UK paytech Paysafe has made two new hires to its burgeoning digital wallets team.

[Rachel McShane \(left\) and Megan Oxman \(right\) join Paysafe's digital wallets division](#)

Rachel McShane joins as digital wallets CFO and Megan Oxman joins as senior vice president of new product development, a newly created role.

Paysafe's digital wallets CEO Chirag Patel says McShane and Oxman's track records "speak for themselves" and believes the pair will make a "huge contribution" to the company's digital wallets business.

McShane joins from Barclays, where she spent the past decade working across a variety of financial products and industry sectors.

Most recently, she was head of finance for the corporate bank and commercial finance director for transaction banking.

Her background, including four years at Barclaycard and a stint in corporate tax advisory and transaction services at consultancy KPMG, "will deliver rich insight into the various market verticals Paysafe focuses on", the paytech says.

McShane says she will "work closely with both Chirag, as well as our Group CFO, Izzy Dawood, to help the team execute its strategic plan, accelerate its growth and deliver value for its customers and shareholders".

Oxman will join Paysafe on 1 March from Amazon's payments team, where she spent eight years launching and operating multiple new consumer payments products.

At Paysafe, Oxman will lead new product development for the digital wallets business, including various initiatives such as the company's embedded finance solution which it recently launched with crypto exchange Binance.

E-commerce giant Amazon.com, Inc. (NASDAQ: [AMZN](#)) isn't known for its video game division, but that could change with another potential hit.

What Happened: Amazon Games and Smilegate released a new massively multiplayer online role-playing game (MMORPG) called Lost Ark this week to people who bought Founder's Packs for early access.

Amazon signed as the North America and European release partner for Lost Ark, which will officially be released in those markets on Feb. 11 as a free-to-play PC game.

The game was first launched in 2019 in South Korea by Smilegate, the makers of the Crossfire game.

Related Link: [Amazon Q4 Earnings Takeaways: Holiday Costs, Prime Price Hike, Stock Soars](#)

Why It's Important: The early access bundles were sold for prices ranging from \$14.99 to \$99.99. Polygon reported that the \$99.99 Platinum Founder's Pack was the most popular on Steam.

Lost Ark had 1.27 million viewers on Twitch at its peak. The game currently ranks ninth at the time of writing for average viewership on Twitch, which is owned by Amazon.

Popular video game streamer Tim the Tatman has been playing the game. One video by the streamer has more than 530,000 views on YouTube, the Alphabet Inc (NASDAQ: [GOOG](#))(NASDAQ: [GOOGL](#))-owned streaming platform.

Lost Ark hit a peak of 532,476 concurrent players on Steam on Tuesday.

After years of setbacks for its gaming division, Amazon appears to have found its way. The company's New World MMORPG released in 2021 was [considered](#) a hit by most metrics and saw similar initial demand and strong viewership.

New World hit a peak of 758,543 viewers on Steam and was a top game on Twitch when it was released.

Amazon's success in the gaming sector could be a future catalyst as the company builds it out.

A COUPLE bought an Amazon return pallet and were shocked by the amount of goodies they found inside.

The [YouTuber, Tom Stanniland](#), occasionally buys pallets for fun to see what goodies come out of them and to share them with his followers.

Tom who lives in the UK with his partner Moon, seemed to love opening the surprise box of goodies which Tom called: "The Best Amazon Returns Pallet YET!"

The couple didn't say how much they paid for the return pallet but shared the mountain of things they unboxed, and it was off to a good start for the couple.

The first item they pulled out was a Razor gaming laptop worth [£900](#), also inside the pallet was a Razor wireless mouse box, however, the mouse was not inside.

All of the items in the box were a mystery to the couple who had no idea what they would receive.

Tom showed off some of the best bargain finds included in the pallet, luckily for Moon there were two sets of brand new DKNY perfumes included, Stories which [costs £50](#), and Be Delicious, [worth £40](#).

Their box also included homeware appliances such as a set of two Tefal pans for the stovetop which retail for [£20](#), a Henry Hoover worth [£130](#) and a Morphy Richards soup maker which costs [£65](#).

The couple even bagged a tattoo gun kit, an electric blanket, a cool box and two pairs of shoes.

They even got a huge box of Space Raider pickled onion crisps, a Mr Frosty machine worth [£20](#), a chocolate fountain, and 32 rolls of toilet roll.

The fun didn't stop there for the couple, as they also received lots of toys and board games in their pallet, from a kid's scooter and wheelbarrow to a poker set and the hugely popular card game, Cards Against Humanity.

There were various bargains inside but unfortunately, there were also some empty boxes too, which can happen when buying return pallets from any retailer.

Tom was particularly excited by one box which looked like it may have had a large flat-screen TV inside but when he opened it he was disappointed there was nothing inside.

Luckily, Moon was there to cheer him up and said: "You know you have to keep your spirit up, it was a good box in the end."

One couple bought a [return pallet for just £18, they received goods which were worth over £10k](#).

Plus, this [woman revealed what she found in her Amazon beauty returns pallet](#).

Meanwhile, check out this [woman who bought a £315 returns pallet & got £1.7k worth of 'broken' products – many just needed batteries replacing](#).

DUBLIN--(BUSINESS WIRE)--February 04, 2022--

The "Cloud Gaming Market by offering, Device Type, and Solution: Global Opportunity Analysis and Industry Forecast, 2021-2030" report has been added to ResearchAndMarkets.com's offering.

Cloud gaming, sometimes called gaming on demand or gaming-as-a-service, is a type of online gaming that runs video games on remote servers and streams them directly to a user's device. Some of the major cloud gaming devices are Microsoft Xbox, google stadia and others.

Independent operation mode of the system and more affordable than other conventional gaming consoles is one of the major factor that is driving the market growth. However, higher latency issues and lesser detail than traditional gaming platforms is primarily restraining the market growth. Moreover, advancement in cloud gaming network coupled with enhanced privacy is creating a lucrative opportunity for the market growth.

The global cloud gaming market is segmented on the basis of offering, device type, solution and region. Based on offering, the market is segmented into infrastructure and gaming platform services. Based on device type, the market is segmented into smartphones, tablets, gaming consoles, PC and laptops, smart tv and HMD. Based on solution, the market is segmented into video streaming and file streaming. Based on the region covered, the market is analyzed across North America, Europe, Asia-Pacific and LAMEA.

Key Benefits

- The study provides an in-depth analysis of the Cloud Gaming market along with current trends and future estimations to elucidate imminent investment pockets.
- Information about key drivers, restraints, and opportunities and their impact analysis on the market size is provided in the report.
- Porter's five forces analysis illustrates the potency of buyers and suppliers operating in the industry.
- The quantitative analysis of Cloud Gaming market for the period 2020-2030 is provided to determine the market potential.

Market Dynamics

Drivers

- Cloud gaming technologies' platform independence
- More affordable than conventional gaming consoles

Restraints

- High latency issues
- Lesser detail than traditional gaming platforms

Opportunities

-- New-age network evolutions

-- Enhanced security and privacy prevention

Companies Mentioned

--

Amazon Luna

-- Blacknut

-- Google LLC

-- Microsoft Corporation

-- NVIDIA Corporation

-- Shadow Sony Group Corporation

-- Tencent

-- Ubitus K. K.

Ipswich man stole gaming mouse from Amazon warehouse

370 words

3 February 2022

Evening Star (Ipswich)

EVSTA

English

Copyright 2022. Archant Regional Limited.

A 20-year-old man who stole a computer mouse from an Amazon warehouse in Ipswich has avoided going to prison despite breaching a suspended prison sentence.

Lukasz Tynny had been working at the Amazon distribution centre on Sroughton Road for around two weeks when he tried to steal a wireless gaming mouse, Suffolk Magistrates' Court heard.

Lesla Small, prosecuting, told the court how security staff at the distribution centre were conducting random searches after a large number of items had gone missing.

On November 26 last year, Tynny was found leaving the site with a Razer DeathAdder V2 Pro computer mouse worth £77.99. He was taken to a side room where he initially said he had purchased the mouse before his shift before making admissions he had stolen it. The item was recovered.

The court heard he was hoping to sell the mouse for around £30.

Ms Small said the offence was a breach of trust given the large amount of items Tynny came into contact with at the Amazon centre.

He was also serving a 16-week prison sentence for assault, suspended for 18 months, at the time of the offence, the court heard.

Tynny, of Boyton Road, Ipswich, previously pleaded guilty to a single charge of theft by employee at his first hearing.

Tynny, who was not represented at the hearing, said that he was under significant financial pressure at the time as he was making payments to somebody who was threatening him.

He said: "I personally believe sending me into custody would allow me to spiral down again."

The court heard that since he was sentenced for an assault in 2020, he has reduced his alcohol intake and complied with the requirements of his previous sentence.

Magistrates warned Tynny that this would be his "last chance" to stay out of trouble but said they were satisfied there was a realistic prospect of rehabilitation, and that his personal situation had improved.

Magistrates increased Tynny's suspended sentence by six months, which means it will now end in March 2023.

He must also complete an additional 45 hours of unpaid work and 10 more rehabilitation activity requirement days.

India, Jan. 29 -- When it comes to deals and sale events, it's always a tough one to separate the real deals from the ones that aren't. The Amazon Grand Gaming Days surely do surprise us every time with a few very attractive deals. However, those deals don't last for long, and hence all you gamers (and deal diggers), you surely don't want to miss out on them. Here's a list of the best gaming deals so far. We will keep updating this list and adding deals as and when we find them.

The sale promises great deals on gaming laptops, desktops & monitors, headphones, gaming consoles, graphic cards, and TVs as well. Some of the brands that are expected to come to the gaming party with offers are - Lenovo, Acer, ASUS, LG, HP, Sony, Dell, Corsair, Cosmic byte, JBL, and more. So, let's get on with the best deals!

Best Gaming Laptop deal under Rs. 60,000: HP Victus Gaming (AMD Ryzen 5 5600H + Radeon RX 5500M)

This is surely one of the best budget gaming laptop deals out there. You get a six-core AMD Ryzen processor paired with the Radeon RX 5500M, which is most certainly better than the Nvidia GeForce GTX 1650 GPU that is normally seen at sub 60K price points. What's more, you get 512GB of SSD as well. Which is a better option than the usual 256GB SSD + 1TB HDD offered at sub 60K price points. We've tested this laptop and can assure you of actual gaming performance numbers across popular games. Here are the performance numbers below.

Full specs: AMD Ryzen 5 5600H 5th, AMD Radeon RX 5500M Graphics (4GB), 16.1-inch@60Hz display, 8GB RAM, 512GB SSD, Windows 10 Home, weight- 2.48kg.

Best deal on GeForce RTX 3060 laptop: ASUS TUF Dash F15

For Rs. 84,990, the Asus TUF Dash F15 is probably one of the cheapest laptops with an Nvidia GeForce RTX 3060 under the hood. We must mention though, the TGP on this one is rather modest at 80W with a 5W boost option available when you push it to the limits, which is lower than the max potential that the GPU can achieve if fed with 130W of power. You will see about 15-20% lower performance than a full-blown RTX 3060. However, for the money, the Asus TUF Dash at 85k is a very sweet deal, especially for 1080P gaming at high settings, where you can extract 100+ FPS in most popular games and take advantage of the 144Hz display on this one. You also get 16GB of RAM and 512GB of NVMe PCIe 3.0 based storage with an additional M.2 Slot. The laptop is also fairly light, weighing approximately 2 kilograms, which is quite light and portable for a 15-inch gaming laptop. There's another catch though, the Intel Core i5-11300H processor on this one kinda borders towards being just about adequate with 4 cores and 8 threads. The good part though is a very healthy base clock speed of 3.1 GHz (and turbo of 4.4 GHz).

Full specs: Intel Core i5-11300H 11th Gen, 6GB Nvidia GeForce RTX 3060 GPU, Gaming, 16GB RAM, 512GB SSD, 15.6-inch FHD display with 144Hz refresh rate, Windows 11 OS.

24-inch monitor with 144Hz refresh rate and 1ms response time under 14K: LG Ultragear 24GL650F

Most online stores are selling this popular gaming monitor at Rs. 14,500. So, at Rs. 13999, we surely think you are saving some cash here. Apply other applicable card discounts and you might be able to push the discount closer to 1K. About the monitor, well it sure is a very good buy for an entry-level (or even a budget mid-range) gaming PC. You get a decent screen size with a high refresh rate and a TN panel with a 1ms response time. The LG Ultragear is height adjustable, very much looks the part, and is well built too. The port selection is fairly wide and the placement is quite convenient as well.

Bang for the buck high-performance gaming mouse: Logitech G502 Hero

For Rs. 3800, the G502 from Logitech offers maximum performance/DPI per rupee (if ever there was such a ratio). With the Hero 25K (25,000 DPI) sensor under the hood, adjustable weights, 11 programmable buttons, onboard memory, and the customary RGB support. The Logitech G502 leaves very little to complain about.

Sure it's not wireless but do you guys really dig a wireless gaming mouse for a desktop gaming PC? Especially when you need to decide between pure gaming-focused features versus the convenience of going wireless. Is it a tough choice?

The deals and deal prices are as per the date of and time of publishing this story, they might change in terms of availability as well as pricing, depending on demand and stocks at Amazon's end

Amazon Grand Gaming Days sale: A quick look at laptops deals

589 words

28 January 2022

India Today Online

INTYON

English

Copyright 2022. Living Media India Limited

Amazon is running a "Grand Gaming Days" sale on its platform. The e-commerce giant is offering deals on several HP, Asus, and Lenovo laptops. The three-day sale is already live on Amazon and will continue until January 30. If you are looking for a laptop, then you can check out the below-mentioned deals.

Amazon is currently offering the 15.6-inch HP Pavilion FHD gaming laptop at a discounted price of Rs 64,990. For the same price, you get the 10th generation Intel Core i5 model. It is backed by an entry-level NVIDIA 1650Ti 4GB graphics card. The official site of HP is selling the same model with 11th gen Intel Core i5 for Rs 69,699, but with 1650 GPU. The 1650Ti variant is slightly more powerful than this.

If you want the latest generation processor, then you will have to spend extra. This might be a little fast, but Intel's 10th-generation chip will also offer users reasonably good performance for most tasks. The laptop comes with a 15.6-inch FHD display and 8GB RAM + 1TB HDD. Users are advised to first check out the laptop in the offline market as this one has a plastic build.

One can also check out the 14-inch Asus ROG Zephyrus G14. This is a better gaming laptop than HP Pavilion, but it will also cost you more. It is available on Amazon for Rs 86,990. It has a more powerful AMD Ryzen 7 5800HS processor, paired with a GTX 1650 4GB graphics card. The device comes with a 144Hz display, a bunch of vents for proper heat dissipation, and support for RGB lighting. The problem with budget gaming laptops is that you get good enough specs at a reasonable price, but with the average build quality. This isn't the case with this Asus laptop, and you get a great build quality, unlike HP.

However, this one lacks a webcam. If you can live with this, then you can go ahead with this deal. It ships with 8GB RAM + 1TB SSD. If you have a budget of around Rs 80,000, then you can buy the same laptop from Reliance Digital's online site as the device is listed for Rs 81,999. But, you only get 512GB SSD. There is also a 6 per cent instant discount with ICICI and HDFC bank cards.

During Amazon's Grand Gaming Days sale, the 15.6-inch Lenovo Ideapad FHD gaming laptop is selling for Rs 74,490. It has AMD's Ryzen 7 5800H processor and the Nvidia GTX 1650 with a 4GB DDR6 dedicated graphics card. It comes with 16GB RAM and 512GB SSD. The device has a 120Hz display and a backlit keyboard. It can be bought for Rs 74,490.

Lastly, the 15.6-inch Acer Nitro 5 AN515-57 gaming laptop is on sale for Rs 68,990. The mentioned price is for the model that has an Intel Core i5-11400H chipset and NVIDIA GeForce RTX 3050 GPU, which will offer good enough performance. It has a 15.6-inch FHD 144Hz IPS display, and 8GB RAM and 256GB SSD+1TB HDD.

This curved Dell gaming monitor delivers a 144Hz refresh rate and 1ms response time, making it ideal for playing games on

T3 spends a lot of time reviewing and rating the [best gaming monitors](#) and, as a result, we know what makes a good one and what makes a good deal.

And, speaking of good gaming monitor deals, right now the Dell S2721HGF 27 Inch Full HD curved gaming monitor is discounted down to just £189 at Amazon.

[View the curved Dell gaming monitor deal at Amazon](#)

If you're in the market for a gaming monitor upgrade this panel is absolutely worth checking out as it delivers a 144Hz refresh rate, 1ms response time and full compatibility with Nvidia G-Sync and AMD FreeSync Premium.

In short, it delivers really strong core functionality at a price point that undercuts many of its rivals significantly. And right here that price is even lower thanks to this Amazon price cut.

Here's the full details of the deal:

[toCheeeek](#)

Dell S2721HGF curved gaming monitor: [was £229.99, now £189 at Amazon](#)

This gaming monitor ticks all the boxes a gamer would be looking for, including a 144Hz refresh rate, 1ms response time, AMD FreeSync, Nvidia G-Sync and DisplayPort and HDMI connectivity. It's also got a sweet 1500R curve to the panel and a 3-year warranty. A £40.99 price cut at Amazon means it is retailing right now for £189, which is a great, market-leading price.

This isn't the absolute cheapest this monitor has been but it's close to it and, crucially, delivers a great gaming package for well under £200.

If you like the idea of this panel but actually fancy a monitor with a higher resolution, then the QHD version of this very same monitor [is also available right now at Amazon](#), albeit without a discount applied. The Dell S2722DGM has the same 27-inch size but comes loaded with a resolution of 2560x1440 instead, so if you've got a rig that can support gaming at that resolution, it is probably also worth scoping out.

To see even more great gaming monitor deals be sure to also check out the below pricing chart, which shows the prices of some of 2022's very finest gaming monitors.

Save big and grab a Razer gaming headset on sale this week

Amazon looks to be having a field day with gaming headset deals this week, most notably on some of Razer's top options. Including discounts on the Kraken, BlackShark V2 and more, this is an excellent chance to grab a new gaming headset on sale cheap.

With some deals taking as much as 40% off the price tag, like the Razer Kraken Ultimate [on sale for just \\$79.99](#), now's the time to grab some of the [best gaming headsets](#) at an even better price. Amazon's sale includes a mix of wireless and wired gaming headsets on sale, with everything from budget-friendly to top-of-the-line seeing price cuts this week.

It's safe to say that these are some of the [best PC gaming deals](#) you'll find right now, as there's quite a bit in terms of savings to be had. The [best gaming headset deals](#), however, you'll find below.

[toCheeeek](#)

Razer Kraken Gaming Headset: [was \\$79.99, now \\$39.99 \(50% off\)](#)

Razer's most popular gaming headset is getting the largest discount of the group, offering a massive 50% off for a limited time. Grab it while you can!

[toCheeeek](#)

Razer Kraken Ultimate: [was \\$129.99, now \\$79.99 \(38% off\)](#)

The upgraded Ultimate version, which features THX 7.1 spatial surround sound support alongside an active noise cancelling mic, is getting a solid \$50 price drop right now. A great price for a premium-feeling headset.

[toCheeeek](#)

Razer BlackShark V2 Pro: [was \\$179.99, now \\$149.99 \(17% off\)](#)

If you're after the best, you can save a little bit on Razer's BlackShark V2 Pro wireless right now. With up to 24 hours of battery life, a super clear mic and THX 7.1 spatial surround sound support, this is a headset worthy of your money.

* [Best Razer keyboard and mouse deals](#)

While there are few differences between Razer's most popular headsets, they all offer solid all-around performance for gaming on PC, PS5 and Xbox. With the price drops happening here, however, it's worth going for the premium options since they're at such good prices. Options like the [Razer Kraken Tournament Edition](#) – which is [on sale for \\$76.54 \(23% off\)](#) – are at their best prices right now.

The sale also covers the [Razer Iskur](#) gaming chair, which may be a bit overpriced at its normal price tag. With over \$100 off, however, it becomes one of the [best gaming chairs](#) available. [On sale for \\$379.99 \(24% off\)](#), it's a worthy option if you're in the market for a new seat.

Amazon is also featuring some of the [best Razer gaming laptop deals](#) you'll find right now. Although these deals don't off the cheapest prices we've seen on Razer's top machines, they're beefy enough to warrant a look if you're hoping to grab a new gaming laptop on sale right now.

Xbox boss says Facebook and Amazon are its main gaming competitors

Callum Bains

324 words

21 January 2022

TechRadar

TECHR

English

© 2022. Future Publishing Ltd. All Rights Reserved

Phil Spencer discusses the tech giants coming into the industry, and what Microsoft can learn from them.

Head of Xbox Phil Spencer has said huge tech companies like Facebook, Amazon, and Google are the brand's main competitors in the gaming industry, as opposed to its traditional rivals.

Speaking to the Wall Street Journal about Microsoft's recently agreed acquisition of Activision Blizzard, Spencer described Xbox's current competitors - including Sony, Nintendo, and Valve - as unlikely to disrupt the industry, but was more concerned that larger tech companies would muscle into the gaming space.

"Nintendo's not going to do anything that damages gaming in the long run because that's the business they're in," he said. "Sony is the same and I trust them... Valve's the same way.

"When we look at the other big tech competitors for Microsoft: Google has search and Chrome, Amazon has shopping, Facebook has social, all these large-scale consumer businesses," he added.

"The discussion we've had internally, where those things are important to those other tech companies for how many consumers they reach, gaming can be that for us."

Spencer goes on to suggest that just as these other, larger tech companies have come to dominate their spaces by providing services across platforms to reach as many consumers as possible, Microsoft could seize the gaming space by setting its sights higher and reaching more players across the industry as a whole.

"I think we do have a unique point of view, which is not about how everything has to run on a single device or platform," he said.

"That's been the real turning point for us looking at gaming as a consumer opportunity that could have a similar impact on Microsoft that some of those other scale consumer businesses do for other big tech competitors."

Amazon Great Republic Day sale: Asus TUF Gaming F15 laptop available with over Rs 7,000 discount, here are details

509 words

18 January 2022

India Today Online

INTYON

English

Copyright 2022. Living Media India Limited

Amazon is hosting its Great Republic Day sale that brings a slew of discounts and offers on a range of products on the e-commerce website. One such is the Asus TUF Gaming F15 laptop, which is seeing a cumulative discount of over Rs 7,000 on its purchase during the Amazon sale, making it a rather sweet deal for those looking for a gaming laptop.

The Asus TUF Gaming F15 is a laptop built by Asus specifically for gamers. The device was launched in India at a price of Rs 84,990. Though it now retails for a usual price of around Rs 63,990. The Amazon sale has further brought this price down for those looking to purchase the laptop.

Under the sale, the Asus TUF Gaming F15 is available for a discounted price of Rs 57,990. The upfront discount offers a straight-up saving of about Rs 6,000 to buyers of the gaming laptop. At this price, the laptop promises a 10th-gen Intel Core i5 processor, a 15.6-inch display with a 144Hz refresh rate, a GeForce GTX 1650 GDDR6 (4GB) graphics and 8GB RAM with 512GB SD.

Easy to see, the specifications are impressive for a gaming laptop that retails with a not-too-demanding price tag. Many are thus finding the Rs 57,990 discounted price on the TUF Gaming F15 to be a deal that is not to be missed. However, there are other benefits to be availed on the laptop's purchase too.

For instance, Amazon is offering a 10 per cent instant discount of up to Rs 1,500 on SBI Credit Card EMI transactions on the laptop. This further brings the price of the TUF Gaming F15 down to Rs 56,490. In addition, buyers can avail of rewards of up to Rs 1,850 on card approval as well as 5 per cent back on this product, if they apply for the Amazon Pay ICICI Bank credit card and are Prime members. Those who are not Prime members can avail of a 3 per cent cashback.

Amazon has also put up an exchange offer of up to Rs 18,150 on the product, so those wanting to exchange their old laptop for it can have a really good incentive for doing so. Other than this, there are no-cost EMI options on select bank cards as well as partner offers for several digital services. You can check all these out on the Amazon listing page for the TUF Gaming F15.

Amazon Great Republic Day Sale 2022: Best deals on Gaming Laptops

Yetnesh Dubey

1,067 words

17 January 2022

Digit

HTDIGI

English

Copyright © 2022 Nine Dot Nine Mediaworx Pvt. Ltd. All Rights Reserved

India, Jan. 17 -- Amazon is hosting the Great Republic Day Sale 2022. The e-commerce giant kicked off the sale from January 16 for Prime members and for non-members on January 17. It will last until January 20. Currently, Amazon is offering up to 70% discount on Electronic items and accessories.

As a result, this particular sale is the best time to buy a gaming laptop at a discounted price range. I've gathered gaming laptops from every price point so you can find the best deal on Amazon regardless of your budget. I have also tested some of these laptops on this and thus can help you make a well-informed decision. Without further ado, here are all the gaming laptops worth buying during the Amazon Great Republic Day Sale 2022.

HP Victus 16

Starting off with the most affordable gaming laptop, the HP Victus 16 powered by an AMD Ryzen 5 5600H and an AMD Radeon 5500M GPU is one of the best deals on Amazon Great Republic Day Sale 2022. I recently tested this laptop and the onboard GPU is more powerful than a GTX 1650, an Nvidia GPU relatively costly laptops use. The AMD Ryzen 5 Hexa Core CPU is as powerful as a Core i5-11300H in terms of single-core performance and more capable than the competition when it comes to multi-core performance. The overall chassis of the laptop is sturdy, well built, and will last you for years to come. The laptop comes with 8GB DDR4 memory, 512GB SSD, and a big 16.1-inch FHD display with a 60Hz refresh rate and 250 nits of maximum brightness.

