of PlayStation Plus each month, it's a decent selection of games available at no cost.

The pick of the bunch is arguably Blasphemous, which is a 2D platform game with a very dark and macabre setting.

Related articles

"Blasphemous is a punishing action-platformer that combines the fast-paced, skilled combat of a hack-n-slash game with a deep and evocative narrative core, delivered through exploration of a huge universe comprised of non-linear levels," reads the official description.

"A foul curse has fallen upon the land of Cvstodia and all its inhabitants - it is simply known as The Miracle.

"Play as The Penitent One - a sole survivor of the massacre of the 'Silent Sorrow'. Trapped in an endless cycle of death and rebirth, it's down to you to free the world from this terrible fate and reach the origin of your anguish."

Skydrift, meanwhile, is another hugely entertaining game available as a free download for March.

The game is a mixture of aerial combat and racing: "Get closer than ever before to the world of adrenaline pumping sky-racing where flyboys can test and master their flying and combat skills against the deadliest opponents!

"Admire amazingly detailed terrains. Unlock state-of-the-art planes and personalise them with unique racing skins. Be the first on the single and multiplayer challenges, where possibilities are limited only by your own imagination."

Boomerang Fu is a multiplayer party game featuring different types of food, Tengami is a charming puzzle game, and Bomber Crew is a strategy title inspired by FTL.

"Prepare your crew for their most dangerous mission yet and go chocks away for a sky-bound expedition in this strategic survival sim, Bomber Crew.

"Train and personalise your own Bomber Crew. Procedurally-generated names, skills and back stories means a unique experience for everyone, but be careful, as death is permanent."

Amazon has expanded early access to Luna, making the gaming platform available on Fire TVs in the US.

Amazon is opening up early access to its Luna gaming platform, making it free to try on Fire TV devices – providing you're in the US.

Luna was [announced last year](#) as Amazon's answer to online gaming services like [Xbox Game Pass](#), [PlayStation Remote Play](#) and [Google Stadia](#), letting you play games using devices you already own, without the need for a console.

Initial access to Luna was limited only to those lucky enough to receive an invitation, but now Amazon is letting Fire TV device owners in the US try the streaming platform for free, no RSVP required.

Fire TV owners can gain access to Luna by downloading the app, which currently offers a seven-day free trial of the Luna+ channel and costs \$5.99 a month thereafter. It houses titles like Resident Evil 7, A Plague Tale: Innocence GRID and Brothers: A Tale of Two Sons.

There's also a Ubisoft Plus channel costing \$14.99 per month, for access to Assassin's Creed Valhalla, Ghost Recon Breakpoint and Watch Dogs.

The previously restricted [Luna controller](#), which connects directly to your wireless network and reduces the amount of input latency while you play, has also been made available to purchase for all customers, priced \$49.99.

Devices compatible with Luna include Amazon's Fire TV Stick Lite, Fire TV Stick (2nd and 3rd generation), [Fire TV Stick 4K](#), Fire TV (3rd generation) and [Fire TV Cube](#) video streamers, plus Amazon Fire TV Edition TVs by Toshiba and Insignia.

If you don't have a Fire TV, you can still request Luna access on Windows, Mac and some Android devices, as well as web browsers on iOS, Windows, and Mac, by heading over to [Amazon](#) and requesting an invitation. Currently, the service is limited to US mainland customers only.

Cheap 4K monitor deals: save 15% on an LG FreeSync 4K gaming monitor at Amazon

Troy Fleming
603 words
25 February 2021
T3

SMLIV

English

© 2021. Future Publishing Ltd. All Rights Reserved.

LG's 24" FreeSync 4K gaming monitor is getting a hefty \$50 price drop for a limited time – don't miss out!

PC gamers looking to upgrade to a cheap 4K gaming monitor are in luck! Amazon has an awesome deal that takes 15% off LG's 24" FreeSync 4K gaming monitor – [on sale for just \\$297!](#)

A solid choice for anyone looking to take their visuals to the next level, LG's 4K gaming monitors are often considered some of the [best gaming monitors](#) for their value on the market.

[toCheeeek](#)

LG 24UD58-B 24" FreeSync IPS 4K Gaming Monitor

[Now: \\$296.99 | Was: \\$349.99 | Savings: \\$53 \(15%\)](#)

An excellent offer on one of LG's latest 4K gaming monitors, grab this FreeSync-ready IPS 4K display on sale for just \$267 right now at Amazon. Enjoy your games like never before with improved clarity, enhanced colors, and response times that'll make you sing hallelujah!

* [Shop all 4K gaming monitor deals at Amazon](#)

LG's 24UD58 4K monitor features an IPS panel that delivers an incredible level of detail and clarity. Combined with a 60Hz refresh rate and AMD's FreeSync technology, games will look and feel better than ever. You may be thinking "only 60Hz?", but for most that is going to be more than enough for 4K gaming.

Running at a higher frame rate than 60Hz right now requires a very pricey setup, which most of us probably can't afford just yet (or can't upgrade thanks to the shortages of CPUs and GPUs). If you game often but aren't in need of the unleashed 144Hz setup, LG's 4K FreeSync gaming monitor is a perfect solution to upgrading your current setup for a bit more responsiveness and clarity.

* [Best 4K monitors](#)

* [Best gaming keyboards](#)

Supporting UHD 4K resolutions, gamers can bump up the settings a bit and enjoy crystal clear high definition gaming – granted you've got the setup to support 4K resolutions. While most GPUs released within the past 3 years will do fine, you'll want to make sure your setup can take advantage of this resolution.