[Buy Here](#)

HP Victus 16 Nvidia RTX 3050 Gaming Laptop

If you're willing to spend a little bit of extra cash then you can get the well-built HP Victus 16 gaming laptop powered by the latest Nvidia RTX 3000 series GPUs. The advantage of going with an RTX 3000 series GPU, the RTX 3050 more specifically, is the Ray Tracing and DLSS technology that comes along with it. With Ray Tracing, your gaming laptop can show real-life reflections on surfaces within a game, thus making the graphics look pretty. Additionally, with DLSS a game can run games at a higher frame rate without sacrificing the visual quality with the help of AI. Other configurations of the HP Victus 16 gaming laptops are almost identical to the one mentioned above.

[Buy Here](#)

Acer Nitro 5 Nvidia RTX 3050 Gaming Laptop 144Hz Refresh Rate

You can buy this laptop on the Amazon Great Republic Day Sale 2022 for a huge 35% discount. It is another great gaming laptop powered by the Nvidia RTX 3050 GPU. In fact, it's only around a thousand bucks more costly compared to the HP Victus 16 mentioned just above. The main advantage the Acer Nitro 5 has in its price range is a 1080p 120Hz high refresh rate display. The first two laptops I mentioned are limited with a 60Hz display but the Acer equipped the Nitro 5 with a smooth 144Hz high refresh rate display capable of showcasing higher frames in various games. In terms of other important specs, the Acer Nitro 5 comes with 8GB RAM, 512GB SSD, and an Intel 11th Gen Core i5-11400H Hexa-core CPU.

[Buy here](#)

ASUS TUF Gaming F15 Nvidia RTX 3060 Gaming Laptop With Core i5 Hexa Core CPU

An ASUS Gaming laptop you can consider is the ASUS TUF Gaming F15 featuring a combination of an Intel Core i5-11400H Hexa Core CPU and an Nvidia RTX 3060. It is a perfect machine for those who want a CPU almost as capable as the GPU. The Core i5 Hexa Core processor delivers higher performance with the RTX 3060 in several games. Additionally, the ASUS TUF Gaming F15 also features 16GB DDR4 RAM, 512GB SSD, and a 15.6-inch 144Hz high refresh rate display.

[Buy here](#)

Acer Nitro 5 AMD Ryzen 7 5800H Nvidia RTX 3060 Gaming Laptop

I recently reviewed another version of this laptop with a QHD display and called it one of the best value for money gaming laptops. The specific model we're talking about today features an AMD Ryzen 7 5800H Octa-core CPU and Nvidia RTX 3060 with GDDR6 VRAM. The sole combination of the CPU and the GPU makes the Acer Nitro 5 one of the gaming laptops to buy during the Amazon Great Republic Day Sale 2022. Additionally, it features a 1080p 144Hz high refresh rate display and a gaming-inspired chassis. The laptop only comes with a small 256GB SSD but it's something you can easily upgrade in the future unlike an embedded component like a CPU or a GPU.

[Buy Here](#)

HP Victus 16 AMD Ryzen 7 5800H Nvidia RTX 3060 Gaming Laptop With QHD Display

Playing good-looking games at a Quad-HD resolution brings out their life-like qualities and improves the overall gaming experience, the recent release of God of War PC comes to mind. As a result, HP Victus 16 offers one of the most affordable laptops for 1440p gaming thanks to a combination of an AMD Ryzen 7 5800H octa-core CPU and an Nvidia RTX 3060 GPU with 6GB GDDR6 VRAM. As mentioned earlier, the laptop also comes with a 2560 X 1440 resolution 16.1-inch display with a 165Hz high refresh rate and 300 nits of maximum brightness.

[Buy here](#)

Lenovo Legion 5 Pro AMD Ryzen 7 5800H And Overclocked Nvidia RTX 3060 Gaming Laptop

The Lenovo Legion 5 Pro is one of the best value-for-money high-performance gaming laptops you can buy during the Amazon Great Republic Day Sale 2022. For starters, it features an AMD Ryzen 7 5800H Octa-core CPU and an Overclocked Nvidia RTX 3060 GPU with 130W TGP, which delivers more performance. The laptop also comes with a massive 1TB SSD allowing you to store tens of AAA games without connecting additional storage drives. The laptop also has a 1600p 165Hz high refresh rate display with 500 nits of peak brightness.

Amazon Great Republic Day Sale 2022: Gaming deals you should check out

Digit NewsDesk

426 words

16 January 2022

Digit

HTDIGI

English

Copyright © 2022 Nine Dot Nine Mediaworx Pvt. Ltd. All Rights Reserved

India, Jan. 16 -- Republic Day is just around the corner and as always, there are some festive sales that you can check out. Amazon's Great Republic Day Sale is all set to kick off from January 17 to January 20, but Prime members get early access to the deals on January 16. As always, there's a lot of deals to check out and you can take a look at the whole list [here](#).

In this list, we will be looking at some of the best deals that will pique the interest of PC gamers.

Western Digital WD SN550 250GB NVMe Internal SSD

An SSD is always a good investment for your PC. With an SSD, expect blazing fast boot times and loading speeds. This NVMe SSD offers 250GB of storage space with 2400MB/s read and 950MB/s write speeds.

[Check it out here](#)

Linksys MR9000X Tri-Band AC 3000 Gigabit WiFi 5 Router MU-Mimo

If you love online gaming, then you would need a strong and stable internet connection. Check out this router by Linksys. This router offers coverage up to 1500sq. ft. and can connect with over 30 devices.

[Check it out here](#)

Redgear Shadow Blade Mechanical Keyboard

This particular keyboard from Redgear offers better tactile feedback thanks to its use of mechanical switches. It also offers LED lighting, which is something any gamer will appreciate. Another notable feature of the keyboard is the fact that it comes with a control knob that can be used to control media.

[Check it out here](#)

Logitech G102 Light Sync Gaming Mouse

This gaming mouse from Logitech comes with RGB lighting. As such it fits in with the gamer aesthetic. It packs a 6-button layout and the primary buttons are mechanical. It should also be noted that users can quickly cycle through up to five DPI settings via the Logitech G Hub software.

[Check it out here](#)

LG UltraWide

Who wouldn't want a new monitor? This ultra-wide monitor from LG has a large panel size of 34-inch, with an aspect ratio of 21:9. This makes it a good option for not only split-screen gaming, but also for multi-tasking. The monitor supports AMD Freesync and offers a 75Hz refresh rate.

Best **gaming** laptop deals: Acer Nitro 5 on sale at **Amazon** for only \$801

Matt Elliott
747 words
13 January 2022
CNET News.com
CNEWSN
English

(c) CNET Networks Inc. All Rights Reserved.

If you accumulated some holiday cash last month and are looking to plunk down for a new gaming laptop, now is a good time to buy. You'll find some sweet deals right now on models with Nvidia's latest GeForce RTX 30-series graphics. Best Buy has the best prices on gaming laptops right now, particularly the Asus TUF Dash F15 with RTX 3070 graphics on sale for only \$1,300. On a tighter budget? You can get an Acer Nitro 5 with RTX 3050 graphics for just \$801.

Read more: [Best gaming laptop to buy in 2022](#)

Don't miss the deals below and check back here. I'll keep this list updated as sales expire and new deals emerge.

Acer Nitro 5

RTX 3050 graphics for \$801

[Click to view image.](#)

Sarah Tew/CNET

Acer's Nitro 5 has long been a popular pick for gamers on tight budgets. This model is discounted on Amazon and features GeForce RTX 3050 graphics alongside midrange components: a Core i5 CPU, 8GB of RAM and a 256GB solid-state drive. The 15.6-inch display has full HD resolution and a 144Hz refresh rate. This is about as inexpensive as you'll find a gaming laptop with a GPU from Nvidia's current RTX 30 series.

[\\$801.00 AT AMAZON](#)

Asus ROG 16

RTX 3050 Ti graphics for \$1,200

[Click to view image.](#)

Best Buy

This Asus ROG boasts a 16-inch screen powered by an 11th-gen Core i7 and RTX 3050 Ti graphics. The display has a 16:10 aspect ratio with 1,920x1,200-pixel resolution and a speedy 144Hz refresh rate. It's on sale at Best Buy for a very reasonable \$1,200.

[\\$1,150.00 AT BEST BUY](#)

Asus ROG Zephyrus 14

RTX 3060 graphics for \$1,300

[Click to view image.](#)

This 14-inch model from Asus pairs GeForce RTX 3060 graphics with a powerful Ryzen 9 CPU while also serving up an ample 16GB of RAM and a roomy 1TB HDD. The 14-inch display has full HD resolution and a speedy 144Hz refresh rate. If you don't mind a slightly smaller screen than the other laptops here, then you can save \$250 at Best Buy right now on it.

[\\$1,200.00 AT BEST BUY](#)

Asus TUF Dash F15

RTX 3070 graphics for \$1,300

[Click to view image.](#)

Sarah Tew/CNET

This Asus gaming laptop is discounted by \$200 and features a 15.6-inch display with a 1080p resolution and a blazing 240Hz refresh rate. It supplies an 11th-gen Core i7 CPU, 16GB of RAM, GeForce RTX 3070 graphics and a 512GB SSD inside a slim, slablike chassis. It's rare to find a laptop equipped with RTX 3070 graphics at so low a price.

[\\$1,300.00 AT BEST BUY](#)

Gigabyte Aorus 15P YD

RTX 3080 graphics for \$1,950

[Click to view image.](#)

Best Buy

You can save \$400 at Best Buy on this 15-inch Gigabyte gaming laptop that features RTX 3080 graphics, a massive 32GB of RAM and an absurdly fast 240Hz display. It's rare to find a gaming laptop with RTX 3080 graphics near the \$2,000 mark -- and rarer still with that much RAM and that fast a display. It also features an 11th-gen Core i7 CPU and a 1TB SSD.

[\\$1,950.00 AT BEST BUY](#)

Gigabyte Aero 15 OLED

RTX 3080 graphics for \$2,499

[Click to view image.](#)

Gigabyte

With a 4K AMOLED display powered by an 11th-gen Core i7-11800H CPU and RTX 3080 graphics, this beast from Gigabyte can handle gaming and content creation. It also serves up 16GB of RAM and a roomy 1TB SSD. It's on sale with a hefty \$500 discount.

[\\$2,499.00 AT NEWEGG](#)

Apple's Loss in Cloud Gaming Could Benefit Nvidia, Amazon, and Microsoft -- Barrons.com

356 words

11 January 2022

20:08

Dow Jones Institutional News

DJDN

English

Copyright © 2022, Dow Jones & Company, Inc.

Jack Denton

Hand-in-hand with technological disruption comes a fresh list of winners and losers.

As the gaming industry looks to the cloud, Apple's (ticker: AAPL) policies put it at a disadvantage to rivals in Big Tech such as Nvidia (NVDA), Amazon.com (AMZN), and Microsoft (MSFT), according to new analysis.

Cloud gaming is on track to become a \$3 billion industry this year, according to research from data-analytics firm GlobalData -- representing 59% growth from 2021. The sector also has the potential to be far more disruptive within the wider gaming industry if developers can offer cloud-exclusive trending titles, the group said.

Cloud gaming describes video games that are run on remote servers via the internet, and not on the devices on which they're played.

As rivals in Big Tech jockey for position, GlobalData sees Apple at risk of losing out because of its strict policies for the App Store, like taking hefty commissions on most payments.

"Apple is the only big tech company without a gaming service," Rachel Foster Jones, an analyst at GlobalData, wrote in a note Tuesday. "Cloud gaming services will purposely avoid Apple's App Store due to its strict policies and app-approval processes."

If cloud gaming largely bypasses the App Store, GlobalData sees the likes of Nvidia, Amazon, and Microsoft opting for web-based avenues to target iPhone users.

"If successful, Apple will lose control over its customers, and it will be difficult for Apple to launch a competitive gaming service," Jones said. "Apple will therefore struggle to gain a foothold in the cloud gaming space."

As for devices, the most popular platform for cloud gaming is set to be Alphabet's (GOOGL) Android, Jones said.

She added that Samsung Electronics (5930.South Korea), BBK Electronics, Xiaomi (1810.H.K.), and Huawei were all well-positioned if they can partner with gaming providers to take advantage of mobile gaming in 5G.

Amazon Technologies Inc. Patent Issued for User interfaces for object exploration in virtual reality environments (USPTO 11204678)

2,453 words

7 January 2022

Leisure & Travel Week

LATW

9300

English

© Copyright 2022 Leisure & Travel Week via VerticalNews.com

2022 JAN 15 (VerticalNews) -- By a News Reporter-Staff News Editor at Leisure & Travel Week -- Amazon Technologies Inc. (Seattle, Washington, United States) has been issued patent number 11204678, according to news reporting originating out of Alexandria, Virginia, by VerticalNews editors.

The patent's inventors are Baker, Dillon Taylor (Seattle, WA, US), Chuah, Joonhao (Seattle, WA, US), DuPree, Jesse Alan (Fall City, WA, US), Kane, Kristian (Seattle, WA, US), Kim, Hai Quang (Bellevue, WA, US), Mount, Brian James (Seattle, WA, US), Thomas, Michael (Seattle, WA, US), Thompson, Lee David (Normandy Park, WA, US).

This patent was filed on December 11, 2019 and was published online on December 21, 2021.

From the background information supplied by the inventors, news correspondents obtained the following quote: "Virtual reality devices such as headsets with corresponding controllers are increasing in use. Generally, virtual reality devices may allow users to be completely immersed in digital environments, such as video games or other virtual reality environments. However, conventional, text-based menus, associated menu structures, and text-based user interfaces may be difficult, cumbersome, and unnatural to use in such immersive digital environments, and may also reduce the desired immersive effect when using virtual reality devices. Accordingly, there is a need for virtual reality user interfaces that facilitate simple and intuitive interactions by users with objects or other aspects of the digital environments."

Supplementing the background information on this patent, VerticalNews reporters also obtained the inventors' summary information for this patent: "As is set forth in greater detail below, implementations of the present disclosure are directed to systems and methods related to various types of user interfaces that present varying levels or amounts of information within virtual reality, augmented reality, mixed reality, and/or extended reality environments to facilitate object exploration. Using the user interfaces described herein, users may be able to search, browse, view, select, place, move, remove, modify, save, evaluate, compare, purchase, or otherwise manipulate various objects and/or portions of a virtual reality environment in a simple, intuitive, and immersive manner.

"In example embodiments, the example user interfaces for virtual reality environments described herein may include hover cards that present at least one additional detail associated with an object responsive to a hover indication over the object. The object may comprise a two-dimensional image or a three-dimensional model of an object that may be presented within a virtual reality environment, e.g., within a room or space of the virtual reality environment. In addition, the object may comprise furniture, tables, chairs, lamps, rugs, sofas, artwork, mirrors, appliances, other furnishings, doors, windows, trim, paint, flooring, surface coverings or treatments, other fixtures, user account settings, preferences, histories, recommendations, help topics, saved images or screenshots, and/or other aspects of virtual reality environments.

"The at least one additional detail presented within the hover card may include one or more aspects or characteristics associated with the object, such as price, user rating, name, brand, materials, or other information. In addition, the hover card may be presented in a defined position and orientation relative to the object, such as above or to a side of the object. Further, the at least one additional detail may also include one or more selectable variations or options associated with the object, such as color, materials, texture, finish, or other variations.

"In additional example embodiments, the example user interfaces for virtual reality environments described herein may include detail cards that present at least some additional details associated with an object responsive to a selection input with respect to the object. The object may comprise a two-dimensional image or a three-dimensional model of an object that may be presented within a virtual reality environment, e.g., within a room or space of the virtual reality environment. In addition, the object may comprise furniture, tables, chairs, lamps, rugs, sofas, artwork, mirrors, appliances, other furnishings, doors, windows, trim, paint, flooring, surface coverings or treatments, other fixtures, user account settings, preferences, histories, recommendations, help topics, saved images or screenshots, and/or other aspects of virtual reality environments.

"The at least some additional details presented within the detail card may include one or more aspects or characteristics associated with the object, such as badges, name, brand, price, user rating, materials, shipping information, availability information, or other information. In addition, the detail card may be presented in a position and orientation relative to the object based on a plurality of factors, such as a field of view of the user, aspects or characteristics of the object, other objects presented proximate the object within the virtual reality environment, portions of the environment presented proximate the object within the virtual reality environment, or other factors. Further, one or more selectable options may also be presented with the detail card that presents at least some additional details associated with the object, such as a replace option, a duplicate option, a remove option, a full details option, an add to list option, an add to shopping cart option, or other selectable options. Moreover, the detail card may be graspable, movable, scrollable, and/or otherwise manipulatable by a user, e.g., using a controller or other input device."

The claims supplied by the inventors are:

"1. A computer-implemented method to present user interfaces in an extended reality environment, comprising: receiving, via an input device, a first input associated with an object presented within an extended reality environment, the first input comprising a hover indication over the object; causing, via a display device, presentation of a first user interface associated with the object responsive to the first input, the first user interface comprising a hover card including at least one additional detail associated with the object overlaid onto a presentation of the extended reality environment; receiving, via the input device, a second input associated with the object presented within the extended reality environment, the second input comprising a selection input associated with the object; causing, via the display device, presentation of a second user interface associated with the object responsive to the second input, the second user interface comprising a detail card including additional details and selectable options associated with the object overlaid onto the presentation of the extended reality environment; receiving, via the input device and during the presentation of the second user interface, a third input associated with the object presented within the extended reality environment, the third input comprising a second hover indication over the object; causing, via the display device, presentation of a third user interface associated with the object responsive to the third input, the third user interface comprising a second hover card including object variations associated with the object overlaid onto the presentation of the extended reality environment, the third user interface being presented together with the second user interface; receiving, via the input device, a fourth input associated with the object presented within the extended reality environment, the fourth input comprising a selection of a full details selectable option; and causing, via the display device, presentation of a fourth user interface associated with the object responsive to the fourth input, the fourth user interface comprising a detail page including additional details presented via a plurality of columns of detail panels overlaid onto the presentation of the extended reality environment; wherein the plurality of columns of detail panels are movable and scrollable by a user via the input device; wherein individual columns of the plurality of columns of detail panels are movable and scrollable by the user via the input device; and wherein individual detail panels of the plurality of columns of detail panels are at least one of graspable, movable, or scrollable by the user via the input device.

"2. The computer-implemented method of claim 1, wherein the at least one additional detail included in the hover card of the first user interface comprises a plurality of selectable variations associated with the object; and wherein the plurality of selectable variations included in the hover card of the first user interface are selectable by the user via the input device.

"3. The computer-implemented method of claim 1, wherein the detail card of the second user interface is at least one of movable, scrollable, or graspable by the user via the input device.

"4. The computer-implemented method of claim 1, wherein the object variations included in the second hover card of the third user interface are selectable by the user via the input device.

"5. The computer-implemented method of claim 1, wherein the hover card is presented at a location above the object within the extended reality environment in the first user interface; wherein the detail card is presented proximate the object within the extended reality environment in the second user interface based at least in part on a field of view of the user; wherein the second hover card is presented at a location above the object within the extended reality environment in the third user interface; and wherein the detail page is presented as including the plurality of columns of detail panels within the extended reality environment in the fourth user interface within at least three zones associated with portions of the field of view of the user.

"6. A computer-implemented method, comprising: receiving, via an input device, an input associated with an object presented within an extended reality environment, the input comprising a selection of a full details selectable option; and causing, via a display device, presentation of a user interface associated with the object responsive to the input, the user interface comprising a detail page including additional details presented via a plurality of detail panels overlaid onto a presentation of the extended reality environment; wherein the plurality of detail panels comprises a plurality of columns of detail panels; wherein individual columns of the plurality of columns of detail panels are movable and scrollable relative to each other by a

user via the input device; and wherein at least one detail panel of the plurality of detail panels is movable, scrollable, and graspable by the user via the input device.

"7. The computer-implemented method of claim 6, wherein the user interface comprises at least three zones associated with portions of a field of view of the user, the at least three zones including a primary zone, a secondary zone, and a tertiary zone that are substantially centered within the field of view of the user.

"8. The computer-implemented method of claim 7, wherein the primary zone includes a first width and a first height within the field of view of the user, the secondary zone includes a second width greater than the first width and a second height greater than the first height within the field of view of the user, and the tertiary zone includes a third width substantially similar to the second width and a third height greater than the second height within the field of view of the user.

"9. The computer-implemented method of claim 6, wherein the plurality of columns are arranged substantially in a curve around a user position within the extended reality environment.

"10. The computer-implemented method of claim 6, wherein the plurality of columns comprise respective columns of videos, object variations, object information, images, user reviews, manufacturer information, and recommendations associated with the object.

"11. The computer-implemented method of claim 6, wherein the plurality of columns are at least one of movable or scrollable within a field of view of the user.

"12. The computer-implemented method of claim 6, further comprising: receiving, via the input device, an input associated with grasping the at least one detail panel; and causing, via the display device, presentation of the at least one detail panel coupled to the input device.

"13. The computer-implemented method of claim 12, further comprising: receiving, via the input device, an input associated with moving the at least one detail panel; and causing, via the display device, presentation of moving the at least one detail panel coupled to the input device.

"14. The computer-implemented method of claim 12, further comprising: receiving, via the input device, an input associated with scrolling within the at least one detail panel; and causing, via the display device, presentation of scrolling within the at least one detail panel coupled to the input device.

"15. The computer-implemented method of claim 12, further comprising: receiving, via the input device, an input associated with releasing the at least one detail panel; and causing, via the display device, presentation of release of the at least one detail panel and placement within the detail page.

"16. The computer-implemented method of claim 6, further comprising: receiving, via the input device, an input associated with at least one keyword within the plurality of detail panels of the detail page; and causing, via the display device, modification of presentation of the at least one keyword within the plurality of detail panels of the detail page.

"17. The computer-implemented method of claim 6, further comprising: receiving, via the input device, a second input associated with the object presented within the extended reality environment, the second input comprising a hover indication over the object; and causing, via the display device, presentation of a second user interface associated with the object responsive to the second input, the second user interface comprising a hover card including at least one additional detail associated with the object overlaid onto the presentation of the extended reality environment.

"18. The computer-implemented method of claim 6, further comprising: receiving, via the input device, a third input associated with the object presented within the extended reality environment, the third input comprising a selection input associated with the object; and causing, via the display device, presentation of a third user interface associated with the object responsive to the third input, the third user interface comprising a detail card including additional details and selectable options associated with the object overlaid onto the presentation of the extended reality environment."

Amazon Prime Gaming announced which video games will be free during the month of January. And something it has been doing for a few months now, it is giving away a game that is part of the Star Wars franchise, this time gamers will have the opportunity to enjoy Star Wars Jedi: Fallen Order.

The only thing you have to do to access these free video games is to have an Amazon Prime subscription, which costs 899 pesos per year or if you prefer, you can pay 99 pesos per month. The best thing is that if you are interested in any of the free games and you don't have this service, you can enjoy the first month for free.

View this post on Instagram A post shared by Star Wars (@jedi_fallen_order)

To start playing the video games that will be free in January 2022, all you have to do is go to Prime Gaming and once there you will see the different free video games

.Below, we leave you the complete list of video games that you can enjoy for free.

Star Wars Jedi: Fallen Order (Origin code)Total War: Warhammer (Epic Games)World War Z: Aftermath (Epic Games)Two Point HospitalPaper Beast - Folded EditionFahrenheit: Indigo Prophecy RemasteredWRC 7 FIA World Rally ChampionshipAbandon ShipIn Other WatersTake into account that for Epic Games video games you will have to link your account with Prime Gaming and download the application to be able to play.

On the other hand, for Star Wars Jedi: Fallen Order you only have to download the Origin application on your PC and from there on the site you can redeem the game to enjoy it for free.

Razer gaming holiday deals up to 50% off at Amazon

Michelle Rae Uy
675 words

Get your game face on by grabbing some of your favorite Razer accessories while they're on sale for up to 50% off at Amazon

If you haven't already bought that gamer in your life (or yourself) that perfect Christmas stocking stuffer, it's not too late. Black Friday and Cyber Monday may have come and gone, but Amazon is still running plenty of deals on Razer gaming accessories that will have gamers and your pocketbook jumping for joy.

In fact, some of these deals are so good, they're criminal. With up to 50% off, this might be the best time to grab some Razer gear, even if you're done with your holiday shopping. From top-quality gaming keyboards and superfast mice to detailed webcams and comfy gaming chairs, you can round out a whole gaming setup with the peripherals on sale.

[toCheeeek](#)

Razer Huntsman Elite Gaming Keyboard: [was \\$199.99, now \\$129.99 at Amazon](#)

The Razer Huntsman Elite Gaming Keyboard is one of the best keyboards in Razer's line-up. On sale for \$129.99, it's currently 35% off its typical \$199.99 price tag. That's hard to beat for a full-sized optical-mechanical keyboard with full RGB lighting, onboard memory, and a super comfortable wrist rest. You're essentially paying mid-range prices for a premium keyboard.

[toCheeeek](#)

Razer Basilisk Ultimate Hyperspeed Wireless Gaming Mouse: [was \\$149.99 now \\$79.99 on Amazon](#)

If you're in the market for a new mouse instead or need a Razer one to pair with your new Huntsman, the Razer Basilisk Ultimate Hyperspeed Wireless Gaming Mouse is currently discounted a whopping 47%. That means its typical asking price of \$149.99 has dropped to \$79.99. While you can get plenty of decent mice for that price, including from Razer, you won't find one with 11 fully programmable buttons and a 20k+ sensor.

[toCheeeek](#)

Razer BlackShark V2 Pro Wireless Gaming Headset: [was \\$179.99 now \\$129.99](#)

You can also upgrade your audio at a much more affordable price with the Razer BlackShark V2 Pro Wireless Gaming Headset, a headset that normally goes for \$179.99. Getting 28% off might not seem like a big deal compared to these other Razer discounts but paying \$129.99 for great audio, an extremely comfortable fit, and superb battery life – these are wireless, after all – is more than worth it. In fact, you can read our thoughts on its wired cousin in our [Razer BlackShark V2 review](#) to see why we think this makes such a great aural addition to any gaming rig.

[toCheeeek](#)

Razer Kiyo Pro Streaming Webcam: [was \\$199.99 now \\$99.99](#)

Streamers should be heartened to see that the accessories needed to broadcast on Twitch or Discord are included in Razer's Amazon holiday sale. Take the Razer Kiyo Pro Streaming Webcam. This HDR-enabled 1080p webcam, that we gave a perfect score to in [our review](#), is getting the biggest percentage markdown on Razer's Amazon store. Instead of \$199.99, the Kiyo is now 50% at \$99.99. Or, to put it another way, it's half off.

[toCheeeek](#)

Razer Iskur Gaming Chair: [was \\$499.00 now \\$299.99](#)

While it's easy to discount how important a good, comfortable chair is, it's also easy to get discouraged by their much higher prices. After all, the only thing you really do is sit in it. But, if you want to avoid long-term

back, shoulder, and arm injuries, you owe it to yourself to get a comfortable chair with built-in lumbar support like the Iskur. Luckily, at 40% off, the Razer Iskur gaming chair is currently \$299.99, making this a much more affordable proposition. And, if you need convincing, take a look at our [review for the Razer Iskur](#) where we discuss what makes this 5/5-scored chair such a worthy purchase.

(c) CNET Networks Inc. All Rights Reserved.

Do you have a gamer on your holiday shopping list? You'll find some sweet deals right now on models with Nvidia's latest GeForce RTX 30-series graphics. Best Buy has the best prices on gaming laptops right now, particularly the Asus ROG 16 with RTX 3050 Ti graphics on sale for only \$1,150. And check out the other 16-inch sale model, the HP Omen 16 with a higher-resolution display and RTX 3070 graphics for \$1,650. On a tight budget? You can get an Acer Nitro 5 with RTX 3050 graphics for less than \$800.

Read more: [Best gaming laptop to buy in 2021](#)

Don't miss the deals below and check back here. I'll keep this list updated as sales expire and new deals emerge.

Acer Nitro 5

RTX 3050 graphics for \$795

[Click to view image.](#)

Sarah Tew/CNET

Acer's Nitro 5 has long been a popular pick for gamers on tight budgets. This model is discounted on Amazon and features GeForce RTX 3050 graphics alongside midrange components: a Core i5 CPU, 8GB of RAM and a 256GB solid-state drive. The 15.6-inch display has full HD resolution and a 144Hz refresh rate. This is about as inexpensive as you'll find a gaming laptop with a GPU from Nvidia's current RTX 30 series.

[\\$795.00 AT AMAZON](#)

Asus ROG 16

RTX 3050 Ti graphics for \$1,150

[Click to view image.](#)

Best Buy

This Asus ROG boasts a 16-inch screen powered by an 11th-gen Core i7 and RTX 3050 Ti graphics. The display has a 16:10 aspect ratio with 1,920x1,200-pixel resolution and a speedy 144Hz refresh rate.

[\\$1,150.00 AT BEST BUY](#)

Asus ROG Zephyrus 14

RTX 3060 graphics for \$1,200

[Click to view image.](#)

This 14-inch model from Asus pairs GeForce RTX 3060 graphics with a powerful Ryzen 9 CPU while also serving up an ample 16GB of RAM and a roomy 1TB HDD. The 14-inch display has full HD resolution and a speedy 144Hz refresh rate. If you don't mind a slightly smaller screen than the other laptops here, then you can save \$350 right now on it.

[\\$1,200.00 AT BEST BUY](#)

HP Omen 16

RTX 3070 graphics for \$1,650

[Click to view image.](#)

Sarah Tew/CNET

This HP Omen 16 model is on sale and features a roomy and speedy hi-res display. The 16.1-inch display has a QHD (2,560x1,440-pixel) resolution and a 165Hz refresh rate powered by an 11th-gen Core i7 CPU and GeForce RTX 3070 graphics. And it's discounted by \$150 right now at Best Buy.

[\\$1,650.00 AT BEST BUY](#)

Gigabyte Aorus 15P YD

RTX 3080 graphics for \$2,150

[Click to view image.](#)

Best Buy

You can save \$200 on this 15-inch Gigabyte gaming laptop that features RTX 3080 graphics, a massive 32GB of RAM and an absurdly fast 240Hz display. It's rare to find a gaming laptop with RTX 3080 graphics near the \$2,000 mark -- and rarer still with that much RAM and that fast a display. It also features an 11th-gen Core i7 CPU and a 1TB SSD.

[\\$2,150.00 AT BEST BUY](#)

Gigabyte Aero 15 OLED

RTX 3080 graphics for \$2,499

[Click to view image.](#)

Gigabyte

With a 4K AMOLED display powered by an 11th-gen Core i7-11800H CPU and RTX 3080 graphics, this beast from Gigabyte can handle gaming and content creation. It also serves up 16GB of RAM and a roomy 1TB SSD. It's on sale with a hefty \$500 discount.

Take this Razer Deathadder V2 gaming mouse [for \\$34.99 \(was \\$69.99\)](#) - an absolute classic that's at its cheapest ever price at Amazon today. This one's been an absolute favorite of gamers worldwide for a good few years now, and this latest revision has made it even better. It's super comfortable (for right-hand users), features a super-smooth 20K DPI sensor, and rubberized sides for plenty of grip over those long sessions.

* [See all of Amazon's deals on Razer PC gaming peripherals](#)

For a cheap gaming headset, this Razer Kraken [for \\$49.99 \(was \\$79.99\)](#) is a good option too. It's \$10 off its cheapest price ever right now, but it's easily one of the better lower to mid-range gaming headsets on the market. Not only is it super comfortable thanks to its spacious design and memory foam padding, but the 50mm audio drivers and 7.1 surround sound afford you decent quality and features for the price. It is wired, but that does come with the added benefit of not having to charge - simple but effective.

And, our final cheap pick for today's Razer PC gaming deals from Amazon is this Razer Seiren X USB microphone [for \\$59.99 \(was \\$99\)](#). While more niche than our other recommendations, this mic is a good option for the 'gamer who has everything' - especially if they've expressed an interest in streaming. It's fairly lightweight, but sturdy thanks to its aluminum build and features easy-to-use controls and noise-canceling tech built in to reduce those annoying background sounds.

Note, while we've just made three recommendations for a cheap Christmas gift, there are, in fact, a ton more Razer PC gaming deals available today (including premium gear) - all of which you can [check out here](#). If you're visiting from outside the US, then you'll also find the best prices on Razer peripherals in your region just below.

Razer PC Gaming deals at Amazon

[toCheeeek](#)

Razer DeathAdder V2: [\\$69.99 \\$34.99 at Amazon](#)

Save \$35 - A cheap gaming mouse par-excellence, the Razer DeathAdder has been the choice for many a gamer for a good few years now. This latest revision brings simple refinement to an established classic with a new 20K DPI sensor while otherwise maintaining an 'if it ain't broke don't fix it' standpoint. It's easily one of the most comfortable gaming mice on the market and right now it's at its cheapest price ever at Amazon. Want to go wireless? Check out the DeathAdder V2 Pro [for \\$69.99](#).

[toCheeeek](#)

Razer Kraken gaming headset: [\\$79.99 \\$49.99 at Amazon](#)

Save \$30 - When it comes to outright bang for the buck, it's hard to beat the Razer Kraken gaming headset. It's built for all-day comfort, has decent sound, and also supports 7.1 surround sound - all at a price that's very easy on the pocket indeed. Also, a sturdy aluminum frame means this one's going to last a good few years down the line. Want to go wireless? We'd recommend the Barracuda X [for \\$79.99](#) - also on sale today at Amazon.

[toCheeeek](#)

Razer Seiren X USB microphone: [\\$99.99 \\$59.99 at Amazon](#)

Save \$40 - The Seiren X might be the entry-level USB microphone from Razer but that doesn't mean it skimps on features or quality. It's built from sturdy aluminum, has an in-built shock absorber so it doesn't pick up vibrations from your desk, and also features an 'ultra precise' pickup pattern to ensure you don't get background bleed. It's a great option if you're looking to get started in the world of streaming.

PSN, Xbox, Twitch and other gaming services go down amid Amazon Web Services outage

Andrew Griffin

299 words

15 December 2021

22:56

Independent Online

INDOP

English

© 2021. Independent Digital News and Media Ltd. All Rights Reserved

Significant parts of the gaming [internet](#) have been hit by problems after what appears to be a problem with [Amazon's](#) Web Services.

Users of PSN, [Xbox Live](#), [Twitch](#) and more all reported issues with getting the services to work as expected.

Amazon reported problems with internet connectivity in two regions. The company's Web Services division powers much of the internet, meaning that problems can rapidly spread and affect seemingly unconnected websites and apps.

On its status page, Amazon Web Services said that the US-WEST 1 region in Northern California, and the US-WEST 2 region in Oregon were both having problems with internet connectivity.

In another update, it said it had found the cause of the problem and had "taken steps to restore connectivity". "We have seen some improvement to Internet connectivity in the last few minutes but continue to work towards full recovery," it wrote.

Shortly after, it said that the problems were resolved.

On its Twitter account, Xbox said it was aware with problems specifically with the game Apex Legends. But it suggested that the rest of its services were online, and its status page indicated that everything was thought to be operational.

In a tweet, Twitch said it was "aware of several issues affecting Twitch services", but did not give any information on what they were. Its team was "aware and hard at work fixing them", it said.

The problems come just days after [another major outage at Amazon Web Services, which had similarly widespread effects on other parts of the internet](#).

Do you have a gamer on your holiday shopping list? You'll find some sweet deals right now on models with Nvidia's latest GeForce RTX 30-series graphics. Best Buy has the best prices on gaming laptops right now, particularly the HP Omen 16 with RTX 3060 graphics on sale for only \$1,200. And the Asus ROG Zephyrus 15 with a powerful AMD Ryzen 9 CPU and RTX 3070 graphics is an incredible value at \$1,550.

Read more: [Best gaming laptop to buy for 2021](#)

Don't miss the deals below and check back here. I'll keep this list updated as sales expire and new deals emerge.

Acer Nitro 5

RTX 3050 graphics for \$789

[Click to view image.](#)

Sarah Tew/CNET

Acer's Nitro 5 has long been a popular pick for gamers on tight budgets. This model is discounted on Amazon and features GeForce RTX 3050 graphics alongside midrange components: Core i5 CPU, 8GB of RAM and a 256GB solid-state drive. The 15.6-inch display has full HD resolution and a 144Hz refresh rate. This is about as inexpensive as you'll find for a gaming laptop with a GPU from Nvidia's current RTX 30 series.

[\\$789.00 AT AMAZON](#)

HP Omen 16

RTX 3050 Ti graphics for \$1,200

[Click to view image.](#)

Sarah Tew/CNET

This discounted HP Omen boasts a larger screen and better graphics than the Nitro 5 above. It also looks cooler, IMHO. It features a 16.1-inch, full HD display with a 144Hz refresh rate, and it's powered by AMD's awesome octa-core Ryzen 7 5800H CPU and GeForce RTX 3050 Ti graphics. And it's discounted by \$130 right now at Best Buy.

[\\$1,200.00 AT BEST BUY](#)

Asus ROG Zephyrus 14

RTX 3060 graphics for \$1,550

[Click to view image.](#)

This 14-inch model from Asus pairs GeForce RTX 3060 graphics with a powerful Ryzen 9 CPU while also serving up an ample 16GB of RAM and a roomy 1TB HDD. The 14-inch display has full HD resolution and a speedy 144Hz refresh rate.

[\\$1,550.00 AT BEST BUY](#)

Asus ROG Zephyrus 15

RTX 3070 graphics for \$1,550

[Click to view image.](#)

Newegg

At its sale price, this 15-inch ROG Zephyrus provides a CPU and GPU that are each a step up from what you usually get for the money. Currently discounted by \$300 at Best Buy, it features an AMD Ryzen 9 CPU and GeForce RTX 3070 graphics when other models around \$1,500 serve up a Ryzen 7 chip and RTX 3060 graphics. You also get a sufficient 16GB of RAM and a roomy 1TB SSD. The 15.6-inch display also provides a higher resolution than you might expect; instead of a standard HD panel, it has 2,560x1,440-pixel resolution and a speedy 165Hz refresh rate.

[\\$1,550.00 AT BEST BUY](#)

Gigabyte Aorus 15P YD

RTX 3080 graphics for \$2,000

[Click to view image.](#)

Best Buy

You can save \$350 on this 15-inch Gigabyte gaming laptop that features RTX 3080 graphics, a massive 32GB of RAM and an absurdly fast 240Hz display. It's rare to find a gaming laptop with RTX 3080 graphics for \$2,000 and rarer still with that much RAM and that fast a display. It also features an 11th-gen Core i7 CPU and a 1TB SSD.

[\\$2,000.00 AT BEST BUY](#)

Gigabyte Aero 15 OLED

RTX 3080 graphics for \$2,199

[Click to view image.](#)

Gigabyte

With a 4K AMOLED display powered by an 11th-gen Core i7-11800H CPU and RTX 3080 graphics, this beast from Gigabyte can handle gaming and content creation. It also serves up 16GB of RAM and a roomy 1TB SSD. It's on sale at discount with a massive \$800 discount, and you can bring the price down even further to \$1,899 with a \$300 mail-in rebate.

[\\$2,199.00 AT NEWEGG](#)

Save 30% off one of the best gaming headsets to date at Amazon

If you're on the hunt for a good PC gaming headset on sale cheap today, Amazon has you covered with an excellent deal on the SteelSeries Arctis 7 wireless gaming headset. Taking almost \$50 off a solid budget-friendly wireless gaming headset, this is an absolute steal for the price.

[On sale for \\$122.27](#), Amazon's deal on this PC gaming headset is perfect for those who want to grab a basic no-frills headset that comes with some pretty nifty features. While the sound quality won't blow away any high-end gaming headsets anytime soon, for the price this deal is well worth a look for the budget-conscience buyer.

[toCheeeek](#)

SteelSeries Arctis 7 Wireless Gaming Headset: [was \\$169.99, now at \\$122.27 at Amazon](#)

A great headset at this price, the Arctis 7 offers a great balance of affordability, features and sound quality at a cheaper price than premium level headsets. Excellent as a basic PC gaming headset or backup PS5/Xbox gaming headset.

* [Shop all PC gaming headsets on sale at Amazon](#)

One of the [best gaming headsets](#) to date. While the Arctis 1 offer delivers more savings, the Arctis 7 is a pro gamers dream when it comes to sound. DTS:X v2.0 surround sound support provides incredible detail and clarity, providing a true wireless headset with excellent sound. Our [SteelSeries Arctis 7X wireless review](#) can provide more insight into just how good this headset is.

With up to 24 hours of battery life, an effective range of almost 40 feet and one of the best mics in gaming, the Arctis 7 at this price is well worth the price of admission. Designed for maximum comfort and performance during extended gaming sessions, it's hard to find a headset that compares to what the Arctis 7 can provide for the price.

Grabbing the Arctis 7 wireless gaming headset can be a significant upgrade if you've got the cash. That said there are plenty of deals going on right now on SteelSeries gaming headsets, and if the Arctis 7 isn't quite what you're after most of the SteelSeries gaming headsets are on sale right now as well. Just check out more deals below to find the set that's right for you.

The event is almost over, so it's time to finish off your shopping

[Cyber Monday](#) is here, and that means it's your last chance before Christmas to get discounts on all sorts of [tech](#), including gaming chairs.

Available in all shapes and sizes, they are generally split into three categories. The first resemble race-car seats and are mounted to the wheels of a conventional office chair, ready to be rolled up to your desk and gaming PC.

Follow live:

[The best Cyber Monday deals to shop now](#)

The second type of gaming chair sits directly on the floor, and is better-suited to console gaming on a television. Being so low, they put gamers at the perfect height for playing with a gamepad in front of the big screen.

Lastly, there are more specialist chairs designed for racing games. These often have mounts for steering wheels, pedals and gear shifters, and in some cases even allow for a console, speakers and television or monitor to be attached, creating an all-in-one system.

Cyber Monday brings some of the best deals on [tech](#), [toys](#), [gaming](#), [home appliances](#) and more. And here at IndyBest, we're continually finding great discounts to make the final day of the event as stress-free as possible.

GTForce roadster 1 sport racing gaming chair: Was £99.99, now £74.99, [Amazon.co.uk](#)

We've found a great deal on this [GTForce roadster 1 sport racing gaming chair on Amazon](#). Just like its name suggests, this is a race-car seat type chair, with a bucket seat design and base with five wheels.

Made from faux leather, it's still soft and designed to be comfortable and ensure you're able to keep going when the game gets tough, and ultimately win the race. Keen car enthusiasts will also appreciate the air-vent design on the back of the chair, which mimics sports car's engine vents too.

The chair has a lift and tilt mechanism too, while the back part of the chair can be moved up or down, according to what you need, for proper spine support.

It's on the lighter side when it comes to weight too, at just 16kg, while other similar styles can be as heavy as 21kg. And it comes in a modest black and white colourway, meaning it would go with most home decors too.

So when you're not using it for gaming, it's also a perfectly good and supportive office chair for working from home too – if anyone needed any more convincing to make the most of this deal.

Save up to 71% on gaming chairs in Anda Seat's Black Friday sale

While not the highest-rated, the Corsair T3 Rush gaming chair just made the list as one of our [best gaming chairs](#), thanks to its affordability and comfort, so we're excited to see the [Corsair T3 Rush for just £172.98 at Amazon](#).

There are plenty of [Black Friday deals](#) flooding the market, but the Corsair T3 Rush is a real treat for those seeking out a more toned-down gaming chair - or even one that can blend in with an everyday office environment.

When compared to other [Black Friday gaming chair deals](#), the T3 Rush comes with a greater discount than some of the premium brands like Secretlab or Noblechairs, coming in at a 31% discount.

Not in the UK? Scroll down for deals in your region.

Today's best Corsair T3 Rush Black Friday deals

[toCheeeek](#)

Corsair T3 Rush | [£249.99 £184.57 at Amazon](#)

Save £65: Fancy a fabric chair instead of PU leather? The Corsair T3 Rush is now £65 off over Black Friday and Cyber Monday. Notable here is the 180-degree recline, for when you need to take a quick nap between raids or Zoom meetings.

It's down to personal preference how you view the design of the Corsair T3 Rush - the lack of the bright, often garish colour palette that comes hand-in-hand with the gaming aesthetic could be a big pro or con depending on your style.

However, the body of the chair still elevates it over the everyday office chair, with its starship commander-esque headrest cutouts.

The Corsair T3 Rush earns major brownie points for how comfortable it is too, with its breathable soft fabric exterior, memory foam lumbar support and extremely customisable backrest position.

For the fact that this already affordable chair has dropped below the £200 mark with this £65 off, we'd recommend this one of our best [Black Friday gaming chair deals](#) for 2021.

Key questions answered: Study Explore COVID 19 Outbreak Impact Analysis

The study objectives of this report are:

To study and analyze the global market size (value & volume) by company, key regions/countries, products and application, history data, and forecast to 2025. To understand the structure of market by identifying its various subsegments. To share detailed information about the key factors influencing the growth of the market (growth potential, opportunities, drivers, industry-specific challenges and risks). Focuses on the key global manufacturers, to define, describe and analyze the sales volume, value, market share, market competition landscape, SWOT analysis and development plans in next few years. To analyze the growth trends, future prospects, and their contribution to the total market. To project the value and volume of submarkets, with respect to key regions (along with their respective key countries). To analyze competitive developments such as expansions, agreements, new product launches, and acquisitions in the market. To strategically profile the key players and comprehensively analyze their growth strategies.

The Study Explore COVID 19 Outbreak Impact Analysis

What should be entry strategies, countermeasures to economic impact, and marketing channels? What are market dynamics? What are challenges and opportunities? What is economic impact on market? What is current market status? What's market competition in this industry, both company, and country wise? What's market analysis by taking applications and types in consideration?

FLYWAL

English

(c) 2021. Theflyonthewall.com. All Rights Reserved.

17:15 EST Amazon Prime Gaming announces holiday season's 'free' games Amazon (AMZN) Prime Gaming's Keith Carpenter, blogged, in-part: "Make the most of your Amazon Prime membership this holiday season, as customers of all ages can enjoy free games and in-game content for some of today's most popular video games. This month, Prime Gaming members can dive into the diverse lineup of free games, including Need for Speed: Hot Pursuit Remastered, Frostpunk, Journey to the Savage Planet, Football Manager 2021 and more, as well as additional great in-game content for popular titles including, Battlefield 2042, Apex Legends, Fall Guys, Genshin Impact and more. Beginning on December 1, Prime members can claim an additional 9 titles on PC!

The December lineup allows members to feel the thrill of the chase and the rush of escape in Need For Speed Hot Pursuit Remastered, and to take on the role of director at Spellcaster University...As we announced earlier this month, Amazon's Prime Gaming and leading video game publisher Electronic Arts (EA) have teamed up to bring Amazon Prime members even more free games and in-game content for some of EA's most popular titles through 2022."

Razer's best gaming chair just dropped to its lowest price ever over at Amazon

John Loeffler

462 words

22 November 2021

TechRadar

TECHR

English

© 2021. Future Publishing Ltd. All Rights Reserved

The Razer Iskur Fabric gaming chair is \$149 off right now at Amazon, making this the lowest price we've ever seen for Razer's best gaming chair.

The [Razer Iskur gaming chair](#) was one of the [best gaming chairs](#) we ever tested, and while we're still reviewing the newer Razer Iskur Fabric, we can tell already that it's even better than the original - which is why we're so excited to see the [Razer Iskur Fabric for just \\$349 at Amazon](#).

Sure, [Black Friday deals](#) are rolling out all over the place, but we didn't expect to see anything on the Iskur Fabric since it hasn't been on the market for very long and is a very popular gaming chair. Getting it for 30% off makes this one of the best Black Friday PC gaming deals we've seen so far.

(Not in the US? Scroll down for deals in your region).

Today's best Razer Iskur Fabric Black Friday deals

Razer's best gaming chair yet

[toCheeeek](#)

Razer Iskur Fabric gaming chair | [\\$499 \\$349 at Amazon](#)

Save \$149 - Razer is known for making top-shelf gaming peripherals, but the company only got into chairs last year with the Razer Iskur. This year's follow-up, the Razer Iskur Fabric, improves on the original with a more breathable fabric construction while keeping all of the features that makes the Razer Iskur one of the best gaming chairs around.

The Razer Iskur Fabric is the next generation of Razer's flagship gaming chair. With an ergonomic lumbar support system, breathable, ultrasoft and spill-resistant fabric, high-density foam cushions, and armrests with four degrees of adjustment, there is very little to complain about with this chair except for its steep \$499 retail price.

So getting this gaming chair for \$149 off makes this a very easy purchase to recommend for Black Friday. At this price, we don't expect it to sell for much lower, so don't worry about missing a better price; this is about as good a [Black Friday gaming chair deal](#) as you're going to find all year.

More Razer Iskur Fabric deals

No matter where you live, you'll find all the lowest prices for the Razer Iskur Fabric from around the web right here, with offers available in your region.

More Black Friday deals

* Got a new Razer Iskur Fabric gaming chair? Check out our [Amazon Black Friday deals](#) page for more savings on everything from the [best gaming PCs](#) to the [best gaming mice](#) and [keyboards](#).

¡Hola Colombia, Amazon Music presents its first virtual concert in Colombia!

577 words

21 November 2021

CE NoticiasFinancieras

NFINCE

English

Copyright © Content Engine LLC

After its launch in Colombia, Amazon Music in collaboration with ONErpm, presents "¡Hola Colombia!", a virtual concert, in live stream format, on November 25th at 6:00 p.m. completely free. Music lovers can enjoy Grupo Niche and Tito Nieves, the best of popular music with Jhonny Rivera and Arelys Henao, all the hits of Randy and Alkilados, the vallenato sense of Diego Daza and Ivan Villazón.

Additional performances will include Latin Grammy newcomer Juliana Velasquez, the cream of Colombian rap music Ali A.K.A Mind, LosPetitFellas, Doble Porción and the power of Pescao Vivo and Generación 12 during the event and also via the playlist. The musical event, which will be hosted by Carolina Sabino and Inés Gaviria. To watch it people will be able to download it the Amazon Music app or access the concert from their Twitch channel.

How to watch it from Twitch:

Through a partnership between Amazon Music and Twitch, Twitch's live streaming feature has been integrated into the Amazon Music app. Interested parties will have several ways to discover the live livestream within the Amazon Music app, including a push notification from artists they follow when they go live on Twitch and through Amazon Music's new "Live" browse page.

"The "¡Hola Colombia!" livestream, has brought together world-class artists as well as emerging talent on a single digital stage to delight fans with a diverse musical repertoire relevant to the Colombian audience."

Amazon Music's recent arrival in the country brought customers playlists and stations that highlight the most popular local and global artists, podcasts, and in-app "Alexa" functionality that plays any song with a single command and much more. In addition, with Amazon Music Unlimited, customers will have the option to stream music in High-Definition (HD) and Ultra HD, the highest quality streaming audio available, at no additional cost to their subscription.

What Amazon Music is all about:

Starting today, people will be able to access Amazon Music Unlimited, the music subscription tier with unlimited access to more than 75 million songs in High-Definition (HD) and millions of songs in Ultra HD. Everything will be backed by commercials, without the need for a subscription or credit card.