AMD's latest GPUs all support FreeSync, so if you're running AMD this bad boy will pair perfectly with them. FreeSync offers an amazing alternative to standard V-Sync settings, allowing the monitor to adjust frame times and frame rates dynamically to ensure smooth gameplay no matter what frame rate you're running.

This deal is an excellent value for the price, and offers gamers a chance to step into 4K without breaking the bank. Many alternatives will cost you around \$400 for a comparable setup, so jump on this deal before it's over.

Amazon Fire TV and Gaming Boss Marc Whitten Exits to Join Unity Technologies

Todd Spangler

355 words

25 February 2021

Variety

VARTY

English

Marc Whitten, head of Amazon's entertainment devices and services group and former longtime Xbox exec, has left the e-commerce giant to join Unity Technologies as general manager of its Unity Create Solutions game development division.

John Riccitiello, Unity's president and CEO, announced Whitten's hire on the company's earnings call earlier this month.

"Marc is an incredible leader in the world of tech and entertainment," Riccitiello told analysts. "He brings a lot to Unity and his leadership will add to our ability to grow and grow faster in the months and years to come. So there is always something going on at Unity, but in this instance, what we're trying to do is map and make sure that the opportunity is met with the ability to realize it."

At Amazon, Whitten oversaw the company's Fire TV, Fire Tablet, Kindle, Amazon Luna gaming and Amazon Appstore businesses. A rep for the company didn't respond to a request for information about who has taken over his duties. His departure from Amazon was noted this week by industry consultant Matthew Ball, former head of strategy at Amazon Studios.

Prior to joining Amazon in June 2016, Whitten spent two years at smart-speaker company Sonos as chief product officer.

Whitten previously worked at Microsoft for 17 years. He was part of the founding team that launched the first Xbox videogame console in 2001, eventually rising to the rank of corporate VP and chief product officer for Xbox. He's also "essentially the founder of Xbox Live, there from the very beginning," as Riccitiello put it.

Unity develops and sells a platform for creating and running interactive, real-time 3D content. For full-year 2020, the company reported revenue of \$772.4 million, up 43% year over year, and narrowed adjusted operating loss to -\$50.6 million (versus -\$91.8 million the year prior). The Unity Create Solutions segment competes against proprietary game engines built in-house by large game studios, as well as Epic Games' Unreal Engine.

[Amazon Luna](#) is expanding its early access, [as announced yesterday in a brief blog post](#). To be more specific, a greater number of Fire TV customers can now check out the cloud gaming service thanks to a one-week trial for the Luna+ channel. After that, they'll have to pay the early access price of \$5.99 monthly to keep playing.

Additionally, the Amazon Luna controller can now be purchased by anyone [through the store](#). Do note that while the listed price is \$69.99, there is a limited-time offer that shelves \$20 off by using the code 20OFFLUNA21 at checkout. The offer is limited to two controllers per consumer.

Built for Luna

A high-performance controller designed to provide an ideal playing experience on Luna, Amazon's new cloud gaming service. Luna Controller is the best connection between Luna gamers and their games.

Cloud Direct gets to your game faster

Luna Controller uses Cloud Direct technology to connect directly to Amazon's custom game servers when playing on Luna, reducing roundtrip latency by 17 to 30 milliseconds vs. a local Bluetooth connection among PC, Mac, and Fire TV.

Alexa's got game

Just press and ask Alexa to launch games while using the Luna app on Fire TV. You can say things like, "Alexa, play 'GRID.'" Alexa is also available for everyday requests like dimming the lights and telling you the weather.

Comfortable design, precision controls

Luna Controller is designed for comfort with an offset thumbstick and easy-access bumpers. Precise triggers, 4 responsive action buttons, and a 4-way directional pad keep your gameplay on point.

Amazon Luna Controller technical details

Color	Black
Wifi connectivity	Cloud Direct gameplay on Luna Controller supports dual-band 802.11 a/b/g/n (2.4 and 5 GHz) networks
Bluetooth connectivity	Supports Bluetooth Low Energy 5.0 for gameplay on PC, Mac, and Fire TV
USB-C port	For wired gameplay on PC and Mac using USB-C cable (sold separately)
Size	156.4 x 107.6 x 58.5 mm
Weight	235.5 g without batteries, 281.5 g with batteries
Inputs	12 buttons: home, action, menu, microphone, X, Y, A, B, LT, LB, RT, RB 1 direction pad: up, down, left, right 2 thumbsticks: left and right (offset)
Haptics	Vibration motors for tactile feedback during gameplay
Display	LED to display controller connectivity status, low battery indicator, and software updates

Audio for headset	3.5 mm stereo audio output
-------------------	----------------------------

Speaker	None
---------	------

Alexa	Press and ask Alexa to launch games and more on Fire TV
-------	---

Set up your Luna Controller with Luna Controller app Download the Amazon Luna Controller app from the Amazon Appstore for Android, Google Play Store, or iOS

App Store. App lets you connect your controller to wifi to play games on compatible host devices over Cloud Direct.

Compatibility

Works on compatible PC,

Mac, Fire TV, iPhone, iPad, and select Android phones via Cloud Direct. Does not work with gaming consoles.

In-box accessories

2 AA Amazon Basics

batteries, setup guide

Warranty and service

1-year limited warranty and

service. Optional 1-year, 2-year, and 3-year extended warranty available for U.S. customers sold separately. Use of Amazon Luna Controller is subject to these terms.