"For example, an image in JPG that loses quality to send and mp3 is the same with audio, the goal of the industry has been to give mobility and streaming on mobile devices, it would have been impractical to tell you: you can listen to music on your mobile but your plan was spent in 3 days. Now, as devices, mobile networks and WiFi access evolve, the difficulty in terms of data consumption is less important, because we can once again offer high quality music," said Federico Pedersen, manager of Amazon Music - Latin America at Amazon, who spoke exclusively to Infobae.

With Amazon Music, listeners can access releases from Colombian and international artists such as Maluma, J Balvin, Karol G, Silvestre Dangond, Herencia de Timbiquí and Camilo, as well as local playlists and channels specially designed for music fans.

Federico, announced that people can start a three-month free unlimited level trial at amazon.com/amazonmusicco.

Need a gaming monitor upgrade? There's great deals available from BenQ, AOC, MSI and more

As T3 tests out the [best gaming monitors](#) and [best curved gaming monitors](#) we like to think we know a thing or two about screens for gaming.

Which is why our attention was caught by these excellent cheap gaming monitors on offer right now in the [Amazon Black Friday sale](#).

[View all gaming monitor deals available at Amazon right now](#)

Each gaming monitor here costs under £149.99, making them some of the very [best Black Friday deals](#) we've seen this year.

These are quality panels, too, made by top makers like AOC, LG, MSI and BenQ, and they come loaded with desirable gaming features like high refresh rates and low response times.

Here are the full details of the gaming monitors we think are worth scoping out.

[toCheeeek](#)

AOC Gaming C24G2AE: [was £189.99, now £139.99](#)

Now this is a great gaming monitor deal from AOC. The curved G24G2AE delivers a 1920 x 1080 resolution, 24-inch panel that boasts a 165Hz refresh rate, 1ms response time and support for AMD FreeSync. Ports are bountiful, too, with HDMI, DP, and VGA on offer.

[toCheeeek](#)

BenQ MOBIUZ EX2510S: [was £159.99, now £149.99](#)

BenQ cranks up the gaming quality here with a 165Hz refresh rate, 1ms response time and full support for AMD FreeSync Premium. It's a 25-inch FHD panel that also comes with built-in speakers and tiny bezels, making it a good fit for most PC gaming setups.

[toCheeeek](#)

MSI Optix G24C6: [was £169.99, now £129](#)

MSI deliver a compact curved gaming monitor here for a very attractive price point of only £129. You get a 144Hz refresh rate, 1ms response time, Full HD 1920 x 1080 resolution panel with support for AMD FreeSync Premium. At 24 inches it isn't the biggest panel, but the tech on offer in it is top draw.

[toCheeeek](#)

BenQ GL2780: [was £149.99, now £124.98](#)

BenQ takes value to a new level here with a 27-inch, 1ms response time, 75Hz LED gaming monitor for just £124.99. That's a lot of gaming monitor for your money and, thanks to its variety of inputs including HDMI, DVI, DP and VGA, this panel is super versatile, too. It could easily be used with retro gaming consoles, for example, as well as a modern gaming PC.

[toCheeeek](#)

LG UltraWide 25UM58: [was £149.99, now £119.99](#)

If you've had your eye on an ultrawide monitor then you really can't beat this LG UltraWide for price, ringing it right now for only £119.99 in the Amazon Black Friday sale. You get a 25-inch, 2560 x 1080 resolution panel with a 60Hz refresh rate and 5ms response time.

To see which other retailers are offering gaming monitor discounts right now, be sure to check out T3's [Black Friday sales](#) A-Z guide. This details which retailers are holding their sales already and who is going to.

Our top-rated gaming monitor right now is the LG UltraGear 27GL850-B. To see how much this is retailing for right now be sure to take a look at the below pricing chart.

[AOC Gaming monitor at Amazon Black Friday sale \(AOC\)](#)

19 November 2021

San Francisco Chronicle: Web Edition

SFCWEB

English

Copyright 2021, San Francisco Chronicle: Web Edition Articles. All rights reserved. Distributed by NewsBank, inc.

For the avid gamer whose love of the craft is only rivaled by a larger appreciation for great deals, Amazon's Early Black Friday Gaming Event is here to rock your world.

Let's start with a couple of goodies: these multi-platform compatible ENG00 G9900 Gaming Headphones (\$16.99) are 63% off their normal price and feature a 720° noise-canceling microphone with a built-in noise reduction chip for high-quality sound that'll fully immerse you in gameplay.

Speaking of gameplay, Amazon's also taking up to 75% off Assassin's Creed digital games for Xbox, including Assassin's Creed Valhalla Xbox Series X|S - Pre-load, Xbox One Ultimate Edition (\$48), and Assassin's Creed Origin (\$11.99) for Xbox One.

If controllers are the name of the game, this FaRuiX Game Controller (\$19.99) runs about \$10 cheaper than most "legit" PS4 controllers and uses double motor vibrations to throw you hands-first into the game - not unlike the 1997 Michael Douglas/Sean Penn psychological thriller of the very same name. That name being The Game.

Take \$20 off this FNATIC miniStreak Speed - LED Backlit RGB Mechanical Gaming Keyboard (\$79.99) unless yellow's your color, in which case I'd suggest taking home a PowerLead Mechanical Gaming Keyboard (\$50.14) which is only \$40 after you apply the digital coupon.

Amazon's Early Black Friday Gaming Event won't last long, so get going + get gaming.

You could save over 50% on these gaming headsets

The best time of year to save money on gaming peripherals is during the [Black Friday sales](#). You're sure to find some incredible deals that will help you level up your gaming setup.

Razer has kicked things off early in 2021 and some of their [best gaming headsets](#) have had massive price drops at Amazon with up to 53% off. These are without a doubt, some of the [best Black Friday deals](#) out there right now.

* [Razer Kraken V3 X was £69.99, now £34.00 save £35 \(50%\) at Amazon](#)

* [Razer Kraken Kitty Edition was £149.99, now £69.99 save £80 \(53%\) at Amazon](#)

* [Razer Barracuda X was £99.99, now £59.99 save £44 \(44%\) at Amazon](#)

If you're a PC gamer and you already own other Razer gaming kit, then it would make sense to buy a Razer gaming headset because you'll be able to control and manage it all on one piece of desktop software - Razer Synapse. But even if you're a console gamer, Razer offers both wired and wireless headsets with high-quality audio paired with sleek modern design that you can use with PlayStation, Nintendo Switch and Xbox.

With a huge 50% price reduction, the Razer Kraken V3 X is a wired USB headset that can be used with computers and PlayStation. Or if you want something that looks a bit more interesting then the Razer Kraken Kitty Edition comes with fun RGB-lit ears and is a whopping 53% cheaper today.

Not so keen on wires? The [Razer Barracuda X](#) wireless gaming headset has been discounted by 44% today, you can use it with PCs, Macs and consoles like PlayStation or Nintendo Switch. as well as with Android devices.

[toCheeeek](#)

Razer Kraken V3 X: [was £69.99, now £34.99 at Amazon \(save £35\)](#)

The Razer Kraken V3 X has been discounted by £35 for Black Friday. It's a wired gaming headset for PC, Mac and PlayStation weighing just 285g so it's lightweight and comfortable. That's paired with a sleek design and surround sound so you won't miss a thing.

[toCheeeek](#)

Razer Kraken Kitty Edition: [was £149.99, now £69.99 at Amazon \(save £80\)](#)

Razer's unique Kraken Kitty Edition gaming headset has been reduced by £80 at Amazon. This cute wired PC headset has RGB-lit ear cups and cat ears that can be synced up with the rest of your compatible Razer gaming peripherals. Gaming gear doesn't have to be so serious!

[toCheeeek](#)

Razer Barracuda X: [was £99.99, now £55.99 at Amazon \(save £44\)](#)

Now at its lowest ever price, the Razer Barracuda X is a gaming headset that has been reduced by 44% saving you £44 in total. It's an impressive headset that can be used wire-free with PC, Mac, most consoles and Android devices. The sound quality is fantastic and the battery will last about 20 hours of gaming.

Black Friday **gaming** laptop deals: Best deals so far from **Amazon**, Best Buy and Newegg

Matt Elliott

761 words

11 November 2021

CNET News.com

CNEWSN

English

(c) CNET Networks Inc. All Rights Reserved.

Ready to upgrade your rig with a new [gaming laptop](#)? You'll find some sweet deals right now as retailers start rolling out early Black Friday deals on models with Nvidia's latest GeForce RTX 30-series graphics. Best Buy has the best prices on gaming laptops right now, particularly the Asus ROG 16 with RTX 3050 Ti graphics on sale for \$1,200. There are a couple deals at Newegg worth checking out, too, along with a midrange Acer Predator model with RTX 3060 at Amazon that's priced to move.

Read more: [Best gaming laptop to buy for 2021](#)

Check out the deals below and check back -- I'll keep this list updated as sales expire and new deals emerge.

Dell G15 Gaming Laptop

RTX 3050 graphics for \$1,100

[Click to view image.](#)

Dell

This Dell budget gaming laptop is \$150 off at Best Buy and serves up RTX 3050 graphics and an 11th-gen Core i7 CPU. You also get 16GB of RAM and a 512GB solid-state drive -- both standard for the price. The 15.6-inch display features full HD (1,920x1,080-pixel) resolution, but only a 60Hz refresh rate. Gamers typically want a faster display to keep up with high frame rates in games, but running at 60 frames per second is sufficient for smooth gameplay.

[\\$1,100.00 AT BEST BUY](#)

Asus ROG 16

RTX 3050 Ti graphics for \$1,200

[Click to view image.](#)

Best Buy

This Asus ROG offers better graphics, a bigger and faster display and a fatter discount than the Dell G15 above. With its \$250 discount, it's only \$100 more than the Dell G15 and boasts a 16-inch screen powered by an 11th-gen Core i7 and RTX 3050 Ti graphics. The display has a 16:10 aspect ratio with 1,920x1,200-pixel resolution and a speedy 144Hz refresh rate.

[\\$1,200.00 AT BEST BUY](#)

Acer Predator Helios 300

RTX 3060 graphics for \$1,295

[Click to view image.](#)

Sarah Tew/CNET

It's not on sale but it is priced aggressively at Amazon considering its components. This Acer gaming laptop features a 15.6-inch display with a full HD resolution and fast 144Hz refresh rate, powered by an 11th-gen Core i7 CPU, 16GB of RAM and RTX 3060 graphics.

[\\$1,295.00 AT AMAZON](#)

Acer Nitro 5 (17-inch)

RTX 3080 graphics for \$1,950

[Click to view image.](#)

Newegg

This is the bigger version of the popular 15-inch Nitro 5. This Nitro 5 boasts a 17.3-inch display with a full HD resolution and a blazing 300Hz refresh rate, powered by an AMD-Nvidia combo. It features the Ryzen 7 5800H CPU and RTX 3080 graphics. You also get a roomy 1TB SSD for your game library. It's rare to find an RTX 3080-based laptop for less than \$2,000, but that's just what you'll find here with its \$150 discount at Newegg.

[\\$1,950.00 AT NEWEGG](#)

MSI GS76

RTX 3070 graphics for \$2,000

[Click to view image.](#)

Best Buy

This MSI model is big and fast and discounted by \$200. It features a 17.3-inch full HD display with a ridiculously fast 360Hz refresh rate powered by an 11th-gen Core i9 CPU and RTX 3070 graphics. Memory and solid-state storage are both ample with 32GB of RAM and a roomy 1TB SSD.

[\\$2,000.00 AT BEST BUY](#)

Gigabyte Aero 15 OLED

RTX 3080 graphics for \$2,399

[Click to view image.](#)

Gigabyte

With a 4K AMOLED display powered by an 11th-gen Core i7-11800H CPU and RTX 3080 graphics, this beast from Gigabyte can handle gaming and content creation. It also serves up 16GB of RAM and a roomy 1TB SSD. It's on sale at discount with a massive \$600 discount.

[\\$2,399.00 AT NEWEGG](#)

Canarias Game Show joins Amazon GAMERGY MAPFRE Edition to bring gaming tournaments to the islands

462 words

11 November 2021

CE NoticiasFinancieras

NFINCE

English

Copyright © Content Engine LLC

Amazon GAMERGY MAPFRE Edition, the most awaited esports and videogames event of the year in Spain, will be present in collaboration with Canarias Game Show. For the first time in history, the Game Show, considered the main international video game circuit, will hold a fair in our country, being the Canary Islands the place chosen for the development of the event. Canarias Game Show will feature different thematic areas related to the world of video games and the environment that surrounds them. This event will be held in a double venue format, as two venues will be set up for its celebration: on the island of Gran Canaria at the Elder Museum of Science and Technology, from the 19th to the 21st of November, and on the island of Tenerife at the Exhibition Centre, from the 3rd to the 5th of December. In this way, these gaming days will allow the Canary Islands to become a milestone in the agenda of hundreds of thousands of esports industry lovers.

Throughout the two dates, fans will be able to enjoy multiple activities and a review of the history of video games. A series of stands will be set up to serve as a time machine: visitors will be able to visit exhibitions dedicated to classic games from the main publishers in the market and discover the latest titles, as well as face-to-face and online esports tournaments, thanks to the support of Amazon's competitive platform GAMERGY MAPFRE Edition, in the main games' spaces. Likewise, the winners of the championships of some titles will qualify to participate in the on-site part of the gaming fair at the IFEMA MADRID facilities from 17 to 19 December, and there will also be a more recreational area where different activities will be organised to offer visitors other alternatives. There will be multiple contests and musical and cosplay exhibitions. There will also be a series of talks in which training related to the video game sector will be held: the latest developments in the gaming industry will be presented or the benefits of e-sports will be explained, among other topics. Thus, Amazon GAMERGY MAPFRE Edition continues to enrich the ecosystem by providing a new space where gaming competitions can be held outside the capital before filling the pavilions, in this case, of the Canary Islands. 2022 augurs a line-up of events that seeks to recover what was already there in 2019. Only the guarantees of public health and the progress to end the pandemic will allow us to reach this stage where esports are in a perfect moment to evolve their formula to the maximum.

Amazon's Black Friday bonanza continues as more ASUS gaming monitors are discounted

Whether you have recently gotten into gaming or you have been gripping a controller for decades, gaming can be darn expensive. From regular PC gaming to mashing buttons on the PS5 and Xbox Series X, things can start to add up when you factor in the cost of monitors.

PC gaming bundles with a monitor included are no longer a logical workaround either thanks to the ongoing computer chip shortage that has made PCs that much more expensive for gamers as well as employees, students, and everyone else who uses computers. If you find yourself balking at the eye-searing prices of some of the [best gaming monitors](#), then you're not alone. Thankfully, there's still value to be found amongst some of the [best Black Friday deals](#).

* [10 Amazon early Black Friday deals](#)

* [Best cheap headphones](#)

* [Best running headphones](#)

T3 knows a thing or two about gaming monitors from screens with powerful entry-level chops to premium rigs that pack a punch. Here are three of our favorite Black Friday gaming monitor deals that offer a great mix of value and performance without cramping your style. Take a look below.

[toCheeeek](#)

ASUS TUF VG27AQ Monitor | [Was £449.99 | Now £321.42 | You save £127.58 \(28%\) at Amazon](#)

We really like this Amazon BF deal last the ASUS TUF VG27AQ is a great monitor for most uses. Whilst the TUF isn't going to give you the performance of a monitor three times its price, it has great resolution, ample size, a very low input lag, and a fantastic response time. Throw in the ASUS TUF's wide viewing angles and ergonomic profile, what you have is a monitor that's a stellar choice for most gamers. It's also a hell of a lot cheaper because of this Black Friday deal, so we'd encourage you to get involved before the deal expires.

[toCheeeek](#)

ASUS ROG Swift PG259QN | [Was £799.00 | Now £689.03 | You save £109.97 \(14%\) at Amazon](#)

Another excellent gaming monitor from ASUS with a hefty saving to boot. The ASUS ROG Swift PG259Q has a remarkably low input lag, exceptional response time, and an eye-searingly smooth 360Hz refresh rate. Native G-SYNC support and FreeSync compatibility suit gaming in the dark for those late-night gaming binges. A 14% saving over at Amazon makes the cost a bit easier on the purse strings, so it's well worth a look.

[toCheeeek](#)

ASUS ROG Strix XG27WQ | [Was £469.00 | Now £399.00 | You save £70.00 \(15%\) at Amazon](#)

The ASUS ROG Strix XG279Q is a fantastic multi-tasker for office use. Sporting a large 27-inch screen, the 1440p resolution delivers clear text and wide viewing angles if you need to share your screen with others. Reviews attest to how well the ASUS XG27 handles reflection and it's more than bright enough to deflect combat glare. With 15% off the full price, this isn't to be slept on.

Key questions answered: Study Explore COVID 19 Outbreak Impact Analysis

he study objectives of this report are:

To study and analyze the global market size (value & volume) by company, key regions/countries, products and application, history data, and forecast to 2025. To understand the structure of market by identifying its various subsegments. To share detailed information about the key factors influencing the growth of the market (growth potential, opportunities, drivers, industry-specific challenges and risks). Focuses on the key global manufacturers, to define, describe and analyze the sales volume, value, market share, market competition landscape, SWOT analysis and development plans in next few years. To analyze the growth trends, future prospects, and their contribution to the total market. To project the value and volume of submarkets, with respect to key regions (along with their respective key countries). To analyze competitive developments such as expansions, agreements, new product launches, and acquisitions in the market. To strategically profile the key players and comprehensively analyze their growth strategies.

The Study Explore COVID 19 Outbreak Impact Analysis

What should be entry strategies, countermeasures to economic impact, and marketing channels? What are market dynamics? What are challenges and opportunities? What is economic impact on market? What is current market status? What's market competition in this industry, both company, and country wise? What's market analysis by taking applications and types in consideration?

Amazon surprises its users with several of the exclusive titles it offers on its Twitch Prime Gaming service, which comes bundled with a paid Prime subscription. Aiming to be on par with companies like Steam and Epic Games, the platform offers each month a list of free games available for download for a limited time.

There were releases, which stood out last October, that were related to the Halloween theme. In that line, in addition to the premium Star Wars release Star Wars: Squadrons, the platform published free Alien Isolation, Ghost Runner, Song of Horror Complete Edition, Whiskey and Zombies: The Great Southern Zombie Escape, among other titles that could only be used until October 31.

In this article, we will tell you which are the free games that are available from today November 1 on the Twitch Prime Gaming service. The complete list is made up of 9 video games, which are:

Dragon Age Inquisition Control Ultimate Edition Rise of the Tomb Raider Rogue Heroes Liberated Puzzle Agent 2 Demon Hunter 2: New Chapter BAFL - Brakes Are For Losers Secret Files: Sam Peters On Amazon, what movies are coming the first week of November to your platform? The wait is over. Amazon users will be able to enjoy different audiovisual productions this month thanks to the extensive catalog of premieres in November. Here are this week's premieres.

Stay at Home (November 1)

After a two-year pandemic, a group of friends organize a party via video call, which is full of games, drugs and alcohol. However, things go horribly wrong and the safety of their home becomes scarier than the chaos in the city.

The Good Doctor Season 4 (Nov. 3)

While Shaun and Lea continue their romantic relationship, Shaun's group is devastated by Melendez's death. Despite the problems, they must treat different patients in order to save their lives.

A Man Named Scott (November 5)

Directed by Robert Alexander, it explores Kid Cudi's decade-long career. Featuring performances by Kanye West, Timothée Chalamet, Shia LaBeouf, Willow Smith, Jaden Smith, Lil Yachty and Pharrell Williams.

Amazon Prime Gaming extends Riot Games partnership -the freebies and esports events you can expect

By, Sian Bradley

561 words

1 November 2021

21:14

birminghammail.co.uk

EVEMONL

English

© 2021 Reach Plc

You can claim exclusive content for Riot Games' titles such as League of Legends

Gamers, stay calm -Riot Games has extended its partnership with Amazon Prime Gaming to give you some more freebies.

The video game developer and publisher has worked with Amazon since 2018, but this extension gives players more access to exclusive in-game content for Riot's biggest titles, including League of Legends , VALORANT , Legends of Runeterra , and League of Legends: Wild Rift .

This also turns Prime Gaming into a global sponsor for Riot Games' Esports, as well as offering bigger and better rewards for all of Riot's titles.

Read more:

[GTA: San Andreas VR to launch on Oculus Quest 2: Everything we know so far](#)

Sylvia Ko, Corporate Business Development Lead for Riot Games said the company has given away tens of millions of Skins, Skin Shards, and more since they began collaborating with Prime.

"As we launched new games, Prime Gaming grew with us to deliver in-game content for players across our new titles.

Now," she continues, "in Prime Gaming we have a partner that shares our focus in making it better to be a player, not only through games, but also through broader entertainment experiences players would want to engage in, including Arcane and our esports."

This collaboration will run throughout 2022, but what exactly is on offer, and how can you get it

What freebies and events are on offer

From today, League of Legend players can access the Prime Gaming Capsule which includes 650 Riot Points, an unknown 1350 RP skin, five Champion Shards Permanent, 200 Orange Essence, two sets of Series 1 Eternals, and a 30-day xp boost.

Beginning on November 18, Prime members who play League of Legends: Wild Rift can access exclusive content drops every two weeks for the whole year, which amounts to 24 drops. Content will include random Baubles, Emotes, Recalls, Skins, and Skin Poses.

Starting next year, if you play VALORANT you can bag some content which improves game play, including two weapon skins, two calling cards, four Gunbuddies, and four sprays.

Once the current series of Legends of Runeterra ends in January 2022, Prime members can claim new content each month, including one Tier 3 Prismatic Chest and one Epic Card or Tier 3 Prismatic Chest, and three Rare Wildcards.

Since this partnership also extends to Riot's esports titles, it will provide free content during various events.

For example, during this year's League of Legends World Championship which runs until November 5, viewers can collect a custom esports emote: the Happiness Overload.

If you missed this one, there will be more exclusive ones available during the League of Legends esports events in 2022.

Opportunities to claim the special emote will be promoted to viewers through in-broadcast placement during LoLEsports broadcasts and on LoLEsports.com

How do I get them

Firstly, you need to be a Prime Gaming member. Once you're signed up, you can [claim in-game content](#) for Riot Games titles as they become available.

If you're not sure whether you want to commit to using Prime Gaming, you can try Prime out for a 30 day free trial.

How **Amazon** sellers are **gaming** the system by sending items no one ordered

1.1m Britons affected by 'brushing' scam of unwanted deliveries

A [scam](#) that has caused hundreds of thousands of households to receive [Amazon](#) packages they have never ordered [has been identified](#) by the consumer group, [Which?](#)

A survey of 1,839 UK adults between 13 and 17 August found that [four per cent of respondents had received a mystery package](#) containing a free item they had not purchased and with no return address.

It means the phenomenon, known as "brushing", is likely to have affected some 1.1m people across Britain.

Which? followed up its findings by speaking to three recipients of unwanted parcels in Swindon, Salisbury and Somerset, all of whom had taken delivery of packages addressed to apparently fictitious people with generic names at their residence and opened them to find a random selection of goods including bathmats, chocolate moulds, wireless karaoke microphones, kitchen tongs, fairy lights, LED bulbs, running gloves and feather dusters.

The practice appears to have taken root because unscrupulous third-party sellers, often based in China, are attempting to "game" Amazon's competitive ranking-based system that orders sellers according to sales volume and number of positive reviews.

By sending out unwanted items — typically, inexpensive tat that costs only a nominal amount to ship in large volumes — sellers aim to be displayed on the first and second pages of search results in the hope of attracting genuine orders.

Scam expands in pandemic

Some sellers could theoretically be going further and setting up fake accounts under the name of the addressee to "purchase" an item and then later writing a glowing review of the service they claim to have received.

"The reason for sending out the packages is to feed the Amazon algorithm, the more you sell, the higher your ranking is," a logistics expert named Eric based in Shenzhen, China, told the watchdog.

"Brushing has been going on for at least a decade. The only reason it has now gone wild is because e-commerce has been accelerating very rapidly, especially because of the pandemic."

Another consumer expert from Shenzhen, David Li, said: "In the Amazon universe, brushing is just a cost of doing business very similar to buying ads or getting an 'Amazon certified' logo. Generally, it's a marketing expense... The competition is intensive in cross border e-commerce."

The most concerning aspect of the practice is how precisely the bogus sellers are obtaining the addresses, with Amazon saying publicly available sources are used rather than its own customer database, which has not been compromised.

'Bad actors'

Of the near-2,000 people surveyed by Which?, 63 per cent said they typically keep the magnetic eyelashes, iPhone cases and Frisbees they receive, 28 per cent toss them out and 16 per cent give them away, often to charity shops.

“Consumers should be able to trust that the popularity and reviews of products they are buying online are genuine, so it is troubling that third-party sellers appear to be using ‘brushing’ scams to game Amazon Marketplace,” said Which?’s director of policy and advocacy Rocio Concha.

“Amazon needs to do more to thoroughly investigate instances of brushing scams and take strong action against sellers that are attempting to mislead consumers.”

A spokesperson for the retail giant commented: “We estimate that less than 0.001 per cent of Amazon orders are impacted by ‘brushing’ as Amazon has robust processes in place to prevent abuse from impacting our reviews, search rankings and other customer experiences.

“We will never stop improving the sophistication of abuse prevention in our store, and we will continue to take the appropriate enforcement actions, including support for law enforcement organisations in their efforts to hold bad actors accountable.

“We strongly encourage those who have received unsolicited packages to report them to our customer services team so that we can investigate fully and take the appropriate actions.”

Customers are also [advised on the company's website](#) to dispose of or donate unwanted items and to be wary that they could be faulty, hence their being chosen for brushing purposes in the first place.

➤ Q&A: Weighing challenges, opportunities behind ad-supported streaming boom

Wurl Inc. has been supplying the distribution, advertising and data technology to the advertising-based video-on-demand business for years, and its COO Sean Doherty said the industry is just now catching up with his vision.

➤ Economics of Networks: Most media companies maintain their cable network rosters in 2021

Media giants Walt Disney Co. and ViacomCBS Inc. continued to own the most U.S. cable networks in 2021, but the merger of Discovery Inc. and Warner Media LLC may create a new leader in cable network ownership.

➤ Tencent, ByteDance to be hit by China's efforts to control algorithm usage

China's raft of cybersecurity guidance will make it difficult for Chinese internet companies to generate business from advertising and seek funding.

TECHNOLOGY

* The U.S. State Department plans to create a bureau of cyberspace and digital policy and a separate special envoy for critical and emerging technology, The Wall Street Journal reported, citing administration officials. The department is making the organizational changes to tackle international cybersecurity challenges such as ransomware, the officials said.

* The U.S. Justice Department accelerated its two-year antitrust investigation of Apple Inc. over the last several months, raising the odds of a lawsuit against the iPhone-maker, The Information reported, citing two sources with knowledge of the probe. The DOJ reportedly queried Apple's customers and competitors and sent a new round of subpoenas to its business partners.

* Amazon's cloud computing unit Amazon Web Services Inc. struck a contract with U.K. spy agencies Government Communications Headquarters, MI5 and MI6, for hosting classified content, the Financial Times (London) reported, citing sources familiar with the discussions. Industry experts estimate the deal's value at between £500 million and £1 billion over the next 10 years.

* TransUnion agreed to acquire Sontiq Inc., a digital identity protection and security solutions developer, for \$638 million. The acquisition is expected to close in the fourth quarter, subject to customary closing conditions and regulatory approvals.

INTERNET AND OTT

* Facebook announced a \$50 billion increase in its share repurchase program as it reported earnings for the third quarter. Facebook's quarterly revenue grew 35% year over year, to \$29.01 billion, while its net income rose 17% to \$9.19 billion.

* Executives from Google LLC's YouTube, LLC, TikTok Inc. and Snap Inc. will defend their platforms' privacy protections for young users during an Oct. 26 hearing of the Senate Subcommittee on Consumer Protection, Product Safety and Data Security, Bloomberg News reported, citing the executives' prepared remarks.

* Pinterest Inc. appointed Malik Ducard as chief content officer, tasking him with developing the company's content strategy and building relationships with the creator community. Ducard most recently was YouTube's vice president of content partnerships.

* YouTube will demonetize "low-quality" content targeted at children, such as videos that encourage negative behaviors or are heavily commercial or promotional. These videos may see limited or no ads from November.

* The number of global internet outages dropped 12% in the week of Oct. 16, to 391 from 443 in the prior week, according to data from ThousandEyes, a network-monitoring service owned by Cisco Systems Inc. Outages in the U.S. fell 20% to 177 from 221 in the preceding week.

MEDIA

* Comscore Inc. appointed Jon Carpenter as its new CFO, effective Nov. 29. Carpenter is CFO of Publishers Clearing House and held senior divisional CFO roles at Nielsen Holdings PLC and NBC Universal.

TELECOMMUNICATIONS

* President Joe Biden is expected to nominate Federal Communications Commission Acting Chairwoman Jessica Rosenworcel as permanent head of the agency, Politico reported, citing three sources familiar with the decision. Biden is also expected to nominate net neutrality advocate Gigi Sohn to the vacant FCC seat.

Skillz has announced the appointment of Vatsal Bhardwaj as the company's chief product officer. An experienced gaming executive who most recently served as the general manager and director of Game Tech for Amazon Web Services (AWS), Bhardwaj joins the Skillz C-suite, further strengthening the company's executive team with seasoned leaders from many of the world's most prominent brands.

"With an outstanding track record at both Amazon and Facebook, Vatsal brings nearly two decades of experience to the Skillz leadership team at a pivotal time as we aggressively scale and grow our business around the world. Under his direction, our product team will develop and deploy innovative new gameplay technologies, accelerate our entry into multiplayer synchronous gaming, and build out brand-sponsored tournaments and partnerships, giving both our players and developers the best experience possible," said Skillz CEO and founder Andrew Paradise.

"I look forward to leading the product team at a moment where Skillz is reimagining the future of mobile gaming and scaling the business. I'm pleased to join Skillz during this enormous growth period as the company continues building its foundation, driving the product and tech teams forward to expand the innovative product offerings and deliver fun, fair, and trusted gameplay for players across the globe," Bhardwaj said.

As chief product officer, Bhardwaj will report directly to Paradise while leading the global product team at Skillz as the company drives to become the world's top competitive entertainment brand. In this role, Bhardwaj will lead the product and technology teams, and will be responsible for driving the creation of new services and products from concept, development, and go-to-market. He and his team will build and operationalise the company's product roadmap, which will include building industry-leading features to enable developers to build successful businesses on Skillz. Additionally, Bhardwaj will help scale the teams, operational practices, and systems as Skillz experiences continued strong growth.

While with AWS, Bhardwaj was the leader for Game Tech, including launching one of the largest open-source initiatives, Open 3D engine, Amazon GameSparks, growing Amazon Gamelift and initiating several new initiatives in gaming. Before joining Amazon, Bhardwaj served as head of product for various groups at Facebook, where he managed projects and teams across engineering, product management, game design, production, art, UI/UX, and analytics. He led Facebook's India growth teams, and launched and scaled the Oculus App store, developer services, and several other initiatives to grow revenues for Oculus. Prior to Facebook, Bhardwaj was General Manager and Head of Studios at Storm8, and also served in related roles at Match.com and Zynga.

Bhardwaj holds an MBA from the Massachusetts Institute of Technology, a master's degree in Electrical and Computer Engineering from Duke University, and a Bachelor of Computer Engineering degree from Gujarat University in Ahmedabad, Gujarat, India.

From consoles to VR, here are the best gaming deals you can pick up on Amazon Saudi Arabia

If you want to enjoy some of the latest games, you're going to of course need a gaming console. Whether you enjoy the sheer power of the [Xbox Series X](#) or the portability of the [Nintendo Switch](#), there's no denying that gamers today are absolutely spoilt for choice when it comes to choosing what games to play.

We've picked up the [best deals](#) for you on Amazon Saudi Arabia so you can jump straight into the world of gaming. Whether you're fighting zombies on your own or going up against friends in Mario Kart, you're in for a great time.

[toCheeeek](#)

[Xbox Series X - SAR 2,299](#)

By far Microsoft's most powerful gaming console yet, the Xbox Series X packs a phenomenal amount of power. We're waiting for some amazing games to release in 2022 for it, but the Xbox Game Pass unlocks some fantastic games over the years, all playable on Series X.

[toCheeeek](#)

[Xbox Series S - SAR 1,299](#)

For a slightly more affordable yet equally powerful gaming option, check out the Xbox Series S. This console is much smaller than its bigger brother, yet still has access to the same amazing games library.

[toCheeeek](#)

[Nintendo Switch - SAR 1,479](#)

Prefer some gaming on the go? The Nintendo Switch is the perfect companion if you prefer gaming on the move, whether you're on a long flight or stuck in a bus on the way home from work. There's plenty of games to choose from and some great co-op action as well, right out of the box.

[toCheeeek](#)

[Oculus Rift S - SAR 1,799](#)

Tired of the real world? Then dive into the realm of VR with the Oculus Rift S and leave everything else behind. Explore alien planets, hunt down zombies, or enjoy an underwater adventure - all without leaving your apartment. Just make sure you've got a beefy PC or laptop to be able to run it all.

* [Looking for more? Check out this weeks deals on Amazon Saudi Arabia](#)

It can be frustrating when you have to reboot your laptop time and again because of it hanging. We all have had to face this annoying problem of working with a slow and unresponsive laptop. However, modern laptops have become better with their performance as well as lightweight and portable. Gaming laptops on the other hand offer the latest cutting edge technology that enables these powerful laptops to run even the most graphically demanding games smoothly.

If you are looking to buy a new gaming laptop, you are in luck, Amazon is currently hosting its Great Indian Festival sale. The American e-commerce giant is offering steep discounts on products across categories including laptops and gaming laptops.

The Acer Nitro 5 Gaming Laptop is available on Amazon for Rs. 85,990, down from its earlier price of Rs. 1,19,999. It is a powerful gaming laptop suitable for multitasking and performance-heavy tasks. The powerful battery can power the laptop for more than 8 hours. It comes with a dedicated 4GB graphics card, rendering superior and lag-free visuals while gaming. It has an Intel Core i7 processor 11th Gen and NVIDIA GeForce RTX 3050 Ti graphics.

[You can buy Acer Nitro 5 here](#)

It has a 16GB DDR4 RAM with 256GB Solid State Drive (SSD). It features 2 USB 3.1 ports for faster transfer and sharing of data. The Acer Nitro 5 is a lightweight gaming laptop weighing 2.4kg. It also has a full RGB backlit keyboard that can be customised to any colour to meet your design need or style. Enjoy smooth, blur-free gameplay with a 144Hz refresh rate.

The CoolBoost mode increases fan speed by 10% and CPU/GPU cooling by 9% compared to auto mode allowing you to push your frames to the max. The DTS:X Ultra technology ensures sounds are clear and can be delivered in a 3D spatial soundscape, allowing you to hear where your opponents are coming from with pinpoint precision.

Acer Nitro 5 has a screen-to-body ratio of 80% and narrow 7.02mm bezels. It is easily one of the best gaming laptops available in the market currently and with the Rs. 34,000 discount, it is definitely a deal you should not miss.

Amazon Great Indian Festival Sale: ASUS TUF Gaming F15 laptop goes on sale with over Rs 26,000 discount

486 words

18 October 2021

India Today Online

INTYON

English

Copyright 2021. Living Media India Limited

Amazon's Great Indian Festival is going on and the American e-commerce giant is offering steep discounts on products across categories including laptops and gaming laptops. Gaming laptops can provide that slight edge in performance that can result in victory over defeat whether you are playing League of Legends, Counter-Strike, or any other competitive PC game.

A good gaming laptop with strong specifications is essential for not only running the game smoothly but also for better performance in the game. Gaming laptops offer flexibility to play your favourite games from anywhere and at the same time these laptops offer heavy specifications for other tasks as well.

Asus TUF Gaming F15 is a great, performance-oriented gaming laptop from the Taiwanese hardware manufacturer. The Asus TUF 15 comes with a GTX 1650 graphics card. It is currently available for Rs. 57,990 on Amazon, down from its earlier selling price of Rs. 83,990.

[You can buy Asus TUF Gaming F15 here](#)

The gaming laptop comes with a 15.6-inch LED-backlit FHD display with a 144Hz refresh rate that renders smooth graphics. It is powered by an Intel Core i5-10300H processor with 2.5GHz of base speed and 4.5GHz peak speed along with 8MB of cache. The Asus TUF F15 has 8GB of DDR4 memory, a 512GB SSD for Windows and storing files, and an Nvidia GeForce GTX 1650 graphics card with a 4GB VRAM. It is upgradeable to the latest Windows 11.

Asus TUF 15 can run games like Call of Duty: Cold War and Fortnite without a hitch. Even more graphically demanding games like Assassin's Creed Valhalla and Forza Horizon 4 run smoothly. The Asus TUF 15 comes with a one-month subscription to Xbox Game Pass as part of Amazon's promotion. It provides access to over 100 high-quality PC games on Windows 10 with new games added all the time.

Additionally, the TUF F15 has two USB 3.2 Gen 1 ports, one USB 2.0 connector, DisplayPort, HDMI, Ethernet LAN, Wi-Fi 6, and a 3.5mm headphone/microphone combo jack. The keyboard is also backlit, and there's a 720p webcam above the display. The Asus TUF Dash F15 battery life is strong, and it can run for around 10 hours.

This is a great deal for a powerful gaming laptop on a budget, you should probably not miss the Asus TUF 15 deal if you are looking for a gaming laptop with strong specifications.

GHOSTRUNNER, Star Wars Squadrons and Alien Isolation are just three of the games available for free with Amazon Prime Gaming in October.

This article contains affiliate links, we may receive a commission on any sales we generate from it. [Learn more](#)

When we talk about Amazon Prime, most of us think of next-day deliveries, movies and music streaming.

However, there's much more to Amazon Prime than free deliveries and TV box sets.

Gaming fans, in particular, should definitely check out the monthly rewards and benefits.

Rivalling the mighty PlayStation Plus, Amazon Prime subscribers can download a wealth of free games every month.

This includes the excellent Star Wars Squadrons, as well as Alien Isolation, and Ghostrunner.

All three games are available for free until November 1, when they'll be replaced by a brand new selection of freebies.

If you're looking for something a little more child-friendly, then Amazon Prime subscribers can also download the PC versions of Tiny Robots Recharged, Blue Fire, and Red Wings: Aces of the Sky.

That's on top of five free Wallace and Gromit games, as well as adventure game Secret Files 3, and survival horror title Song of Fire Complete Edition.

Separate from the free game downloads are a selection of in-game rewards for popular titles such as Apex Legends, New World and Call of Duty Warzone.

Related articles

Fans of Apex Legends can unlock the Electric Royalty Wattson skin, the Ornate Orchid SMG, and a new Banner Frame.

Elsewhere, Grand Theft Auto fans can get up to GTA\$400,000 to spend in GTA Online, while Fall Guys players will receive the Merry Mastodon Bundle and 6,500 Kudos.

If you've been playing massively-multiplayer game New World, then you'll receive a steady stream of bonuses, starting with the Swashbuckler Skin, Pirate Stance emote and 5,000 Marks of Fortune.

There's even something for Far Cry 6 fans, as the Vaquero Bundle joins Amazon Prime: "Ride to the revolution in style with the Vaquero Bundle plus unlock 3000 in-game Pesos - only for Prime members."

As for the free games, Ghostrunner is arguably the pick of the bunch, featuring fast-paced platforming action in the first person.

"Ghostrunner is a hardcore FPP game packed with lightning-fast action, set in a grim, cyberpunk megastructure.

"Climb Dharma Tower, humanity's last shelter, after a world-ending cataclysm. Make your way up from the bottom to the top, confront the tyrannical Keymaster, and take your revenge.

"As the most advanced blade fighter ever created, you're always outnumbered but never outclassed. Slice your enemies with a monomolecular katana, dodge bullets with your superhuman reflexes, and employ a variety of specialized techniques to prevail."

Remember to redeem your free games before the November 1 deadline.

Amazon Great Indian Festival: Lenovo Legion 5 gaming laptop available with over Rs 7,500 discount

493 words

11 October 2021

India Today Online

INTYON

English

Copyright 2021. Living Media India Limited

Lenovo Legion 5 gaming laptop is available with a fantastic deal during the ongoing Amazon sale. And, considering this is a gaming machine, you can expect it to handle multitasking with ease apart from casual games and more.

Laptops have seen a steep rise in pricing in recent times. Hence, one would have to shell out a lot of money to get a decent gaming laptop. But you will be able to save a lot of money if you make a purchase at the ongoing Amazon Great Indian Festival. The sale has brought a lot of exciting deals on gaming laptops. Plus, there are additional bank discounts to make the deals even more lucrative.

[You can check all laptop deals here](#)

Users of American Express, Citi Bank, and RBL Bank are eligible to avail of these discounts. According to terms and conditions, the consumer can get a 10 per cent discount of up to Rs 1750. The minimum order to get this instant discount differs for each bank. The new bank offers are valid until October 12.

We have spotted a fantastic deal on the Lenovo Legion 5 gaming laptop. The laptop was launched in December last year at a starting price of Rs 75,990. However, it is now selling at a discounted price of Rs 69,990. The price can be further reduced via bank offers. To cross verify and find the final discounted amount, we added a Citibank credit card which reduced the price down to 68,490. So you can save up to Rs 7500 on this beefy laptop, making it a steal deal.

[You can buy Lenovo Legion 5 here](#)

The Lenovo Legion 5 features a 15.6-inch IPS LCD display with a 120Hz refresh rate. It is powered by a hexa-core AMD Ryzen 5 4600H processor with a max clock speed of 4GHz. The CPU is paired with 8GB DDR4 RAM and NVIDIA GeForce GTX 1650 4GB GDDR6 graphic card. There's 1TB of HDD storage and an additional 256GB of SSD storage.

The Lenovo Legion 5 comes with a TrueStrike keyboard with backlit keys. It also gets additional features like Coldfront 2.0 for thermal efficiency, Rapid Charge Pro for fast charging and Lenovo Q-Control 3.0 to control the system voltage and fan speed. Lenovo claims up to 8 hours of battery life in Hybrid mode. The Laptop sports a 720p webcam with a shutter for privacy. There are 2W Harman Kardon speakers on this laptop. Connectivity options include Wi-Fi, Bluetooth v5 and more.

Amazon Great Indian Festival: Top offers on gaming headphones you should check

656 words

8 October 2021

India Today Online

INTYON

English

Copyright 2021. Living Media India Limited

Gamers obsess over good quality displays, high-end graphic cards, CPUs and Keyboards. But they generally ignore good gaming headphones, which are as important as the other hardware accessories. In popular competitive games like PUBG, Dota, Apex Legends and CS-Go, you need to coordinate with your allies and kill enemies around the corner. Thus, a good gaming headset becomes essential as it offers Low Latency audio, surround sound and other additional features to get you ahead of your enemies.

In case you're planning to get gaming headphones, wait no more. Amazon is offering up to an 80 per cent discount on headphones as part of this sale. Plus, there are additional bank offers to make the deals even more lucrative. With that out of the way, let's take a look at the top offers on gaming headsets.

[You can check headphone deals here](#)**HyperX Cloud Alpha Pro**

The HyperX Cloud Alpha Pro is one of the most popular gaming headphones. The wired headset is compatible with PC, Playstation, Xbox and Nintendo Switch. It has dual-chamber drivers for better distinction and less distortion. The microphone on this device is quite good and does a decent job of cancelling unwanted noise. Not to miss, the detachable braided cable has in-line audio controls. HyperX Cloud Alpha Pro is a well-built headset that can be used for long gaming sessions. The gaming headset is currently selling at a discounted price of Rs 7,999 making it a great deal to consider.

[You can buy HyperX Cloud Alpha Pro here](#)**SteelSeries Arctis 1**

The SteelSeries Arctis 1 is an affordable gaming headphone with a host of high-end features. It features 40mm drivers, which offer an excellent sound output. The headphone provides features like DTS:X v2.0 surround sound, independent game/chat audio settings and full SteelSeries Engine for EQ tweaking. SteelSeries Arctis 1 has a detachable bidirectional mic that has noise cancelling ability. As part of this sale, SteelSeries Arctis 1 is selling at just Rs 4,999, an absolute winner for the price.

[You can buy SteelSeries Arctis 1 here](#)**Corsair HS70 PRO**

The next device on the list is Corsair HS70 Pro. Although this wireless gaming headphone is a few years old now, it still offers great value for money. The headset is currently selling at a reduced price of 9,999. Corsair HS70 Pro comes with 50mm drivers, which are tuned for a more bassy output. It also offers 7.1 surround sound, which can be customised via Corsair's iCue software.

[You can buy Corsair HS70 PRO here](#)**Razer Kraken X**

The Karen X is a budget gaming headset from the popular gaming laptop manufacturer Razer. It is priced at Rs 5,199, but in this ongoing sale, you can avail of it just for Rs 3,719. The headphone offers good sound equity with 7.1 surround sound. It is also quite lightweight at 265 gms. The Razer Kraken X comes with a cardioid mic which claims to offer decent noise cancellation.

[You can buy Razer Kraken X here](#)**Logitech G431**

The Logitech G341, with a price drop of Rs 3,000 over its retail price, is now selling for Rs 4,995. The headphone comes with 50mm drivers and a 6mm mic with flip to mute feature. It also offers DTS X 2.0

surround sound, which can be controlled by Logitech G HUB gaming software. The Logitech G431 is well built and provides a decent amount of comfort.

Amazon Great Indian Festival: HP Victus gaming laptop available with massive Rs 7,000 discount

497 words

6 October 2021

India Today Online

INTYON

English

Copyright 2021. Living Media India Limited

Another gem from among the series of laptop deals on Amazon's Great Indian Festival sale is an ongoing offer on the HP Victus. HP Victus variant with Ryzen 5 processor is available for a price of Rs 61,990 during the festive sale on the e-commerce website. This marks a discount of around Rs 7,000 on the HP laptop.

For those unaware, [HP launched Victus as part of its gaming line of laptops earlier this year in India](#). The laptop comes in both AMD and Intel options and the variant in focus usually retails for Rs 68,990. During the Great Indian Festival sale, Amazon has priced the Victus at Rs 61,990, along with additional offers that can be applied on top of the discount.

For instance, a total of eight bank offers can provide an additional discount of up to Rs 1,750 on the purchase of the laptop. In addition, buyers can avail of 10X CashPoints, cashback and no-cost EMI options on the HP Victus under the sale. Most of these offers are applicable on HDFC Bank debit and credit cards.

Amazon is also running an exchange offer of up to Rs 17,900 on the HP Victus Ryzen 5 during its Great Indian Festival sale. Other ways to save money include signing up for Amazon Pay ICICI Bank credit card for a cashback of Rs 600, or paying through Amazon Pay Later for a Rs 50 cashback. There is also a partner offer with which buyers can get a minimum of 4 months of Audible membership for free along with the laptop.

As for the laptop itself, the HP Victus comes with a 5th-Gen AMD Ryzen 5 5600H processor that has six cores, a base clock speed of 3.3GHz and can be clocked up to 4.2 GHz. There is an 8 GB DDR4-3200 MHz RAM backing the device along with 512 GB storage.

Its display spans across 16.1-inch diagonally and features FHD (1920 x 1080) resolution, 60 Hz refresh rate and 250 nits brightness. Graphics are taken care of by 4 GB GDDR6 dedicated NVIDIA GeForce GTX 1650. The laptop comes pre-loaded with Windows 10 Home with a free upgrade to Windows 11 as well as pre-installed Microsoft Office Home. Connectivity options on the laptop include Wi-Fi 6, Bluetooth 5.2, 3 USB 3.0 ports and 1 HDMI port. There is a 70Wh battery and with it, the laptop weighs 2.48 Kg

After many failures in gaming, Amazon has a hit release; check out full details

298 words

6 October 2021

Business Today Online

BTDYON

English

Copyright 2021. Living Media India Limited

"E-commerce giant Amazon has long struggled to make a good video game. But now, it finally has a hit release, and the company is predicting a bright future for its gaming business.

"Games could end up being the largest entertainment category over the long haul, Chief Executive Officer (CEO) Andy Jassy said at a technology conference on Tuesday, reported Bloomberg.

"Even before Jassy became the CEO in July, he oversaw Amazon's effort to break into video games. The division, which debuted in 2012, faced years of turmoil.

"Amazon released its first major video game Crucible in May 2020. It was met with scathing reviews, and the company quickly retreated. It scrapped Crucible entirely a year ago and gave customers refunds.

"After the warm reception to New World, Jeff Bezos declared it a win. "After many failures and setbacks in gaming, we have a success," the former CEO tweeted on Friday, three days after its release.

"Although early signs are encouraging, experts advise caution. "It's way too early to say it's a hit. It's not a disaster, you could say," said David Cole, an analyst at DFC Intelligence, which tracks the video game industry, reported Bloomberg.

"Over 77,000 reviews on Steam indicate players' opinions are mixed. On Tuesday, about a week after its release, New World, at one point, had more than 662,000 people playing at one time on Steam, making it the top game by player count. On Twitch, it was being watched by hundreds of thousands of people.

Amazon Great Indian Festival sale 2021: Gaming deals you should check out

Digit NewsDesk

493 words

4 October 2021

Digit

HTDIGI

English

Copyright © 2021 Nine Dot Nine Mediaworx Pvt. Ltd. All Rights Reserved

India, Oct. 4 -- Amazon Great Indian Festival sale is on right now and as always, there are a whole host of deals going on. As such, it's easy to find yourself slightly overwhelmed with everything that is happening. If you're looking for some gaming deals, then you have come to the right place. In this list, we will be looking at some of the best gaming deals to check out during the Great Indian Festival. These will include games, consoles and accessories.

So let's begin.

Nintendo Switch Lite

Amazon Great Indian Festival price: Rs 16,799

The Nintendo Switch Lite is arguable the best dedicated portable gaming machine you can buy right now. The console not only offers a range of Nintendo first-party titles such as Mario and Zelda, but also major third-party titles that include Doom, Civilization, The Witcher 3 and more.

Buy it from Amazon

Horizon: Zero Dawn - Complete Edition

Amazon Great Indian Festival price: Rs 569

If you own a Sony PlayStation, then you owe it to yourself to play Horizon: Zero Dawn if you already haven't done so. This particular version of the game is the complete edition. This means that it comes with the base game as well as The Frozen Wilds expansion pack that adds new lands, skills, weapons and machines.

Buy it from Amazon

Nitho Drive Pro Racing Wheel and Pedal Set

Amazon Great Indian Festival price:

A racing wheel is possibly the best way to enjoy racing games. This Nitho Drive Pro setup comes with a wheel and pedals so you can enjoy a complete and immersive racing experience. The setup is compatible with the PC, PS4, PS3, Xbox One, Xbox Series X/S and the Nintendo Switch.

Buy it from Amazon

Microsoft Xbox Series X/S Wireless Controller Carbon Black

Amazon Great Indian Festival price: Rs 5,026

Microsoft is clearly one that believes in the old adage 'If it ain't broke.'. The new controller for the Xbox Series X/S is very similar to the classic Xbox One controller, albeit with a few improvements. This includes new textured triggers, a new D-Pad and a dedicated share button. The controller also works with the Xbox One and PC.

Buy it from Amazon

8BitDo Pro 2 Bluetooth gamepad (Black edition)

Amazon Great Indian Festival price: Rs 3,899

The 8BitDo Pro Bluetooth gamepad is compatible with PC, macOS, Android, Steam, Raspberry Pi and the Nintendo Switch. The controller features custom profile switching as well as a 4-way mode switching button. It also comes with two additional buttons on the rear that can be used for added controls.

Buy it from Amazon

Copyright © Content Engine LLC

As it does every month, Amazon has unveiled the new official list of PC games that all members of the Prime Gaming subscription service will be able to add to their library for free starting this Friday, October 1, via the company's website.

This time, gamers will have the chance to claim a massive collection of 10 titles, including Star Wars: Squadrons, Alien: Isolation, Ghostrunner, Secret Files 3, and Song of Horror: Complete Edition.

In addition to this selection of works, the platform will also give away as part of its monthly benefit a variety of additional content for different video games, such as Fall Guys, Call of Duty, Apex Legends, Genshin Impact, League of Legends and Destiny 2.

Amazon Prime Gaming: Free games in October
Star Wars: Squadrons
Ghostrunner
Alien: Isolation
Wallace & Gromit's Grand Adventures
Song of Horror: Complete Edition - Fear the Presence
Red Wings: Aces of the Sky
Whisky & Zombies: The Great Southern Zombie Escape
Blue Fire
Tiny Robots Recharged
Secret Files 3
Amazon Prime Gaming: October Free Content
Call of Duty: Black Ops Cold War / Warzone: Jam Pack, World Series of Warzone Summer 2021 Bundle, World Series of Warzone Bundle.
Apex Legends: character skin for Watson - Electric Royalty, Volt submachine gun - Ornate Orchid and Watson's banner frame - Electrifying Portrait.
Fall Guys: Happy Mastodon full costume and 6,500 kudos.
Genshin Impact: Fragile Resin x1, Mystic Enchantment x4, and 40,000 Mora.
League of Legends: Mysterious Aspect Shard.
Destiny 2 - Season of the lost: Exceptional Hummingbird Dark Horse and Exceptional Ship Popular.
How do I access Amazon Prime Gaming benefits?
Prime Gaming is currently included with Amazon Prime membership and Prime Video in over 200 countries worldwide, including Peru, Mexico, Argentina, Brazil, Bolivia, Colombia, Chile, Ecuador, Spain, Venezuela, United States and United Kingdom.

To link the two services, first go to the Prime Gaming website (gaming.amazon.com), click the sign in button in the top right corner of the screen and select your country (if it doesn't appear, choose the other parts of the world option).

Next, log in to your Amazon account, and once you're on the main screen of the gaming service, press the activate Prime Gaming button in the top right corner. From that moment on, you'll be able to access all of the platform's benefits.

Summary: Users of Loom's WiFi extender Amazon with ethernet for gaming are happily praising the unit for its ease of installation. The WiFi booster extends the internet signal throughout the house and outdoors up to 2,640 square feet, eliminating dead zones and weak signal areas.

PLAINVIEW, N.Y., Sept. 30, 2021 /PRNewswire/ -- Loom continues to be a brand of choice for homeowners looking to boost their home internet connection for a reliable and strong signal throughout the home and outside. The brand's WiFi extender Amazon with ethernet for gaming rates high among users for its ease of installation, with many reviewers able to have the unit up and running in five minutes or less.

Learn more about WiFi extender gaming at

<https://www.amazon.com/Extender-2640sq-ft-generation-Wireless-Amplifier/dp/B08YC2WXMM>.

Amazon customers agree that installing the WiFi extender ethernet is easy even for people who find technology challenging. One happy customer reports, "Even for a 'techno-dolt' like me, this range extender was easy to install. It works seamlessly with my home WiFi network and provides excellent coverage in hard-to-reach areas.

The review continues, "I bought it because my outside camera was getting too weak of a signal from my router to work consistently. This solved that problem and more. I now have WiFi on my roof deck and in my garage! And I don't have to sign in and out of my home network and an 'extended' network when I move from one area to another. This extender uses the same password and name as my home router and, as I move from one area to another, the signal automatically switches to the extender when needed. Simple!"

Designed to maximize the internet performance across the home, the WiFi booster can increase the signal range up to 2,640 square feet, reaching areas of the house and yard that often suffer from a weak signal or no signal at all. The unit can boost a connection signal through thick walls, appliances and cement floors -- all barriers that often create dead zones.

"Whether you're running a business, running an online class, or simply streaming 35 devices, our five-mode wireless router gets it done," the company says. Users can choose between router, repeater, access point, client, or wisp mode.

To find additional information about the WiFi extender for gaming by Loom, visit the company's Amazon storefront at <https://www.amazon.com/Extender-2640sq-ft-generation-Wireless-Amplifier/dp/B08YC2WXMM>.

A New Try For Amazon In Gaming

By Kellen Browning

The tech giant has struggled to produce popular games, but a much-delayed title released this week could be the first step in a turnaround.

Amazon has been successful in nearly every industry it has entered, from books and grocery shopping to cloud computing and movie streaming. So it has been puzzling to many that success in the lucrative video game business has eluded the tech giant.

On Tuesday, Amazon gave producing its own video games another try. After more than a year of delays, it released New World, an online multiplayer game in which players join factions, fight monsters, fight one another and colonize a fictional island in the Atlantic Ocean.

The \$40 computer game, which received generally positive reviews as players tested early versions over the past few months, arrives at a crucial time for the tech giant's disappointing gaming efforts.

After spending by some estimates hundreds of millions of dollars, neither of the other two big-budget games that Amazon announced it was producing in 2016 alongside New World exists today. Some of its top gaming hires have departed over the years without putting out any notable titles. Last year, the company also removed another game from storefronts after a poor reception.

New World "has to be our breakthrough game -- there's no doubt about it," said Christoph Hartmann, the vice president of Amazon Games. "Just for morale of people, at some point you want to see some success."

Amazon's biggest accomplishment in the gaming industry so far has been the acquisition of Twitch, the livestreaming video site, which the company bought in 2014 for about \$1 billion. Amazon has also forged ahead with a new gaming subscription service, Luna, and recently announced a new development studio in Montreal.

But success with its own games has been difficult for Amazon, which opened its gaming studio in 2012. Mike Frazzini, a longtime company executive, took the helm and said he wanted to make hits like Minecraft. Instead, though it has produced a handful of mobile titles, Amazon has canceled or ended at least four bigger games over the past several years.

In 2018, Amazon ended development of a sports game called Breakaway, acknowledging that it "didn't achieve the breakthrough that made the game what we all hoped it could be." In 2020, it took the rare step of killing an already released game, Crucible, after the multiplayer game was panned as a "hollow and forgettable experience." This April, it canceled a planned Lord of the Rings game after a contract dispute with the Chinese tech giant Tencent, with which it was teaming up to produce the title.

One oft-cited reason for Amazon's struggles is that the typical mind-set of big tech companies -- taking an analytical approach that involves throwing money at something, scaling up and hoping for results -- does not work in a fickle, artistic industry like gaming, where users are quick to criticize and slow to embrace new entrants.

"What governs Amazon, first and foremost, is this spreadsheet logic," said Joost van Dreunen, a New York University professor who studies the business of video games. "I don't know if a hodgepodge, creative process of creating games really fits into the corporate culture at Amazon."

Outside of Amazon, which does not break out its gaming sales in its financial disclosures, the gaming industry has flourished, especially during the pandemic. Newzoo, a gaming analytics firm, has projected that people will spend \$175.8 billion on games this year.

Amazon, of course, has found success after a slow start in producing television shows and movies. Gaming analysts suggested that Amazon could just now be figuring out the gaming business -- which adds a dimension of technological skill -- similar to how it took several years to land on a winning strategy in the streaming world.

"It's about experience," said Rupantar Guha, a gaming analyst at the analytics company GlobalData. "Although they have been slow, I think they are starting to get there."

Mr. Hartmann, who reports to Mr. Frazzini, acknowledged that Amazon had failed in the past. When he joined the company in 2018, New World "didn't look promising." Crucible, he said, was meant to compete with Fortnite, one of the most popular games ever, and was "too ambitious" in scope. "In the long run, I think you learn with the defeats," he said.

But he likened the studio to a talented yet youthful sports team that is on the rise. "You can put the best people together, but they're not going to win the championship immediately," he said.

Mr. Hartmann, an industry veteran who founded 2K Games, which produces popular titles like NBA 2K, has tried to adjust Amazon's focus from worrying about financial goals to developing enjoyable content.

"It's a big tech company, so there will be always an element of, if you keep on pounding at it a certain way, eventually you will spit something out the other side," said Mr. Hartmann. Instead, he encouraged a more creative approach less focused on benchmarks and the bottom line. With games, "most decisions are with your gut, and that's sometimes a very risky proposition for a big tech company."

Gamers who have played early versions of New World said it was colorful and action-packed. Amazon would not share sales figures, but said it had more than one million players in one two-week test period of the game over the summer. New World was also the top-selling title on the online game store Steam during that time.

Dan James, a Twitch streamer and longtime gamer from Southampton, England, said an initial test of the game last year was rocky and somewhat underwhelming, but developers have since expanded gameplay options, introduced voice-overs, improved fighting mechanics and made a host of other changes that have people buzzing with enthusiasm.

"New World looks bloody awesome," said Mr. James, 32, who has played various iterations of the game leading up to its official launch. He said there remained some skepticism among gamers "because Amazon doesn't have a big game out there yet," but said the company had proved that it could create, at the very least, "an awesome baseline."

If it is successful, New World could create momentum for Amazon and bolster the perception that it is a serious rival in this industry. But Mr. van Dreunen questioned whether Amazon would want to continue investing in the endeavor, especially if early returns on New World are underwhelming. And even if New World is hugely successful, he said, one game does not necessarily justify years of failures and spending.

"Let's say it's the flagship title, cool. This is the Super Mario of Amazon. OK, cool, what else you got? You need to have a catalog, you need to have a full offering," Mr. van Dreunen said. "One swallow doesn't make a summer."

Still, Amazon has a reputation for persistence, even if the company loses money initially. Mr. Hartmann said executives had embraced a long-term vision for game development. The company plans to release a game called Lost Ark in 2022, and has other projects in the works.

Mr. Guha said patience was the tech giant's greatest asset. "The best thing about Amazon is they don't give up," he said.

New World has received generally positive reviews from players who have tested earlier versions. Christoph Hartmann, the vice president of Amazon Games, said the company was banking on New World's success. (PHOTOGRAPHS BY AMAZON GAMES) (B7)

Amazon Glow: The Alexa-free, long-distance family gaming device

Molly Price

527 words

28 September 2021

CNET News.com

CNEWSN

English

(c) CNET Networks Inc. All Rights Reserved.

At [Amazon's Echo and Ring devices event](#) Tuesday, the company announced the Amazon Glow, an interactive video-chat device focused on helping kids and loved ones play together via the internet.

The Amazon Glow works in two parts. On the child's end, an 8-inch display projects an interactive gaming surface onto a 19-inch, white silicone mat. The Amazon Glow is also equipped with a video screen that shows the remote adult on the other end of the video call. Children can call anyone in the preapproved list of contacts set up by the parent with its Amazon Parent dashboard. Parents and children can also disable the microphone and close the camera shutter at any time.

The remote friend or family member uses the free Glow app for iOS and Android mobile phones or tablets to interact with the child's play mat. Two cameras on the Amazon Glow capture footage for the remote adult: one focuses on the child; the other points down at the mat. The cameras provide wide-angle, 720p video and the remote adult sees a picture-in-picture livestream.

[Click to view image.](#)

The Amazon Glow includes a wide range of entertainment and educational content. Games like checkers and go fish are built in, as well as puzzles, thousands of books and a free drawing app that can scan objects into the artwork and do fun things like create a jigsaw puzzle from your favorite toy by smashing it on the screen.

The catalog comes from an included one-year subscription of Amazon Kids Plus. After the year is up, that subscription will kick in at \$3 per month. Amazon also partnered with studios for branded experiences from Disney, Mattel, Sesame Street and Nickelodeon. Curated video content is available, but kids can only watch videos while they're calling an approved adult.

The Amazon Glow will also come with accessories called GlowBits. One GlowBit kit will be available at launch and included for free, a Tangram puzzle game with physical pieces. A child can complete the puzzle and watch an animation come to life on the projection mat. More GlowBits will be sold separately after the Amazon Glow launches later this year.

[Click to view image.](#)

Alexa is not built into the Amazon Glow, but Amazon representatives said they would continue to listen to customer feedback regarding the virtual assistant. Several Echo devices have kids' editions, including the [Echo Dot](#) and [Echo Show 5](#). Alexa is onboard those devices in a limited, kid-friendly scope. If the Amazon Glow sounds familiar, that's because there's also a kids' smart lamp called the [Echo Glow](#). It's still for sale, but not to be confused with this new Amazon Glow device.

The Amazon Glow is launching in the US only in mid-October. No specific dates were available, but the device will cost \$250 at introduction, going up to \$300. Customers can request an invitation to the early-access Glow program starting today on [Amazon's site](#).

Join the 5-Day Double Your Sales Challenge hosted by elite Amazon Seller organization, Titan Network

Tampa, FL - September 23, 2021 - Titan Network, an exclusive membership organization for elite Amazon sellers, announced today they will be hosting a 5-Day Double Your Sales Challenge Facebook Live virtual event from September 27 to October 1.

Participants will get VIP insights into the top five secrets that Amazon sellers use to generate millions of dollars each year, as well as how to scale up an Amazon business and turn it into a powerful sales and profit-maximizing machine.

During the five-day program, sellers will be guided on key e-commerce strategies including how to:

Catapult listings up the rankings through keyword optimization

Boost conversion rates by leveraging the lowest-hanging fruit

Adjust and optimize product pricing according to the market

Maximize PPC campaigns and reap the rewards of organic rank gains

Leverage and scale so you can position yourself for a lucrative exit

Hosted by Titan Network co-founders, Dan Ashburn and Athena Severi, the 5-Day Double Your Sales Challenge was designed with prosperity in mind. Entrepreneurs and existing Amazon business owners alike will learn the benefits of higher sales, ROI, and profits to scale their brand, all the while getting closer to a multi-million-dollar exit.

Attendees who join all five days of the Challenge will go into the draw to win one of four top prizes, including \$5,000 cash, a personalized listing makeover, event tickets to Titan Network Orlando in November, and an annual Titan Network membership. Click here for more information and to register.

About Titan Network:

Titan Network is the exclusive membership organization for elite Amazon sellers who wish to scale faster. Titan Network was co-founded by Athena Severi and Dan Ashburn, two of the leading figures in the Amazon industry.

Gamasutra-Black eSports Network Launches First Indie Graphic Novel for New Gaming Series Developed With Amazon

316 words

15 September 2021

ENP Newswire

ENPNEW

English

© 2021, Electronic News Publishing. All Rights Reserved.

Release date - 14092021

Black eSports Network (BESN.TV) has published the introductory comic for its graphic novel series, 'Esuoh: Heaven's Hell.'

'Sixteen years in the making comes the prequel comic for the new graphic novel,' the comic's page in the BESN.TV Shop said. 'Witness an epic retelling of good vs. evil, God vs. Lucifer and how it all started.'

Comic creator Thug-Geek encourages everyone to check out the tale he has crafted for the last decade and a half.

'I would like to thank all the people that made this possible in the 16 years it took to make this happen,' he told Black eSports Network.

Art director Alejo Curuchet's love for anime and comic books is reflected in the artwork of 'Esuoh,' as he uses a myriad of bright colors and swift movements. He likes his panels to be immersive.

'It was a great honor working with Thug-Geek on designing and creating the first installment on this great series,' Curuchet said. 'I'm very happy and proud. This is a milestone for me!'

The digital copy is available for immediate download at \$9.99 USD and hard copies are available for preorder at \$19.99 USD. Hard copies have three unique covers to choose from: Adam and Lilith, G or L.

To purchase a digital copy or preorder a hard copy, you can do so on Black eSports Network's website: <https://www.besn.tv/product-page/esuoh-prequel-comic-digital-copy>

Interviews regarding 'Esuoh: Heaven's Hell' can be arranged for Timothy 'Thug-Geek' Fields at the Calendly link: <https://calendly.com/besntv/15min>

Amazon Fire TV Stick 4K Max powers up gaming, streaming for \$55

Ty Pendlebury

287 words

9 September 2021

CNET News.com

CNEWSN

English

(c) CNET Networks Inc. All Rights Reserved.

Amazon's range of [streaming devices](#) just got a little larger with the unveiling of the company's flagship player, the Fire TV Stick 4K Max.

Amazon says the Max is 40% more powerful than the popular \$40 [Fire TV Stick 4K](#) and comes with a quad-core 1.8GHz processor. This should translate to speedier loading times and navigation than the cheaper model offers, as well as improved performance for [Luna](#), the company's streaming games app.

The Stick includes support for [Wi-Fi 6](#) as well as playback standards 4K UHD, HDR10, [Dolby Vision](#) and [HDR10+](#) as well as [Dolby Atmos](#) audio. The company says the stick is its first product with live Picture-in-Picture.

The device also comes with the latest Alexa Voice Remote and also offers the Alexa Home Theater feature for wireless pairing with the [Echo Studio](#) or two fourth-generation Echo smart speakers.

The TV Stick 4K Max is up against dongle-style devices like the [\\$50 Chromecast with Google TV](#) and the [\\$40 Roku Express 4K Plus](#), and the Luna integration pits it against [Google's Stadia recent inclusion](#) on the Google TV device. Gaming via streaming is an emerging category and I look forward to seeing how the Amazon and Google products compete in this regard.

The Fire TV Stick 4K Max will be available in the United States on October 7 for \$55. We don't have information on international availability or pricing yet.

Separately, Amazon announced an all-new lineup of [Amazon-branded Fire TVs](#) as well as additional [upgrades for Luna](#).

Amazon Luna cloud gaming coming to Fire tablets, adding channel

Ty Pendlebury

275 words

9 September 2021

CNET News.com

CNEWSN

English

(c) CNET Networks Inc. All Rights Reserved.

Amazon's cloud gaming service [Luna](#) is now opening up to more devices including [Fire tablets](#), [Chromebooks](#) and the new [Fire TV 4K Max](#).

The company is also introducing a new channel -- the \$3 a month Family Channel -- which includes kid-friendly games like SpongeBob SquarePants: Battle for Bikini Bottom and Garfield Kart Furious Racing.

"Amazon Luna is already [available today to all Fire TV customers](#) without an invitation and this week we're adding support for Fire tablets so we're bringing it to the full family of Fire devices. We're also adding support for Chromebooks", an Amazon spokesperson confirmed to CNET.

In addition, Amazon is also introducing Luna Couch which lets users play Luna games with friends outside their home -- whether the friends are subscribers or not.

Amazon Luna is the company's answer to other streaming games services including [Google Stadia](#) and [PS Now](#). Luna is also available on Windows PC, Mac, Fire TV and web apps for iPhone, iPad and select Android phones (Pixel, Samsung, and OnePlus).

The company is also offering discounted bundles for a limited time:

- * Fire TV Stick 4K Max and Luna Controller: \$99 (save \$26)
- * Amazon Fire HD 10 tablet and Luna Controller: \$156 (save \$64)
- * Amazon Fire HD 8 tablet and Luna Controller: \$116 (save \$44)

[Amazon introduced Luna in 2020](#) and opened access to all Prime members in June with a seven-day free trial. The service currently costs \$6 a month while users can also trade up to the [Ubisoft Plus](#) channel for \$15 a month.

Save over \$600 on the Razer Blade 15 Advanced RTX 2070 gaming laptop on sale for \$1,985.93 at Amazon

If you've been hoping to find an RTX gaming laptop for cheap ahead of the Black Friday sale season, Amazon just might have the right gaming laptop deal for you. Taking over \$600 off the Razer Blade 15 Advanced loaded with NVIDIA's latest GeForce RTX 2070 Super Max-Q, it's an offer well worth a look if you've been hoping to grab one of these excellent gaming laptops cheap.

[On sale for \\$1,985.93](#), Amazon's deal on the Razer Blade 15 Advanced gaming laptop gets you one of the [best gaming laptops](#) available at a pretty great price. While many may not consider this the cheapest gaming laptop deal available right now, the value on this deal is unbeatable for a gaming laptop of this caliber.

[toCheeeek](#)

Razer Blade 15 Advanced RTX 2070 Gaming Laptop

[Now: \\$1,985.93 | Was: \\$2,599.99 | Savings: \\$614.06 \(24%\)](#)

Loaded with NVIDIA's RTX 2070 Max-Q paired with Intel's 10th Gen i7, the Razer Blade 15 Advanced offers an excellent mobile gaming platform that's hard to beat for the price. For 1080p and upscaled 4K gaming, this rig offers a great range of power and performance for the cost.

* [Shop all deals on Razer gaming laptops at Amazon](#)

Running off a 10th Gen Intel i7 and paired with NVIDIA's latest RTX 2070, the Blade 15 is an excellent gaming rig that provides enough horsepower to handle 300Hz 1080p gaming. While this laptop doesn't support 4K natively, thanks to NVIDIA's own graphics drivers it'll support upscaling to 4K nicely and provide high refresh rates for fast gaming action.

Spec'd with a 512GB SSD built-in as well as 16GB DDR4 2933MHz RAM, the Razer Blade 15 Advanced gaming laptop offers a solid future-proof build for high performance 1080p gaming. While 4K gaming is still picking up in terms of gaming laptop support, this rig's 15.6" screen is ideal for high speed 1080p gaming meaning you won't be missing out much.

* [Best Razer gaming laptop deals](#)

While you may want to upgrade the SSD at some point, at this price point the 512GB storage capacity is a generous amount. Games will fill this up fairly quickly though, so don't be afraid to check out our [best SSD](#) guide for some inspiration on an upgrade.

There's also a flurry of other discounts on Razer Blade 15 gaming laptops, with price drops of up to \$500 on select models. Check out some of the other Razer Blade 15 gaming laptop deals today.

Grab a cheap LG 4K FreeSync **gaming** monitor on sale at **Amazon**

Troy Fleming
440 words
7 September 2021

T3

SMLIV

English

© 2021. Future Publishing Ltd. All Rights Reserved.

Now down to \$267.99, the LG 27UK500-B 27 inch 4K FreeSync gaming monitor is an absolute steal at over 20% off

When it comes to cheap gaming monitors, it can be hard to find a deal that doesn't take off a measly \$20 or \$30 bucks. Amazon seems to be breaking the mold however with a pretty cheap new 4K monitor on sale that is hard to pass up if you're in the market.

[Now on sale for \\$267.99](#), LG's 27UK500-B 27" offers a more affordable option to 4K gaming monitors out there with some pretty impressive specs and features packed in. Alongside AMD FreeSync tech for those running red, this IPS monitor runs at 60 Hz and features full 4K UHD native support.

While it may not be on our list for some of the [best gaming monitors](#) available, this deal offers a great alternative for gamers as well as content professionals a solid 4K monitor at a great price.

[toCheeeek](#)

LG 27UK500-B 27" 4K UHD IPS FreeSync Monitor

[Now: \\$267.99 | Was: \\$349.99 | Savings: \\$82 \(23%\)](#)

One of the best deals you'll find right now on a 4K monitor, Amazon's deal takes a hefty \$82 off this 4K display. A 60 Hz refresh rate, HDR10 support and AMD FreeSync tech make this display a great choice for budget-friendly buyers.

* [Shop all 4K monitors on sale at Amazon](#)

From a gaming perspective, this LG display offers a gambit of must-have features including HDR10 support, full 4K UHD native support and of course AMD's FreeSync variable refresh rate technology. The standard 60Hz refresh rate may turn some off, but there's a big chance anything over 120Hz may be hard to achieve thanks to the GPU shortage happening.

This laptop deal does offer one of the [best 4K monitors](#) for the price, however. Content creators and editors alike will appreciate this screen's color range, offering an impressive 89% color gamut in comparison to other 4K monitors. It's not ultrawide, however, but the standard 27 inch IPS panel makes up for it with crystal clear images and a great color range.

We highly recommend checking this laptop deal out if you're on the fence about grabbing a new 4K monitor cheap. While it isn't a full-blown gaming display, it offers an incredible range of features and an impressive picture quality for the price. At \$70 off, it's hard to say no to this screen!

[cheap 4k monitor deal \(LG\)](#)

Don't overthink it. If you are a gamer, you either love the equipment that you have or you know you need some new items. Trying out accessories and tools for your gaming makes you a smarter competitor. Casual gamers are sure to settle on something and enjoy it. But serious gamers and competitive esports athletes need more. There are certain places you need to look when you're eying up new items. Amazon frequently has great deals on gaming accessories. Right now, you can snag a Blade Hawks RGB Gaming Headphone Stand that has two USB ports for just \$26.99. But if you need a full upgrade on your most important piece for gaming, Amazon's one-day sale on Acer gaming laptops is something you have to check out.

The Acer gaming laptops sale gives you multiple options to upgrade your computer. You'll be able to look at three different laptops and save major money. This sales event offers up to 12% off laptops, but this is a one-day sale only. So you'll have to hurry up to take advantage of what it's offering. You won't be sorry.

Up to 12% off Acer gaming laptops Price: \$739.99 - \$1,144.99 Buy Now Acer gaming laptops for everyone If you're in the market for a top laptop that delivers extreme performance, the Acer Predator Helios 300 is a great bet. This has the power and the speed that you covet. It has an 11th Generation Intel Core i7-11800H processor, featuring eight cores and 16 threads. The NVIDIA GeForce RTX 3060 graphics helps deliver the best gaming performance in collaboration with Ampere architecture and new Ray Tracing Cores, Tensor Cores, and streaming multiprocessors.

You'll love the 15.6" Full HD display with an LED-backlit display. The refresh rate is incredibly fast at 144Hz and 3ms Overdrive response time. This has Ethernet ports and Wi-Fi connectivity, so you can use them both at the same time. There are 89 blades designed to increase the air intake. It'll cool easily. Normally, this laptop would cost you \$1,299.99. But right now, it's down to just \$1,144.99.

Acer Predator Helios 300 PH315-54-760S Gaming Laptop | Intel i7-11800H | NVIDIA GeForce RTX 306... Price: \$1,144.99 Buy Now Pick the right one for you The Acer Nitro 5 gives you a bigger screen and is visually intense. This also has an Intel Core i7-11800H processor with cores that deliver unmatched performance. The LED-backlit IPS display has 1920 x 1080 resolution for a crystal clear picture. You can instantly visualize the laptop's cooling temperature, fan speed, loading performance, power plan, and more. The 16:9 aspect ratio is friendly for gaming.

This holds 16GB of RAM, offering you plenty of storage. Typically, this is \$1,199.99. But right now, it's only \$1,059.99. But if this is not the laptop you want and you don't want to spend that much, you can choose the Acer AN515-55-53E5, which is also on sale. The display is 15.6" and this has 8 GB of RAM. It boasts a 10th Gen Intel Core i5-10300H processor, meaning it is packed with power. It has a lot of features the previous two laptops also include. This is down to only \$739.99. Remember, these deals last today only!

Prime Gaming is packed full of rewards for your favourite games this month

A new month bring a new set of deals and offers from Amazon's Prime Gaming service which comes bundled with their regular Prime subscription.

Alongside some free games, Prime Gaming also gives subscribers free rewards for some of their favourite games that are exclusive to Prime.

Subscribers who enjoy watching streamers on Twitch can also benefit from one free sub to a channel every month, as well as a Prime-exclusive badge to show off in Twitch chat.

Read more:

If you're not subscribed already and want to reap the benefits of Prime Gaming, you can subscribe via their [website](#) with a 30 day free trial for the first month and then £7.99 each month afterwards which can be cancelled at any time.

Free games with Prime September 2021

Starting today Prime has got a pretty extensive addition to its library of free games on offer for the month -Prime subscribers can download these without any extra cost.

Here's a breakdown of the new games being added to Prime Gaming for September.

Knockout City

Knockout City is a dodgeball extravaganza that lets players fight it out on the court against others around the world via online play.

The game, developed by Electronic Art's EA Original label, allows you to play with your friends as you work together to beat the competition across a variety of dodgeball-focused maps.

Sam & Max Hit the Road

Sam & Max are 'Freelance Police' who will have to crack one of their toughest cases ever in Hit the Road.

This adventure game is home to some wonderful animations filled with wacky and zany characters for players to get invested in.

Candleman The Complete Journey

This 3-D puzzling platform adventure game takes players into an interesting world wrapped in the darkness where the only light comes from the little living candle players take control of.

The story is surprisingly deep for a puzzle game where the candle will spend a lot of time pondering the purpose of his life and the world around them.

Other free games with Prime Gaming include Puzzle Agent, Secret Files 2: Puritas Cordis, Tools up! and Unmemory

Big offers with Prime Gaming in September 2021

* Genshin Impact : Players can claim 60 Primogems, 8 Hero's Wit and 5 Calla Lily Seafood Soup which will help players rank up their characters in the popular RPG.

* Madden NFL 22 : Players can claim 10 NAT Gold or better Players right now with another Prime Gaming pack coming on September 9.

* Brawlhalla : Dark Heart Bundle includes 1 legend, 1 skin, 1 emote, and 1 sidekick.

* Free Fire : Hayato character for free

* Rogue Company : Jungle Command Sigrid outfit

* Apex Legends : Rare skin for Mirage Available September 3

* Sea of Thieves : Blighted Capstan, Raven Makeup Available September 8

* Grand Theft Auto Online : \$100,000 in-game currency Available September 9

* League of Legends : Mystery Skin Shard Available September 14

A full list of rewards can be found on Prime Gaming's site [here](#) .

Speed up your home internet with Amazon's one-day Netgear gaming sale

Chris Hachey
662 words
31 August 2021
Boy Genius Report (BGR)
BGR
English

BGR Media, LLC, a subsidiary of Penske Media Corporation. All Rights Reserved.

Any gamer knows that they are only as good as their connection speed. You never want to think of the dreaded "lag" word, but sometimes, that can happen. What you want is the best possible connection to help you conquer your opponents. Usually, you'll be able to find awesome gaming gear at Amazon with the occasional sale. For example, you can save today on a Redragon S101 wired gaming keyboard and mouse combo, getting it for only \$29.99. But if you're in need of a router to deliver the connectivity you desire, Amazon's sale on Netgear gaming products has you covered.

You'll be able to save big money on routers and network extenders, thanks to the Netgear gaming products sale. But it is only available today, so you better hurry up to catch some of the best prices you'll find on these items. It doesn't matter if you're on the fence about upgrading. You should take the opportunity and run with it. At the end of the day, that's the best way to outrun your opponents while competing. Not only will you save some money, but you'll be able to save up to 47% off this gear.

Up to 47% off Netgear gaming products Price: \$74.99 - \$159.99 Buy Now Enjoy faster speeds with this Netgear gaming products sale We'll start with the NETGEAR Nighthawk Pro Gaming XR500 Wi-Fi Router. This minimizes ping and optimizes performance for a lag-free experience. You'll have the opportunity to use four 1 Gigabit Ethernet ports for wired connectivity. The 1.7 GHz dual-core processor delivers network efficiency. You can pick which lane to use when you're gaming, so you can bypass network congestion and reduce lag spikes. You can use geo-filtering to connect to the closest servers and players, allowing you to jump in the game and dominate. This allows you to monitor your network and game ping in real-time, so you can check the bandwidth. This has been optimized for the lowest ping possible for Fortnite, Call of Duty: Black Ops, Overwatch, and more. Typically, this costs \$300 and is worth it. But today, get it for only \$159.99! That's a 47% savings!

NETGEAR Nighthawk Pro Gaming XR500 Wi-Fi Router with 4 Ethernet Ports and Wireless Speeds Up to... Price: \$159.99 You Save: \$40.00 (20%) Buy Now Other options in this sales event If you don't want to spend quite that much money, opt for the NETGEAR 4-Stream WiFi 6 Router. This lets you stream at faster speeds. You can stream movies, games, video calls, or transfer files at 1.8Gbps Wi-Fi speed. It works with existing and new Wi-Fi 6 devices, including iPhones and Android phones. This works with cable, satellite, fiber, DSL, and more ISPs. It takes almost no time to set up and offers you four 1 Gigabit Ethernet ports. The 1.5 GHz quad-core processor and Beamforming technologies make it worth the purchase. Control this with Amazon Alexa or Google Assistant. Get this for just \$74.99, a savings of \$25!

For those who like their current router but want to extend the network, check out the NETGEAR WiFi 6 Mesh Range Extender. This adds up to 1,500 sq. ft. to your range and allows you to add more than 20 devices. The AX1800 speed uses Dual-Band Wi-Fi technology and four simultaneous streams to provide more capacity. This boasts universal compatibility and wired Ethernet ports to plugin. Plus this into your wall outlet after you snag it for \$89.99, saving you \$40.

Go here to see this month's best deals on Amazon!

WRAP Holds Thought Leadership Discussion with Amazon Web Services Executive and Miami Police Chief on the Future of VR Training in Law Enforcement

979 words

26 August 2021

Peoples Daily

PEPDA

English

All Rights Reserved | Copyright © 2015 Peoples Media Limited

(GlobeNewswire) - Wrap Technologies, Inc. (the Company or WRAP) (Nasdaq: WRAP), a global leader in innovative public safety technologies and services, released an interview featuring WRAP CEO Tom Smith, Amazon Web Services Leader of Justice and Public Safety Ryan Reynolds, and Miami Police Chief Art Acevedo during which they discussed the Wrap Reality virtual reality (VR) training platform and the potential positive impact of VR on law enforcement training. The discussion can be viewed here.

With VR training, you can train daily, and in as little as five to ten minutes a day, you can really create well-trained officers with good instincts and with good muscle memory, said Chief Acevedo during the discussion. You're going to see, virtual reality is going to end up taking most of the bandwidth in terms of how much training time is spent. We're going to be able to give immediate feedback, and in the VR environment, you're going to be able to see everything you did - what you did wrong, what you did the right way, what you can do better - to debrief and learn almost in real-time. This is something that is here, and I think in the next 12 to 36 months, it is going to be widespread, and I hope here at Miami PD that we're going to be the front end of this wave, this revolution.

The inbound requests we are receiving from agencies for quotes and more information about Wrap Reality reflect the demand for our platform as we continue to develop new modules while strengthening its functionalities with Amazon Web Services, said Tom Smith. We are excited about the opportunity to help agencies amplify their training in a way that's effective and affordable.

WRAP recently announced its collaboration with Amazon Web Services (AWS) to enhance Wrap Reality's law enforcement training platform through AWS GovCloud (US).

About WRAP

WRAP Technologies (Nasdaq: WRAP) is a global leader in innovative public safety technologies and services. WRAP develops creative solutions to complex issues and empowers public safety officials to protect and serve their communities through its portfolio of advanced technology and training solutions.

WRAP's BolaWrap Remote Restraint device is a patented, hand-held pre-escalation and apprehension tool that discharges a Kevlar tether to temporarily restrain uncooperative suspects and persons in crisis from a distance. Through its many field uses and growing adoption by agencies across the globe, BolaWrap is proving to be an effective tool to help law enforcement safely detain persons without injury or the need to use higher levels of force.

Wrap Reality, the Company's virtual reality training system, is a fully immersive training simulator and comprehensive public safety training platform providing first responders with the discipline and practice in methods of de-escalation, conflict resolution, and use-of-force to better perform in the field.

WRAP's headquarters are in Tempe, Arizona. For more information, please visit wrap.com.

AMAZON PRIME Gaming will be offering Genshin Impact players some free Primogems just in time for the highly anticipated update 2.1 release.

Next week Genshin Impact players will be able to download the next big update for the hit free-to-play JRPG, which launches on Wednesday September 1. Genshin Impact update 2.1 adds the long-awaited fishing gameplay mechanics, new characters including five-star hero Aloy from Horizon Forbidden West as well as two new areas - the Watatsumi Island and Seirai Island which will be found in Inazuma.

Related articles

If you're counting down the days until the next big Genshin Impact update then the good news is Amazon Prime Gaming will be able to offer you a helping plan for your adventures.

As part of Prime Gaming's monthly load of free loot Genshin Impact players - that are Prime Gaming subscribers - will be able to claim free Primogems and more.

On September 1 Genshin Impact fans will be able to get 60x Primogems, 8x Hero's Wit and 5x Calla Lily Seafood Soup to help rank up their favourite character.

Prime Gaming is one of the many perks of Amazon Prime, so if you're already a Prime subscriber you will have access to it.

READ MORE

The Genshin Impact freebie isn't the only extra that Prime Gaming is offering in September.

Prime Gaming subscribers will also be able to claim free gear for Madden 22, Red Dead Online, FIFA 21, Fall Guys and Valiant.

While there will also be a new selection of free games available to Prime Gaming subscribers from September 1.

Here are the upcoming free games with Prime Gaming...

- **Knockout City** – Developed by Velan Studios and published by Electronic Arts under the EA Originals label, Knockout City lets dodgeball enthusiasts duke it out on the court.
- **Sam & Max Hit the Road** – Grab your nightstick, squeal like a siren, and Hit the Road with Sam & Max, Freelance Police, as they attempt to crack their toughest case in this 1993 2D deranged animated adventure.
- **Candleman The Complete Journey** – In this unique puzzle platformer, players take on the role of a little candle who can burn for only 10 seconds, exploring a wide range of enchanted environments to seek out the distant glow.
- **Puzzle Agent** – Created with indie comic artist Graham Annable's unique narrative and visual sensibilities, Puzzle Agent challenges, thrills and engages players in more ways than you can shake a cryptogram at!
- **Secret Files 2: Puritas Cordis** – In the sequel to the award winning adventure hit Secret Files Tunguska, the world is on the brink of disaster when players witness a murder and are thrust into the spotlight of events that encompass not only continents but also centuries.
- **Tools Up!** – Dive into the local multiplayer game where players work together against the clock to host a wild renovation party!

- Unmemory – Explore in the text driven mystery game that mixes puzzles and reading to immerse players in a noir thriller.

The inbound selection of new free Prime Gaming titles means time is running out to download the current free games. The games currently available for free with Prime Gaming are Battlefield V, Indiana Jones and the Fate of Atlantis, Metamorphosis, A Normal Lost Phone, Another Lost Phone: Laura's Story, Planet Alpha, Secret Files: Tunguska and Lost Horizon 2.

Amazon Grand Gaming Days sale: Top gaming laptop deals

498 words

22 August 2021

India Today Online

INTYON

English

Copyright 2021. Living Media India Limited

Amazon has started its Grand Gaming Days' sale offering cashback and discounts on televisions, gaming laptops, computer accessories, and more. Customers can get up to 30% off on large screen TVs with more RAM and a higher refresh rate.

Additionally, buyers can also avail themselves of no-cost EMI and exchange offers with a price drop on select models. If you are looking for a new laptop for gaming here are the top picks:

ASUS ROG Zephyrus G14

The ASUS ROG Zephyrus G14 has a 14-inch FHD+ display with a 60 Hz refresh rate and IPS-level anti-glare panel. It is equipped with an octa-core AMD Ryzen 7 5800HS Processor with a maximum clock speed of 4.3 GHz. It has 8 GB DDR4 RAM with support for up to 24 GB RAM. The ASUS ROG Zephyrus G14 offers 512 GB of internal memory storage. It runs Windows 10 and comes with MS Office preinstalled.

ASUS ROG Zephyrus G14 QHD

The ASUS ROG Zephyrus G14 is equipped with an ergonomic hinge that raises the device by 15mm, improving the typing, audio, and cooling performance. It has a new 7nm Ryzen 4000HS processor that offers up to 8 cores and 16 threads with blistering fast performance. The ASUS ROG Zephyrus G14 QHD has a 14-inch QHD display with 2560x1440 pixels and a peak brightness of 300 nits. The gaming laptop comes with 16 GB (2 x 8 GB) DDR4 which is upgradeable to up to 24 GB. It has 1 TB of internal M.2 NVMe PCIe 3.0 SSD.

MSI GF75 Thin

The MSI GF75 Thin uses a 4 GB dedicated graphics card, GeForce GTX 1650 that provides great graphics performance. The 17.3-inch FHD IPS display brings you the most vibrant visuals with a 144 Hz refresh rate. It has 8 GB of DDR4 2666MHz RAM expandable up to 64 GB and 512 GB of NVMe SSD storage. This light and portable gaming laptop by MSI is ultra-thin and weighs only 2.2 kg.

Lenovo IdeaPad Gaming 3

The Lenovo IdeaPad Gaming 3 has a 15.6 inch Full HD display with 1920 x 1080 pixels. It has a peak brightness of 250 nits, utilises anti-glare, IPS Technology, and has a refresh rate of 120 Hz. It is powered by a 10th Gen Intel Core i5 H-series processor that delivers a superior gaming experience. It comes with 8 GB of DDR4 RAM which is expandable up to 16 GB and a highly reliable 512 GB SSD hybrid storage. It is equipped with the latest Nvidia GeForce GTX 1650 4GB GDDR6 graphics card and a refresh rate of 120 Hz.

Save just under \$100 on one of the best gaming chairs – the Razer Iskur – at Amazon

If you've been hunting for a good gaming chair on sale cheap, Amazon is offering a great deal on the Razer Iskur gaming chair right now. Now down to its lowest price ever, Amazon is taking 20% off this top rated gaming chair – a deal that saves you just under \$100.

[On sale for \\$399.99](#), the Razer Iskur drops to the cheapest price we've seen on one of the [best gaming chairs](#) available to date. Made with high density foam cushions and lined with multi-layered synthetic leather, the Iskur gaming chair is an excellent choice for extended gameplay and streaming sessions.

[toCheeeek](#)

Razer Iskur Gaming Chair (Black/Green)

[Now: \\$399.99 | Was: \\$499 | Savings: \\$99.01 \(20%\)](#)

Ranked by T3 as one of the top five gaming chairs available today, the Razer Iskur provides a comfortable and ergonomic seat. Supporting up to 300 pounds, this is an excellent chair for gamers of all shapes and sizes.

* [Shop all gaming chairs on sale at Amazon](#)

Recently given a five star rating over at our very own [Razer Iskur review](#), this premium gaming chair offers quite the comfy chair with innovative features to boot.

Built-in lumbar support along with comfortable memory foam headrests and cushions mean this chair provides an incredible amount of support. When it comes to extended gaming or streaming sessions, this is a life saver that ensures you sit with proper posture the entire time. It also means that this chair stays just as comfortable even during extended use.

When it comes down to it, the price of the Razer Iskur can be a bit high in comparison to other gaming chairs. A 20% discount on the black and green version is the cheapest Razer gaming chair deal we've seen so far. The standard black chair is also [on sale for \\$449.10](#) (a modest 10% discount), but we'd suggest just going with the 20% off offer on the black and green to save a bit more.

It's also at its lowest price ever, so unless you're holding out until [Black Friday](#) or Cyber Monday this is the best gaming chair deal you'll find today.

[cheap gaming chair razer iskur \(Razer\)](#)

New Delhi, Aug. 21 -- Amazon India has announced 'Grand Gaming Days' sale where buyers can get offers and deals on gaming laptops, desktops & monitors, advanced headphones, gaming consoles, graphic cards, TVs from popular brands like Lenovo, Acer, ASUS, LG, HP, Sony, Dell, Corsair, Cosmic byte, JBL and more. Grand Gaming Days will be live from 22 August till 24 August.

Customers can get up to 30% off on large screen TVs with more RAM and higher refresh rate. Additionally, buyers can also avail no-cost EMI and exchange offers with a price drop on select models.

Here are some popular gaming products on Amazon.in with offers and deals from sellers:

Laptops

HP Victus 15.6-inch FHD Gaming Laptop: The laptop is powered by 10th Gen Intel Core i5-10300H processor and Nvidia RTX 1650 with 4GB DDR6 dedicated graphics card. The laptop is available for Rs.66,990.

Acer Nitro 5 AN515-56 15.6-inch Gaming laptop: Nitro 5 AN515-56 Gaming Laptop powered by Intel Core i5 11th gen processor. This gaming machine comes with Nvidia GeForce GTX 1650 with 8GB of dedicated DDR4 RAM. This gaming laptop is available for Rs.69,990.

MSI Bravo 15 FHD Gaming Laptop: This laptop features AMD Ryzen 7 4800H Mobile Processors and Radeon RX 5500M graphics. MSI's exclusive Dragon Center software helps gamers customize the performance of MSI laptop. It gets 16GB RAM and 512GB SSD. It is available for Rs.74,990.

Lenovo IdeaPad 15.6-inch Gaming Laptop : This laptop comes with 10th Gen Intel i5 processor and NVIDIA GeForce GTX 1650 with 4GB GDDR6 dedicated graphics. It comes with 8GB RAM and 1TB HDD. The laptop can be purchased at Rs.67,557.

TVs

Sony Bravia (55) 4K Ultra HD Smart LED Google TV KD-55X80AJ : The TV gets a 4K Processor X1. The TV can be purchased at a price of Rs.83,990.

Redmi (55) 4K Ultra HD Android Smart LED TV X55 : The TV supports Dolby Vision. On Grand Gaming Days sale it is selling at Rs.45,999.

Gaming accessories

G335 Wired Gaming Headset: G335 Wired Gaming Headset weighs 240 g. It gets memory foam earpads for comfort. The mic can be flipped up to quickly mute. G335 gaming headsets are available in multiple colours at Rs.6,495.

SteelSeries Apex Pro - Mechanical Gaming Keyboard: Steelseries Apex Pro Keyboard has OmniPoint Adjustable Mechanical Switches which allows for customization of actuation distance from 0.4mm to 3.6mm. It has an OLED Smart Display to view profiles, game info, Discord messages, and more. The keyboard is available at price of Rs.27,999.

Acer FA100 512GB PCIe Gen3 x4 NVMe 3D NAND SSD: The SSD is powered by the latest 3D NAND technology and PCIe NVMe 1.4 interface, sequential read/write up to 3300/2700 MB/s, which is 6 times faster than standard SATA SSD. The SSD is available for Rs.6,039.

Best **gaming** PC deals from **Amazon**, Best Buy and Newegg

Matt Elliott
652 words
16 August 2021
CNET News.com
CNEWSN
English

(c) CNET Networks Inc. All Rights Reserved.

DIY gamers are still having a devil of a time finding standalone [Nvidia GeForce RTX 3000-series graphics cards in stock](#), but if you aren't looking to build your own gaming PC, you can find some reasonably priced, off-the-shelf gaming desktops with Nvidia's latest GPU.

Amazon, Best Buy and Newegg have some inventory of RTX 3000 gaming desktops from vendors including ABS, Alienware, CyberPower, HP and Skytech. After taking a look at the PCs that each site has in stock, here are the best deals I found -- from relatively inexpensive desktops with RTX 3060 graphics to a fully loaded beast with an RTX 3090 GPU.

Read more: [Best graphics card for gamers and creatives in 2021](#)

Check back -- I'll keep this list updated as I find new deals on RTX 3000 series gaming desktops.

Skytech Archangel 3.0: \$1,500

RTX 3060 GPU with 600-watt PSU

[Click to view image.](#)

Amazon

This Skytech PC features an unusual marriage between AMD and Nvidia, with an AMD Ryzen 5 CPU and an Nvidia GeForce RTX 3060 GPU. It also supplies 16GB of RAM and a 1TB solid-state drive. What it adds to the mix is a beefier power supply (600 watts to the HP's 500-watt PSU) and RGB lighting to add a bit of bling to your rig. The system is currently out of stock with an expected ship date in mid-September.

[\\$1,500.00 AT AMAZON](#)

HP Omen GT13-1074: \$1,543

High style with RTX 3060 graphics

[Click to view image.](#)

HP

This HP Omen features the same Ryzen 5 3600 CPU and GeForce RTX 3060 as the above Skytech system. The imposing, jet-black tower also includes 16GB of RAM, a 1TB SSD and a 500-watt PSU.

[\\$1,543.00 AT AMAZON](#)

CyberPowerPC Gamer Supreme Gaming Desktop: \$1,650

Affordable RTX 3070 graphics

[Click to view image.](#)

Best Buy

This CyberPower tower is one of the more affordable RTX 3070 options. It's able to hit a relatively low price because it uses an older AMD Ryzen 7 3700X CPU. It doesn't skimp on memory or solid-state storage space, however, and provides 16GB of RAM and a 1TB SSD. It also features liquid cooling and customized lighting.

[\\$1,650.00 AT BEST BUY](#)

Alienware Aurora R12: \$1,900

Page 134 of 155 © 2022 Factiva, Inc. All rights reserved.

RTX 3070 power for less than \$2,000

[Click to view image.](#)

Sarah Tew/CNET

This funky, futuristic-looking Alienware unit is one of the few systems that has the GeForce RTX 3070 GPU and costs less than \$2,000. It features an Intel Core i7 CPU, 16GB of RAM and a 256GB SSD along with a 1TB hard drive. It's available in-store only so you'll need to check availability near you.

[\\$1,900.00 AT BEST BUY](#)

ABS Gladiator ALI544: \$2,000

RTX 3070 Ti graphics on sale

[Click to view image.](#)

Newegg

You can save \$200 on this already reasonably priced RTX 3070 Ti-based gaming PC. In addition to GeForce RTX 3070 Ti graphics, it also features a 10th-gen Intel Core i7 CPU, 32GB of RAM, a 1TB SSD and a 750-watt power supply.

[\\$2,000.00 AT NEWEGG](#)

HP Omen 30L: \$4,000

RTX 3090 graphics at a nonexorbitant cost

[Click to view image.](#)

HP

Ready to blow it out? When you consider that many gaming PCs with Nvidia's latest GPUs cost \$5,000 and up, this HP Omen looks very reasonable at its price of \$4,000. It features the GeForce RTX 3090, the top GPU in Nvidia's new lineup. It also boasts an AMD Ryzen 9 5900X CPU, 16GB of RAM and a 512GB SSD, plus a 2TB hard drive. It also offers an 800-watt power supply and a liquid-cooling system.

[\\$4,000.00 AT NEWEGG](#)

Grab This QHD Curved Gaming Monitor for \$269 at Amazon

Michelle Ehrhardt

326 words

11 August 2021

Tom's Hardware

TOMHA

English

© 2021. Future US Inc. All Rights Reserved.

The Gigabyte G27QC 1440p @ 165 Hz curved gaming monitor is \$60 off at Amazon right now.

The [best gaming monitor deals](#) strike a strong balance between resolution, refresh rate and price. [Gigabyte's G27QC](#) nails this with a sharp QHD panel, a fast 165Hz refresh rate and, thanks to this discount, its lowest price this year. While its panel is [VA](#) rather than [IPS](#) or [OLED](#), at \$269 this monitor is a great deal on a lot of premium features bundled together.

* More: [Best gaming monitors](#)

* [Best 4K gaming monitors](#)

* [Best gaming PC and laptop deals](#)

[toCheeeek](#)

Gigabyte G27QC: [was \\$319.99, now \\$269.99 at Amazon](#)

With \$60 off, this is a seriously tempting deal for any enthusiast looking to upgrade their gaming setup. The G27QC features a WQHD panel with a 165Hz refresh rate, HDR and [adaptive sync](#).

We gave this monitor high praise in our [Gigabyte G27QC review](#), thanks to its accurate color, strong build quality and high contrast. Specs-wise, its 1500mm curve radius and [1440p](#) resolution also easily match what you'll find on the [best gaming monitors](#). The 165Hz refresh rate and 1ms response time are competitive too, with the only potential downsides here being the VA panel (great for contrast but not for color overall), a lack of an sRGB mode and subpar HDR support.

The G27QC also has multiple input options including one DisplayPort 1.4 port and two HDMI 2.0 ports. It also features a 3.5mm headphone jack for audio passthrough.

Today's deal marks the best opportunity so far this year to grab this monitor, with [PCPartPicker](#) pointing to it as 2021's current best price for it. That makes this deal a great choice for anyone who wants premium features at an affordable price, especially if you don't care too much about panel type or HDR.

[Gigabyte G27QC \(Gigabyte\)](#)

Amazon Technologies Inc. Patent Issued for Distributed authority for peer gaming (USPTO 11065546)

1,875 words

9 August 2021

Journal of Engineering

JOENG

7381

English

© Copyright 2021 Journal of Engineering via VerticalNews.com

2021 AUG 9 (VerticalNews) -- By a News Reporter-Staff News Editor at Journal of Engineering -- Amazon Technologies Inc. (Seattle, Washington, United States) has been issued patent number 11065546, according to news reporting originating out of Alexandria, Virginia, by VerticalNews editors.

The patent's inventors are Lange, Christian R. (Snohomish, WA, US).

This patent was filed on January 11, 2018 and was published online on July 20, 2021.

From the background information supplied by the inventors, news correspondents obtained the following quote: "The widespread adoption of portable computing devices, such as smartphones and tablet computers, has resulted in a corresponding increase in the amount and types of electronic content available to players. The availability of large numbers of devices able to transmit and process this content has triggered a similar increase in online, multiplayer gaming. In many situations a number of game clients will be connected by a network to a gaming server that will act as the authority for the game. For performance reasons, in various situations a different networking structure, such as peer-to-peer, may be preferred over a central server-based approach. Such a structure also has the advantage of not requiring a significant amount of hardware and resource capacity as is utilized for a centralized game server-based approach. Peer-based approaches lack a centralized authority, however, which allows for at least some amount of cheating or other manipulations of the game by individual peer clients."

Supplementing the background information on this patent, VerticalNews reporters also obtained the inventors' summary information for this patent: "In the following description, various embodiments will be described. For purposes of explanation, specific configurations and details are set forth in order to provide a thorough understanding of the embodiments. However, it will also be apparent to one skilled in the art that the embodiments may be practiced without the specific details. Furthermore, well-known features may be omitted or simplified in order not to obscure the embodiment being described.

"Approaches in accordance with various embodiments provide for authority in peer-to-peer networks. In particular, various approaches enable the state data for each peer on a session to be compared to determine whether there are any inconsistencies or outliers amongst the peers. Such an approach can help to maintain consistency across the distributed network, as well as to minimize the occurrence of cheating or manipulation of the data on the session. Such an approach is also highly scalable and provides for non-centralized authoritative application state management, as is useful for mobile games and other such applications. A set of state variables can be selected, and each peer can use their local values for those variables to generate a hash that can be sent to the other peers. The hashes can be generated and circulated at an appropriate frequency. The hash values can be compared and any variations addressed accordingly. Where the hash values do not all agree, it can first be determined whether a consensus value can be reached, such as a hash value that was reported by at least a consensus number of peers. For the other outlier peers, their state values can be adjusted to attempt to bring the outliers back in sync with the other peers. This can involve updating or rolling back specific parameter values, among other such options. If an outlier proves to be problematic over time, or meets another termination criterion, then that peer can be dropped from the session. If the peers rarely agree or have difficulty coming to consensus then the session can be restarted or terminated, among other such options.

"Various other functions can be implemented within the various embodiments as well as discussed and suggested elsewhere herein."

The claims supplied by the inventors are:

"1. A computer-implemented method, comprising: initiating a multiplayer gaming session for a plurality of peer clients executing a game application; periodically rotating master peer responsibility for authoritative actions among at least a subset of the plurality of peer clients; receiving, from the peer clients, hash values generated using game state data, the hash values being obtained at determined times, for the multiplayer gaming

session stored by the peer clients; determining, from the received hash values, a consensus hash value returned by at least a threshold number of peer clients; determining, using the peer client having the master peer responsibility, an outlier peer client having an outlier hash value different from the consensus hash value; setting the game state data for the outlier peer client to match the game state data corresponding to the consensus hash value in response to determining the outlier peer client does not satisfy a termination criterion; and causing the outlier peer client to be dropped from the multiplayer gaming session in response to determining the outlier peer client satisfies the termination criterion.

"2. The computer-implemented method of claim 1, further comprising: selecting, from among the plurality of peer clients, a temporary peer client to have the master peer responsibility responsible for determining the outlier peer.

"3. The computer-implemented method of claim 1, further comprising: selecting a set of state parameters to be used to obtain the game state data for the peer clients; and sending the set of state parameters to the plurality of peer clients for the multiplayer gaming session.

"4. The computer-implemented method of claim 3, further comprising: expanding the outlier hash value to identify values for the set of state parameters for the outlier peer; and setting a consensus value for at least one of the state parameters for the outlier peer.

"5. The computer-implemented method of claim 1, further comprising: storing outlier data for the outlier peer over time; and comparing the outlier data against the termination criterion to determine whether to cause the outlier peer client to be dropped from the multiplayer gaming session.

"6. A computer-implemented method, comprising: periodically rotating master peer responsibility for authoritative actions among at least a subset of a set of peer clients on a game session; receiving, by a peer-to-peer connection, hash values from the set of peer clients, the hash values generated using game state data, the hash values being obtained at determined times, stored by the peer clients; comparing, using the peer client having the master peer responsibility, the hash values of the peer clients to determine a consensus hash value; and adjusting the game state data stored on an identified peer in response to the hash value, received from the identified peer, differing from the consensus hash value.

"7. The computer-implemented method of claim 6, further comprising: selecting, from among the set of peer clients, a temporary peer client to have the master peer responsibility to compare the hash values adjust the game state data.

"8. The computer-implemented method of claim 7, further comprising: rotating temporary master responsibility among at least the subset of the set of peer clients during the game session.

"9. The computer-implemented method of claim 6, further comprising: specifying a set of game state parameters for generating the game state data, at least a subset of the game state parameters corresponding to a game object or an action taken by a player character.

"10. The computer-implemented method of claim 6, further comprising: causing a non-player client to function as a peer client on the game session, the non-player client configured to provide an unbiased has value using the game state data.

"11. The computer-implemented method of claim 6, further comprising: adjusting the game state data by setting the game state data for the set of peer clients to a prior set of game data for which the set of peer clients returned the consensus hash value.

"12. The computer-implemented method of claim 6, further comprising: expanding the hash values to identify values for the set of state parameters; and setting a consensus value for at least one of the state parameters for at least the identified peer.

"13. The computer-implemented method of claim 6, further comprising: storing outlier data for the identified peer over time; and comparing the outlier data against a termination criterion to determine whether to cause the identified peer to be dropped from the game session.

"14. The computer-implemented method of claim 13, further comprising: sending a message to an address associated with the identified peer indicating a potential issue with the identified peer as determined from the outlier data.

"15. The computer-implemented method of claim 6, wherein the consensus hash value is able to be determined by at least a minimum number of peers for which the hash values are received.

"16. A system, comprising: at least one processor; and memory including instructions that, when executed by the at least one processor, cause the system to: periodically rotate master peer responsibility for authoritative

actions among a set of peer clients; receive, by a peer-to-peer connection, hash values from a set of peer clients on a game session, the hash values generated using game state data, the hash values being obtained at determined times, stored by the peer clients; compare, using the peer client having the master peer responsibility, the hash values of the peer clients to determine a consensus hash value; and adjust the game state data stored on an identified peer in response to the hash value, received from the identified peer, differing from the consensus hash value.

"17. The system of claim 16, wherein the instructions when executed further cause the system to: select, from among the set of peer clients, a temporary peer client to have the master peer responsibility to compare the hash values and adjust the game state data.

"18. The system of claim 16, wherein the instructions when executed further cause the system to: expand the hash values to identify values for the set of state parameters; and set a consensus value for at least one of the state parameters for at least the identified peer.

"19. The system of claim 16, wherein the instructions when executed further cause the system to: store outlier data for the identified peer over time; and compare the outlier data against a termination criterion to determine whether to cause the identified peer to be dropped from the game session.

"20. The system of claim 16, wherein the instructions when executed further cause the system to: adjust the game state data by setting the game state data for the set of peer clients to a prior set of game data for which the set of peer clients returned the consensus hash value."

India, Aug. 6 -- Amazon's Great Freedom Festival is live, with the e-commerce giant promising a number of great deals and offers on thousands of popular products during the sale. While Amazon is extending offers on multiple categories, the most buzz appears to be around the smartphones category, which is currently seeing Amazon offer some aggressive discounts. Over and above these discounts, Amazon is also offering a 10 per cent instant discount (maximum Rs 1,750) on EMI purchases made using SBI Bank credit cards.

These deals combined make it easier than ever to buy yourself the gaming phone of your choice to run the most graphics-intensive games and applications on Google Play. Here are the best gaming phones available on Amazon right now.

OnePlus 9R 5G

One of the best phones available in the market right now, the OnePlus 9R also doubles up as a more than capable phone for gaming. Among the things that make it good for gaming is its big 6.55-inch Full HD+ resolution AMOLED display with 120Hz refresh rate. Powering gaming on the OnePlus 9R is the Qualcomm Snapdragon 870 processor. This is paired with upto 12GB RAM and up to 256GB storage options to choose from. As we found out during our review, OnePlus 9R shines in both gaming and overall performance. While it does not beat competing devices when it comes to synthetic benchmarks, it does manage to do well in real-world performance.

[Click here to buy](#)

Xiaomi Mi 11X

The Mi 11X is a power-packed phone in terms of specs as it comes with a 6.67-inches display capable of handling up to Full-HD+ (1,080x2,400 pixels) resolutions. The panel is AMOLED in technology and offers support for 120Hz refresh rates. Under the hood, there is the octa-core Qualcomm Snapdragon 870 SoC, paired with up to 8GB of RAM. Apart from this, the phone also gets an Adreno 650 GPU with support for Snapdragon Elite gaming features. To make the best of this chip, Xiaomi has used the Android 11-based MIUI 12 custom skin out of the box. The phone also comes with up to 256GB of UFS 3.1 storage. To ensure gaming sessions can go on, the phone is backed by a 4,520mAh battery that supports 33W fast charging.

[Click here to buy](#)

iQOO 7

The iQOO 7 was recently launched in India alongside the iQOO 7 Legend. The iQOO 7 is the successor to the iQOO 3 which was launched in 2020 as one of the first 5G phones in the country. The iQOO 7 features a 6.62-inch AMOLED display that offers a Full HD+ resolution and has a punch-hole cutout in the centre for the selfie camera upfront. The flat display offers upto a 120Hz refresh rate and is also certified for HDR10+ playback. While the display helps make the iQOO 7 a good gaming phone, what makes it great is its powerful Qualcomm Snapdragon 870 processor with an octa-core CPU. The CPU has a prime core running at upto 3.2GHz followed by three performance cores at upto 2.42GHz and four power-efficient cores clocked at 1.80GHz. This is backed by Adreno 650 GPU for graphics rendering and is paired with upto 12GB LPDDR4x RAM and upto 256GB UFS 3.1 storage options to choose from.

[Click here to buy](#)

Xiaomi Mi 10i

Xiaomi Mi 10i is a good phone for those on a budget, and are looking for a device that's good for gaming and also everything else. The Mi 10i has a premium finish with metal-glass construction and a circular rear camera module that houses four cameras. Xiaomi Mi 10i features a 6.67-inch Full HD+ (2400 x 1080 pixels) resolution display that supports 120Hz high refresh rate along with HDR10+ certification. The Mi 10i is

powered by the Qualcomm Snapdragon 750G processor with an octa-core CPU and Adreno 619 GPU. This is paired with up to 8GB LPDDR4x RAM and up to 128GB UFS2.2 storage solution. The phone runs on MIUI 12 which is based on Android 11 out-of-the-box.

[Click here to buy](#)

Redmi Note 10 Pro Max

Another good gaming phone for those on a budget, Redmi Note 10 Pro Max features a big 6.67-inch Full HD+ Super AMOLED display with 120Hz high refresh rate support. The screen offers upto 1200 nits brightness, is HDR10+ certified and is topped with a layer of Gorilla Glass 5. The phone uses a Qualcomm Snapdragon 732G processor with an octa-core CPU and Adreno 618 GPU. This is paired with upto 8GB LPDDR4X RAM and upto 128GB UFS 2.2 storage options to choose from. Apart from this, we also have a 3.5mm audio jack, IR sensor, stereo speakers, 360-degree ambient light sensor and more. Further, it is also equipped with a 5,020mAh battery that supports 33W fast charging out-of-the-box for gaming your gaming sessions going on and on.

[Click here to buy](#)

iQOO Z3

The iQOO Z3 5G is a mid-range smartphone that's good for gaming. It features the Qualcomm Snapdragon 768G processor. This is paired with up to 8GB RAM and up to 256GB storage. The iQOO Z3 5G has a plastic build and is available in only two colours - Ace Black and Cyber Blue. The phone measures 8.5mm in thickness and weighs 185g. The iQOO Z3 5G is also rated IP52 dust and water-resistant. There are no dual stereo speakers on the device. As for the display, the iQOO Z3 5G comes packing a 6.58-inch IPS LCD display with Full HD+ resolution (2408x1080). It comes with 120Hz refresh rate support and a 180Hz touch sampling rate. The phone has a teardrop notch at the top and narrow bezels on the sides but a wide chin bezel. The iQOO Z3 5G runs Funtouch OS 11.1 based on Android 11. It comes with a triple camera setup consisting of a 64MP primary lens, an 8MP ultrawide sensor, and a 2MP macro shooter. You also have a 16MP selfie camera. The phone is equipped with a 4,400mAh battery that supports 55W FlashCharge.

Amazon allows pirated Nintendo games to be sold through knockoff **gaming** devices, including one that resembles the Game Boy (AMZN, NTDOY)

feedback@businessinsider.com (Ben Gilbert)

788 words

5 August 2021

18:11

Business Insider

BIZINS

English

Copyright 2021. Insider Inc

Summary List Placement

For just shy of \$120, you can buy a gaming handheld on Amazon that looks suspiciously like Nintendo's classic Game Boy gaming handheld.

Included in the price is a massive suite of games, including some you've assuredly heard of: "Super Mario World" for the Super Nintendo, "Mario Kart 64" for the Nintendo 64, and dozens of other gaming classics created by Nintendo's legendary in-house game development teams.

I'm not talking about a discounted Nintendo Switch, but a device made by [a Chinese company named Anbernic](#) that isn't associated with the Japanese gaming giant.

Nintendo didn't license its games, and many of the other dozens of major game publishers whose games are included on the device likely didn't either.

The vast majority of the games on the handheld are pirated.

Representatives for Nintendo and Anbernic didn't respond to a request for comment as of publishing. Amazon also did not respond, but soon after we reached out, the page for one such Anbernic console was removed from the marketplace. Many others still remain.

I used the Anbernic RG351V pictured above.

When it first boots up, the handheld displays a splash screen for one of several game consoles it's able to emulate: the Nintendo Entertainment System, the Super Nintendo Entertainment System, the Nintendo 64, Game Boy, Nintendo DS, and several others.

That alone isn't piracy.

Technically speaking, game console emulators — software applications that replicate the functionality of physical gaming hardware — aren't illegal. Anbernic's handheld uses [Emuelec](#), an open-source emulation tool that can be downloaded legally.

It's the games themselves, shared through various online channels that are illegal.

A "ROM" of "Super Mario Bros" for the NES, for instance, is a version of the game that can be played entirely in an NES emulator. (It's been copied from a "read-only memory" chip to a shareable format, thus the name.) You don't need the cartridge, or to prove that you paid for the game in any way. Nintendo has repeatedly threatened or taken legal action to shut down websites and services offering ROMs of its games for download.

The Anbernic RG351V I used, ordered through Amazon, was absolutely rife with pirated ROMs of classic games.

I was able to select a console and wade through a lengthy list of games already pre-loaded onto the device via microSD card, from "The Legend of Zelda: Ocarina of Time" to "Street Fighter 2." I swerved around corners in "F-Zero" from SNES and "Mario Kart 64" from Nintendo 64. I leapt on the heads of Mario's many foes in "Super Mario World."

Though it allows users to load their own ROMs, a major selling point of the RG351V is that it comes out of the box "with 2521 classic games pre-installed." The Amazon listing for the device doesn't explicitly say what those games are, but the listing does explicitly list which game consoles the device emulates.

The devices are popular enough on Amazon that they have dozens of positive reviews, and the handheld I used was one of several such devices featured as "sponsored" listings — meaning the company that makes them paid Amazon to be featured in the search results.

For all intents and purposes, Anbernic's handheld functioned exactly as well as you might hope.

I pushed the button, and Mario jumped. It didn't feel like a cheap knockoff, despite being literally that. The build quality of the device was solid, like a grown-up Game Boy Color, and it even has a rechargeable battery that plugs into USB-C.

It's not quite as nice as a Nintendo Switch, but it's also less than half the price. And hey, if it breaks, you can always get in touch with Amazon customer support [for a refund](#).

Got a tip? Contact Insider senior correspondent Ben Gilbert via email (bgilbert@insider.com), or Twitter DM ([@realbengilbert](#)). We can keep sources anonymous. Use a non-work device to reach out. PR pitches by email only, please.

Amazon Prime Gaming surprised recently by announcing that it would be giving away not one, but two of the newest games in the renowned Battlefield saga. Now, after a few weeks of offering the first title for free, the second promise is finally available: none other than Battlefield V. Are you interested? Here's how to claim it.

The gift, of course, also comes from Electronic Arts, who gave the go-ahead to give away the latest title in their well-known shooter series. It's possible that their plan will be to generate interest ahead of the eventual release of Battlefield 2042, which will arrive later this year.

How to claim Battlefield V on Amazon Prime Gaming? First of all, you should know that Amazon Prime Gaming (formerly Twitch Prime) is one of the many online gaming platforms available for PC. All it takes to claim Battlefield V is to have an account and follow the steps:

Sign in to your Amazon account (if your country doesn't have the service available, you'll need an account from another territory) Hire the Amazon Prime free trial from this link: amzn.to/2GzZPL7 Now, go to the official Amazon Gaming portal, at this link: gaming.amazon.com/home Find the Games with Prime section You will arrive at a section where Battlefield V is offered (depending on the date) Click on request On the next page, click on request now You will be given a product code. Note it fine or save it to a file. Download Origin for PC, from this link: www.origin.com/mex/en-us/store Sign in (or create a new account) to the Origin app Once in the main application window, head over and look for the Origin menu (the first one) Click on Redeem Product Code (or redeem product code) Enter the code provided by Amazon Click Next and you're done, your Origin account will now have Battlefield V active. You just have to download it to start playing. Remember that there is still time to claim Battlefield 1 until August 4th.

WRAP Announces New VR Training Platform Powered by Amazon Web Services

Wrap Reality will utilize AWS GovCloud (US) for Service, Delivery, and Storage

TEMPE, Ariz., Aug. 02, 2021 (GLOBE NEWSWIRE) -- Wrap Technologies, Inc. (WRAP) (Nasdaq: WRAP), a global leader in innovative public safety technologies and services, announced a collaboration with Amazon Web Services (AWS) to support Wrap Reality through AWS GovCloud (US). AWS will provide consulting and advisory services to support Wrap Reality's complex technology initiatives, assistance in developing and executing our product roadmap, and streamline access to AWS subject matter experts.

"Following several months of planning and discussion, Wrap Reality worked with AWS to deliver our Virtual Reality (VR) training platform to law enforcement, built on AWS GovCloud (US)," said Tom Smith, Chief Executive Officer and President of WRAP Technologies. "As WRAP continues to map out our vision for enhancing law enforcement training with Wrap Reality, choosing a collaborator with extensive support and government approved cloud services was a key decision. AWS brings a wealth of knowledge to Wrap Reality along with infrastructure and cloud services that are proven in the industry. Wrap Reality enhances its capabilities by working with AWS. AWS has experience managing sensitive state and local government data and systems with AWS GovCloud (US)."

"Events in 2020 have underlined how law enforcement must adapt and innovate fast to unforeseen challenges as well as the importance of trust and transparency. WRAP Reality's fully-immersive experience allows training of real-time scenarios that address the priorities of today's communities. AWS is proud to assist by providing services to WRAP that innovate on training and create a better future of policing," says AWS Justice and Public Safety (JPS) leader Ryan Reynolds.

The relationship with AWS provides the framework for development, training, and collaboration to support next-generation applications that have the scalability, resiliency, and security AWS offers. It will assist WRAP in accelerating innovation and the development of strategic initiatives. These initiatives will bring the most advanced cloud-native services to WRAP clients, improving the flow of information and providing a better experience for law enforcement agencies.

About WRAP

WRAP Technologies (Nasdaq: WRAP) is a global leader in innovative public safety technologies and services. WRAP develops creative solutions to complex issues and empowers public safety officials to protect and serve their communities through its portfolio of advanced technology and training solutions.

WRAP's BolaWrap(R) Remote Restraint device is a patented, hand-held pre-escalation and apprehension tool that discharges a Kevlar(R) tether to temporarily restrain uncooperative suspects and persons in crisis from a distance. Through its many field uses and growing adoption by agencies across the globe, BolaWrap is proving to be an effective tool to help law enforcement safely detain persons without injury or the need to use higher levels of force.

WRAP Reality, the Company's virtual reality training system, is a fully immersive training simulator and comprehensive public safety training platform providing first responders with the discipline and practice in methods of de-escalation, conflict resolution, and use-of-force to better perform in the field.

WRAP's headquarters are in Tempe, Arizona. For more information, please visit wrap.com.

Amazon is offering big discounts on last generation Razer gaming keyboards

Tabitha Baker

598 words

1 August 2021

TechRadar

TECHR

English

© 2021. Future Publishing Ltd. All Rights Reserved

Cheap Razer gaming keyboards are seeing some excellent deals right now, with prices nearing record lows at Amazon.

Razer releases plenty of gaming keyboards every year, each with incremental upgrades over the previous model. If you're just looking for a cheap deck, then, there are some excellent prices to be found on previous generation models, and Amazon is offering a plethora of savings this weekend.

The Razer Cynosa and Ornata gaming keyboards are the stars of the show here, both nearing their lowest ever prices right now. The Cynosa is [\\$20 off at just \\$39.99 \(was \\$59.99\)](#) - that's just \$5 away from a record low that we haven't seen since January. Meanwhile, the Ornata is down [all the way from \\$99.99 to \\$59.99](#), just \$8 away from the \$51 record low that we've only seen twice in this model's lifetime.

These keyboards are pretty much identical to their more expensive predecessors in experience and quality, but don't offer the dedicated media controls found in later models. You'll still find a few discounts on the V2 instalments, but the value offered in the cheaper keyboards isn't quite matched here as we've seen far lower prices on the newer models in recent memory.

However, if you don't want to pick up an older gaming keyboard, the Razer BlackWidow Tournament Edition V2 is currently available for its lowest price ever - just [\\$69.99 down from \\$139.99](#). That's a massive \$70 discount on a premium deck, and it's also available with a range of switch options.

Not in the US? Scroll down for more [cheap gaming keyboard deals](#) in your region.

Today's best Razer gaming keyboard deals

[toCheeeek](#)

Razer Cynosa Chroma gaming keyboard: [\\$59.99 \\$39.99 at Amazon](#)

Save \$20 - With \$20 off the MSRP, this Razer Cynosa gaming keyboard comes in just \$5 more than its lowest price ever. That's an excellent discount considering we haven't seen a cheaper price since a brief drop in January. This is the older release, but you're only really dropping the dedicated media keys of the V2 as the experience between them is very similar.

Razer Cynosa V2: [\\$59.99 \\$49.99 at Amazon](#)

[toCheeeek](#)

Razer Ornata gaming keyboard: [\\$99.99 \\$59.99 at Amazon](#)

Save \$40 - The Razer Ornata is just \$8 away from its all time record low price right now, and that \$51 cost has only been seen twice in this device's lifetime. Again, the only real difference between this model and the newer Ornata V2 is the dedicated media keys on the latter deck, so the lower price point here is well worth it if you're simply after a cheaper hybrid keyboard.

Razer Ornata V2: [\\$99.99 \\$79.99 at Amazon](#)

[toCheeeek](#)

Razer BlackWidow Tournament Edition V2 gaming keyboard: [\\$139.99 \\$69.99 at Amazon](#)

Save \$70 - In the case of the BlackWidow Tournament Edition you won't need to buy an older device to get a great price. At \$69.99, you'll find the 60% deck available for its lowest cost yet, and it's available with either green, orange, or yellow switches to boot.

More Razer gaming keyboard deals

If you're kitting out your full rig, check out the latest [gaming laptop deals](#) for more discounts. Or, take a look at the latest [cheap gaming chairs](#), [gaming monitor sales](#) and [gaming mouse prices](#).

A Amazon Prime Gaming disponibiliza novos jogos grátis no mês de agosto. O download dos games estará disponível para os assinantes do serviço. A assinatura do Prime custa R\$ 9,90 por mês.

Entre os destaques está o “Battlefield V” além de “Indiana Jones and the Fate of Atlantis” e “Another Lost Phone: Laura’s Story”.

Veja a lista abaixo:

-Battlefield V

-Indiana Jones and the Fate of Atlantis

-Lost Horizon 2

-Metamorphosis

-Planet Alpha

-Secret Files: Tunguska

-Another Lost Phone: Laura’s Story
